Lendlease prices S\$400m hybrid securities

Lendlease today announced it has successfully priced a S\$400 million issue of perpetual subordinated hybrid securities to wholesale investors in the Singapore dollar fixed income market, with the offer oversubscribed.

Pricing has been set at a fixed distribution rate of 3.90% per annum until the first optional redemption date in September 2030.

Net proceeds will be used to repay existing debt and for general corporate purposes.

This transaction represents an important component of the Group's ongoing capital management strategy, enhancing financial flexibility and broadening funding sources as Lendlease continues to execute on its corporate strategy and progresses planned capital recycling initiatives.

The Singapore dollar issue complements Lendlease's broader activities in the region, including the A\$3.4 billion development of Comcentre in Singapore, due for completion in FY28.

The issue also provides flexibility as the Group seeks to realign the currency mix of its funding sources, with ~A\$600 million of US\$ denominated financing maturing in May 2026 and ~A\$350m of S\$ denominated financing maturing in April 2027.

The hybrid securities are expected to be classified as equity for accounting purposes. The key terms of the securities are attached to this release.
