Foreign currency reserve

The reserve is used to recognise exchange differences arising from the translation of the financial statements of foreign operations to Australian dollars. It is also used to recognise gains and losses on hedges of the net investments in foreign operations.

Option reserve

The reserve is used to recognise the value of equity benefits provided to employees, directors and other parties as part of their remuneration and compensation for services.

Note 10. Earnings per share (continued)

	Cents	Cents
Basic earnings per share	(0.769)	(1.834)
Diluted earnings per share	(0.769)	(1.834)

The amount of the dilution is the average market price of ordinary shares during the period minus the issue price. Therefore, to calculate diluted earnings per share, potential ordinary shares are treated as consisting of both the following:

- a contract to issue a certain number of the ordinary shares at their average market price during the period. Such ordinary shares are assumed to be fairly priced and to be neither dilutive nor antidilutive. They are ignored in the calculation of diluted earnings per share.
- a contract to issue the remaining ordinary shares for no consideration. Such ordinary shares generate no proceeds and have no effect on profit or loss attributable to ordinary shares outstanding. Therefore, such shares are dilutive and are added to the number of ordinary shares outstanding in the calculation of diluted earnings per share.

added to the number of ordinary shares outstanding in the calculation of diluted earnings per share.

As the consolidated entity is in a loss position at the end of the financial year, the options and performance rights on issue are not considered to be dilutive.
