

Farm-in successfully completed at Pinjin Gold Project covers tenure hosting Kirgella Gift and Lighthouse

Kalgoorlie Gold Mining (ASX:KAL) ('KalGold' or 'the Company') is pleased to report a major milestone with the **completion of its initial farm-in at the Pinjin Gold Project**. The Company surpassed all metrics to secure a 75% interest in tenure at Pinjin South and Kirgella, which hosts the Kirgella Gift and Providence Mineral Resources, the Lighthouse discovery and the entire mineralised Lighthouse corridor. This corridor extends all the way north to gold mineralisation and anomalism defined at Wessex less than 1 km from the Anglo Saxon open pit gold mine (currently under care and maintenance, Hawthorn Resources Limited, ASX: HAW).

For MD and CEO Matt Painter's thoughts on the farm-in exercise, please see our video on the KalGold Investor Hub at <https://investorhub.kalgoldmining.com.au/link/qy1DEP>.

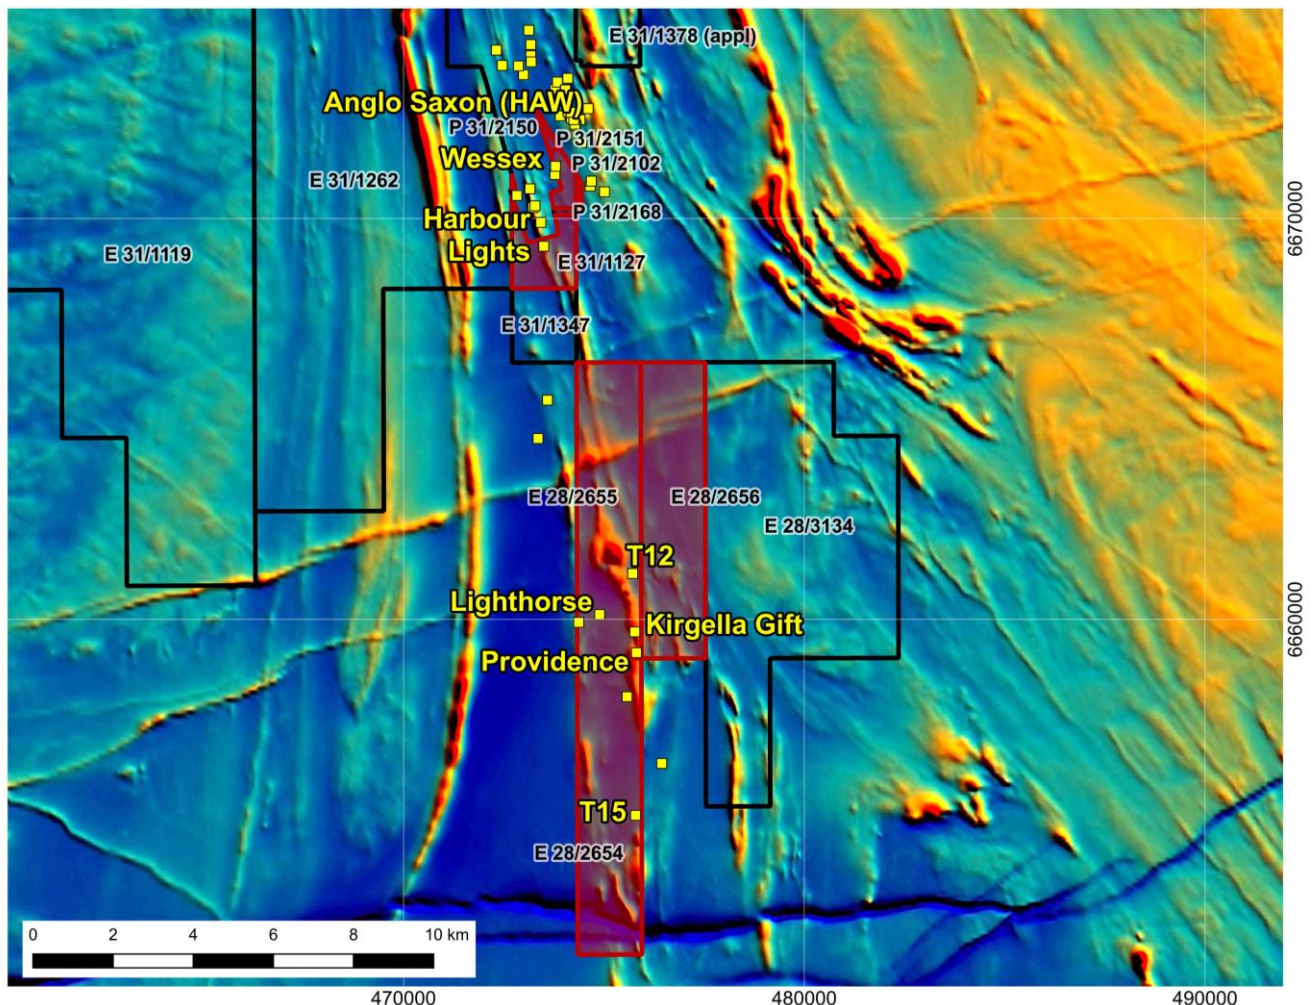

Figure 1 – KalGold has completed its farm-in agreement over several tenements (red) at its Pinjin Gold Project east of Kalgoorlie, to take a 75% interest on those tenements. These include the Kirgella Gift-Providence Mineral Resource, the Lighthouse and Wessex discoveries, the historic Newmont prospects at T12 and T15, and many other areas of interest. This tenure complements the 100%-owned KalGold tenements (black outline) to define a commanding stake over this part of the under explored Laverton Tectonic Zone. Projection GDA94 MGA Zone 51.

Commenting on the farm-in exercise, KalGold Managing Director Matt Painter said:

"This marks a major milestone for the Company. We are incredibly proud of the KalGold team's achievements since commencing the farm-in at Pinjin. In less than 2 years, the Company has defined over 75,000 ounces of gold in a near-surface Mineral Resource following JORC Code (2012) guidelines, at Kirgella Gift and Providence. Beyond this, we have defined gold mineralisation and anomalism across multiple prospects throughout the tenement package, including the hugely prospective Lighthorse and Wessex prospects. There is enormous potential for further discovery at Lighthorse and elsewhere on KalGold's 100% owned tenements, particularly to the east in the constituent shears of the Laverton Tectonic Zone.

Importantly, completion of the farm-in puts KalGold in a strong position to drive engagement with strategic and third parties.

The Board is also pleased to have reached an agreement with the vendors for an all-cash settlement, which minimises dilution for shareholders and maximises potential upside as we advance exploration at the under explored, and highly prospective Pinjin Gold Project."

By exceeding all milestones and securing control of this tenure, combined with the much larger footprint of the Company's 100%-owned tenements, KalGold's Pinjin Project now represents a commanding position over this highly prospective section of the southern Laverton Tectonic Zone.

The transaction involved a \$1.65M cash settlement for 75% ownership in E 28/2654, E 28/2655, E 28/2656, E 31/1127, P 31/2102, P 31/2150-S, P 31/2151-S, P 31/2201-S, and P 31/2202-S. Under the Agreement, the vendors will be free carried until a positive Bankable Feasibility Study (BFS) has been delivered and a Decision to Mine made, at which point they must elect to either contribute their share of costs or convert their interest into a 2% Net Smelter Royalty (NSR) (ASX: KAL, 23/5/23).

Assay results from KalGold's recent large-scale aircore drill program, targeting areas north and south of the Lighthorse discovery, are pending and will play a key role in shaping of the next phase of KalGold's exploration strategy. With control of key tenure in the Pinjin Project secured, KalGold is preparing to accelerate aircore, RC, and diamond drilling at Pinjin. The Company is also assessing targeted geophysical programs designed to detect alteration zones, structures, and mineralisation, with the objective of unlocking additional high-priority target areas, making further gold discoveries and increasing the Mineral Resource inventory.

Authorised for lodgement by the Board of Kalgoorlie Gold Mining Limited.

About KalGold

ASX-listed resources company Kalgoorlie Gold Mining (KalGold, ASX: KAL) is a proven, low-cost gold discoverer with a large portfolio of West Australian projects and a total gold resource in excess of 214,000 oz. KalGold prides itself on defining shallow, potentially open-pittable gold resources at very low costs, currently less than A\$4.60 per ounce of gold². Current focus includes:

- The **Pinjin Project** within the **30 Moz Laverton Tectonic Zone** (host to Sunrise Dam, Granny Smith, Rebecca, Anglo Saxon, and Wallaby projects) is located only 25 km north along strike from Ramelius Resources (ASX: RMS) **Rebecca Gold Project**. A first JORC Code (2012) Inferred Mineral Resource Estimate at Kirgella Gift and Providence (2.34 Mt @ 1.0 g/t Au for 76,400 oz¹) represents the first area targeted at Pinjin, with many more targets scheduled for testing. The company aims to define further resources as these targets are tested. Some tenure is the subject of a farm-in over two years. Between this tenure and KalGold's own tenure and applications, the Company has established a significant presence in a strategic and important gold producing region.
- The **Bulong Taurus Project**, 35 km east of Kalgoorlie-Boulder. Contains the outcropping **La Mascotte** gold deposit where KalGold has defined a JORC Code (2012) Inferred Mineral Resource Estimate of 3.61 Mt @ 1.19 g/t Au for 138,000 oz², plus a series of satellite prospects and historic workings of the **Taurus Goldfield**. Work continues at the project.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING INFORMATION

This news release contains forward-looking statements and forward-looking information within the meaning of applicable Australian securities laws, which are based on expectations, estimates and projections as of the date of this news release.

This forward-looking information includes, or may be based upon, without limitation, estimates, forecasts and statements as to management's expectations with respect to, among other things, the timing and amount of funding required to execute the Company's exploration, development and business plans, capital and exploration expenditures, the effect on the Company of any changes to existing legislation or policy, government regulation of mining operations, the length of time required to obtain permits, certifications and approvals, the success of exploration, development and mining activities, the geology of the Company's properties, environmental risks, the availability and mobility of labour, the focus of the Company in the future, demand and market outlook for precious metals and the prices thereof, progress in development of mineral properties, the Company's ability to raise funding privately or on a public market in the future, the Company's future growth, results of operations, restrictions caused by COVID-19, performance, and business prospects and opportunities. Wherever possible, words such as "anticipate", "believe", "expect", "intend", "may" and similar expressions have been used to identify such forward-looking information. Forward-looking information is based on the opinions and estimates of management at the date the information is given, and on information available to management at such time.

Forward-looking information involves significant risks, uncertainties, assumptions, and other factors that could cause actual results, performance, or achievements to differ materially from the results discussed or implied in the forward-looking information. These

factors, including, but not limited to, fluctuations in currency markets, fluctuations in commodity prices, the ability of the Company to access sufficient capital on favourable terms or at all, changes in national and local government legislation, taxation, controls, regulations, political or economic developments in Australia or other countries in which the Company does business or may carry on business in the future, operational or technical difficulties in connection with exploration or development activities, employee relations, the speculative nature of mineral exploration and development, obtaining necessary licenses and permits, diminishing quantities and grades of mineral reserves, contests over title to properties, especially title to undeveloped properties, the inherent risks involved in the exploration and development of mineral properties, the uncertainties involved in interpreting drill results and other geological data, environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins and flooding, limitations of insurance coverage and the possibility of project cost overruns or unanticipated costs and expenses, and should be considered carefully. Many of these uncertainties and contingencies can affect the Company's actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, the Company. Prospective investors should not place undue reliance on any forward-looking information.

Although the forward-looking information contained in this news release is based upon what management believes, or believed at the time, to be reasonable assumptions, the Company cannot assure prospective purchasers that actual results will be consistent with such forward-looking information, as there may be other factors that cause results not to be as anticipated, estimated or intended, and neither the Company nor any other person assumes responsibility for the accuracy and completeness of any such forward-looking information. The Company does not undertake, and assumes no obligation, to update or revise any such forward-looking statements or forward-looking information contained herein to reflect new events or circumstances, except as may be required by law.

No stock exchange, regulation services provider, securities commission or other regulatory authority has approved or disapproved the information contained in this news release.

COMPETENT PERSON STATEMENT

The information in this report that relates to Exploration Targets, Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Dr Matthew Painter, a Competent Person who is a Member of the Australian Institute of Geoscientists. Dr Painter is the Managing Director and Chief Executive Officer of Kalgoorlie Gold Mining Limited (KalGold) and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Dr Painter consents to the inclusion in the report of the matters based on his information in the form and context in which it appears. Dr Painter holds securities in Kalgoorlie Gold Mining Limited.

EXPLORATION RESULTS

The references in this announcement to Exploration Results were reported in accordance with Listing Rule 5.7 in the announcements titled:

- *Lighthorse RC program confirms primary gold mineralisation at depth, follow up drilling imminent, 15 April 2025*
- *Aircore drilling to test Lighthorse strike extensions in April, 10 March 2025*
- *Multi-kilometre target areas along strike at KalGold's Lighthorse discovery, 17 February 2025*
- *'Lighthorse' gold discovery at Pinjin: thick, high-grade gold intercepted at new greenfields find, 7 February 2025*
- *First-pass aircore drilling at Kirgella West: broad gold anomalism and mineralisation over 1,200m strike, 18 December 2024*
- *Quarterly activities report for the quarter ending 30 September 2024, 30 October 2024*
- *Providence: North plunging shallow gold mineralisation has significant potential, 7 December 2023*
- *Shallow, high-grade results extend Kirgella Gift and Providence corridor to over 1,150m of strike, 25 October 2023*
- *Thick, shear-hosted gold mineralisation intercepted at Kirgella Gift, 8 June 2023*
- *KalGold farms-in to Kirgella gold tenements and acquires Rebecca West tenure at Pinjin, 23 May 2023*

The Company confirms that it is not aware of any new information or data that materially affects the information included in the previous market announcements noted above.

MINERAL RESOURCE ESTIMATES

The references in this announcement to Mineral Resource estimates were reported in accordance with Listing Rule 5.8 in the following announcements:

- *La Mascotte gold deposit: First JORC (2012) Mineral Resource of 138,000 oz Au, 7 March 2023.*
- *First Kirgella Gift Inferred Resource of 76,400 oz from 3m, 5 July 2024.*

In accordance with ASX Listing Rule 5.23, the Company confirms that it is not aware of any new information or data that materially affects the information included in the previous market announcement noted above and that all material assumptions and technical parameters underpinning the Mineral Resource estimates in the previous market announcements continue to apply.
