

## ASX RELEASE

25 August 2025 | ASX: KAR

### Production guidance lifted despite issue with SPS-92 downhole pump at Baúna Project, Brazil.

Karoon advises that on 13 August 2025 (BRT time), the Electrical Submersible Pump (ESP) located downhole in the subsea SPS-92 well at Baúna shut down due to the failure of one of three electrical cables supplying power downhole to the ESP motor. The SPS-92 well has produced approximately 8,500-9,000 bopd during August.

Partial production was restored on 18 August, utilising the remaining two electrical cables. The well is currently choked back and producing approximately 2,500 to 3,000 bopd. Karoon, together with the equipment supplier SLB, is investigating remediation options, with the expectation that this could result in a doubling of current rates. Based on the analysis and testing over the past few days, it is believed that a rig-based well intervention to replace the ESP will be required to reinstate full production.

Work to identify and contract a suitable drilling rig and planning for the intervention has commenced. Karoon already has a replacement ESP assembly and electrical power cable in stock. Other materials, as well as regulatory approvals, will be required and consequently the work is not expected to start until the second quarter of 2026 at the earliest.

While this issue will impact Baúna Project production until an intervention takes place, given the strong performance over the first half of 2025 until the SPS-92 electrical fault, Baúna production guidance for CY25 has been raised, from 6.7 – 7.7 MMbbl to 7.3 – 7.8 MMbbl. Together with narrowed Who Dat guidance (which is performing in line with expectations), total production for CY25 is now expected to be 9.7 – 10.5 MMboe.

Full year 2025 guidance		Prior guidance	Revised guidance
Production <sup>1</sup>			
Brazil	MMboe	6.7 – 7.7	7.3 – 7.8
Who Dat (NRI)	MMboe	2.3 – 2.8	2.4 – 2.7
<b>Total Production</b>	<b>MMboe</b>	<b>9.0 – 10.5</b>	<b>9.7 – 10.5</b>

1. Production assumes drilling results and expected future development projects, including well interventions, are delivered in accordance with their currently expected schedules

#### Dr Julian Fowles, Karoon’s CEO and Managing Director said:

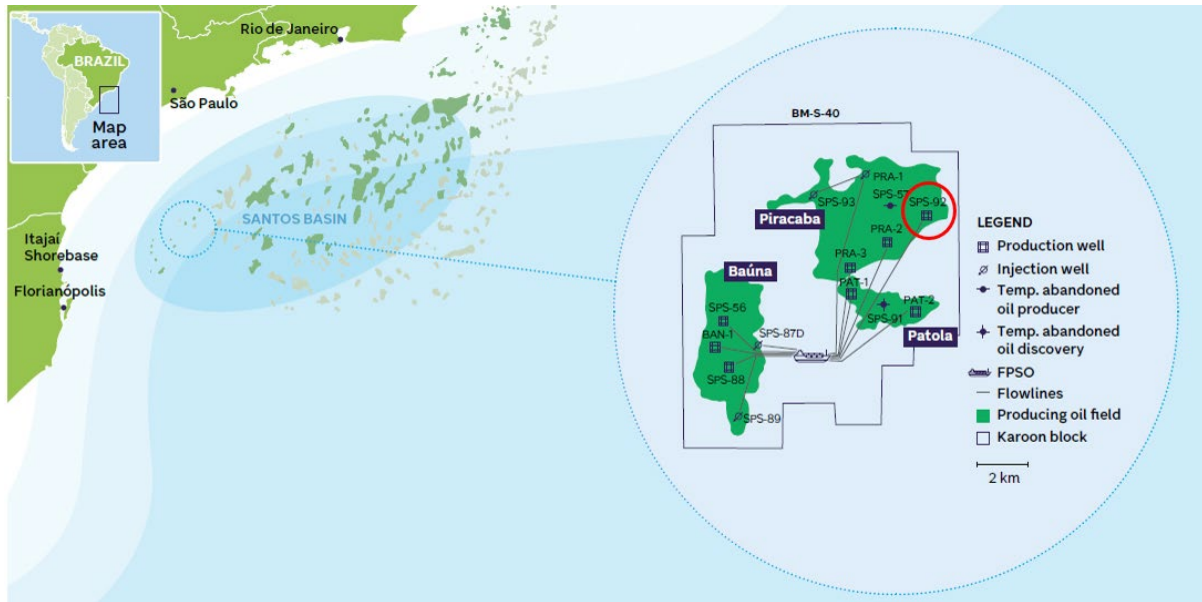

*“The ESP in SPS-92 was installed in September 2022<sup>1</sup> as part of Karoon’s first intervention project at Baúna. The anticipated life of ESPs is generally three to four years and failure of the electrical cables and connections are not uncommon. While this issue has emerged earlier than expected, the potential replacement of the ESPs at SPS-92 and PRA-2 were part of our planning activities for 2026.*

*Fortunately, the pump itself continues to operate in line with expectations, although at a reduced rate due to the electrical fault, allowing us to continue to produce from the well for the time being.*

*Our key focus now is on planning the intervention, securing a suitable drilling rig and the relevant approvals required to replace the ESP. Based on initial market soundings, this is expected to take between 6 and 12 months.*

<sup>1</sup> Refer ASX release dated 26.9.22 “Baúna Intervention Campaign Update”

*We shall keep the market informed if there is any update to this timeframe.”*

This announcement has been authorised by the Board of Karoon Energy Ltd.

##### FORWARD LOOKING STATEMENTS

Petroleum exploration and production operations rely on the interpretation of complex and uncertain data and information which cannot be relied upon to lead to a successful outcome in any particular case. Petroleum exploration and production operations are inherently uncertain and involve significant risk of failure. All information regarding Reserve and Contingent Resource estimates and other information in relation to Karoon’s assets is given in light of this caution.

This announcement may contain certain “forward-looking statements” with respect to the financial condition, results of operations and business of Karoon and certain plans and objectives of the management of Karoon. Forward-looking statements can generally be identified by words such as ‘may’, ‘could’, ‘believes’, ‘plan’, ‘will’, ‘likely’, ‘estimates’, ‘targets’, ‘expects’, or ‘intends’ and other similar words that involve risks and uncertainties, which may include, but are not limited to, the outcome and effects of the subject matter of this announcement. Indications of, and guidance on, future earnings and financial position and performance, well drilling programs and drilling plans, estimates of Reserves and Contingent Resources and information on future production are also forward-looking statements.

You are cautioned not to place undue reliance on forward-looking statements as actual outcomes may differ materially from forward-looking statements. Any forward-looking statements, opinions and estimates provided in this announcement necessarily involve uncertainties, assumptions, contingencies and other factors, and unknown risks may arise (including, without limitation, in respect of imprecise reserve and resource estimates, changes in project schedules, operating and reservoir performance, the effects of weather and climate change, the results of exploration and development drilling, demand for oil, commercial negotiations and other technical and economic factors) many of which are outside the control of Karoon. Such statements may cause the actual results or performance of Karoon to be materially different from any future results or performance expressed or implied by such forward-looking statements. Forward-looking statements including, without limitation, guidance on future plans, are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. Such forward-looking statements speak only as of the date of this announcement.

Karoon disclaims any intent or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or results or otherwise.

#### ABOUT KAROON ENERGY LTD

Karoon Energy Ltd. is an ASX listed international oil and gas exploration and production company with assets in Brazil and the United States of America.

Karoon’s vision is to be a leading, independent international energy company that adapts to a dynamic world in an entrepreneurial and innovative way. Karoon’s purpose is to provide energy safely, reliably and responsibly, creating lasting benefits for all its stakeholders.
