Dividend Reinvestment Plan

The Dividend Reinvestment Plan ('DRP') is in operation and the recommended partially franked final dividend of 5.0 cents per share qualifies. Participating shareholders will be entitled to be allotted the number of shares (rounded to the nearest whole number) which the cash dividend would purchase at the relevant issue price. The relevant issue price will be at a 2.5% discount to the price, calculated as the volume weighted average market price (VWAP) of shares sold on the ASX on the ex-date for the relevant dividend and the three trading days following that date.

Glossary of performance measures

The key measures used to analyse and discuss our results are defined here to guide the reader through the FY2025 financial highlights, the Letter from the Chairman, and the Update from the Lead Portfolio Manager. A full glossary of terms is also located on pages 77 to 79.

Dividend yield	The annual dividend amount expressed as a percentage of the share price at a certain point in time. <i>This is calculated as follows: Annual dividend amount per share ÷ share price</i>
Grossed-up dividend yield	Grossed-up dividend yield includes the value of franking credits and is based on the corporate tax rate (generally 30.0%), assuming the dividend is partially franked. <i>This is calculated as follows:</i> <i>Annual dividend yield % + [annual dividend yield % x franking % x (the corporate tax rate of 30.0% ÷ (1 – the corporate tax rate of 30.0%))]</i>
Net tangible assets (NTA) before tax	The NTA of a company, exclusive of current and deferred income tax assets or liabilities. The NTA before tax represents the investment portfolio of the Company, i.e. cash and investments, less any associated liabilities excluding tax and is the most comparable figure for a listed investment company (LIC) to an exchange traded fund (ETF) or managed fund.
Share price premium or discount	LIC's shares are traded on the ASX and a LIC has a fixed amount of capital. At times, the LIC's share price can fluctuate above or below its NTA value. When the share price is above the NTA of the company, the LIC is trading at a premium to NTA. When the share price is below the NTA, the LIC is trading at a discount to NTA. <i>This is calculated as follows: (Share price – NTA before tax) ÷ NTA before tax</i>
Total shareholder return (TSR)	Total share price return to shareholders, assuming all dividends received were reinvested without transaction costs and the compounding effect over the period. This measure is calculated before and after the value of franking credits attached to dividends paid to shareholders. <i>This is calculated as follows:</i> <i>(Closing share price – starting share price + dividends paid + franking credits) ÷ starting share price</i> <i>Note: the TSR reported in the Annual Report and media release is calculated monthly, using the above formula, and includes the effect of compounding over the period.</i>

Letter from the Chairman

Geoff Wilson AO

Dear Fellow Shareholder,

I would like to thank you for your support of WAM Research during FY2025. You have entrusted us with your capital, and we will continue to deploy WAM Research's proven investment process to deliver value for our shareholders.

In the 12 months to 30 June 2025, the WAM Research investment portfolio increased 22.4%*, outperforming the S&P/ASX All Ordinaries Accumulation Index by 9.2% and the S&P/ASX Small Ordinaries Accumulation Index by 10.1%. WAM Research has achieved an investment portfolio return of 15.2% per annum since 2010, outperforming the S&P/ASX All Ordinaries Accumulation Index by 6.0% per annum, while holding an average cash weighting of 24.5% over this period.

The WAM Research investment portfolio delivered strong performance for shareholders, reinforcing the investment thesis that focuses on the fundamental aspects of stock picking to deliver superior shareholder returns, particularly given the underperformance of small-cap companies relative to the broader market. I would like to commend Oscar and the WAM Research investment team for their commitment to our rigorous research-driven investment process and strong stock selection during the period.

The WAM Research Board of Directors declared a full year dividend of 10.0 cents per share, with the final dividend being 5.0 cents per share, partially franked at 60%. The full year dividend represents a dividend yield of 9.0% and a grossed-up yield of 11.3%, when including the value of franking credits. The full year dividend was made possible by the strong investment portfolio performance over the period, the listed investment company (LIC) structure and the profits reserve available.

Grossed-up dividend yield: 11.3%

*Investment portfolio performance is before expenses, fees and taxes to compare to the relevant indexes which are before expenses, fees and taxes.

The return on any equity investment for shareholders can be made up of a combination of capital (i.e. movement in the Company's share price) and income (i.e. through franked or unfranked dividends paid to shareholders on a semi-annual basis). To maintain the full year dividend of 10.0 cents per share for the 2025 financial year, the investment portfolio needed to increase more than 16% per annum, before all expenses, fees and taxes. The strong investment portfolio performance of 22.4%, above that of the yield paid to shareholders, enabled the Company to provide both capital growth and a high-income yield during the period.

The level of franking in FY2026 and beyond is dependent on the payment of tax on realised profits and the receipt of franked dividends from investee companies, having consideration to the utilisation of prior year tax losses to the benefit of shareholders. The WAM Research Board of Directors expects the FY2026 full year dividend to also be partially franked at 60%, should the company be able to maintain the full year dividend of 10.0 cents per share.

Since inception, WAM Research has paid 159.0 cents per share in franked dividends to shareholders, and 223.7 cents per share when including the value of franking credits.

WAM Research provided shareholders with a total shareholder return (TSR) of 12.6% in the 12 months to 30 June 2025, or 15.1% when including the value of franking credits. TSR was driven by the strong investment portfolio performance being slightly offset by the share price premium to NTA, which narrowed marginally from 3.5% at 30 June 2024 to 2.0% at 30 June 2025.

The Company reported an operating profit before tax of \$39.1 million for the year (FY2024: \$44.9 million) and an operating profit after tax of \$28.5 million for the year (FY2024: \$32.5 million).

Looking ahead to FY2026, the WAM Research investment team sees a favourable environment for undervalued growth companies and will continue to deploy our proven research-driven investment process into compelling opportunities the team identifies.

We encourage you to visit our website, subscribe to receive our updates and to call or email us with any questions or suggestions you have regarding WAM Research or Wilson Asset Management.

Please contact me or the team on (02) 9247 6755 or email us at info@wilsonassetmanagement.com.au.

Thank you for your continued support.

Geoff Wilson AO
Chairman

For personal use only

Company performance

Over four decades of investing, we have found three key measures crucial to the evaluation of a listed investment company’s (LIC) performance:

Key performance
measure 1

Investment
portfolio performance

Investment portfolio performance measures the growth of the underlying portfolio of equities and cash before expenses, fees and taxes. Each LIC is driven towards outperforming a benchmark index, or increasing the underlying investment portfolio of equities and cash at a faster rate.

Key performance
measure 2

Net tangible asset
growth

NTA growth is the change in value of the company’s assets, less liabilities and costs (after management and performance fees). The NTA growth includes dividends paid to shareholders and tax paid (franking credits) and demonstrates the value of the investment portfolio performance and quantifies the impact of capital management decisions.

Key performance
measure 3

Total shareholder
return

TSR measures the tangible value shareholders gain from share price growth and dividends paid over the period, before and after the value of any franking credits distributed to shareholders through franked dividends.

Key performance measure 1

Investment portfolio performance

Investment portfolio performance measures the growth of the underlying portfolio of equities and cash before expenses, fees and taxes. A key objective of WAM Research is long-term outperformance against the S&P/ASX All Ordinaries Accumulation Index, which is achieved by growing the investment portfolio at a greater rate. The S&P/ASX All Ordinaries Accumulation Index is measured before expenses, fees and taxes.

Investment portfolio performance in the financial year to 30 June 2025

+22.4%

WAM Research's investment portfolio increased 22.4% in the year to 30 June 2025, outperforming the S&P/ASX All Ordinaries Accumulation Index by 9.2%, while holding on average 4.9% of the investment portfolio in cash.

Since its change in investment strategy in 2010, WAM Research has achieved an investment portfolio return of 15.2% per annum, outperforming the S&P/ASX All Ordinaries Accumulation Index by 6.0% per annum.

Set out on the next page is the performance of WAM Research since its change in investment strategy in 2010, on a financial year basis. The performance data excludes all expenses, fees and taxes, and is used as a guide to show how the Company's investment portfolio has performed against the S&P/ASX All Ordinaries Accumulation Index over the same period.

WAM Research investment portfolio performance since change in investment strategy

Investment portfolio performance at 30 June 2025	1 yr	3 yrs %pa	5 yrs %pa	7 yrs %pa	10 yrs %pa	Since change in investment strategy %pa (Jul-10)
WAM Research Investment Portfolio	22.4%	22.2%	18.0%	12.0%	13.5%	15.2%

2011/2012	4.5%	-7.0%	+11.5%
2012/2013	30.4%	20.7%	+9.7%
2013/2014	20.5%	17.6%	+2.9%
2014/2015	22.8%	5.7%	+17.1%
2015/2016	25.5%	2.0%	+23.5%
2016/2017	11.1%	13.1%	-2.0%
2017/2018	14.5%	13.7%	+0.8%
2018/2019	1.8%	11.0%	-9.2%
2019/2020	-5.1%	-7.2%	+2.1%
2020/2021	45.2%	30.2%	+15.0%
2021/2022	-13.5%	-7.4%	-6.1%
2022/2023	14.1%	14.8%	-0.7%
2023/2024	30.7%	12.5%	+18.2%
2024/2025	22.4%	13.2%	+9.2%

Key performance measure 2

Net tangible asset growth

NTA growth is the change in value of the Company's assets, less liabilities and costs (including management and performance fees). The NTA represents the realisable value of the Company and is provided to shareholders and announced on the ASX each month.

NTA growth in the financial year to 30 June 2025

+19.6%

WAM Research's pre-tax NTA increased 19.6% in the 12 months to 30 June 2025, including 10.0 cents per share of franked dividends paid to shareholders during the year and corporate tax paid of 5.0 cents per share or 4.8%. The franking credits attached to corporate tax payments are available for distribution to shareholders through franked dividends.

Performance fees payable of 1.6% was the major item of difference between the investment portfolio performance of 22.4% and the NTA performance of 19.6%. Other items contributing to the change in the value of the assets during the year were management fees of 1.0% and other company related expenses of 0.2%.

For personal use only

WAM Research pre-tax NTA performance

+\$0.233

Portfolio performance

Investment portfolio performance measures the growth of the underlying portfolio of equities and cash before expenses, fees and taxes. The WAM Research investment portfolio increased 22.4% for the 12 months to 30 June 2025.

Paid to Shareholders as franked dividends

\$0.100

Dividends paid to Shareholders

When the Company pays a dividend, it represents income that is returned to shareholders out of the Company's assets and profits reserve. The dividend payment reduces the Company's NTA when paid. This excludes the value of franking credits attached to the dividend payment for shareholders. During the year, 10.0 cents per share of partially franked dividends were paid or 12.6 cents per share, including the value of franking credits, comprising the FY2024 partially franked final dividend of 5.0 cents per share and the FY2025 partially franked interim dividend of 5.0 cents per share.

\$0.050

Franking credits generated (tax paid)

Tax paid reduces the pre-tax NTA of the Company, as it represents an outflow of cash from the investment portfolio at the time of payment. Shareholders receive the benefit of tax paid by the Company as franked dividend payments are made. Shareholders receive the cash dividend, plus the value of the attached franking credits. Shareholders can use these credits to help offset additional tax payable on their taxable income, or have it refunded to them if their tax rate is lower than the 30% franking rate (corporate tax rate) attached to the dividend.

\$0.017

Performance fee

Under the investment management agreement, the Investment Manager is eligible to be paid a performance fee, being 20% (plus GST) in circumstances where:

- the level of the S&P/ASX All Ordinaries Accumulation Index has increased over that period, the amount by which the value of the portfolio exceeds this increase; or
- the S&P/ASX All Ordinaries Accumulation Index has decreased over that period, the amount of the increase in the value of the portfolio.

No performance fee is payable in respect of any performance period where the value of the portfolio has decreased over that period.

\$0.010

Management fees

In return for its duties as Investment Manager of the portfolio, the Investment Manager is entitled to be paid monthly a management fee equal to 0.0833334% per month or 1% per annum (plus GST) of the value of the portfolio (calculated on the last business day of each month and paid at the end of each month in arrears).

\$0.002

Company expenses paid

Company related expenses include ASX, ASIC, Director, audit, tax, accounting, Company Secretary, registry fees and other expenses incurred that relate to the operation of the Company each year.

Key performance measure 3

Total shareholder return

TSR measures the tangible value shareholders gain from share price growth and dividends paid over the period, before and after the value of any franking credits distributed to shareholders through franked dividends.

TSR in the financial year to 30 June 2025

+15.1%

The TSR for WAM Research was 15.1% during the 12 months to 30 June 2025, including the value of franking credits distributed to shareholders through franked dividends. This was driven by the strong investment portfolio performance of 22.4% during the period, being partially offset by the share price premium to NTA contracting from 3.5% as at 30 June 2024 to 2.0% at 30 June 2025.

Excluding the value of franking credits, TSR was 12.6% for the period.

Growth of a \$10,000 investment

WAM Research versus the index

Notes:

1. The above graph reflects the period from the change in investment strategy in July 2010 to 30 June 2025.
2. WAM Research's share price performance is calculated using the adjusted closing monthly share price from IRESS, in Australian dollar terms. The closing monthly share price from IRESS is adjusted for corporate actions such as stock splits, dividends and rights offerings.
3. The S&P/ASX All Ordinaries Accumulation Index has been chosen for comparison purposes only. The graph is not intended to be an indication of future performance of any asset class, index or the WAM Research investment portfolio.

NTA growth and TSR calculations

The table below reflects the Company's total return to shareholders calculated on a per share basis by adding back dividends paid (including the value of tax paid or franking credits) to the change in the NTA before tax or share price during the year. The dividends are assumed to have been re-invested at the relevant net asset value or share price, respectively, on the date on which the shares were quoted ex-dividend. The movement in the NTA before tax is driven by the investment portfolio performance, with TSR being added to or offset by the increase or narrowing in the share price premium or discount to NTA.

2025	NTA before tax	Share price	Premium to NTA
As at 30 June 2025	\$1.0884	\$1.11	2.0%
As at 30 June 2024	\$1.0390	\$1.075	3.5%
Change in the year (capital)	4.8%	3.5%	
Impact of dividend reinvestments (income)	10.0%	9.1%	
Impact of tax paid/value of franking credits (income)	4.8%	2.5%	
Total return for the year	19.6%	15.1%

Dividend yield

9.0%

Grossed-up dividend yield: 11.3%

The Board declared a full year dividend of 10.0 cents per share, partially franked at 60%, with the partially franked final dividend being 5.0 cents per share. Since inception in August 2003, the Company has paid 223.7 cents per share in dividends to shareholders, including the value of franking credits.

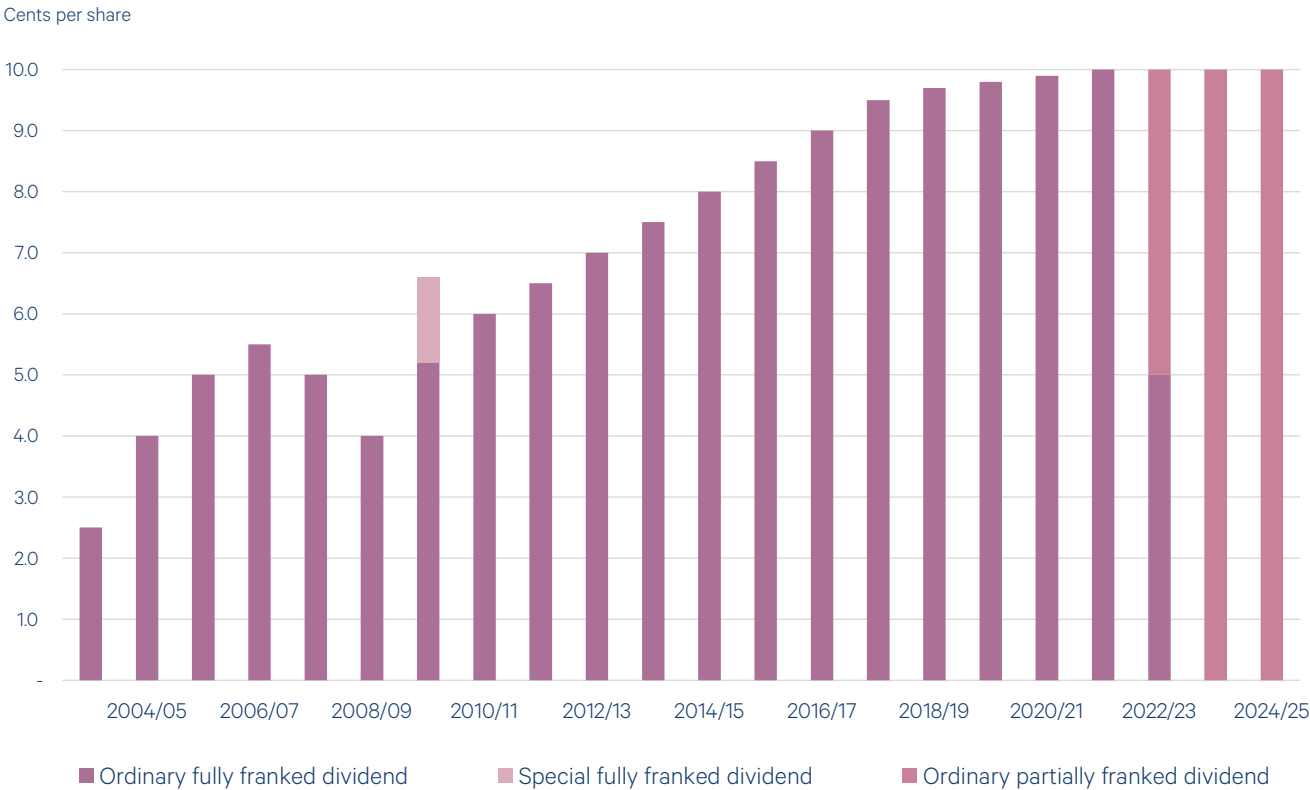

The Board is committed to paying a stream of fully franked dividends to shareholders, provided the Company has sufficient profits reserves and franking credits, and it is within prudent business practices. In FY2026, the Company's ability to continue paying franked dividends at the current level is dependent on generating additional profits reserves, through positive investment portfolio performance, and franking credits. The ability to generate franking credits is reliant on the receipt of franked dividends from investee companies and the payment of tax on realised profits. As at 31 July 2025, the Company had 48.3 cents per share available in its profits reserve, before the payment of the partially franked final dividend of 5.0 cents per share payable on 28 October 2025.

The Dividend Reinvestment Plan (DRP) is in operation and the recommended partially franked final dividend of 5.0 cents per share qualifies. Participating shareholders will be entitled to be allotted the number of shares (rounded to the nearest whole number) which the cash dividend would purchase at the relevant issue price. The relevant issue price will be at a 2.5% discount to the price, calculated as the volume weighted average market price (VWAP) of shares sold on the ASX on the ex-dividend date for the relevant dividend and the three trading days following that date.

Update from the Lead Portfolio Manager

Oscar Oberg CFA

For personal use only

The WAM Research investment portfolio delivered strong outperformance in the 12 months to 30 June 2025, increasing 22.4% and outperforming the S&P/ASX All Ordinaries Accumulation Index by 9.2%. The investment team was pleased to deliver this result given small-cap companies underperformed the broader market for the fourth consecutive financial year. The WAM Research investment team's diligent stock selection is highlighted by the investment portfolio outperformance of the S&P/ASX Small Ordinaries Accumulation Index by 10.1% over the period.

In the first half of the 2025 financial year, the team took advantage of a more favourable market backdrop, while the six months to 30 June 2025 presented a period of significant volatility. Macroeconomic and geopolitical uncertainty dominated market narratives in the latter half of the financial year, particularly as US President Trump announced broad-based and punitive trade policy reforms. As the market began to digest the Trump presidency from late February, the S&P 500 and the S&P/ASX 300 Indexes experienced a peak-to-trough decline of 27% and 20% respectively, through to early April. While this was certainly eventful, macroeconomic and geopolitical uncertainty is not new; we find that most years present transitory reasons that impact equity markets. Despite the initial shock and lingering threat of US tariffs, markets have recovered to above pre-tariff levels, reinforcing our view of focusing on the fundamental aspects of stock picking, as this will ultimately drive returns for shareholders.

Diversified investment portfolio by sector
at 30 June 2025

Companies that are held within the WAM Research investment portfolio meet the strict criterion of our proven investment process. These companies are generally held for a longer period, approximately 1.4 years, with a catalyst that can lead to a re-rating of its share price. Pleasingly, in the 2025 financial year we saw a number of companies that had been held for a sustained period of time perform strongly as share price re-ratings were achieved, supporting the investment team's long-term view and conviction in these companies.

We have held diversified financial services business Generation Development Group (ASX: GDG) in the investment portfolio since 2019 and were rewarded for this long-term investment with the share price more than doubling in the 2025 financial year. Under the leadership of Chief

Executive Officer Grant Hackett, we believed the market was underappreciating the structural tailwinds within the managed accounts and investment bonds sectors. During the period, the company executed two earnings-accretive acquisitions: Generation Development Group moved to 100% ownership of Lonsec in August 2024, building on its initial 37% stake acquired in October 2020, and secured high growth managed accounts competitor Evidentia Group Holdings, cementing its position as Australia's largest provider of outsourced investment advice to financial planners. Generation Development Group was subsequently added to the S&P/ASX 300 and S&P/ASX 200 indices, resulting in a significant valuation re-rating driven by a substantial increase in passive index-driven buying. This has become an increasingly powerful driver of share prices.

Portfolio composition by market capitalisation
at 30 June 2025

	WAM Research [†]	S&P/ASX All Ordinaries Index	S&P/ASX Small Ordinaries Index
ASX Top 20	0.0%	55.3%	0.0%
ASX 21-50	0.0%	17.7%	0.0%
ASX 51-100	3.7%	12.4%	0.0%
ASX 101-300	74.8%	11.8%	100.0%
Ex ASX 300	19.6%	2.8%	0.0%

[†]Investment portfolio held 1.9% in cash.

Long-term holding retail pharmacy franchisor Sigma Healthcare (ASX: SIG) contributed to the investment portfolio outperformance with the successful completion of the Chemist Warehouse Group acquisition driving significant active and passive investor demand on S&P/ASX 100 inclusion. We are excited by the prospects for the business given its dominant position domestically as one of the country's best retailers, with a global store roll out on the horizon.

Telecommunications company Tuas (ASX: TUA) continued its momentum over the 2025 financial year with subscriptions in its mobile offering in Singapore continuing to grow and earnings materially exceeding analyst expectations. The company is in its early stages of launching its broadband offering with positive traction to date, while market expansion opportunities such as the enterprise segment and entry into the Malaysian market present material upside. Consolidation of the Singaporean telecommunications market is a key potential catalyst looking forward.

Service Stream (ASX: SSM) which is an end-to-end asset life-cycle services provider for different industries also contributed to portfolio outperformance in the period. Management have done an excellent job in improving margins across the business, whilst the establishment of a new defence vertical is a key potential catalyst in the near term and the tender process is in its final stages. Aged care provider Regis Healthcare (ASX: REG) benefitted from ongoing industry tailwinds, with demand continuing to outstrip supply and government funding changes improving operator returns after an extended period of industry margin contraction.

As is common with a balanced investment portfolio, WAM Research held companies that detracted from the investment portfolio performance, including online travel services provider Web Travel Group (ASX: WEB) and department store operator Myer Holdings (ASX: MYR). Unexpected pressure on revenue margins and broader volatility in travel markets contributed to a downgrade in Web Travel Group's earnings expectations and we halved our position leading into the update. With earnings expectations significantly rebased and the company now showing strong earnings growth momentum, we have materially increased our position following the recent FY2025 results and maintain a positive outlook. Myer Holdings' share price performed strongly throughout the first half of the calendar year as the merger with Premier Investments' (ASX: PMV) Apparel Brands was implemented. Unfortunately, a January trading update revealed unexpected delays and increased costs associated with a new national distribution centre. With the interest rate cutting cycle underway and a further six cuts expected by the end of 2026, we expect improving consumer sentiment and execution on synergy targets to drive a re-rating in the share price from what we believe are attractive valuation levels.

The introduction of Australian Prudential Regulation Authority's (APRA) *Your Future, Your Super* rules have heightened the focus on relative benchmark performance among Australia's superannuation and pension funds. This has contributed to a pronounced trend of 'index hugging', as underperformance carries regulatory and reputational consequences. Combined with the continued rise of passive index-tracking strategies, this dynamic is contributing to distortions in the domestic equity market.

As capital increasingly flows into large-cap passive funds that track indices such as the S&P/ASX 100 Index and S&P/ASX 200 Index, investment in smaller companies has been constrained, presenting a headwind to small-cap performance. However it also creates opportunities for WAM Research to identify stocks that we believe can benefit from the significant valuation uplift that typically occurs in entering larger indices, as index-tracking passive investment funds must then buy shares in those companies and remain passive ongoing buyers.

With interest rates expected to continue declining over the 2026 financial year, we believe the current cycle of small-cap underperformance is coming to an end and the headwinds experienced can turn into tailwinds over the medium term and deliver material upside as seen in previous market cycles. This reflects the number of smaller Australian companies exposed to the domestic economy such as retail, financials, automotive, building materials, media, travel and real estate. These sectors are 47.7% of the investable universe within the S&P/ASX Small Ordinaries Accumulation Index and will drive the outperformance of small-cap companies in the future; all sectors in which the investment portfolio carries significant exposure.

Heading into the 2026 financial year, the WAM Research investment team has identified numerous compelling investment opportunities across a variety of sectors, with emerging catalysts and attractive valuations. We believe the

housing sector is positioned for a recovery as lower interest rates feed into improving activity levels with signs of this already occurring. Vertically integrated regional construction materials company Maas Group Holdings (ASX: MGH), land lease community operator Ingenia Communities Group (ASX: INA) and recent initial public offering (IPO) GemLife Communities Group (ASX: GLF) should benefit from structural tailwinds from ageing demographics while retirement village operator Summerset Group Holdings (NZX: SUM) will benefit from similar conditions in New Zealand.

With expectations of an improving consumer sentiment, we believe retailers such as Myer Holdings, Lovisa Holdings (ASX: LOV) and Beacon Lighting Group (ASX: BLX) will benefit, along with KFC franchisor Collins Foods (ASX: CKF), cinema, hotel and hospitality operator EVT (ASX: EVT) and small-to-medium business lender Judo Capital Holdings (ASX: JDO). Each of these businesses are well positioned with catalysts ranging from new market expansion, divestment opportunities to earnings accretive acquisitions. Integral Diagnostics (ASX: IDX) has completed the acquisition of Capitol Health and is positioned to capitalise on improving industry conditions with upside to synergy targets. Ridley Corporation (ASX: RIC) is another holding we are positive on, with headwinds in the core business turning, and the recent acquisition of Incitec Pivot's fertiliser business demonstrating material upside.

For personal use only

After four challenging years, we see a robust period ahead for undervalued small-cap growth companies with historical cycles suggesting the trajectory of interest rates will act as a clear catalyst to drive renewed interest in and the outperformance of smaller companies. We continue to maintain a flexible cash position to ensure we can benefit from share price volatility and take advantage of valuation anomalies and capital markets activity which pleasingly is demonstrating signs of improvement with a number of large IPOs recently.

Thank you for your continued support.

Investment

objectives and process

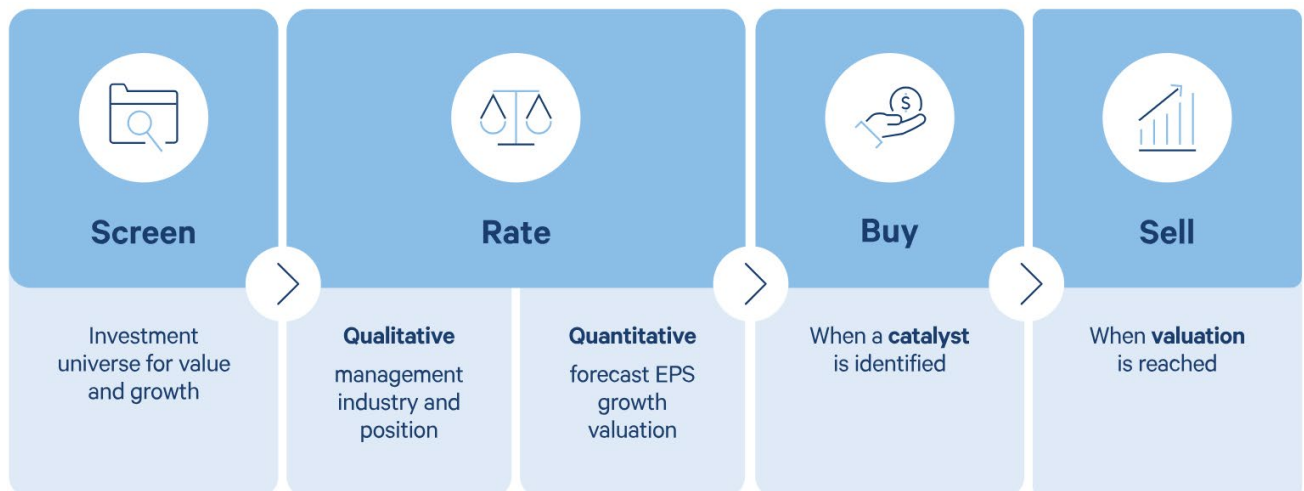

Investment objectives

The investment objectives of WAM Research are to:

- deliver investors a stream of fully franked dividends; and
- achieve a high real rate of return, comprising both income and capital growth within risk parameters acceptable to the Directors.

Investment process

WAM Research provides investors with access to Wilson Asset Management's research-driven process, focused on identifying undervalued growth companies. This investment process involves diligent and deep research that focuses on free cash flow, return on equity and the quality of a company. Each company is carefully rated with respect to management, earnings growth potential, valuation and industry position. Under this proprietary process, the investment team will only ever invest in a security once it can identify a catalyst or event that it expects will change the market's valuation of the company.

About

Wilson Asset Management

Wilson Asset Management has been passionate about making a difference for shareholders and the community for over 27 years. As an investment manager, Wilson Asset Management invests \$6.0 billion on behalf of more than 130,000 retail and wholesale investors.

Wilson Asset Management is proud to be the Investment Manager for nine leading listed investment companies (LICs), WAM Capital (ASX: WAM), WAM Leaders (ASX: WLE), WAM Global (ASX: WGB), WAM Microcap (ASX: WMI), WAM Alternative Assets (ASX: WMA), WAM Income Maximiser (ASX: WMX), WAM Strategic Value (ASX: WAR), WAM Research (ASX: WAX) and WAM Active (ASX: WAA) and two unlisted funds: Wilson Asset Management Leaders fund and Wilson Asset Management Founders Fund. Wilson Asset Management created and is the lead supporter for the first LICs to deliver both investment and social returns: Future Generation Australia (ASX: FGX) and Future Generation Global (ASX: FGG), as well as Future Generation Women.

Philanthropy

Geoff Wilson founded Future Generation Australia in 2014 and Future Generation Global in 2015. The Future Generation companies are Australia's first listed investment companies to provide both investment and social returns. The companies seek to deliver a stream of fully franked dividends, preserve shareholder capital and provide medium to long-term capital growth for investors by giving them unprecedented access to prominent Australian and global fund managers. These managers generously waive their performance and management fees, which enables the Future Generation companies to invest 1.0% of average net tangible assets each year in their social impact partners and other not-for-profit organisations. To date, the Future Generation companies have invested \$87.2 million to organisations that support at-risk children and youth in Australia. The team at Wilson Asset Management continue to be the leading supporter of both companies and Future Generation Women.

By 2030, Future Generation aims to have donated over \$100 million, with \$87.2 million donated since inception so far. The team at Wilson Asset Management continue to support both companies.

Wilson Asset Management is a member of the global philanthropic Pledge 1% movement, is a significant funder of many Australian charities and provides all team members with \$10,000 each year to donate to charities of their choice. During the year, Wilson Asset Management and Future Generation team members were proud to support 97 charities across several cause areas such as education, youth services, mental health and cancer research. All philanthropic investments are made by the Investment Manager.

We are honoured to provide continued support to Olympic athletes, through managing funds for the Australian Olympic Committee (AOC) on a pro bono basis. The AOC provides crucial financial and institutional support to Australian athletes to compete at an Olympic level. All fees are foregone by the Investment Manager.

We also support a number of organisations through sponsorships and partnerships across a range of initiatives including the Australian Shareholder's Association, Sporting Chance Cancer Foundation, Sydney Women's Fund, Raise Foundation, Eat Up Australia, Alpine Cycling Club, Bondi2Berry, Morgans Big Dry Friday, Macquarie University Applied Finance Investment and Scholarship Fund and more.

All sponsorships and partnerships are paid for by the Investment Manager.

Advocacy

As part of our commitment to delivering value for both shareholders and the broader community, we continue to prioritise advocacy on behalf of retail investors in the Australian equity market. This work is underpinned by our core belief that all Australian investors should be treated equitably.

In the financial year to date we have focused on five key policies:

1. Taxing unrealised gains in superannuation

In February 2024, we made a formal submission to the Senate Economics Legislation Committee on Treasury Laws Amendment (Better Targeted Superannuation Concessions) opposing the Government's proposal to tax unrealised gains and the failure to index the superannuation threshold of \$3 million. At the time, we provided a simple solution to eliminate the need for a tax on unrealised gains, which unfortunately, to date, has not been adopted.

Under the proposed changes, superannuants with balances over \$3 million would be required to pay tax on the increase in the value of their assets, even if the assets are not sold and no cash has been generated to fund the tax. A lack of indexation on the \$3 million means, on our estimates, that 8.1 million Australians, or half of all current superannuants, will be captured by 2053 due to the impact from 'bracket creep'.

In April 2025, we launched a discussion paper 'Critiquing the Proposed Taxation on Unrealised Gains in Superannuation'. The evidence-based paper is grounded in economic principles and highlights the significant unintended consequences of the legislation. It is designed to contribute

towards an important national conversation and has generated significant national media coverage.

The paper shows how the proposed policy will undermine Australia's \$4.2 trillion superannuation system and damage the economy. Our modelling indicates \$94.5 billion would be removed from the Australian economy through what economists term the Deadweight Loss of Taxation, and \$155 billion of superannuation savings would be redirected into tax-free structures such as principal places of residence, exacerbating the housing affordability crisis that already weighs on younger Australians.

In May 2025, we launched a petition 'Stand with Us Against Taxing Unrealised Gains' and invited Australians to call upon the Senate to stop the proposed legislation. To date, nearly 18,000 people have signed the petition. The legislation is set to go before the Senate after Parliament returns on 22 July 2025.

2. Australia's evolving capital markets

In May 2025, we made a submission in response to ASIC's discussion paper 'Australia's evolving capital markets: A discussion paper on the dynamics between public and private markets'.

Our submission called on ASIC to play a proactive role in safeguarding investor confidence, reducing regulatory burden, and preserving the features, like franking credits, that make Australia's markets competitive and attractive for long-term investment.

Our submission advocated for policy certainty on franking credits, especially ensuring refundable franking credits are protected to encourage domestic investment. It also made the case for ASX listings to be easier for smaller companies to

prevent a shrinking public market that limits capital, hurts innovation, and reduces the diversity and strength of the share market that underpins superannuation savings.

3. Phase out of 'bank hybrids'

In November 2024, we made a formal submission to the Australian Prudential Regulation Authority (APRA) in response to their discussion paper 'A more effective capital framework for a crisis on the proposed phase out of Additional Tier 1 (AT1) capital, which are commonly known as 'bank hybrids'.

Our submission objected to the proposed phase out of retail access to 'bank hybrids', as we believe they play an important role in both retail investors' portfolios and bank's credit structures. In addition, they offer retail investors higher-yielding franked-income streams with both debt and equity characteristics. The removal of these securities from the retail investors' investment universe will deprive their investment portfolio of diversification benefits with respect to risk and return. It will also reduce valuable franked income streams, especially for retirees and those in self-managed super funds (SMSF).

On 9 December 2024, APRA announced its decision to phase out all Additional Tier 1 (AT1) capital instruments by 2032.

4. Sophisticated investor test (wholesale investor and wholesale client tests)

In October 2024, Geoff Wilson AO appeared before the Parliamentary Joint Committee on Corporations and Financial Services to advocate our position on the sophisticated investor test (wholesale investor and wholesale client tests).

This follows our formal submission in May 2024, where we proposed two regulatory changes that could help level the playing field between large and small investors:

- a) Abolish the wholesale investor test for listed companies, allowing all shareholders to participate in equity raisings by ASX-listed companies to ensure fairness to small shareholders.
- b) Enhance the sophisticated investor test that currently discriminates between investors according to their wealth by adding a new financial literacy test to enable those with the relevant experience and qualifications to qualify for the test and not be excluded simply because of their wealth.

The Parliamentary Joint Committee on Corporations and Financial Services concluded its inquiry in February 2025. Notably, the Committee did not recommend immediate changes to the existing financial thresholds for classifying wholesale investors or clients. The Committee's final report made two key recommendations:

- a) That the Government establish a mechanism for the periodic review of the operation of the wholesale investor and client tests and should include mandatory requirements for engagement and consultation with Australia's investment industry.
- b) Subject to stakeholder consultation, the Committee advised amending the *Corporations Act 2001* to remove the subjective elements of the sophisticated investor test with the aim of introducing objective criteria relating to the knowledge and experience of the investor.

The second recommendation aligns with our long-held position and ongoing advocacy on the issue. We understand that future consultations and evidence-based discussions will be integral to any potential reforms, and we will continue to engage with policy makers through the consultation process.

5. Virtual Annual General Meetings (AGMs)

In July 2024, we made a formal submission to the Treasury's Statutory Review of the Meetings and Documents Amendments. Our submission focused on the review into making temporary virtual AGMs permanent. We believe that AGMs of publicly listed companies should be held as hybrid meetings (a combination of in-person and virtual meetings), not exclusively as online meetings, as virtual only meetings shift the balance of power away from shareholders by eroding transparency, accountability and access.

In February 2025, the Government released a response to the review that included eleven recommendations. The Government maintained that listed public companies and listed registered schemes can hold wholly virtual meetings only if explicitly permitted by their constitution.

Recommendation 4, 'future review of meeting laws', states that a review of the formats of AGMs and other members' meetings be undertaken in 5 years' time. This would provide opportunities to observe how the conduct of meetings has evolved during the transition and whether any significant issues have arisen. We will continue to advocate for hybrid meetings as part of this process.

Education

We also remain committed to education initiatives which advocate for change and progress in corporate Australia. We support the University of New South Wales School of Mathematics and Statistics' Do the Maths program, which aims to inspire girls in high school to consider tertiary studies and careers in mathematics and statistics. We believe in the importance of gender diversity in the financial services industry, in particular funds management, which provides rewarding career paths. We also host Women's Investor Events which give likeminded women a platform to network and enhance financial literacy, while our Young Investor Events aim to inspire the next generation to begin their investment journey early.

We encourage all shareholders to visit our website and subscribe to receive our updates.

As always, please contact us by phone on (02) 9247 6755 or by email at info@wilsonassetmanagement.com.au if you ever have any questions or feedback.

Shareholder engagement and communication

WAM Research is your company and it is Wilson Asset Management's responsibility to manage the Company on your behalf and be available to report to you on a regular basis. We encourage all shareholders to communicate with us and share their feedback. We have a variety of options to keep you informed, including:

- ✓ Email updates from the Chairman and CIO, the Lead Portfolio Managers and Investment Team
- ✓ Shareholder presentations and events
- ✓ Investment insights including market and macroeconomic commentary, updates from meetings with investee management teams and 'Talking Stocks' videos
- ✓ Shareholder Q&A webinars and breakfast roundtable events
- ✓ Monthly NTA reports
- ✓ Social media engagement
- ✓ Investor education material
- ✓ Annual and interim results announcements with detailed updates on the investment portfolios and markets
- ✓ Media coverage and speaking engagements from our ongoing media partnerships with Livewire Markets, the ASX, Equity Mates, the Australian Shareholders' Association, the SMSF Association and more.

Directors' Report

to shareholders

For the year ended 30 June 2025

The Directors present their report together with the financial report of WAM Research for the financial year ended 30 June 2025.

Principal activity

The principal activity of the Company is making investments in listed companies. The Company's investment objectives are to deliver a stream of fully franked dividends and to achieve a high real rate of return, comprising both income and capital growth, within the risk parameters acceptable to the Directors. No change in this activity took place during the year or is likely to in the future.

Operating and financial review

Investment operations over the year resulted in an operating profit before tax of \$39,078,057 (2024: \$44,897,695) and an operating profit after tax of \$28,486,073 (2024: \$32,471,074). The operating profit for 2025 is reflective of the strong performance of the investment portfolio over the period. The investment portfolio increased 22.4% in the 12 months to 30 June 2025, outperforming the S&P/ASX All Ordinaries Accumulation Index and the S&P/ASX Small Ordinaries Accumulation Index by 9.2% and 10.1% respectively.

The operating profit for the year includes unrealised gains or losses arising from changes in the fair value of the investments held in the portfolio during the period. This movement in the fair value of investments can add to or reduce the realised gains and losses on the investment portfolio and other revenue from operating activities (such as dividend and interest income) in each period. This treatment under the Accounting Standards can cause large variations in reported operating profits between periods.

The operating profit or loss for each financial period is reflective of the underlying investment portfolio performance and is important to understand with context to the overall performance of equity markets in any given period. As a result, we believe the more appropriate measures of the financial results for the period are the investment portfolio performance, the change in net tangible assets (NTA) and franked dividends, together with total shareholder return.

Further information on the three key listed investment company performance measures and the operating and financial review of the Company is contained in the Chairman's Letter.

Financial position

The net asset value of the Company as at 30 June 2025 was \$226,209,496 (2024: \$214,664,486). Further information on the financial position of the Company is contained in the Chairman’s Letter.

Significant changes in state of affairs

There was no significant change in the state of affairs of the Company during the year ended 30 June 2025.

Dividends paid or recommended

Dividends paid or declared during the year are as follows:

	\$
Partially franked FY2024 final dividend of 5.0 cents per share paid on 25 October 2024	10,203,456
Partially franked FY2025 interim dividend of 5.0 cents per share paid on 30 April 2025	10,279,808

Since the end of the year, the Directors declared a final dividend of 5.0 cents per share, partially franked at 60%, to be paid on 28 October 2025.

Since inception, WAM Research has paid 159.0 cents per share in dividends to shareholders and 223.7 cents per share when including the value of franking credits.

The Company has 4.8 years of dividend coverage, based on the profits reserve of 48.3 cents per share at 30 June 2025, before the payment of the partially franked final dividend of 5.0 cents per share. The franking account balance of WAM Research at the end of the year enabled the Company to declare a partially franked final dividend for shareholders. The level of franking in FY2026 and beyond is dependent on the performance of the investment portfolio and the payment of tax on realised profits.

The Board is committed to paying a stream of fully franked dividends, provided the Company has sufficient profits reserves and franking credits and it is within prudent business practices. The ability to generate franking credits is dependent on the future franked dividends received from investee companies held within the investment portfolio, and future tax paid on realised profits generated by the investment portfolio.

Director of the Company since June 2003

Experience and expertise

Julian Gosse has spent the last 27 years of his career working as a professional director of public companies. Prior to that he was involved in the stockbroking, merchant banking and venture capital industries.

Other current listed company directorships

Julian Gosse has no other current listed company directorships.

Former listed company directorships in the last 3 years	Special responsibilities	Interests in shares of the Company	Interests in contracts
Julian Gosse resigned as a director of Clime Capital Limited in November 2023.	Member of the Audit and Risk Committee.	None.	None.

Joint Company Secretaries

The following persons held the position of Joint Company Secretary at the end of the financial year:

Jesse Hamilton

*Joint Company Secretary of WAM Research Limited
since November 2020*

Jesse Hamilton is a Chartered Accountant with more than 17 years' experience working in advisory and assurance services, specialising in funds management. As the Chief Financial Officer, Jesse oversees all finance and accounting of Wilson Asset Management (International) Pty Limited. Jesse is currently a non-executive Director of the Listed Investment Companies & Trusts Association, Chair and Company Secretary of Keybridge Capital Limited, Director and Company Secretary of Yowie Group Limited, Company Secretary for WAM Alternative Assets Limited and WAM Strategic Value Limited and Joint Company Secretary for WAM Capital Limited, WAM Leaders Limited, WAM Global Limited, WAM Microcap Limited, WAM Research Limited, WAM Active Limited and WAM Income Maximiser Limited, in addition to Future Generation Australia Limited and Future Generation Global Limited. Prior to joining Wilson Asset Management, Jesse worked as Chief Financial Officer of an ASX listed company and also worked as an advisor specialising in assurance services, valuations, mergers and acquisitions, financial due diligence and capital raising activities for listed investment companies.

Linda Kiriczenko

*Joint Company Secretary of WAM Research Limited
since May 2016*

Linda Kiriczenko has over 21 years' experience in financial accounting including more than 17 years in the funds management industry. As the Finance Manager of Wilson Asset Management (International) Pty Limited, Linda oversees finance and accounting and is also Joint Company Secretary for seven listed investment companies, WAM Capital Limited, WAM Leaders Limited, WAM Global Limited, WAM Microcap Limited, WAM Research Limited, WAM Active Limited and WAM Income Maximiser Limited. Linda holds a Bachelor of Commerce and is a fully qualified CPA. She is a certified member of the Governance Institute of Australia.

Remuneration Report (Audited)

This report details the nature and amount of remuneration for each Director of WAM Research.

a) Remuneration of Directors

All Directors of WAM Research are non-executive Directors. The Board from time to time determines remuneration of Directors within the maximum amount approved by the shareholders at the Annual General Meeting. Directors are not entitled to any other remuneration.

Fees and payments to Directors reflect the demands that are made on and the responsibilities of the Directors and are reviewed annually by the Board. The Company determines the remuneration levels and ensures they are competitively set to attract and retain appropriately qualified and experienced Directors.

The maximum total remuneration of the Directors of the Company has been set at \$120,000 per annum. Directors do not receive bonuses nor are they issued options on securities as part of their remuneration. Directors' fees cover all main Board activities and membership of committees.

Directors' remuneration received for the year ended 30 June 2025:

Director	Position	Short-term employee benefits Directors' fees \$	Post-employment benefits Superannuation \$	Total \$
Geoff Wilson	Chairman	8,969	1,031	10,000
Kate Thorley	Director	8,969	1,031	10,000
John Abernethy	Director	26,906	3,094	30,000
Julian Gosse	Director	30,000	-	30,000
		74,844	5,156	80,000

Directors receive a superannuation guarantee contribution required by the government, which was 11.5% of individuals benefits for FY2025 (FY2024: 11.0%) and do not receive any other retirement benefits. Directors may also elect to salary sacrifice their fees into superannuation.

Directors' remuneration received for the year ended 30 June 2024:

Director	Position	Short-term employee benefits Directors' fees \$	Post-employment benefits Superannuation \$	Total \$
Geoff Wilson	Chairman	9,009	991	10,000
Kate Thorley	Director	9,009	991	10,000
John Abernethy	Director	27,027	2,973	30,000
Julian Gosse	Director	30,000	-	30,000
		75,045	4,955	80,000

Remuneration Report (Audited) (cont'd)

a) Remuneration of Directors (cont'd)

The following table reflects the Company's performance and Directors' remuneration over five years:

	2025	2024	2023	2022	2021
Operating profit/(loss) after tax (\$)	\$28,486,073	\$32,471,074	\$16,854,237	(\$20,698,660)	\$52,288,040
Dividends declared (cents per share)	10.0	10.0	10.0	10.0	9.9
Share price (\$ per share)	\$1.11	\$1.075	\$1.06	\$1.295	\$1.645
NTA after tax (\$ per share)	\$1.09	\$1.05	\$0.99	\$1.00	\$1.20
Total Directors' remuneration (\$)	\$80,000	\$80,000	\$80,000	\$80,000	\$80,000
Shareholder's equity (\$)	\$226,209,496	\$214,664,486	\$199,136,629	\$198,826,033	\$235,632,242

As outlined above, Directors' fees are not directly linked to the Company's performance.

b) Director related entities remuneration

All transactions with related entities during the year were made on normal commercial terms and conditions and at market rates.

The Company has an investment management agreement with MAM Pty Limited (the Investment Manager or the Manager), part of the Wilson Asset Management Group. Geoff Wilson is the Director of MAM Pty Limited, the entity appointed to manage the investment portfolio of WAM Research. Entities associated with Geoff Wilson hold 100% of the issued shares of MAM Pty Limited. In its capacity as the Manager, and in accordance with the investment management agreement, MAM Pty Limited was paid a management fee of 1% p.a. (plus GST) of the value of the portfolio amounting to \$2,571,310 inclusive of GST (2024: \$2,204,432). As at 30 June 2025, the balance payable to the Manager was \$210,018 inclusive of GST (2024: \$200,239).

In addition, MAM Pty Limited is eligible to be paid a performance fee, being 20% (plus GST) in circumstances where:

- the level of the S&P/ASX All Ordinaries Accumulation Index has increased over that period, the amount by which the value of the portfolio exceeds this increase; or
- the S&P/ASX All Ordinaries Accumulation Index has decreased over that period, the amount of the increase in value of the portfolio.

No performance fee is payable in respect of any performance period where the value of the portfolio has decreased over that period.

For the year ended 30 June 2025, a performance fee of \$3,710,478 inclusive of GST was payable to MAM Pty Limited (2024: \$6,519,566).

Wilson Asset Management (International) Pty Limited has a service agreement in place with WAM Research to provide accounting and company secretarial services on commercial terms. For the year ended 30 June 2025, the fee for accounting services amounted to \$68,750 inclusive of GST (2024: \$55,000) and the fee for company secretarial services amounted to \$23,650 inclusive of GST (2024: \$19,800). Entities associated with Geoff Wilson hold 100% of the issued shares of Wilson Asset Management (International) Pty Limited.

Remuneration Report (Audited) (cont'd)

b) Director related entities remuneration (cont'd)

These amounts are in addition to the above Directors' remuneration. Since the end of the previous financial year, no Director has received or become entitled to receive a benefit (other than those detailed above) by reason of a contract made by the Company or a related company of the Director or with a firm of which they are a member or with a company in which they have substantial financial interest.

c) Remuneration of executives

There are no executives that are paid by the Company. MAM Pty Limited, the Investment Manager of the Company, provides the day-to-day management of the Company and is remunerated for these services as outlined above.

d) Equity instruments disclosures of Directors and related parties

As at the balance date, the Company's Directors and their related parties held the following interests in the Company:

Ordinary shares held Directors	Balance at 30 June 2024	Acquisitions	Disposals	Balance at 30 June 2025
Geoff Wilson	120,242	-	-	120,242
Kate Thorley	68,317	-	-	68,317
John Abernethy	10,000	-	-	10,000
Julian Gosse	-	-	-	-
	198,559	-	-	198,559

There have been no changes in shareholdings disclosed above between 30 June 2025 and the date of the report. Directors and director related entities disposed of and acquired ordinary shares in the Company on the same terms and conditions available to other shareholders. The Directors have not, during or since the end of the financial year, been granted options over unissued shares or interests in shares of the Company as part of their remuneration.

- End of Remuneration Report -

After balance date events

Since the end of the year, the Directors declared a final dividend of 5.0 cents per share, partially franked at 60%, to be paid on 28 October 2025.

No other matters or circumstances have arisen since the end of the financial year, other than already disclosed, which significantly affect or may significantly affect the operations of the Company, the results of those operations, or the state of affairs of the Company in subsequent financial years.

Future developments

The Company will continue to pursue investment activities - primarily investing in equities listed on the Australian Securities Exchange - to achieve the Company's stated objectives.

The Company's future performance is dependent on the performance of the Company's investments. In turn, the performance of these investments is impacted by investee company-specific factors and prevailing industry conditions. In addition, a range of external factors including economic growth rates, interest rates, exchange rates and macro-economic conditions impact the overall equity market and these investments.

As such, we do not believe it is possible or appropriate to accurately predict the future performance of the Company's investments and, therefore, the Company's performance.

Environmental regulation

The Company's operations are not regulated by any environmental regulation under a law of the Commonwealth or of a State or Territory of Australia.

Indemnification and insurance of Officers or Auditors

During the financial year the Company paid a premium in respect of a contract insuring the Directors of the Company, the Company Secretary and any related body corporate against liability incurred as such by a Director or Secretary to the extent permitted by the *Corporations Act 2001*. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

No indemnities have been given or insurance premiums paid during or since the end of the financial year, for any person who is or has been an auditor of the Company.

Proceedings on behalf of the Company

No person has applied for leave of the Court to bring proceedings on behalf of the Company or to intervene in any proceedings to which the Company is a party for the purpose of taking responsibility on behalf of the Company for all or any part of those proceedings.

The Company was not a party to any such proceedings during the year.

Non-audit services

During the year Pitcher Partners Sydney, the Company's auditor, performed taxation and other services for the Company. Details of the amounts paid to the auditors and their related parties are disclosed in Note 5 to the financial statements.

The Board of Directors, in accordance with advice from the Audit and Risk Committee, is satisfied that the provision of non-audit services during the year is compatible with the general standard of independence for auditors imposed by the *Corporations Act 2001*. The Directors are satisfied that the services disclosed in Note 5 did not compromise the external auditor's independence for the following reasons:

- all non-audit services are reviewed and approved by the Audit and Risk Committee to ensure they do not adversely affect the integrity and objectivity of the auditor; and
- the nature of the services provided do not compromise the general principles relating to auditor independence in accordance with the APES 110: *Code of Ethics for Professional Accountants (including Independence Standards)* set by the Accounting Professional and Ethical Standards Board.

Rounding of amounts to nearest dollar

In accordance with *ASIC Corporations (rounding in Financial/Directors' Reports) Instrument 2016/191*, the amounts in the Directors' Report have been rounded to the nearest dollar, unless otherwise indicated.

Corporate Governance Statement

The Company's Corporate Governance Statement for the year ended 30 June 2025 is provided on the Company's website at wilsonassetmanagement.com.au/wam-research/.

Auditor's Independence Declaration

A copy of the Auditor's Independence Declaration as required under Section 307C of the *Corporations Act 2001* is set out on page 44 of the Annual Report.

Signed in accordance with a resolution of the Board of Directors.

Geoff Wilson AO
Chairman

Dated this 27th day of August 2025

For personal use only

**Auditor's Independence Declaration
To the Directors of WAM Research Limited
ABN 15 100 504 541**

In relation to the independent audit of WAM Research Limited for the year ended 30 June 2025, I declare that to the best of my knowledge and belief there have been:

- (i) no contraventions of the auditor's independence requirements of the *Corporations Act 2001*; and
- (ii) no contraventions of APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)*.

Financial Report

For the year ended 30 June 2025

This financial report is for WAM Research Limited (WAM Research or the Company) for the year ended 30 June 2025.

WAM Research is a for-profit entity for financial reporting purposes under Australian Accounting Standards.

WAM Research is a listed public company, incorporated and domiciled in Australia.

The financial report was authorised for issue on 27 August 2025 by the Board of Directors.

In addition to the relevant financial information, the notes to the financial statements include a description of the material accounting policies applied, and where applicable key judgements and estimates used by management in applying these policies.

Consolidated entity disclosure statement

WAM Research is not required to prepare consolidated financial statements by Australian Accounting Standards. Accordingly, in accordance with subsection 295(3A) of the *Corporations Act 2001*, no further information is required to be disclosed in the consolidated entity disclosure statement.

Statement of Comprehensive Income ('Profit or Loss')

Notes to the *financial statements*

For the year ended 30 June 2025

1. Basis of preparation

The financial statements are general purpose financial statements, which:

- have been prepared in accordance with Australian Accounting Standards, Australian Accounting Interpretations, other authoritative pronouncements of the Australian Accounting Standards Board (AASB) and the *Corporations Act 2001*;
- have been prepared on a for-profit entity basis;
- comply with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB);
- have been prepared on an accruals basis (except for cash flow information) and are based on historical costs, with the exception of certain financial assets which have been measured at fair value;
- are presented in Australian dollars with all amounts in the Financial Report rounded to the nearest dollar, unless otherwise indicated, in accordance with *ASIC Corporations (rounding in Financial/Directors' Reports) Instrument 2016/191*;
- adopt all of the new or amended Accounting Standards and Interpretations issued by the AASB that are mandatory for the current reporting period. There was no material impact to the financial statements; and
- do not adopt any new standards or interpretations issued but not yet effective. The impact of these standards or interpretations has been assessed and the impact has been identified as not being material.

Material and other accounting policy information adopted in the preparation of these financial statements has been included with the relevant notes to the financial statements, and where applicable, key judgements and estimates used by management in applying these policies.

For personal use only

2. Other revenue

Dividend revenue is recognised when the right to receive a dividend has been established (i.e. the ex-dividend date).

All revenue is stated net of the amount of goods and services tax (GST) where applicable.

	2025 \$	2024 \$
Australian sourced dividends	4,518,928	3,725,167
Underwriting fees and other income	644,146	23,484
Interest income from cash and cash equivalents	574,313	806,418
Foreign sourced dividends	276,626	377,952
	6,014,013	4,933,021

3. Income tax

Current income tax expense

The current income tax expense is based on profit for the year adjusted for non-assessable or disallowed items, as well as franking credits (or imputation credits) received on franked dividend income from investee companies. It is calculated using tax rates that have been enacted or are substantially enacted at the reporting date (i.e. 30% corporate tax rate). Current tax liabilities/(assets) are measured at the amounts expected to be paid to/(refunded from) the relevant taxation authority in the next 12 months.

Deferred tax assets and liabilities

Deferred tax is accounted for using the balance sheet method in respect of temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. No deferred income tax will be recognised from the initial recognition of an asset or liability, excluding a business combination, where there is no effect on accounting or taxable profit or loss.

Deferred tax is calculated at the tax rates that are expected to apply to the period when the asset is realised or liability is settled (i.e. 30% corporate tax rate). Deferred tax is credited in the Statement of Comprehensive Income except where it relates to items that may be credited directly to equity, in which case the deferred tax is adjusted directly against equity.

Deferred tax assets and liabilities relating to temporary differences on financial assets or liabilities and unused tax losses are recognised, to the extent that it is probable that future taxable profit will be available against which the benefits of the deferred tax asset can be utilised.

3. Income tax (cont'd)

Deferred tax assets and liabilities (cont'd)

Current tax assets and liabilities are offset only where a legally enforceable right of set-off exists and it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur. Deferred tax assets and liabilities are only offset where:

- a legally enforceable right of set-off exists; and
- the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either:
 - i) the same taxable entity; or
 - ii) different taxable entities where it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur in future periods in which significant amounts of deferred tax assets or liabilities are expected to be recovered or settled.

Key estimates and judgements

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that future taxable profits will be available against which they can be used. The assumptions about future taxable profits require the use of judgement. Future taxable profits are determined based on the historical performance of the Company and the ability of the Company to generate positive performance even when market conditions are uncertain. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

a) Income tax expense

The prima facie tax on profit before income tax is reconciled to the income tax expense as follows:

	2025 \$	2024 \$
Prima facie tax on profit before income tax at 30% (2024: 30%)	11,723,417	13,469,309
Franking credit gross up	470,254	428,675
Franking credit offset	(1,567,514)	(1,428,916)
Foreign income tax gross up	14,646	18,191
Foreign income tax offset	(48,819)	(60,638)
	10,591,984	12,426,621

	2025 \$	2024 \$
Effective tax rate		
The effective tax rate reflects the benefit to the Company from franking credits received on dividend income during the year. The decrease in the effective tax rate from the comparative year is reflective of the higher proportion of franked dividends received compared to the operating profit before tax for the year.	27.1%	27.7%

3. Income tax (cont'd)

a) Income tax expense (cont'd)

Total income tax expense results in a change to the following:	2025 \$	2024 \$
Current tax liability	8,693,156	7,886,706
Deferred tax asset	(71,558)	2,463,552
Deferred tax liability	1,970,386	2,076,363
	10,591,984	12,426,621

b) Deferred tax assets

	2025 \$	2024 \$
Tax losses	6,257,206	11,165,639
Provisions	13,959	13,398
	6,271,165	11,179,037

Movement in deferred tax assets

Balance at the beginning of the year	11,179,037	13,591,029
Tax losses utilised	(4,908,433)	-
Credited/(charged) to the Statement of Comprehensive Income	71,558	(2,463,552)
(Charged)/credited to equity	(70,997)	51,560
At reporting date	6,271,165	11,179,037

The Directors continue to consider it probable that future taxable profits will be available against which the \$6,257,206 (2024: \$11,165,639) of income tax losses can be recovered and therefore, the deferred tax asset recognised will be able to be utilised against future income tax payable.

c) Current tax liabilities

	2025 \$	2024 \$
Balance at the beginning of the year	6,466,323	1,676,635
Current year income tax on operating profit	8,693,156	7,886,706
Income tax paid	(8,866,764)	(3,097,018)
Tax losses utilised	(4,908,433)	-
At reporting date	1,384,282	6,466,323

3. Income tax (cont'd)

d) Deferred tax liabilities

	2025 \$	2024 \$
Fair value adjustments and timing differences on receivable	4,046,749	2,076,363
	4,046,749	2,076,363

Movement in deferred tax liabilities

Balance at the beginning of the year	2,076,363	-
Charged to the Statement of Comprehensive Income	1,970,386	2,076,363
At reporting date	4,046,749	2,076,363

4. Dividends

a) Ordinary dividends paid during the year

	2025 \$	2024 \$
Final dividend FY2024: 5.0 cents per share, partially franked at 60% (30% tax rate), paid 25 October 2024 (Final dividend FY2023: 5.0 cents per share partially franked)	10,203,456	10,044,258
Interim dividend FY2025: 5.0 cents per share, partially franked at 60% (30% tax rate), paid 30 April 2025 (Interim dividend FY2024: 5.0 cents per share partially franked)	10,279,808	10,126,606
	20,483,264	20,170,864

b) Dividends not recognised at year end

	2025 \$	2024 \$
In addition to the above dividends, since the end of the year, the Directors have declared a final dividend of 5.0 cents per share, partially franked at 60% (2024: 5.0 cents per share, partially franked at 60%) which has not been recognised as a liability at the end of the financial year	10,353,608	10,203,456

c) Dividend franking account

	2025 \$	2024 \$
Balance of franking account at year end	5,430,053	262,898
Adjusted for franking credits arising from: - Estimated income tax payable	1,384,282	6,466,323
Subsequent to the reporting period, the franking account would be reduced by the proposed dividend disclosed in Note 4(b):	(2,662,356)	(2,623,746)
	4,151,979	4,105,475

4. Dividends (cont'd)

c) Dividend franking account (cont'd)

The Company's ability to continue to pay franked dividends is dependent on generating additional profits reserves and franking credits. The ability to generate franking credits is reliant on the receipt of franked dividends from investee companies and the payment of tax on realised profits.

The balance of the franking account does not include tax to be paid on unrealised investment gains (i.e. fair value movements) at the end of the reporting period. As at 30 June 2025, the deferred tax in relation to fair value movements on the financial assets held at fair value through profit and loss is in a credit balance of \$4,049,961 and this amount has been presented as a deferred tax liability (2024: \$2,150,571).

5. Auditor's remuneration

	2025 \$	2024 \$
Remuneration of the auditor for:		
Auditing and reviewing the financial report	63,418	56,076
Other services provided by a related practice of the auditor:		
Taxation services	5,225	10,780
	68,643	66,856

The Company's Audit and Risk Committee oversees the relationship with the Company's external auditor. The Audit and Risk Committee reviews the scope of the audit and review and the proposed fee. It also reviews the cost and scope of other services provided by a related entity of the audit firm, to ensure that they do not compromise independence.

6. Trade and other receivables

Trade and other receivables are initially recognised at fair value. They are subsequently stated at amortised cost, less any provision for impairment (where applicable).

As at reporting date, trade and other receivables primarily relates to outstanding trade settlements (i.e. settlement proceeds from the sale of securities that is receivable as at the balance date). Outstanding trade settlements are on the terms operating in the securities industry, which do not incur interest and require settlement within two days from the date of the transaction.

Receivables also include GST recoverable from the Australian Taxation Office due to claimable items on expenses incurred by the Company.

	2025 \$	2024 \$
Outstanding settlements	1,376,331	2,993,667
GST receivable	323,134	509,592
Underwriting fees receivable	-	10,355
	1,699,465	3,513,614

7. Financial assets

Initial recognition and measurement

Financial assets are recognised when the Company becomes party to the contractual provisions of the instrument. Trade date accounting is adopted for the purchase or sale of financial assets, which is equivalent to the date that the Company commits itself to purchase or sell the assets.

Financial instruments are initially measured at fair value. Transaction costs related to financial instruments are expensed to the Statement of Comprehensive Income immediately.

Classification and subsequent measurement

Financial assets are classified 'at fair value through profit or loss' when they are held for trading for the purpose of short-term profit taking. Realised and unrealised gains and losses arising from changes in fair value are included in the Statement of Comprehensive Income in the period in which they arise and form part of the Company's net profit as a result.

Financial assets that are not held for trading are irrevocably classified as financial assets at fair value through other comprehensive income and are recognised initially at cost. The Company has elected to present subsequent changes in the fair value of financial assets in the Statement of Comprehensive Income through the asset revaluation reserve after deducting a provision for the potential deferred capital gains tax liability.

Financial instruments are subsequently measured at fair value. The fair values of financial instruments traded in active markets are based on the closing quoted last sale prices at the end of the reporting date. For all listed or unlisted securities that are not traded in an active market, valuation techniques are applied to determine fair value, including recent arm's length transactions and reference to similar instruments. Refer to Note 15 for further details of these valuation techniques.

Financial risk management

Information regarding the Company's exposure to financial risk management risk is set out in Note 15.

Derecognition

Financial assets at fair value through profit or loss are derecognised where the contractual rights to receipt of cash flows expires or the asset is transferred to another party whereby the Company no longer has any significant continuing involvement in the risks and benefits associated with the asset.

When financial assets that are not held for trading investment are disposed, the cumulative gain or loss, net of tax thereon, is transferred from the asset revaluation reserve to the capital profits reserve.

7. Financial assets (cont'd)

	2025 \$	2024 \$
Financial assets at fair value through profit or loss	223,557,729	205,899,544
Financial assets at fair value through other comprehensive income	1,498,248	1,261,592
	225,055,977	207,161,136
Financial assets at fair value through other comprehensive income:		
- Clime Investment Management Limited	1,183,282	946,626
- Clime Private Limited	314,966	314,966
	1,498,248	1,261,592

The fair values of individual investments held at the end of the reporting period are disclosed on page 75 of the Annual Report.

8. Trade and other payables

Trade and other payables are stated at their amortised cost.

As at reporting date, trade and other payables primarily relates to outstanding trade settlements (i.e. settlement proceeds from the purchase of securities that are payable as at the balance date) and performance fee payable. Outstanding trade settlements are on the terms operating in the securities industry, which do not incur interest and require settlement within two days from the date of the transaction. Sundry payables are settled within the terms of payment offered. No interest is applicable on these accounts.

	2025 \$	2024 \$
Outstanding settlements	7,576,450	3,504,727
Performance fee payable	3,710,478	6,519,566
Management fee payable	210,018	200,239
Sundry creditors	143,635	78,724
Dividend withholding tax payable	-	125,428
	11,640,581	10,428,684

9. Issued capital

Ordinary shares are classified as equity. Incremental costs (i.e. share issue costs) directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds raised by the Company.

a) Paid-up capital

	2025 \$	2024 \$
207,072,164 ordinary shares fully paid (2024: 204,069,123)	228,959,109	225,582,567

b) Ordinary shares

	2025 \$	2024 \$
Balance at the beginning of the year	225,582,567	222,234,613
204,069,123 ordinary shares fully paid (2024: 200,885,140)		
1,527,030 ordinary shares issued on 25 October 2024 under a dividend reinvestment plan	1,696,387	-
1,476,011 ordinary shares issued on 30 April 2025 under a dividend reinvestment plan	1,680,155	-
1,646,994 ordinary shares issued on 16 October 2023 under a dividend reinvestment plan	-	1,719,208
1,536,989 ordinary shares issued on 30 April 2024 under a dividend reinvestment plan	-	1,628,746
At reporting date	228,959,109	225,582,567

Holders of ordinary shares are entitled to receive dividends as declared from time to time, and are entitled to one vote per share at shareholder meetings, with all substantive resolutions conducted by a poll. In the event of winding up of the Company, ordinary shareholders rank after creditors and share in any proceeds on winding up in proportion to the number of shares held.

c) Capital management

The Board manages the Company's capital by regularly reviewing the most efficient manner by which the Company deploys its capital. At the core of this, the Board is of the belief that shareholder value should be preserved through the management of the level of distributions to shareholders, share placements, share purchase plans, option issues and share buy-backs. These capital management initiatives will be used when deemed appropriate by the Board. There have been no changes in the strategy adopted by the Board to manage the capital of the Company during the year. The Company is not subject to any externally imposed capital requirements.

10. Reserves

The profits reserve is made up of amounts transferred from current period and prior year earnings that are preserved for future dividend payments to shareholders. The profits reserve is made up of both realised and unrealised amounts from the performance of the investment portfolio in each period. The profits reserve represents the ability of the Company to frank future dividend payments for shareholders, subject to the availability of franking credits.

There can be situations where the franking account balance including franking credits generated from the receipt of franked dividends from investee companies and the payment of tax on realised profits, may not match the profits reserve balance (which includes realised and unrealised profits).

The asset revaluation reserve is used to record increments and decrements on the revaluation of the financial assets at fair value through other comprehensive income, net of potential tax.

The capital profits reserve records gains or losses arising from the disposal of financial assets at fair value through other comprehensive income, that are designated on revenue or capital account for taxation purposes respectively.

	2025 \$	2024 \$
Profits reserve	99,948,129	87,034,298
Asset revaluation reserve	(7,492)	(173,151)
Capital profits reserve – capital account	42,194	42,194
Capital profits reserve – revenue account	(19,847,541)	(19,847,541)
	80,135,290	67,055,800

Movement in profits reserve

Balance at the beginning of the year	87,034,298	74,734,088
Transfer of profits during the year	33,397,095	32,471,074
Final dividend paid (refer to Note 4(a))	(10,203,456)	(10,044,258)
Interim dividend paid (refer to Note 4(a))	(10,279,808)	(10,126,606)
At reporting date	99,948,129	87,034,298

Movement in asset revaluation reserve

Balance at the beginning of the year	(173,151)	(52,844)
Other comprehensive income/(loss)	165,659	(120,307)
At reporting date	(7,492)	(173,151)

11. Accumulated losses

	2025 \$	2024 \$
Balance at the beginning of the year	(77,973,881)	(77,973,881)
Profit for the year attributable to members of the Company	28,486,073	32,471,074
Transfer to profits reserve	(33,397,095)	(32,471,074)
At reporting date	(82,884,903)	(77,973,881)

12. Cash and cash equivalents

Cash and cash equivalents include cash on hand and at call deposits with banks or financial institutions.

Cash at the end of the financial year as shown in the Statement of Cash Flows is reconciled to the related items in the Statement of Financial Position as follows:

	2025 \$	2024 \$
Cash at bank	10,254,501	11,782,069
	10,254,501	11,782,069

The weighted average interest rate for cash as at 30 June 2025 is 3.79% (2024: 4.47%). There were no term deposits held at 30 June 2025 (2024: nil).

13. Cash flow information

	2025 \$	2024 \$
Reconciliation of profit after tax to cash flows from operating activities:		
Profit after income tax	28,486,073	32,471,074
Fair value gains and movements in financial assets	(11,969,126)	(30,521,184)
Changes in assets and liabilities:		
Decrease/(increase) in receivables	196,813	(458,949)
Decrease in deferred tax assets	4,907,872	2,411,992
(Decrease)/increase in payables	(2,734,398)	6,446,679
(Decrease)/increase in current tax liabilities	(5,082,041)	4,789,688
Increase in deferred tax liabilities	1,899,389	2,127,923
Net cash provided by operating activities	15,704,582	17,267,223

14. Earnings per share

	2025 Cents per share	2024 Cents per share
Basic and diluted earnings per share	13.87	16.04

	2025 \$	2024 \$
Profit after income tax used in the calculation of basic and diluted earnings per share	28,486,073	32,471,074

	2025 No.	2024 No.
Weighted average number of ordinary shares outstanding during the year used in calculating basic and diluted earnings per share	205,438,038	202,480,676

There are no outstanding securities that are potentially dilutive in nature for the Company at the end of the year.

15. Financial risk management

The Company's financial instruments consist of listed and unlisted investments, trade receivables, trade payables and cash. The risks exposed to through these financial instruments are discussed below and include credit risk, liquidity risk and market risk, consisting of interest rate risk and other price risk. There have been no substantive changes in the types of risks the Company is exposed to, how these risks arise, or the Board's objective, policies and processes for managing or measuring the risks during the year.

Under delegation from the Board, MAM Pty Limited (the Investment Manager or the Manager) has the responsibility for assessing and monitoring the financial market risk of the Company. The Manager monitors these risks daily. On a formal basis the investment team meet twice weekly to monitor and manage the below risks as appropriate.

a) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge a contracted obligation. The Manager monitors the credit worthiness of counterparties on an ongoing basis and evaluates the credit quality of all new counterparties before engaging with them.

The maximum exposure to credit risk on financial assets, excluding investments of the Company which have been recognised in the Statement of Financial Position, is the carrying amount net of any expected credit losses of those assets.

The Manager is responsible for ensuring there is appropriate diversification across counterparties and that they are of a sufficient quality rating. The Manager is satisfied that the counterparties are of sufficient quality and diversity to minimise any individual counterparty credit risk. The majority of the Company's receivables arise from unsettled trades at year end which are settled two days after trade date. Engaging with counterparties via the Australian Securities Exchange facilitates the Company in both mitigating and managing its credit risk on an ongoing basis.

15. Financial risk management (cont'd)

a) Credit risk (cont'd)

Credit risk is not considered to be a major risk to the Company as the majority of cash held by the Company or in its portfolios are invested with major Australian banks and their 100% owned banking subsidiaries that have a Standard and Poor's short-term rating of A-1+ and long-term rating of AA-. The Company also holds cash with its custodian that has a Standard and Poor's short-term rating of A-1 and long-term rating of A+. There were no term deposits held as at 30 June 2025.

None of the assets exposed to credit risk are overdue or considered to be impaired.

b) Liquidity risk

Liquidity risk represents the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities.

The Company's major cash payments are the purchase of securities and dividends paid to shareholders, the levels of which are managed respectively by the Manager.

The Company's cash receipts depend upon the level of sales of securities, dividends and interest received, or other capital management initiatives that may be implemented by the Board from time to time.

The Manager monitors the Company's cash flow requirements daily by reference to known sales and purchases of securities, dividends and interest to be paid or received. Should these decrease by a material amount, the Company can alter its cash outflows as appropriate. The Company also holds a portion of its portfolio in cash sufficient to ensure that it has cash readily available to meet all payments. Furthermore, the assets of the Company are largely in the form of tradable securities which, where liquidity is available, can be sold on market when, and if required.

The table below reflects an undiscounted contractual maturity analysis for the Company's liabilities. The timing of cash flows presented in the table to settle liabilities reflects the earliest possible contractual settlement date to the reporting date.

	>1 month \$	<1 month \$	Total \$
30 June 2025			
Liabilities			
Trade and other payables	-	11,640,581	11,640,581
Total	-	11,640,581	11,640,581
	>1 month \$	<1 month \$	Total \$
30 June 2024			
Liabilities			
Trade and other payables	-	10,428,684	10,428,684
Total	-	10,428,684	10,428,684

15. Financial risk management (cont'd)

c) Market risk

Market risk is the risk that changes in market prices, such as interest rates and other market prices will affect the fair value or future cash flows of the Company's financial instruments.

By its nature, as a listed investment company that invests in tradable securities, the Company will always be subject to market risk as it invests its capital in securities which are not risk free, as the market price of these securities can fluctuate.

(i) Interest rate risk

The Company's interest bearing financial assets expose it to risks associated with the effects of fluctuations in the prevailing level of market interest rates on its financial position and cash flows. The Company however is not materially exposed to interest rate risk as it did not hold any term deposits at the end of the period. As the Company's exposure to interest rate risk is not significant, interest rate sensitivities have not been performed.

At the end of the reporting period, the Company's exposure to interest rate risk and the effective weighted average interest rate was as follows:

30 June 2025	Weighted average interest rate (% pa)	Interest bearing \$	Non-interest bearing \$	Total \$
Assets				
Cash and cash equivalents	3.79%	10,254,501	-	10,254,501
Trade and other receivables		-	1,699,465	1,699,465
Financial assets		-	225,055,977	225,055,977
Total		10,254,501	226,755,442	237,009,943

Liabilities

Trade and other payables		-	11,640,581	11,640,581
Total		-	11,640,581	11,640,581

30 June 2024	Weighted average interest rate (% pa)	Interest bearing \$	Non-interest bearing \$	Total \$
Assets				
Cash and cash equivalents	4.47%	11,782,069	-	11,782,069
Trade and other receivables		-	3,513,614	3,513,614
Financial assets		-	207,161,136	207,161,136
Total		11,782,069	210,674,750	222,456,819

Liabilities

Trade and other payables		-	10,428,684	10,428,684
Total		-	10,428,684	10,428,684

15. Financial risk management (cont'd)

c) Market risk (cont'd)

(ii) Other price risk

Other price risk is the risk that the value of an instrument will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

As the majority of the Company's investments are carried at fair value with fair value changes recognised in the Statement of Comprehensive Income, all changes in market conditions will directly affect net investment income. Due to the short-term nature of receivables and payables, the carrying amounts of these financial assets and financial liabilities approximate their fair values.

The Manager seeks to manage and reduce the other price risk of the Company by diversification of the investment portfolio across numerous stocks and multiple industry sectors. The relative weightings of the individual securities and market sectors are reviewed daily in order to manage risk. The Company does not have set parameters as to a minimum or maximum amount of the portfolio that can be invested in a single company or sector.

The Company's industry sector weighting of gross assets as at 30 June 2025 is as follows:

Industry sector	2025 %	2024 %
Consumer discretionary	28.6	26.1
Health care	15.0	15.1
Industrials	13.1	16.6
Financials	12.1	8.4
Communication services	10.7	7.8
Information technology	6.9	7.1
Consumer staples	5.4	5.4
Materials	2.5	2.4
Real estate	1.6	3.7
Energy	1.1	1.3
Utilities	1.1	0.7
Total	98.1	94.6

Securities representing over 5 per cent of the gross assets of the Company as at 30 June 2025 are set out below:

Company name	2025 %
Tuas Limited	8.1
Maas Group Holdings Limited	6.1
G8 Education Limited	5.5

Securities representing over 5 per cent of the gross assets of the Company as at 30 June 2024 are set out below:

Company name	2024 %
Tuas Limited	7.8
G8 Education Limited	5.0

15. Financial risk management (cont'd)

c) Market risk (cont'd)

(ii) Other price risk (cont'd)

Sensitivity analysis

For investments held by the Company at the end of the reporting period, a sensitivity analysis was performed relating to its exposure to other price risk. This analysis demonstrates the effect on current year net assets after tax as a result of a reasonably possible change in the risk variable. The sensitivity assumes all other variables remain constant.

Investments represent 98.1% (2024: 94.6%) of gross assets at year end. At reporting date, if the fair value of each of the investments within the portfolio changed by 5%, the impact on the Company's profit or loss after tax would have been an increase/decrease by \$7,824,521 (2024: \$7,206,484) and the impact on the Company's total comprehensive income and equity would have been an increase/decrease by \$7,876,959 (2024: \$7,250,640). This would result in the 30 June 2025 net asset backing after tax moving by 3.8 cents per share (2024: 3.6 cents per share).

d) Financial instruments measured at fair value

AASB 13: *Fair Value Measurement* requires the disclosure of fair value information using a fair value hierarchy reflecting the significance of the inputs in making the measurements. The fair value hierarchy consists of the following levels:

Level 1: Quoted prices in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Included within Level 1 of the hierarchy are listed investments. The fair values of these financial assets have been based on the closing quoted last sale prices at the end of the reporting period, excluding transaction costs. Included within Level 2 of the hierarchy is an unlisted investment and an initial public offering. The unlisted investment has been valued using the last closing price to determine fair value. The investment in the initial public offering has been valued at cost.

There were no transfers between Level 1 and Level 2 during the year (2024: nil).

	Level 1 \$	Level 2 \$	Level 3 \$	Total \$
30 June 2025				
Financial assets at fair value through profit or loss	219,756,134	3,801,595	-	223,557,729
Financial assets at fair value through comprehensive income	1,183,282	314,966	-	1,498,248
Total	220,939,416	4,116,561	-	225,055,977
	Level 1 \$	Level 2 \$	Level 3 \$	Total \$
30 June 2024				
Financial assets at fair value through profit or loss	205,899,544	-	-	205,899,544
Financial assets at fair value through comprehensive income	946,626	314,966	-	1,261,592
Total	206,846,170	314,966	-	207,161,136

16. Investment transactions

The total number of contract notes that were issued for transactions in securities during the financial year was 5,379 (2024: 4,688). Each contract note could involve multiple transactions. The total brokerage paid on these contract notes was \$1,444,284 (2024: \$1,209,136).

17. Segment reporting

The Company engages in investing activities, including cash, term deposits and equity investments. It has no reportable operating segments.

18. Capital commitments

There were no capital commitments for the Company as at 30 June 2025 (2024: nil).

19. Contingent liability

There were no contingent liabilities for the Company as at 30 June 2025 (2024: nil).

20. Key management personnel compensation

The names and position held of the Company's key management personnel (including Directors) in office at any time during the financial year are:

- Geoff Wilson AO Chairman
- Kate Thorley Director
- John Abernethy Director
- Julian Gosse Director

a) Remuneration

There are no executives that are paid by the Company. MAM Pty Ltd, the Investment Manager of the Company, provides the day-to-day management of the Company and is remunerated for these services as outlined in Note 21.

Information regarding individual Directors' remuneration is provided in the Remuneration Report of the Directors' Report on pages 38 to 40, as required by *Corporations Regulation 2M.3.03 and 2M.6.04*.

	Short-term employee benefits Directors' fees \$	Post-employment benefits Superannuation \$	Total \$
Total Directors remuneration paid by the Company for the year ended 30 June 2025	74,844	5,156	80,000
Total Directors remuneration paid by the Company for the year ended 30 June 2024	75,045	4,955	80,000

20. Key management personnel compensation (cont'd)

b) Shareholdings

At 30 June 2025, the Company's key management personnel and their related parties held the following interests in the Company:

Ordinary shares held Directors	Balance at 30 June 2024	Acquisitions	Disposals	Balance at 30 June 2025
Geoff Wilson	120,242	-	-	120,242
Kate Thorley	68,317	-	-	68,317
John Abernethy	10,000	-	-	10,000
Julian Gosse	-	-	-	-
	198,559	-	-	198,559

At 30 June 2024, the Company's key management personnel and their related parties held the following interests in the Company:

Ordinary shares held Directors	Balance at 30 June 2023	Acquisitions	Disposals	Balance at 30 June 2024
Geoff Wilson	120,242	-	-	120,242
Kate Thorley	68,317	-	-	68,317
John Abernethy	10,000	-	-	10,000
Julian Gosse	-	-	-	-
	198,559	-	-	198,559

Directors and Director related entities disposed of and acquired ordinary shares in the Company on the same terms and conditions available to other shareholders. The Directors have not, during or since the end of the financial year, been granted options over unissued shares or interests in shares of the Company as part of their remuneration.

21. Related party transactions

All transactions with related parties during the year were made on normal commercial terms and conditions and at market rates.

The Company has an investment management agreement with MAM Pty Limited, part of the Wilson Asset Management Group. Geoff Wilson is the Director of MAM Pty Limited, the entity appointed to manage the investment portfolio of WAM Research. Entities associated with Geoff Wilson hold 100% of the issued shares of MAM Pty Limited. In its capacity as the Manager, and in accordance with the investment management agreement, MAM Pty Limited was paid a management fee of 1% p.a. (plus GST) of the value of the portfolio amounting to \$2,571,310 inclusive of GST (2024: \$2,204,432). As at 30 June 2025, the balance payable to the Manager was \$210,018 inclusive of GST (2024: \$200,239).

21. Related party transactions (cont'd)

In addition, MAM Pty Limited is eligible to be paid a performance fee, being 20% (plus GST) in circumstances where:

- the level of the S&P/ASX All Ordinaries Accumulation Index has increased over that period, the amount by which the value of the portfolio exceeds this increase; or
- the S&P/ASX All Ordinaries Accumulation Index has decreased over that period, the amount of the increase in value of the portfolio.

No performance fee is payable in respect of any performance period where the value of the portfolio has decreased over that period.

For the year ended 30 June 2025, a performance fee of \$3,710,478 inclusive of GST was payable to MAM Pty Limited (2024: \$6,519,566).

Wilson Asset Management (International) Pty Limited has a service agreement in place with WAM Research to provide accounting and company secretarial services on commercial terms. For the year ended 30 June 2025, the fee for accounting services amounted to \$68,750 inclusive of GST (2024: \$55,000) and the fee for company secretarial services amounted to \$23,650 inclusive of GST (2024: \$19,800). Entities associated with Geoff Wilson hold 100% of the issued shares of Wilson Asset Management (International) Pty Limited.

No Director has received or become entitled to receive a benefit (other than those detailed above) by reason of a contract made by the Company or a related company of the Director or with a firm of which they are a member or with a company in which they have substantial financial interest.

22. Events subsequent to reporting date

Since the end of the year, the Directors declared a final dividend of 5.0 cents per share, partially franked at 60%, to be paid on 28 October 2025.

No other matters or circumstances have arisen since the end of the financial year, other than already disclosed, which significantly affect or may significantly affect the operations of the Company, the results of those operations, or the state of affairs of the Company in subsequent financial years.

Directors' Declaration

The Directors of WAM Research Limited declare that:

- 1) The financial statements as set out in pages 45 to 68 and the additional disclosures included in the Directors' Report designated as "Remuneration Report", as set out on pages 38 to 40, are in accordance with the *Corporations Act 2001*, including:
 - a) complying with Australian Accounting Standards, which, as stated in Note 1 to the financial statements, constitutes compliance with International Financial Reporting Standards (IFRS), the *Corporations Regulations 2001* and other mandatory professional reporting requirements; and
 - b) giving a true and fair view of the financial position of the Company as at 30 June 2025 and of its performance, as represented by the results of the operations and the cash flows, for the year ended on that date.
- 2) The Directors have been given the declarations required by Section 295A of the *Corporations Act 2001* from the Chief Executive Officer and Chief Financial Officer of the Manager, MAM Pty Limited.
- 3) At the date of this declaration, in the Directors' opinion there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.
- 4) The consolidated entity disclosure statement required by subsection 295(3A) of the *Corporations Act 2001*, as set out on page 45, is true and correct.

Signed in accordance with a resolution of the Board of Directors.

Geoff Wilson AO
Chairman

Dated this 27th day of August 2025

**Independent Auditor's Report
To the Members of WAM Research Limited
ABN 15 100 504 541****Report on the Audit of the Financial Report***Opinion*

We have audited the financial report of WAM Research Limited ("the Company"), which comprises the statement of financial position as at 30 June 2025, the statement of comprehensive income, the statement of changes in equity and the statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information, the consolidated entity disclosure statement, and the Directors' declaration.

In our opinion, the accompanying financial report of WAM Research Limited is in accordance with the *Corporations Act 2001*, including:

- i. giving a true and fair view of the Company's financial position as at 30 June 2025 and of its financial performance for the year then ended; and
- ii. complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

Basis for Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Company in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* ("the Code") that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the Directors of the Company, would be in the same terms if given to the Directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

<i>Key audit matter</i>	<i>How our audit addressed the matter</i>
Existence and Valuation of Financial Assets Refer to Note 7: Financial assets	
<p>We focused our audit effort on the existence and valuation of the Company's financial assets as they represent the most significant driver of the Company's Net Tangible Assets and Profit.</p> <p>The Company's investments are considered to be non-complex in nature with fair value based on readily observable data from the ASX or other observable markets.</p> <p>Consequently, these investments are disclosed as either "Level 1" (i.e. where the valuation is based on quoted prices in active markets) or "Level 2" (i.e. where key inputs to valuation are based on other observable inputs) under Australian Accounting Standards.</p>	<p>Our procedures included, amongst others:</p> <ul style="list-style-type: none"> ▪ Obtaining an understanding of and evaluating the design and implementation of the investment management processes and controls; ▪ Reviewing and evaluating the independent auditor's report on the design and operating effectiveness of internal controls (ASAE 3402 Assurance Reports on Controls at a Service Organisation) for the Custodian; ▪ Obtaining confirmation of the investment holdings directly from the Custodian; ▪ Assessing and recalculating the Company's valuation of individual investment holdings using independent observable pricing sources and inputs; and ▪ Assessing the adequacy of disclosures in the financial statements.

Key Audit Matters (Continued)

<i>Key audit matter</i>	<i>How our audit addressed the matter</i>
Accuracy of Management and Performance Fees Refer to Note 8: Trade and other payables and Note 21: Related party transactions	
<p>We focused our audit effort on the accuracy of management and performance fees as they are significant expenses of the Company and their calculation requires adjustments and key inputs. Adjustments include company dividends, tax payments, capital raisings, capital reductions and other relevant expenses. Key inputs include the value of the portfolio and application of the correct fee percentage in accordance with the Investment Management Agreement between the Company and the Investment Manager.</p> <p>In addition, to their quantum, as these transactions are made with related parties, there are additional inherent risks associated with these transactions, including the potential for these transactions to be made on terms and conditions more favourable than if they had been with an independent third-party.</p>	<p>Our procedures included, amongst others:</p> <ul style="list-style-type: none"> ▪ Obtaining an understanding of and evaluating the design and implementation of the processes and controls for calculating the management and performance fees; ▪ Making enquiries with the Investment Manager and those charged with governance with respect to any significant events during the period and associated adjustments made as a result, in addition to reviewing ASX announcements and Board meeting minutes; ▪ Testing of adjustments such as company dividends, tax payments, capital raisings, capital reductions as well as any other relevant expenses used in the calculation of management and performance fees; ▪ Testing of key inputs including the value of the portfolio and application of the correct fee percentage in accordance with our understanding of the Investment Management Agreement; and ▪ Assessing the adequacy of disclosures made in the financial statements.

Other Information

The Directors are responsible for the other information. The other information comprises the information included in the Company's Annual Report for the year ended 30 June 2025, but does not include the financial report and our auditor's report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Report

The Directors of the Company are responsible for the preparation of:

- a) the financial report (other than the consolidated entity disclosure statement) that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001*; and
- b) the consolidated entity disclosure statement that is true and correct in accordance with the *Corporations Act 2001*; and

for such internal controls as the Directors determine is necessary to enable the preparation of:

- (i) the financial report (other than the consolidated entity disclosure statement) that gives a true and fair view and is free from material misstatement, whether due to fraud or error; and
- (ii) the consolidated entity disclosure statement that is true and correct and is free of misstatement, whether due to fraud or error.

In preparing the financial report, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with the Australian Auditing Standards, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

Auditor's Responsibilities for the Audit of the Financial Report (Continued)

- Evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Directors, we determine those matters that were of most significance in the audit of the financial report of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on the Remuneration Report*Opinion on the Remuneration Report*

We have audited the Remuneration Report included in pages 38 to 40 of the Directors' Report for the year ended 30 June 2025. In our opinion, the Remuneration Report of WAM Research Limited, for the year ended 30 June 2025, complies with section 300A of the *Corporations Act 2001*.

Responsibilities

The Directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.

Glossary

Term	Definition
Benchmark	A standard against which performance can be measured, usually an index that averages the performance of companies in a stock market or a segment of the market.
Dividend coverage	<p>Dividend coverage represents the number of years the Company can maintain the current full year dividend payment paid semi-annually from the current level of profits reserve.</p> <p><i>This is calculated as follows: Profits reserve ÷ annual dividend amount</i></p>
Dividend yield	<p>The annual dividend amount expressed as a percentage of the share price at a certain point in time.</p> <p><i>This is calculated as follows: Annual dividend amount per share ÷ share price</i></p>
Franking credits	Franking credits (also known as imputation credits) are tax credits attached to franked dividends that companies distribute to their shareholders. These credits represent the tax the company has already paid on its profits, which helps to avoid double taxation of those profits once distributed to shareholders. Shareholders can use franking credits to offset their income tax liabilities.
Grossed-up dividend yield	<p>Grossed-up dividend yield includes the value of franking credits and is based on the corporate tax rate (generally 30.0%), assuming the dividend is partially franked.</p> <p><i>This is calculated as follows:</i> <i>Annual dividend yield % + [annual dividend yield % x franking % x (the corporate tax rate of 30.0% ÷ (1 – the corporate tax rate of 30.0%))]</i></p>
Investment portfolio performance	Investment portfolio performance measures the growth of the underlying portfolio of investments and cash before expenses, fees and taxes, to compare to the relevant benchmark which is also before expenses, fees and taxes.
Listed investment company (LIC)	LICs are corporate entities in a 'company' structure providing a permanent and stable closed-end pool of capital, established for the purpose of investing in a portfolio of securities or investments on behalf of shareholders. LICs are listed on an exchange, which in Australia is primarily the Australian Securities Exchange (ASX). Each company on the ASX has an ASX code, also known as a 'ticker'.
Management fee	Management fee means the fee payable to the Investment Manager in return for its duties as Investment Manager of the portfolio. The Investment Manager is entitled to be paid monthly a management fee equal to 0.0833334% per month or 1% per annum (plus GST) of the value of the portfolio (calculated on the last business day of each month and paid at the end of each month in arrears) in accordance with the Investment Management Agreement (IMA).
Net tangible assets (NTA)	The aggregate of a company's assets (i.e. cash and investments) less its liabilities and current and deferred income tax. The NTA represents the value of the company and is announced on the ASX to shareholders each month.

Term	Definition
NTA before tax	The NTA of a company, exclusive of current and deferred income tax assets or liabilities. The NTA before tax represents the investment portfolio of the Company, i.e. cash and investments, less any associated liabilities excluding tax and is the most comparable figure for a LIC to an exchange traded fund (ETF) or managed fund.
NTA after tax	The NTA of a company, inclusive of current and deferred income tax assets or liabilities.
Performance fee	<p>Performance fee means the fee payable to the Investment Manager under the IMA. The Investment Manager is eligible to be paid a performance fee, being 20% (plus GST) in circumstances where:</p> <ul style="list-style-type: none"> the level of the S&P/ASX All Ordinaries Accumulation Index has increased over that period, the amount by which the value of the portfolio exceeds this increase; or the S&P/ASX All Ordinaries Accumulation Index has decreased over that period, the amount of the increase in the value of the portfolio. <p>No performance fee is payable in respect of any performance period where the value of the portfolio has decreased over the period.</p>
Profits reserve	<p>The profits reserve is made up of amounts transferred from current and retained earnings that are preserved for future dividend payments. The profits reserve forms part of the NTA of the company and is invested in the market. The profits reserve is an accounting entry only that quarantines the profits of the LIC for future dividend payments. We convert the profits reserve amount into dividend years coverage for ease of seeing how sustainable the current dividend amount is. The ability to frank a dividend is dependent on the availability of franking credits which are generated from the receipt of franked dividends from investee companies and the payment of tax on realised profits.</p> <p>There can be situations where the franking account balance including franking credits generated from the receipt of franked dividends from investee companies and the payment of tax on realised profits, may not match the profits reserve balance (which includes realised and unrealised profits).</p>
Share price premium or discount	<p>LIC's shares are traded on the ASX and a LIC has a fixed amount of capital. At times, the LIC's share price can fluctuate above or below its NTA value. When the share price is above the NTA of the company, the LIC is trading at a premium to NTA. When the share price is below the NTA, the LIC is trading at a discount to NTA.</p> <p><i>This is calculated as follows: $(\text{Share price} - \text{NTA before tax}) \div \text{NTA before tax}$</i></p>
S&P/ASX All Ordinaries Accumulation Index	The S&P/ASX All Ordinaries Accumulation Index tracks the 500 largest companies listed on the ASX according to their market capitalisation. This Index assumes that dividends are reinvested and measures both growth and dividend income.
S&P/ASX Small Ordinaries Accumulation Index	The S&P/ASX Small Ordinaries Accumulation Index is comprised of companies included in the S&P/ASX 300 Index, but not in the S&P/ASX 100 Index. This Index assumes that dividends are reinvested and measures both growth and dividend income. The S&P/ASX Small Ordinaries Accumulation Index is used as a benchmark for small-cap Australian equity portfolios.

Term	Definition
Three key measures of a LIC's performance	The three key measures crucial to the evaluation of a LIC's performance are: investment portfolio performance, NTA growth and total shareholder return.
Total shareholder return (TSR)	<p>Total share price return to shareholders, assuming all dividends received were reinvested without transaction costs and the compounding effect over the period. This measure is calculated before and after the value of franking credits attached to dividends paid to shareholders.</p> <p><i>This is calculated as follows:</i></p> <p><i>(Closing share price – starting share price + dividends paid + franking credits) ÷ starting share price</i></p> <p><i>Note: the TSR reported in the Annual Report and media release is calculated monthly, using the above formula, and includes the effect of compounding over the period.</i></p>
