

ASX Announcement

MLG SECURES \$80 MILLION IN NEW CONTRACTS**Critical infrastructure construction for Evolution and extends relationship with Norton Gold Fields**

MLG Oz Limited (ASX: MLG) (**MLG** or **the Company**) is pleased to announce that it has been awarded a civil project by Evolution Mining Limited (ASX: EVN) (**Evolution**) through Evolution Mining (Mungari) Pty Limited, to construct a 26km all-weather bitumen sealed haul road between the Castle Hill mining centre and the Mungari mill. This award follows the recent five-year contract extension for the supply of integrated mining services to Mungari Gold Operations (**MGO**) (refer ASX announcement 27 November 2024).

This infrastructure will enable uninterrupted road train haulage from satellite Run of Mine (ROM) pads to the main ROM pad near the MGO processing plant and will be important to supporting Evolution's expansion project 'Mungari 4.2', as well as to facilitate the mining ramp-up at Castle Hill.

MLG is also pleased to have extended its relationship with Paddington Gold Pty Limited, a wholly owned subsidiary of Norton Gold Fields Pty Limited (**Norton**), through the signing of a new three-year contract. Since 2021, MLG has been providing its integrated haulage and site services at Norton's Paddington Mill, with the new contract continuing that relationship to at least 2027.

The combined value of the Evolution and Norton contracts exceeds \$80 million in revenue for MLG and, as importantly, broadens MLG's provision of integrated services across two of its key clients in the Western Australian Goldfields.

HIGHLIGHTS:**Evolution haul road project (Castle Hill to Mungari Gold Operations)**

- Construction of a 26.4km bitumen sealed all-weather haul road to link the Castle Hill mining centre with the Mungari mill.
- MLG will transition its workforce and equipment from the soon-to-be-completed 29 Metals Civil Project, ensuring uninterrupted operations across crews and equipment.
- Scheduled to commence in December 2024 with completion targeted for May 2025.
- Contract value (project): approximately \$16 million in revenue.

Norton Gold Fields three-year extension of services (Paddington Mill)

- Contract executed to extend the provision of services to Norton at its Paddington Mill, located 35km north-west of Kalgoorlie, in Western Australia.
- Contract term for three years, scheduled to conclude in August 2027.
- MLG's scope of work includes:
 - Loading of ore at designated sites.
 - Haulage of ore to the Paddington Mill Site; estimated to 11 million wet metric tonnes (WMT) handled over the contract term.
 - Road maintenance.
- Contract value: annual revenue of approximately \$22 million.

MLG Managing Director, Murray Leahy, said the delivery of the private bitumen sealed haul road for Evolution represented an important and significant milestone.

“We will be transitioning this large-scale off-road hub and spoke haulage project to one that can mitigate the effects of wet weather which will ensure optimised haulage rates between the pit and mill. MLG is pleased to be expanding its relationship with Evolution beyond haulage and site services to now include our civil division. It reinforces our strong partnership and commitment to delivering high-quality civil and mining services to our clients.

“We are also really pleased to have extended our relationship with Norton Gold, which enables MLG to continue to provide key infrastructure support services to their Paddington Mill operations.

“The combined value and tenure of these contracts further bolsters MLG’s foundation of contract work on some of the Goldfields’ most important projects, in a strong gold market,” Leahy concluded.

Authorised for release by the Board of Directors.

ENDS

About MLG Oz Limited

MLG Oz Limited (ASX: MLG) is a Kalgoorlie-based integrated mining services and resource asset management company, founded by Managing Director Murray Leahy. MLG delivers tailored solutions to mining operations, primarily focused on supporting its clients’ ore processing facilities across gold, iron ore and other base metals in Western Australia and the Northern Territory.

MLG offers a comprehensive range of services under an integrated business model, often within a single contractual framework. These include Civil & Construction, Crushing & Screening, Bulk Haulage & Site Services, and the supply of Open Pit Mining & Construction Materials from MLG’s strategically located regional quarries.

The Company’s key capabilities include build, own, and operate models, contract crushing and screening services, as well as crusher feed and material management.

Services extend to include construction, road maintenance, rehabilitation work, vehicle maintenance, and machinery and labour hire. MLG’s dedicated facility at the Esperance Port supports its end-to-end bulk commodity export logistics services.
