ABOUT PREDICTIVE DISCOVERY

PDI's strategy is to identify and develop gold deposits within the Siguiri Basin, Guinea. The Company's key asset is the Tier-1 Bankan Gold Project. A Mineral Resource estimate of 5.38Moz has been defined to date at the NEB (4.89Moz) and BC (487Koz) deposits,³ making Bankan the largest gold discovery in West Africa in a decade.

PDI completed a Pre-Feasibility Study for the Bankan Project in April 2024, outlining a 269koz per annum operation over 12 years, a maiden Ore Reserve estimate of 3.05Moz and strong financials.³ A Definitive Feasibility Study is underway and PDI is advancing the permitting for the Project. The government of Guinea has approved the Project's Environmental & Social Impact Assessment and issued a Certificate of Environmental Compliance, and PDI has submitted an Exploitation Permit application.

The Bankan Project is highly prospective for additional discoveries. PDI is also exploring targets near the NEB and BC deposits, and regionally to the north along the 35km gold super structure which runs through the permits.
