Commenting on the first half results, QuickFee Chairman Dale Smorgon, said:

"We are delighted to deliver a positive EBTDA in the first half, which reflects our growing customer base and revenue in both Australia and the US. Importantly, our businesses continue to operate on an extremely stable and reliable cost base.

The Australian business continues to perform well, reflecting the strong growth in the higher margin disbursement funding Finance product and favourable economic conditions whereby firms are looking to preserve cash.

In the US, a key focus area was on increasing transaction volumes on our Connect platform through new client onboarding and new Connect integrations. We are very pleased with the traction this product has gained in market, and the strong pipeline of clients to be onboarded in H2 FY25 is expected to drive further revenue growth in H2.

We have a scalable business model, and we remain optimistic about the growth potential in both Australia and the US. The business has now transitioned into operating profitability, and we expect earnings to be weighted to the second half."
