Green360 Technologies Limited's shares are listed on the Australian Securities

Exchange (ASX code: GT3)

www.g360tech.au

Corporate Governance Statement www.g360tech.au/corporate-governance/

The Directors present their report, together with the financial statements, on the consolidated entity (referred to hereafter as the 'Group') consisting of Green360 Technologies Limited (referred to hereafter as the 'Green360' or the 'Company') and the entities it controlled at the end of, or during, the year ended 30 June 2025. The Company's name was changed from Suvo Strategic Minerals Limited to Green360 Technologies Limited on 7 March 2025.

#### **Directors**

The following persons were Directors of Green360 during the whole of the financial year and up to the date of this report, unless otherwise stated:

Mr Aaron Banks Executive Chairman
Mr Mark Pensabene Non-Executive Director

Mr Peter Trinder Non-Executive Director (appointed 25 November 2024)
Mr Darren Hedley Non-Executive Director (appointed 6 August 2025)
Mr Oliver Barnes Non-Executive Director (resigned 25 November 2024)

### **Principal activities**

The principal activities of the Group during the period were refined kaolin production in Victoria and commercialisation of lower carbon cement and concrete formulations.

### **Review of operations**

During the financial year ended 30 June 2025, the Company generated \$13.28 million in turnover and recognised a gross profit from operations of \$0.66 million (+344.8% compared to prior corresponding period).

The Company sold a total of 22,074 tonnes during the financial year, an increase from 19,842 tonnes in the prior year. This volume growth highlights the continued expansion of Pittong's customer base and the effectiveness of the Company's commercial strategy in targeting high-value applications across diverse end markets.

Operationally, Pittong achieved a positive EBITDA of \$0.14 million, compared with a loss of \$1.13 million in the previous financial year. This \$1.27 million turnaround, representing a 112% year-on-year improvement, highlights the effectiveness of management's focus on margin enhancement, cost discipline, and operational efficiency across the site.

These results were further supported by successful product development initiatives, entry into new markets, and strategic customer engagement efforts designed to drive increased offtake from Pittong and more effectively leverage the plant's manufacture production capacity. Together, these factors have positioned Pittong for sustained operational and financial performance, while laying the foundation for long-term growth in both primary and value-added kaolin products.

During the financial year ended 30 June 2025, the Company also invested in research and development activities to commercialise lower carbon cement binders and concrete products, utilising kaolin and other waste-derived industrial by-products. This was aided by the incorporation of a joint venture with PERMAcast, one of Australia's largest precast concrete manufacturers and a key commercial partner.

Green360 continues the process of testing various lower carbon cement and concrete formulations with varying feedstock materials, assessing suitability for different applications and determining the best route for potential commercialisation.

### Significant changes in the state of affairs

There were no significant changes in the state of affairs of the Group during the financial year.

### Matters subsequent to the end of the financial year

On 6 August 2025, Mr Darren Hedley was appointed as a Non-Executive Director of the Company.

On 11 August 2025, the Company announced it had secured firm commitments from institutional and sophisticated investors to raise \$4.0 million before costs. A total of 146,909,090 Placement shares were issued under the Company's Listing Rule 7.1 placement capacity (Tranche 1). The remaining 34,909,091 shares, to be allocated to a single institution, are subject to shareholder approval at the general meeting scheduled for 1 October 2025.

On 4 September 2025, the Company announced that after 4 years with the Company, Mr Bojan Bogunovic had resigned as Chief Executive Officer. As agreed with the Board to enable a smooth transition, Bojan's resignation will become effective on 31 October 2025.

Apart from matters discussed above, no other matter or circumstance has arisen since 30 June 2025 that has significantly affected, or may significantly affect the Group's operations, the results of those operations, or the Group's state of affairs in future financial years.

### ikely developments and expected results of operations

The Group intends to continue its exploration, development, commercialisation and production activities on its existing operations and projects and to acquire further suitable projects as opportunities arise.

### nvironmental regulation

The Group is subject to and is compliant with all aspects of environmental regulation of its exploration and mining activities. The Directors are not aware of any environmental law that is not being complied with.

### Material business risks

### Development and commercialisation of the Company's technology

The success of the Company will depend upon the Company's ability to further develop and commercialise its technology and intellectual property. A failure to successfully develop and commercialise the technology could lead to a loss of opportunities and adversely impact the Company's operating results and financial position.

### **Intellectual Property**

The success of the Company, in part, depends on its continued ability to protect its intellectual property and use any trademarks to increase brand awareness. The Company will depend on its intellectual property to protect its brand and trade secrets, and any pending patents on its products and production processes. In the event the Company is unable to protect its intellectual property adequately, the value of the Company's products and brands could be adversely affected. This may further impact the overall business, with respect to its financial position and overall profitability and operational output.

### Exploration and development

The Company's mining tenements are at various stages of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings. There can be no assurance that future exploration of these tenements, or any other mineral tenements that may be acquired in the future, will result in the discovery of an economic resource. Even where an apparently viable resource is identified, there is no guarantee that it can be economically exploited.

### Staffing and reliance on key management

The Company relies on the experience and knowledge of key members of its staff. In the event that key personnel leave and the Company is unable to recruit suitable replacements, such loss could have a materially adverse effect on the Company.

### Capital and funding requirements

The Company is not yet at the stage where it is generating positive cash flows at the group level. Further, no assurance can be given that the Company will become profitable in the future. Accordingly, the Company may require additional equity or debt funding in the short, medium or long term. The ability of the Company to access funding is never certain and is dependent on a multitude of factors, including the macro-economic conditions in Australia and overseas.

### Production, operations and supply chain

Green360 aims to have reliable operational performance to allow it to deliver on its operational objectives and satisfy its obligations to customers, regulators and communities. Supply chains have an influence on the way the Company operates and the results it generates. The Company relies on various key customers, supplier relationships and contractors to conduct various aspects of its operations.

### Demand, product pricing and offtake agreements

Green360 continues to build relationships with its customers and has underpinned its production with geographically diverse offtake agreements with various pricing mechanisms.

#### **Environment, climate change and natural events**

Green360's hydrous kaolin operational activities have the potential to impact the environment and require proactive management to minimise any potential impact to water resources, air quality and biodiversity. Climate change has the potential to impact the frequency, intensity, and likelihood of extreme events that could impact people's safety, wellbeing, security and key operating infrastructure.

### **Poture growth opportunities**

Green360 endeavours to improve its return on investments and create shareholder value by carefully evaluating organic and inorganic growth and investment opportunities. The Company expects this risk may increase with the increased likelihood of growth and investment opportunities.

### Information on directors

Mame: Aaron Banks

itle: Executive Chairman (appointed 1 May 2024), Non-Executive Chairman (resigned 1

May 2024)

Experience and expertise: Aaron Banks is a specialist business consultant with over 20 years' experience in

contract negotiations and business development including senior roles in sales, marketing and construction management. In 2015 as founder and Managing Director of Australian Silica Pty Ltd, Mr Banks discovered one of the largest high grade silica sand resources in the world. Whilst on the Board of Australian Silica he successfully negotiated the sale of the Muchea Silica Sand Project to Ventnor Resources Limited which pivoted the former base metals explorer to the emerging silica sand producer known today as VRX Silica Limited (ASX:VRX). In 2020 he vended his private companies into what is Green360 Technologies Limited today. Aaron has an extensive background in industrial minerals and has focused on developing emerging assets

globally.

Other current directorships: None ormer directorships (last 3 years): None Special responsibilities: None Interests in shares: 75,660,225 Interests in options: None Interests in performance rights: 22.500.000

Oliver Barnes	1	1	-	-	-	-			

<sup>&</sup>lt;sup>1</sup> Refer to Company's Corporate Governance statement.

Held: represents the number of meetings held during the time the Director held office or was a member of the relevant committee.

### Remuneration report (audited)

The remuneration report details the key management personnel remuneration arrangements for the Group, in accordance with the requirements of the Corporations Act 2001 and its Regulations.

Ley management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including all Directors.

activities of the entity, directly or indirectly, including all Directors.

The remuneration report is set out under the following main headings:

Principles used to determine the nature and amount of remuneration

Details of remuneration

Service agreements

Share-based compensation

Additional information

Additional disclosures relating to key management personnel

Trinciples used to determine the nature and amount of remuneration

The Board of Directors ('the Board') ensures that executive reward satisfies the following key criteria for good reward governance practices:

competitiveness and reasonableness
acceptability to shareholders
performance linkage / alignment of executive compensation

performance linkage / alignment of executive compensation

transparency

The Board is responsible for determining and reviewing remuneration arrangements for its directors and executives. The performance of the Group depends on the quality of its directors and executives. The remuneration philosophy is to attract. motivate and retain high performance and high-quality personnel.

In accordance with best practice corporate governance, the structure of non-executive director and executive director remuneration is separate.

#### Non-executive directors' remuneration

Fees and payments to non-executive directors reflect the demands and responsibilities of their role. Non-executive directors' fees and payments are reviewed annually by the Board. The chairman's fees are determined independently to the fees of other non-executive directors based on comparative roles in the external market. The chairman is not present at any discussions relating to the determination of his own remuneration.

ASX listing rules require the aggregate non-executive directors' remuneration be determined periodically by a general meeting. The most recent determination was at the 2016 Annual General Meeting where the shareholders approved a maximum annual aggregate remuneration of \$350,000.

#### Executive remuneration

The Group aims to reward executives based on their position and responsibility, with a level and mix of remuneration which has both fixed and variable components.

The executive remuneration has four components:

- base pay and non-monetary benefits
- short-term performance incentives
- share-based payments
- other remuneration such as superannuation and long service leave

The combination of these comprises the executive's total remuneration.

Fixed remuneration, consisting of base salary, superannuation and non-monetary benefits, are reviewed annually by the Board based on individual and business unit performance, the overall performance of the Group and comparable market remunerations.

Executives may receive their fixed remuneration in the form of cash or other fringe benefits where it does not create any additional costs to the Group and provides additional value to the executive.

The short-term incentives ('STI') program is designed to align the targets of the business units with the performance hurdles of executives. STI payments are granted to executives based on specific annual targets and key performance indicators (KPI's') being achieved.

⚠he long-term incentives ('LTI') include share-based payments. Shares are awarded to executives over a period greater than one year based on long-term incentive measures.

### Use of remuneration consultants

igcupuring the financial year ended 30 June 2025, the Group did not engage a remuneration consultant.

### Voting and comments made at the Company's 2024 Annual General Meeting ('AGM')

at the 2024 AGM, 99.66% of the votes received supported the adoption of the remuneration report for the year ended 30 June At the 2024 AGM, 99.66% of the votes received supported the adoption of the remuneration report for the year 2024. The Company did not receive any specific feedback at the AGM regarding its remuneration practices.

### **Details of remuneration**

25-Nov-2024	9-Dec-2027	nil 10,500,000
2-Dec-2024	9-Dec-2027	nil 19,500,003

### Shares issued on the exercise of options and performance rights

During the year ended 30 June 2025, no shares were issued on the exercise of options, and 1,583,333 shares were issued on the exercise of performance rights.

### Indemnity and insurance of officers

The Company has indemnified the Directors and executives of the Company for costs incurred, in their capacity as a Director or executive, for which they may be held personally liable, except where there is a lack of good faith.

During the financial year, the Company paid a premium in respect of a contract to insure the Directors and executives of the Company against a liability to the extent permitted by the Corporations Act 2001. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

### Indemnity and insurance of auditor

The Company has not, during or since the end of the financial year, indemnified or agreed to indemnify the auditor of the Company or any related entity against a liability incurred by the auditor.

During the financial year, the Company has not paid a premium in respect of a contract to insure the auditor of the Company or any related entity.

### Proceedings on behalf of the company

No person has applied to the Court under section 237 of the Corporations Act 2001 for leave to bring proceedings on behalf of the Company, or to intervene in any proceedings to which the Company is a party for the purpose of taking responsibility on behalf of the Company for all or part of those proceedings.

### Non-audit services

Details of the amounts paid or payable to the auditor for non-audit services provided during the financial year by the auditor are outlined in note 30 to the financial statements.

The Directors are satisfied that the provision of non-audit services during the financial year, by the auditor (or by another person or firm on the auditor's behalf), is compatible with the general standard of independence for auditors imposed by the Corporations Act 2001.

The Directors are of the opinion that the services as disclosed in note 30 to the financial statements do not compromise the external auditor's independence requirements of the Corporations Act 2001 for the following reasons:

all non-audit services have been reviewed and approved to ensure that they do not impact the integrity and objectivity
of the auditor; and

none of the services undermine the general principles relating to auditor independence as set out in APES 110 Code of Ethics for Professional Accountants issued by the Accounting Professional and Ethical Standards Board, including reviewing or auditing the auditor's own work, acting in a management or decision-making capacity for the Company, acting as advocate for the Company or jointly sharing economic risks and rewards.

### fficers of the company who are former partners of RSM Australia Partners

There are no officers of the Company who are former partners of RSM Australia Partners.

### Auditor's independence declaration

CA copy of the auditor's independence declaration as required under section 307C of the Corporations Act 2001 is set out immediately after this Directors' report.

### Auditor

RSM Australia Partners continues in office in accordance with section 327 of the Corporations Act 2001.

his report is made in accordance with a resolution of Directors, pursuant to section 298(2)(a) of the Corporations Act 2001.

On behalf of the directors

Aaron Banks
Executive Chairman

#### **AUDITOR'S INDEPENDENCE DECLARATION**

As lead auditor for the audit of the financial report of Green360 Technologies Limited for the year ended 30 June 2025, I declare that, to the best of my knowledge and belief, there have been no contraventions of:

- (i) the auditor independence requirements of the Corporations Act 2001 in relation to the audit; and
- (ii) any applicable code of professional conduct in relation to the audit.

### Note 1. Material accounting policy information

The material accounting policies adopted in the preparation of the financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

### New or amended Accounting Standards and Interpretations adopted

The Group has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period.

Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

### **Basis of preparation**

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') and the Corporations Act 2001, as appropriate for for-profit oriented entities. These financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board ('IASB').

### listorical cost convention

The financial statements have been prepared under the historical cost convention, except for, where applicable, the revaluation of financial assets and liabilities at fair value through profit or loss and certain classes of property, plant and equipment.

# Pritical accounting estimates

The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in note 2.

### **G**oing Concern

The financial statements have been prepared on the going concern basis, which contemplates continuity of normal business activities and the realisation of assets and discharge of liabilities in the normal course of business.

As disclosed in the financial statements, the Group incurred a loss of \$4,047,444 and had net cash outflows from operating activities of \$1,726,471 for the year ended 30 June 2025. As at that date, the Group had a cash balance of \$1,820,826.

The Directors consider it appropriate to continue to adopt the going concern basis of preparation, noting that on 11 August 2025, subsequent to the financial year end, the Company announced it had obtained firm commitments from institutional and sophisticated investors to raise \$4.0 million before costs. Of this amount, \$3.232 million has been received at the date of this report, while the shares relating to the remaining \$0.768 million are subject to shareholder approval at the general meeting scheduled for 1 October 2025.

### Parent entity information

In accordance with the Corporations Act 2001, these financial statements present the results of the Group only. Supplementary information about the parent entity is disclosed in note 34.

### **Principles of consolidation**

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of Green360 Technologies Limited ('Company' or 'Parent') as at 30 June 2025 and the results of all subsidiaries for the year then ended. Green360 Technologies Limited and its subsidiaries together are referred to in these annual financial statements as the 'Group'.

Subsidiaries are all those entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

Intercompany transactions, balances and unrealised gains on transactions between entities in the Group are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

The acquisition of subsidiaries is accounted for using the acquisition method of accounting. A change in ownership interest, without the loss of control, is accounted for as an equity transaction, where the difference between the consideration transferred and the book value of the share of the non-controlling interest acquired is recognised directly in equity attributable to the parent.

Non-controlling interest in the results and equity of subsidiaries are shown separately in the statement of profit or loss and other comprehensive income, statement of financial position and statement of changes in equity of the Group. Losses incurred by the Group are attributed to the non-controlling interest in full, even if that results in a deficit balance.

Where the Group loses control over a subsidiary, it derecognises the assets including goodwill, liabilities and non-controlling interest in the subsidiary together with any cumulative translation differences recognised in equity. The Group recognises the fair value of the consideration received and the fair value of any investment retained together with any gain or loss in profit or loss.

### perating segments

Operating segments are presented using the 'management approach', where the information presented is on the same basis as the internal reports provided to the Chief Operating Decision Makers ('CODM'). The CODM is responsible for the allocation of resources to operating segments and assessing their performance.

### oreign currency translation

As stated in the "Basis of preparation', the financial statements are presented in Australian dollars, which is Green360 echnologies Limited's functional and presentation currency.

### Foreign currency transactions

Foreign currency transactions are translated into Australian dollars using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at financial year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

### Foreign operations

The assets and liabilities of foreign operations are translated into Australian dollars using the exchange rates at the reporting date. The revenues and expenses of foreign operations are translated into Australian dollars using the average exchange rates, which approximate the rates at the dates of the transactions, for the period. All resulting foreign exchange differences are recognised in other comprehensive income through the foreign currency reserve in equity.

The foreign currency reserve is recognised in profit or loss when the foreign operation or net investment is disposed of.

#### Revenue recognition

The Group recognises revenue as follows:

#### Revenue from contracts with customers

Revenue is recognised at an amount that reflects the consideration to which the Group is expected to be entitled in exchange for transferring goods or services to a customer. For each contract with a customer, the Group: identifies the contract with a customer; identifies the performance obligations in the contract; determines the transaction price which takes into account estimates of variable consideration and the time value of money; allocates the transaction price to the separate performance obligations on the basis of the relative stand-alone selling price of each distinct good or service to be delivered; and recognises revenue when or as each performance obligation is satisfied in a manner that depicts the transfer to the customer of the goods or services promised.

Variable consideration within the transaction price, if any, reflects concessions provided to the customer such as discounts, rebates and refunds, any potential bonuses receivable from the customer and any other contingent events. Such estimates are determined using either the 'expected value' or 'most likely amount' method. The measurement of variable consideration is subject to a constraining principle whereby revenue will only be recognised to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur. The measurement constraint continues until the uncertainty associated with the variable consideration is subsequently resolved. Amounts received that are subject to the constraining principle are recognised as a refund liability.

#### Interest

Interest revenue is recognised as interest accrues using the effective interest method. This is a method of calculating the amortised cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset.

Other revenue is recognised when it is received or when the right to receive payment is established.

#### Sale of kaolin and other minerals

Sale of kaolin and other minerals is recognised at the point of sale, which is where the customer has taken delivery of the goods, the risks and rewards are transferred to the customer and there is a valid sales contract. Amounts disclosed as revenue are net of sales returns and trade discounts.

Government grants

Government grants relating to costs are deferred and recognised in profit or loss over the period necessary to match them with the costs that they are intended to compensate.

#### Income tax

The income tax expense or benefit for the period is the tax payable on that period's taxable income based on the applicable Cincome tax rate for each jurisdiction, adjusted by the changes in deferred tax assets and liabilities attributable to temporary differences, unused tax losses and the adjustment recognised for prior periods, where applicable.

Deferred tax assets and liabilities are recognised for temporary differences at the tax rates expected to be applied when the Lassets are recovered or liabilities are settled, based on those tax rates that are enacted or substantively enacted, except for:

When the deferred income tax asset or liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and that, at the time of the transaction, affects neither the accounting nor

When the taxable temporary difference is associated with interests in subsidiaries, associates or joint ventures, and the timing of the reversal can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

The carrying amount of recognised and unrecognised deferred tax assets are reviewed at each reporting date. Deferred tax assets recognised are reduced to the extent that it is no longer probable that future taxable profits will be available for the carrying amount to be recovered. Previously unrecognised deferred tax assets are recognised to the extent that it is probable that there are future taxable profits available to recover the asset.

Deferred tax assets and liabilities are offset only where there is a legally enforceable right to offset current tax assets against current tax liabilities and deferred tax assets against deferred tax liabilities; and they relate to the same taxable authority on either the same taxable entity or different taxable entities which intend to settle simultaneously.

Green360 Technologies Limited (the 'Parent') and its wholly-owned Australian subsidiaries have formed an income tax consolidated group under the tax consolidation regime. The Parent and each subsidiary in the tax consolidated group continue to account for their own current and deferred tax amounts. The tax consolidated group has applied the 'separate taxpayer within group' approach in determining the appropriate amount of taxes to allocate to members of the tax consolidated group.

In addition to its own current and deferred tax amounts, the Parent also recognises the current tax liabilities (or assets) and the deferred tax assets arising from unused tax losses and unused tax credits assumed from each subsidiary in the tax consolidated group.

Assets or liabilities arising under tax funding agreements with the tax consolidated entities are recognised as amounts receivable from or payable to other entities in the tax consolidated group. The tax funding arrangement ensures that the intercompany charge equals the current tax liability or benefit of each tax consolidated group member, resulting in neither a contribution by the head entity to the subsidiaries nor a distribution by the subsidiaries to the head entity.

#### **Discontinued operations**

A discontinued operation is a component of the Group that has been disposed of or is classified as held for sale and that represents a separate major line of business or geographical area of operations, is part of a single co-ordinated plan to dispose of such a line of business or area of operations, or is a subsidiary acquired exclusively with a view to resale. The results of discontinued operations are presented separately on the face of the statement of profit or loss and other comprehensive income.

### Current and non-current classification

Assets and liabilities are presented in the consolidated statement of financial position based on current and non-current classification.

An asset is classified as current when: it is either expected to be realised or intended to be sold or consumed in the Group's pormal operating cycle; it is held primarily for the purpose of trading; it is expected to be realised within 12 months after the reporting period; or the asset is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period. All other assets are classified as non-current.

A liability is classified as current when: it is either expected to be settled in the Group's normal operating cycle; it is held primarily for the purpose of trading; it is due to be settled within 12 months after the reporting period; or there is no inconditional right to defer the settlement of the liability for at least 12 months after the reporting period. All other liabilities are classified as non-current.

Deferred tax assets and liabilities are always classified as non-current.

#### **Section**

Cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. For the statement of cash flows presentation purposes, cash and cash equivalents also includes bank overdrafts, which are shown within borrowings in current liabilities on the statement of financial position.

### Trade and other receivables

Trade receivables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less any allowance for expected credit losses. Trade receivables are generally due for settlement within 60 to 90 days.

The Group has applied the simplified approach to measuring expected credit losses, which uses a lifetime expected loss allowance. To measure the expected credit losses, trade receivables have been grouped based on days overdue.

Other receivables are recognised at amortised cost, less any allowance for expected credit losses.

### **Contract assets**

Contract assets are recognised when the Group has transferred goods or services to the customer but where the Group is yet to establish an unconditional right to consideration. Contract assets are treated as financial assets for impairment purposes.

#### **Customer acquisition costs**

Customer acquisition costs are capitalised as an asset where such costs are incremental to obtaining a contract with a customer and are expected to be recovered. Customer acquisition costs are amortised on a straight-line basis over the term of the contract.

Costs to obtain a contract that would have been incurred regardless of whether the contract was obtained or which are not otherwise recoverable from a customer are expensed as incurred to profit or loss. Incremental costs of obtaining a contract where the contract term is less than one year is immediately expensed to profit or loss.

#### **Customer fulfilment costs**

Customer fulfilment costs are capitalised as an asset when all the following are met: (i) the costs relate directly to the contract or specifically identifiable proposed contract; (ii) the costs generate or enhance resources of the Group that will be used to satisfy future performance obligations; and (iii) the costs are expected to be recovered. Customer fulfilment costs are amortised on a straight-line basis over the term of the contract.

### Right of return assets

Right of return assets represents the right to recover inventory sold to customers and is based on an estimate of customers who may exercise their right to return the goods and claim a refund. Such rights are measured at the value at which the inventory was previously carried prior to sale, less expected recovery costs and any impairment.

### Inventories

Inventories are stated at the lower of cost and net realisable value. Cost comprises direct materials and delivery costs, direct labour, import duties and other taxes, an appropriate proportion of variable and fixed overhead expenditure based on normal operating capacity, and, where applicable, transfers from cash flow hedging reserves in equity. Costs of purchased inventory are determined after deducting rebates and discounts received or receivable.

Oost is determined on the following basis:

- a. Work in progress and finished goods on hand is valued on an average total production cost method
- b. Ore stockpiles are valued at the average cost of mining and stockpiling the ore, including haulage
- c. Raw materials are valued at average cost

Stock in transit is stated at the lower of cost and net realisable value. Cost comprises of purchase and delivery costs, net of rebates and discounts received or receivable.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

### Property, plant and equipment

Dand is measured at fair value, based on periodic valuations by external independent valuers. The valuations are undertaken more frequently if there is a material change in the fair value relative to the carrying amount. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. Increases in the carrying amounts arising on revaluation of land are credited in other comprehensive income through to the revaluation surplus reserve in equity. Any revaluation decrements are initially taken in the comprehensive income through to the revaluation surplus reserve to the extent of any previous revaluation surplus of the same asset. Thereafter the decrements are taken to profit or loss.

Buildings are stated at historical cost less accumulated depreciation and impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Plant and equipment is stated at historical cost less accumulated depreciation and impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Depreciation is calculated on a straight-line basis to write off the net cost of each item of property, plant and equipment (excluding land) over their expected useful lives as follows:

Buildings 3-40 years
Plant and equipment 2-25 years

The residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each reporting date.

Leasehold improvements are depreciated over the unexpired period of the lease or the estimated useful life of the assets, whichever is shorter.

An item of property, plant and equipment is derecognised upon disposal or when there is no future economic benefit to the Group. Gains and losses between the carrying amount and the disposal proceeds are taken to profit or loss. Any revaluation surplus reserve relating to the item disposed of is transferred directly to retained profits.

#### Right-of-use assets

A right-of-use asset is recognised at the commencement date of a lease. The right-of-use asset is measured at cost, which comprises the initial amount of the lease liability, adjusted for, as applicable, any lease payments made at or before the commencement date net of any lease incentives received, any initial direct costs incurred, and, except where included in the cost of inventories, an estimate of costs expected to be incurred for dismantling and removing the underlying asset, and restoring the site or asset.

Right-of-use assets are depreciated on a straight-line basis over the unexpired period of the lease or the estimated useful life of the asset, whichever is the shorter. Where the Group expects to obtain ownership of the leased asset at the end of the lease term, the depreciation is over its estimated useful life. Right-of use assets are subject to impairment or adjusted for any remeasurement of lease liabilities.

The Group has elected not to recognise a right-of-use asset and corresponding lease liability for short-term leases with terms of 12 months or less and leases of low-value assets. Lease payments on these assets are expensed to profit or loss as incurred.

### **Exploration and evaluation assets**

Description and evaluation expenditure in relation to separate areas of interest for which rights of tenure are current is carried forward as an asset in the statement of financial position where it is expected that the expenditure will be recovered through the successful development and exploitation of an area of interest, or by its sale; or exploration activities are continuing in area and activities have not reached a stage which permits a reasonable estimate of the existence or otherwise of economically recoverable reserves. Where a project or an area of interest has been abandoned, the expenditure incurred thereon is written off in the year in which the decision is made.

### Mining assets

Sapitalised mining development costs include expenditures incurred to develop new ore bodies to define further mineralisation in existing ore bodies, to expand the capacity of a mine and to maintain production. Mining development also includes costs transferred from exploration and evaluation phase once production commences in the area of interest.

Amortisation of mining development is computed by the units of production basis over the estimated proved and probable reserves. Proved and probable mineral reserves reflect estimated quantities of economically recoverable reserves which can be recovered in the future from known mineral deposits. These reserves are amortised from the date on which production commences. The amortisation is calculated from recoverable proven and probable reserves and a predetermined percentage of the recoverable measured, indicated and inferred resource. This percentage is reviewed annually.

Restoration costs expected to be incurred are provided for as part of development phase that give rise to the need for restoration.

### Impairment of non-financial assets

Non-financial assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount.

Recoverable amount is the higher of an asset's fair value less costs of disposal and value-in-use. The value-in-use is the present value of the estimated future cash flows relating to the asset using a pre-tax discount rate specific to the asset or cash-generating unit to which the asset belongs. Assets that do not have independent cash flows are grouped together to form a cash-generating unit.

### Trade and other payables

These amounts represent liabilities for goods and services provided to the Group prior to the end of the financial year and which are unpaid. Due to their short-term nature they are measured at amortised cost and are not discounted. The amounts are unsecured and are usually paid within 30 days of recognition.

#### **Contract liabilities**

Contract liabilities represent the Group's obligation to transfer goods or services to a customer and are recognised when a customer pays consideration, or when the Group recognises a receivable to reflect its unconditional right to consideration (whichever is earlier) before the Group has transferred the goods or services to the customer.

#### **Refund liabilities**

Refund liabilities are recognised where the Group receives consideration from a customer and expects to refund some, or all, of that consideration to the customer. A refund liability is measured at the amount of consideration received or receivable for which the Group does not expect to be entitled and is updated at the end of each reporting period for changes in circumstances. Historical data is used across product lines to estimate such returns at the time of sale based on an expected value methodology.

#### **Lease liabilities**

A lease liability is recognised at the commencement date of a lease. The lease liability is initially recognised at the present value of the lease payments to be made over the term of the lease, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Lease payments comprise of fixed payments less any lease incentives receivable, variable lease payments that depend on an index or a rate, amounts expected to be paid under residual value guarantees, exercise price of a purchase option when the exercise of the option is reasonably certain to occur, and any anticipated termination penalties. The variable lease payments that do not depend on an index or rate are expensed in the period in which they are incurred.

Dease liabilities are measured at amortised cost using the effective interest method. The carrying amounts are remeasured if there is a change in the following: future lease payments arising from a change in an index or a rate used; residual guarantee; lease term; certainty of a purchase option and termination penalties. When a lease liability is remeasured, an adjustment is made to the corresponding right-of use asset, or to profit or loss if the carrying amount of the right-of-use asset is fully written down.

### inance costs

Finance costs attributable to qualifying assets are capitalised as part of the asset. All other finance costs are expensed in the period in which they are incurred.

### Provisions

Provisions are recognised when the Group has a present (legal or constructive) obligation as a result of a past event, it is probable the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the reporting date, taking into account the risks and uncertainties surrounding the obligation. If the time value of money is material, provisions are discounted using a current pre-tax rate specific to the liability. The increase in the provision resulting from the passage of time is recognised as a finance cost.

### **Employee benefits**

#### Short-term employee benefits

Liabilities for wages and salaries, including non-monetary benefits, annual leave and long service leave expected to be settled wholly within 12 months of the reporting date are measured at the amounts expected to be paid when the liabilities are settled.

### Other long-term employee benefits

The liability for annual leave and long service leave not expected to be settled within 12 months of the reporting date are measured at the present value of expected future payments to be made in respect of services provided by employees up to the reporting date.

### Defined contribution superannuation expense

Contributions to defined contribution superannuation plans are expensed in the period in which they are incurred.

### Share-based payments

Equity-settled and cash-settled share-based compensation benefits are provided to employees.

Equity-settled transactions are awards of shares, or options over shares, that are provided to employees in exchange for the rendering of services. Cash-settled transactions are awards of cash for the exchange of services, where the amount of cash is determined by reference to the share price.

The cost of equity-settled transactions are measured at fair value on grant date. Fair value is independently determined using either the Binomial or Black-Scholes option pricing model that takes into account the exercise price, the term of the option, the impact of dilution, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the option, together with non-vesting conditions that do not determine whether the Group receives the services that entitle the employees to receive payment. No account is taken of any other vesting conditions.

The cost of equity-settled transactions are recognised as an expense with a corresponding increase in equity over the vesting period. The cumulative charge to profit or loss is calculated based on the grant date fair value of the award, the best estimate of the number of awards that are likely to vest and the expired portion of the vesting period. The amount recognised in profit or loss for the period is the cumulative amount calculated at each reporting date less amounts already recognised in previous periods.

The cost of cash-settled transactions is initially, and at each reporting date until vested, determined by applying either the Binomial or Black-Scholes option pricing model, taking into consideration the terms and conditions on which the award was granted. The cumulative charge to profit or loss until settlement of the liability is calculated as follows:

during the vesting period, the liability at each reporting details.

- during the vesting period, the liability at each reporting date is the fair value of the award at that date multiplied by the expired portion of the vesting period.
- from the end of the vesting period until settlement of the award, the liability is the full fair value of the liability at the reporting date.

All changes in the liability are recognised in profit or loss. The ultimate cost of cash-settled transactions is the cash paid to settle the liability.

Market conditions are taken into consideration in determining fair value. Therefore, any awards subject to market conditions are considered to vest irrespective of whether that market condition has been met, provided all other conditions are satisfied.

If equity-settled awards are modified, as a minimum an expense is recognised as if the modification has not been made. An additional expense is recognised, over the remaining vesting period, for any modification that increases the total fair value of the share-based compensation benefit as at the date of modification.

🧦 the non-vesting condition is within the control of the Group or employee, the failure to satisfy the condition is treated as a cancellation. If the condition is not within the control of the Group or employee and is not satisfied during the vesting period, any remaining expense for the award is recognised over the remaining vesting period, unless the award is forfeited.

If equity-settled awards are cancelled, it is treated as if it has vested on the date of cancellation, and any remaining expense is recognised immediately. If a new replacement award is substituted for the cancelled award, the cancelled and new award is treated as if they were a modification.

#### Fair value measurement

When an asset or liability, financial or non-financial, is measured at fair value for recognition or disclosure purposes, the fair value is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date; and assumes that the transaction will take place either: in the principal market; or in the absence of a principal market, in the most advantageous market.

Fair value is measured using the assumptions that market participants would use when pricing the asset or liability, assuming they act in their economic best interests. For non-financial assets, the fair value measurement is based on its highest and best use. Valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, are used, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Assets and liabilities measured at fair value are classified into three levels, using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. Classifications are reviewed at each reporting date and transfers between levels are determined based on a reassessment of the lowest level of input that is significant to the fair value measurement.

For recurring and non-recurring fair value measurements, external valuers may be used when internal expertise is either not available or when the valuation is deemed to be significant. External valuers are selected based on market knowledge and reputation. Where there is a significant change in fair value of an asset or liability from one period to another, an analysis is undertaken, which includes a verification of the major inputs applied in the latest valuation and a comparison, where applicable, with external sources of data.

#### **Issued capital**

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

### Investment in Associates

Associates are entities over which the Group has significant influence but not control. Investments in associates are accounted for using the equity method. Under the equity method, the share of the profits or losses of the associate is recognised in profit or loss and the share of the movements in equity is recognised in other comprehensive income. Investments in associates are carried in the statement of financial position at cost plus post-acquisition changes in the Group's share of net assets of the associate. Goodwill relating to the associate is included in the carrying amount of the investment and is neither amortised nor individually tested for impairment. Dividends received or receivable from associates reduce the carrying amount of the investment.

When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any unsecured Mong-term receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

The Group discontinues the use of the equity method upon the loss of significant influence over the associate and recognises (Pany retained investment at its fair value. Any difference between the associate's carrying amount, fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

Borrowings Loans and borrowings are initially recognised at the fair value of the consideration received, net of transaction costs. They are subsequently measured at amortised cost using the effective interest method.

### **Parnings per share**

### Basic earnings per share

Basic earnings per share is calculated by dividing the profit attributable to the owners of Green360 Technologies Limited, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the financial year.

### Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

### Goods and Services Tax ('GST') and other similar taxes

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the tax authority. In this case it is recognised as part of the cost of the acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the tax authority is included in other receivables or other payables in the statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the tax authority, are presented as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the tax authority.

### New Accounting Standards and Interpretations not yet mandatory or early adopted

Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet mandatory, have not been early adopted by the Group for the annual reporting period ended 30 June 2025. The Group has not yet assessed the impact of these new or amended Accounting Standards and Interpretations, with those most relevant to the Group set out below:

#### AASB 18 Presentation and Disclosure in Financial Statements

This standard is applicable to annual reporting periods beginning on or after 1 January 2027 and early adoption is permitted. The standard replaces IAS 1 'Presentation of Financial Statements', with many of the original disclosure requirements retained and there will be no impact on the recognition and measurement of items in the financial statements. But the standard will affect presentation and disclosure in the financial statements, including introducing five categories in the statement of profit or loss and other comprehensive income: operating, investing, financing, income taxes and discontinued operations. The standard introduces two mandatory sub-totals in the statement: 'Operating profit' and 'Profit before financing and income taxes'. There are also new disclosure requirements for 'management-defined performance measures', such as earnings before interest, taxes, depreciation and amortisation ('EBITDA') or 'adjusted profit'. The standard provides enhanced guidance on grouping of information (aggregation and disaggregation), including whether to present this information in the primary financial statements or in the notes. The consolidated entity will adopt this standard from 1 July 2027 and it is expected that there will be a significant change to the layout of the statement of profit or loss and other comprehensive income.

### Note 2. Critical accounting judgements, estimates and assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities (refer to the respective notes) within the next financial year are discussed below.

### Share-based payment transactions

The Group measures the cost of equity-settled transactions with employees by reference to the fair value of the equity struments at the date at which they are granted. The fair value is determined by using either the Binomial or Black-Scholes model taking into account the terms and conditions upon which the instruments were granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact profit or loss and equity. Refer to note 6 for further information.

#### Provision for impairment of inventories

The provision for impairment of inventories assessment requires a degree of estimation and judgement. Net realisable value tests are performed at least annually and represent the estimated future sales price of the product based on prevailing prices, less estimated costs to complete production and bring the product to sale.

Stockpiles are measured by estimating the number of tonnes added and removed from the stockpile, the contained tonnes based on assay data, and the estimated recovery percentage based on the expected processing method. Stockpile tonnages are verified by periodic surveys. The Group reviews the carrying value of stockpile inventories regularly to ensure that their cost does not exceed net realisable value.

#### Rehabilitation provision

A provision has been made for the present value of anticipated costs for future rehabilitation of land explored or mined. The Group's mining and exploration activities are subject to various laws and regulations governing the protection of the environment. The Group recognises management's best estimate for assets retirement obligations and site rehabilitations in the period in which they are incurred. Actual costs incurred in the future periods could differ materially from the estimates. Additionally, future changes to environmental laws and regulations, life of mine estimates and discount rates could affect the carrying amount of this provision.

### Exploration and evaluation costs

Exploration and evaluation costs are only capitalised when they are expected to be recovered either through successful development or sale of the relevant mining interest. Factors that could impact the future commercial production at the mine include the level of reserves and resources, future technology changes, which could impact the cost of mining, future legal changes and changes in commodity prices. To the extent that capitalised costs are determined not to be recoverable in the future, they will be written off in the period in which this determination is made.

Key judgements are applied in considering costs to be capitalised which includes determining expenditures directly related to these activities and allocating overheads between those that are expensed and capitalised.

#### Amortisation

The Group uses the concept of life of mine to determine the amortisation of mine properties. In determining life of mine, the Group prepares mineral resource estimation in accordance with JORC 2012, guidelines prepared by the Joint Ore Reserves Committee of The Australasian Institute of Mining and Metallurgy, Australian Institute of Geoscientists and Minerals Council of Australia. The estimate of these mineral resources, by their very nature, require judgements, estimates and assumptions. Where the mineral resources estimates need to be modified, the amortisation expense is accounted for prospectively from the date of assessment until the end of the revised mine life (for both current and future years).

#### Estimation of useful lives of assets

The Group determines the estimated useful lives and related depreciation and amortisation charges for its property, plant and equipment and finite life intangible assets. The useful lives could change significantly as a result of technical innovations or some other event. The depreciation and amortisation charge will increase where the useful lives are less than previously estimated lives, or technically obsolete or non-strategic assets that have been abandoned or sold will be written off or written down.

### Note 3. Operating segments

### Dentification of reportable operating segments

The Group is organised into one operating segment, being mining and exploration operations. This operating segment is based on the internal reports that are reviewed and used by the Board of Directors (who are identified as the Chief Operating Decision Makers ('CODM')) in assessing performance and in determining the allocation of resources.

The CODM reviews EBITDA (earnings before interest, tax, depreciation and amortisation). The accounting policies adopted for internal reporting to the CODM are consistent with those adopted in the financial statements.

The information reported to the CODM is on a monthly basis.

### Types of products and services

The principal products and services of the kaolin production operating segment are the manufacture and sale of refined kaolin in Australia and overseas.

### Major customers

During the year ended 30 June 2025 approximately \$4,446,421 (2024: \$3,563,989) of the Group's external revenue was derived from sales to two major Australian paper producers.

Operating segment information					
		Research &	Exploration	Kaolin	30 June 2025
	Corporate	Development	& Evaluation		Total
	\$	\$	\$	\$	\$
Revenue					
Sales to external customers	_	_	_	13,275,357	13,275,357

### **Options**

During the current financial year, 2,000,000 options were issued to the mortgage loan lenders. In addition, 20,833,328 free-attaching options were issued as part of the October 2024 Placement, whilst 10,000,000 options were issued to the lead manager.

For the options granted during the current financial year, the valuation model inputs used to determine the fair value at the grant date, are as follows:

Grant date	Expiry date	Exercise price	Share price at grant date	Expected volatility	Dividend yield	Risk-free interest rate	Fair value at grant date
16-Sep-2024	11-Nov-2026	\$0.06	\$0.055	74%	_	3.48%	\$0.0226
29-Oct-2024	29-Oct-2026	\$0.075	N/A - free attac	ching options			
9-Oct-2024	29-Oct-2026	\$0.075	\$0.05	68%	-	3.97%	\$0.0136

The fair value of the mortgage loan options is \$45,266 which has been recognised against borrowings on the consolidated statement of financial position. The fair value of the lead manager options is \$136,206 which has been included in share success.

Set out below is a summary of the movement in options during the financial year:

Grant date	Expiry date	Exercise price	Balance at the start of the year	Granted	Exercised	Expired/ forfeited/ other	Balance at the end of the year

Net off deferred tax liabilities	530,293	571,510
Deferred tax liabilities	-	

A potential deferred tax asset, attributable to tax loss incurred in the current period, amounts to approximately \$6,865,083 (2024: \$6,054,070) and has not been brought to account at reporting date because the Directors believe it is inappropriate to regard realisation of the deferred tax asset as probable at this point in time. This benefit will only be obtained if:

- the Group derives future assessable income of a nature and of an amount sufficient to enable the benefit from the deductions for the loss incurred;
- the Group continues to comply with the conditions for deductibility imposed by law; and
- no changes in tax legislation adversely effects the Group in realising the benefit from the deductions for the loss incurred.

Mortgage loan	992,456	1,000,000	

On 30 November 2023, the Company obtained debt funding, from private lender Tember Nominees Pty Ltd, attracting an interest rate of 10% per annum and repayable in 12 months. The Company has used its non-core asset, being freehold land it owns at Lal Lal, located in Victoria, as security against the loan. During the current year, the loan term was extended for a period of six months commencing 1 December 2024 and expiring 31 May 2025 with the pre-payment of interest required in full and calculated at a rate of 10% per annum, being \$50,000. The loan was then extended for a further six months for the subsequent period from 1 June 2025 to 30 November 2025 with the interest rate moving to 11% per annum.

<sup>&</sup>lt;sup>1</sup> This appears as nil as the value is already fully recognised within equity, in the share-based payments reserve.

#### Ordinary shares

Ordinary shares entitle the holder to participate in dividends and the proceeds on the winding up of the Company in proportion to the number of and amounts paid on the shares held. The fully paid ordinary shares have no par value and the Company does not have a limited amount of authorised capital.

On a show of hands every member present at a meeting in person or by proxy shall have one vote and upon a poll each share shall have one vote.

#### Share buy-back

There is no current on-market share buy-back.

#### Capital risk management

The Group's objective when managing capital is to safeguard its ability to continue as a going concern, so that it can provide returns for shareholders and benefits for other stakeholders and to maintain an optimum capital structure to reduce the cost of capital. Capital is regarded as total equity, as recognised in the statement of financial position, plus net debt. Net debt is calculated as total borrowings less cash and cash equivalents.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The Group would look to raise capital when an opportunity to invest in a business or company is seen as value adding relative to the current Company's share price at the time of the investment. The Group is not actively pursuing additional investments the short term as it continues to integrate and grow its existing businesses in order to maximise synergies.

The capital risk management policy remains unchanged from the 30 June 2024 Annual Report.

#### Note 26. Equity - reserves

#### Guarantees entered into by the parent entity in relation to the debts of its subsidiaries

The parent entity and some of its subsidiaries are party to a deed of cross guarantee under which each company guarantees the debts of the others.

#### Contingent liabilities

Other than those specified in note 36, the parent entity had no contingent liabilities as at 30 June 2025 (30 June 2024: \$Nil).

#### Capital commitments - Property, plant and equipment

The parent entity had committed \$Nil for property, plant and equipment as at 30 June 2025 (30 June 2024: \$Nil).

#### Material accounting policies

The accounting policies of the parent entity are consistent with those of the Group, as disclosed in note 1, except for the following:

- Investments in subsidiaries are accounted for at cost, less any impairment, in the parent entity; and
- Dividends received from subsidiaries are recognised as other income by the parent entity and its receipt may be an indicator of an impairment of the investment.

#### Note 35. Financial instruments

#### Financial risk management objectives

The Group's activities expose it to a variety of financial risks: market risk (including foreign currency risk and price risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Group. The Group uses different methods to measure different types of risk to which it is exposed. These methods include sensitivity analysis in the case of foreign exchange and other price risks and ageing analysis for credit risk.

Risk management is carried out by senior finance executives ('finance') under policies approved by the Board of Directors the Board'). These policies include identification and analysis of the risk exposure of the Group and appropriate procedures, controls and risk limits. Finance identifies, evaluates and hedges financial risks within the Group's operating units. Finance reports to the Board on a monthly basis.

#### Market risk

#### **E**oreign currency risk

The Group undertakes certain transactions (export sales) denominated in foreign currency and is exposed to foreign currency risk through foreign exchange rate fluctuations.

The Group has elected not to enter into hedging contracts as receipts in foreign currency (USD) were not material during the financial year. The Group will continue to monitor foreign currency risk and take the appropriate course of action as required.

The Group held cash of US\$389,248 as at 30 June 2025 (2024: US\$189,149).

#### Price risk

The Group is not exposed to any significant price risk.

#### Interest rate risk

The Group is exposed to interest rate risk given it has interest-bearing liabilities at 30 June 2025 of \$380,458 (2024: \$528,648). These are principal and interest payment liabilities. Monthly cash outlays of approximately \$1,800 per month are required to service the interest payments. In addition, minimum principal repayments of \$170,593 are due during the year ending 30 June 2026. As the interest-bearing liabilities are at fixed rates, an official change in interest rates will have no effect on profit before tax.

#### Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. The Group has a strict code of credit, including obtaining agency credit information, confirming references and setting appropriate credit limits. The Group obtains guarantees where appropriate to mitigate credit risk. The maximum exposure to credit risk at the reporting date to recognised financial assets is the carrying amount, net of any provisions for impairment of those assets, as disclosed in the consolidated statement of financial position and notes to the financial statements. The Group does not hold any collateral.

The Group has adopted a lifetime expected loss allowance in estimating expected credit losses to trade receivables through the use of a provisions matrix using fixed rates of credit loss provisioning. These provisions are considered representative across all customers of the Group based on recent sales experience, historical collection rates and forward-looking information that is available.

Generally, trade receivables are written off when there is no reasonable expectation of recovery. Indicators of this include the failure of a debtor to engage in a repayment plan, no active enforcement activity and a failure to make contractual payments for a period greater than 1 year.

#### Liquidity risk

Vigilant liquidity risk management requires the Group to maintain sufficient liquid assets (mainly cash and cash equivalents) to be able to pay debts as and when they become due and payable.

The Group manages liquidity risk by maintaining adequate cash reserves by continuously monitoring actual and forecast cash flows and matching the maturity profiles of financial assets and liabilities.

#### Remaining contractual maturities

The following tables detail the Group's remaining contractual maturity for its financial instrument liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the financial liabilities are required to be paid. The tables include both interest and principal cash flows disclosed as remaining contractual maturities and therefore these totals may differ from their carrying amount in the statement of financial position.

Weighted average interest rate %	1 year or less \$	Between 1 and 2 years \$	Between 2 and 5 years \$	Over 5 years	Remaining contractual maturities \$

Interest-bearing - fixed rate						
Borrowings	10.00%	1,000,000	-	-	-	1,000,000
Lease liability	5.80%	126,127	-	-	-	126,127
Interest-bearing liabilities	7.43%	192,370	192,370	208,401		593,141
Total non-derivatives		3,603,404	192,370	208,401		4,004,175

The cash flows in the maturity analysis above are not expected to occur significantly earlier than contractually disclosed above.

#### Fair value of financial instruments

Unless otherwise stated, the carrying amounts of financial instruments reflect their fair value.

#### Note 36. Contingent assets and liabilities

On 17 January 2023, the Company announced that the tenement purchase for 100% of exploration license application E70/4981, located in the Muchea region of Western Australia, was completed. As part of the consideration for the Tenement Application, the Company agreed to issue or grant (as the case may be) the following royalty interest and deferred consideration to the Vendor:

- (a) Royalty: 4% of the proceeds of gross sales from Product derived from the Tenement Application;
- (b) Deferred Consideration Shares: Subject to the following development milestones having first been satisfied, issue to the Vendor up to \$1,550,000 Shares (Deferred Consideration Shares), in the following tranches:
  - Grant of Mining License: Upon the grant of a mining license over any area the subject of the Exploration License. The number of Shares calculated by dividing \$1,150,000 by the greater of:
    - the 5 Day VWAP; and
    - \$0.15.
- ii. Grant of Mining Permit: Upon the grant of all necessary mining permits over any part of the Tenement Application, necessary to commence production (including environmental permits, water licenses, project management plans and mine closure plans), the number of Shares calculated by dividing \$400,000 by the greater of:

   The 5 Day VWAP; and
   \$0.15.

  The Deferred Consideration Shares must be issued by 21 October 2027 (5 years from the date of shareholder approval), or the rights to the Deferred Consideration Shares will large.

the rights to the Deferred Consideration Shares will lapse.

The Company has received a recovery claim from the Victorian WorkCover Authority (VWA) under section 369 of the Workplace Injury Rehabilitation and Compensation Act 2013 (Vic). The claim relates to compensation payments made to, and on behalf of, a worker alleged to have been injured on 13 April 2022 while performing duties at the Company's premises.

Since the recovery claim was received from the VWA, the worker has also pursued an impairment benefits claim, with Zassessments to date determining no compensable whole person impairment. The worker has lodged an application for conciliation in response to those findings, disputing the outcome and expanding the scope of alleged injuries. VWA's solicitors have advised that any common law claim is unlikely to be pursued until the impairment benefit issues are resolved. To date, (Right court proceedings have been issued against the Company in relation to the worker's common law claim, and the only current proceeding against the Company is the VWA recovery proceeding. The VWA proceeding has been adjourned to an administrative mention not before 6 February 2026, to allow time for the worker to resolve their impairments benefits claim.

The directors are of the opinion that, whilst the matter represents a contingent liability, no provision has been recognised as the likelihood of an outflow of resources cannot be reliably determined and the amount of any potential liability cannot be measured with sufficient reliability at this time.

Other than the above, the Group had no other contingent assets or liabilities at the current and previous reporting date.

#### **Note 37. Commitments**

Balance at 30 June 2025	992,456	380,458	353,780

#### Note 39. Deed of cross guarantee

The following entities are party to a deed of cross guarantee under which each company guarantees the debts of the others:

Green360 Technologies Limited
Watershed Enterprise Solutions Pty Ltd
Mt Marshall Kaolin Pty Ltd
Suvo Australia Pty Ltd
Suvo Minerals Australia Pty Ltd
Kaolin Australia Pty Ltd

By entering into the deed, the wholly-owned entities have been relieved from the requirement to prepare financial statements and directors' report under Corporations Instrument 2016/785 issued by the Australian Securities and Investments Commission. The above companies represent a 'Closed Group' for the purposes of the Corporations Instrument, and as there are no other parties to the deed of cross guarantee that are controlled by Green360 Technologies Limited, they also represent the 'Extended Closed Group'.

The statement of profit and loss and other comprehensive income and statement of financial position of the Closed Group are substantially the same as the consolidated entity and therefore have not been separately disclosed. Climate Tech Cement Pty Ltd is not a party to the deed of cross guarantee, it is a standalone wholly-owned subsidiary. Climate Tech Cement Pty Ltd is not a reporting entity.

As at 30 June 2025, Climate Tech Cement Pty Ltd has assets of \$33,754 (2024: nil) and has liabilities of \$605,665 (2024: \$246,719), all of which relate to amounts due to Group entities. Climate Tech Cement Pty Ltd generated no revenue, and made a loss for the year of \$325,193 (2024: \$234,327).

#### Note 40. Matters subsequent to the end of the financial year

On 6 August 2025, Mr Darren Hedley was appointed as a Non-Executive Director of the Company.

On 11 August 2025, the Company announced it had secured firm commitments from institutional and sophisticated investors to raise \$4.0 million before costs. A total of 146,909,090 Placement shares were issued under the Company's Listing Rule 7.1 placement capacity (Tranche 1). The remaining 34,909,091 shares, to be allocated to a single institution, are subject to shareholder approval at the general meeting scheduled for 1 October 2025.

On 4 September 2025, the Company announced that after 4 years with the Company, Mr Bojan Bogunovic had resigned as Chief Executive Officer. As agreed with the Board to enable a smooth transition, Bojan's resignation will become effective on 31 October 2025.

Apart from the matters discussed above, no other matter or circumstance has arisen since 30 June 2025 that has significantly affected, or may significantly affect the Group's operations, the results of those operations, or the Group's state of affairs in future financial years.

# **Director's Declaration**

In the directors' opinion:

- the attached financial statements and notes comply with the Corporations Act 2001, the Accounting Standards, the Corporations Regulations 2001 and other mandatory professional reporting requirements;
- the attached financial statements and notes comply with International Financial Reporting Standards as issued by the International Accounting Standards Board as described in note 1 to the financial statements;
- the attached financial statements and notes give a true and fair view of the Group's financial position as at 30 June 2025 and of its performance for the financial year ended on that date;
- there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable;
- At the date of this declaration, there are reasonable grounds to believe that the members of the Extended Closed Group will be able to meet any obligations or liabilities to which they are, or may become, subject by virtue of the deed of cross guarantee described in note 39 to the financial statements; and

The information disclosed in the attached consolidated entity disclosure statement is true and correct.

The directors have been given the declarations required by section 295A of the Corporations Act 2001.

Signed in accordance with a resolution of directors made pursuant to section 295(5)(a) of the Corporations Act 2001.

# INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF GREEN360 TECHNOLOGIES LIMITED

#### REPORT ON THE AUDIT OF THE FINANCIAL REPORT

#### Opinion

We have audited the financial report of Green360 Technologies Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated statement of financial position as at 30 June 2025, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information, the consolidated entity disclosure statement and the directors' declaration.

In our opinion the accompanying financial report of the Group is in accordance with the *Corporations Act 2001*, including:

- (i) giving a true and fair view of the Group's financial position as at 30 June 2025 and of its financial performance for the year then ended; and
- (ii) complying with Australian Accounting Standards and the Corporations Regulations 2001.

#### **Basis for Opinion**

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

#### How our audit addressed this matter **Key Audit Matter** Going concern - Refer to Note 1 in the financial statements

At 30 June 2025, the Group incurred a loss of \$4,047,444 and had net cash outflows from operating activities of \$1,726,471 for the year ended 30 June 2025.

The directors have prepared the financial report on the going concern basis.

We determined this assessment of going concern to be a key audit matter due to the significant judgments involved in preparing the cash flow forecast and the potential material impact of the results of management's assessment.

Our audit procedures included:

- Assessing the reasonableness of the Group's cash flow forecast;
- Checking the mathematical accuracy of management's cash flow forecast;
- Challenging the reasonableness of the assumptions used by management in the cash flow forecast by comparison to our knowledge of the business;
- Assessing the sensitivity of the key assumptions within management's cash flow forecast; and
- Assessing the disclosures in the financial report.

#### Impairment consideration relating to its Kaolin production cash generating unit

As at 30 June 2025, the Group had property, plant and equipment and mine properties amounting to \$6,588,880 capitalised in the statement of financial position relating to its Kaolin production cash generating unit (CGU).

We have considered this to be a key audit matter due to significant management's judgment involved in consideration of whether these assets are part of the CGU and if there are any indicators of impairment at the reporting date.

Our audit procedures included:

Our audit procedures included:

- Understanding the nature of property, plant and equipment and mine properties that relate to the CGU;
- Assessing management's determination of the CGU; and
- Assessing and evaluating management's assessment of whether indicators of impairment existed at the reporting date.

### Mineral interest acquisition and exploration expenditure - Refer to Note 16 in the financial statements

The Group has capitalised mineral interest acquisition and exploration expenditure with a carrying value \$3,298,398 as at 30 June 2025.

We determined this to be a key audit matter due significant management judgments involved in assessing the carrying value of the assets including:

- Determining whether the exploration and evaluation expenditure can be associated with finding specific mineral resources, and the basis on which that expenditure is allocated to an area of interest;
- Assessing whether exploration activities have reached a stage at which the existence of an economically recoverable reserves may be concluded; and
- Assessing whether any indicators impairment are present and if so, any impairment expense to be recognised.

Assessing the Group's accounting

- compliance with Accounting Standards;
- Assessing whether the rights to tenure of the areas of interest are current;
- Testing a sample of additions to supporting documentation and assessing whether the amounts capitalised during the year are in compliance with the Group's accounting policy and relate to the relevant area of interest:
- Assessing and evaluating management's assessment of whether indicators of impairment existed at the reporting date;
- Enquiring with management and reading budgets and other documentation as evidence that active and significant operations in, or relation to, the relevant area of interests will be continued in the future; and
- Assessing and evaluating management's determination that exploration activities have not yet progressed to the stage where the existence or otherwise of economically recoverable reserves may be determined.

#### Other Information

The directors are responsible for the other information. The other information comprises the information included in the Group's annual report for the year ended 30 June 2025 but does not include the financial report and the auditor's report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### Responsibilities of the Directors for the Financial Report

The directors of the Company are responsible for the preparation of:

- a. the financial report (other than the consolidated entity disclosure statement) that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001*; and
- the consolidated entity disclosure statement that is true and correct in accordance with the Corporations Act 2001, and

for such internal control as the directors determine is necessary to enable the preparation of:

- the financial report (other than the consolidated entity disclosure statement) that gives a true and fair view and is free from material misstatement, whether due to fraud or error; and
- ii. the consolidated entity disclosure statement that is true and correct and is free of misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

### Auditor's Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at: <a href="https://www.auasb.gov.au/admin/file/content102/c3/ar2\_2020.pdf">https://www.auasb.gov.au/admin/file/content102/c3/ar2\_2020.pdf</a> This description forms part of our auditor's report.

#### REPORT ON THE REMUNERATION REPORT

#### **Opinion on the Remuneration Report**

We have audited the Remuneration Report included in the directors' report for the year ended 30 June 2025.

In our opinion, the Remuneration Report of Green360 Technologies Limited, for the year ended 30 June 2025, complies with section 300A of the *Corporations Act 2001*.

#### Responsibilities

The directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.

# **Annual Mineral Resource Statement**

#### 1. Mineral Resource Estimate

A summary of the Mineral Resources at Green360 Technologies Limited's projects and operations as at 30 June 2025 is shown in Table 1 below.

Table 1 Kaolin Mineral Resources Statement (as at 30 June 2025)

	White Kaolinised	ISO Brightness %	Yield <45um	Kaolin
Category	Granite (Mt)	(457nm)	%	(Mt)
Gabbin Project (White Cloud Kaolin Project) <sup>1</sup>				
Indicated	26.9	80.4	41.3	11.1
Inferred	45.6	80.6	41.1	18.8
Total	72.5	80.5	41.2	29.9
Trawalla Deposit <sup>2</sup>				
Indicated	9.9	81.0	27.7	2.8
Inferred	2.8	79.8	28.3	8.0
<b>─</b> Total	12.7	80.8	27.8	3.6
ittong Operations³				
Indicated	3.5	81.2	35.4	1.2
Inferred	1.9	79.1	33.0	0.7
otal	5.4	80.5	34.6	1.9

The Gabbin (White Cloud Kaolin Project) Mineral Resource estimate was completed by CSA Global Pty Ltd (CSA) on behalf of the Company. The Mineral Resource estimate was announced on 25 March 2021. As no mining activity has occurred since, there has been no movement in the Mineral Resource estimate.

The Trawalla Mineral Resource estimate was completed by CSA Global Pty Ltd (CSA) on behalf of the Company. The Mineral Resource estimate was announced on 22 September 2021. As no mining activity has occurred since, there has been movement in the Mineral Resource estimate.

The Pittong Mineral Resource estimate was completed by CSA Global Pty Ltd (CSA) on behalf of the Company. The Mineral Resource estimate was announced on 1 March 2022 and has been revised to account for depletion due to mining activity which occurred during the period 1 July 2024 to 30 June 2025 by Goldfields Geological Services on behalf of the Company.

## Annual Mineral Resource Statement

#### 2. Material changes and resource statement comparison

A comparison table between 2024 and 2025 Mineral Resource Estimates for Green360 Technologies Limited's projects and operations is shown in Table 2 and Table 3 below.

#### Table 2 Kaolin Pittong Operations Mineral Resource Estimate comparison between 2024 and 2025

Estimate as at 30 June 2025:

Category	White Kaolinised Granite (Mt)	ISO Brightness % (457nm)	Yield <45um %	Kaolin (Mt)
Pittong Operations		,		, ,
Indicated	3.5	81.2	35.4	1.2
Inferred	1.9	79.1	33.0	0.7
Total	5.4	80.5	34.6	1.9

Estimate as at 30 June 2024:

	White Kaolinised	ISO Brightness %	Yield <45um	Kaolin
Category	Granite (Mt)	(457nm)	%	(Mt)
Pittong Operations				
Indicated	3.6	81.3	35.5	1.3
Inferred	1.9	79.1	33.0	0.7
Total	5.5	80.5	34.6	2.0

Competent Persons Statement - Mineral Resource Estimation

The information in this report that relates to Mineral Resources at Green360 Technologies Limited's Pittong Operations, is assed on information compiled by Mr Matthew Hernan, a Competent Person who is a Fellow and Chartered Professional of The Australasian Institute of Mining and Metallurgy and a member of Australian Institute of Geoscientists. Mr Hernan is the Principal Geologist at Goldfields Geological Services and provides independent geological consulting services to Green360 and Consulting Services to Green360 are I imited's Pittong Operations. Mr Hernan has sufficient experience that is relevant to the style of mineralisation and to the activity being undertaken to qualify as a Competent Person as defined in and Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mineral Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mineral Resources are information in the form and context in which in the formal context in which is the formal context in

project) is extracted from the report entitled "Suvo increases White Cloud kaolin resource by 84% to 72.5Mt" created on 25th March 2021 and is available to view at <a href="https://investorhub.g360tech.au/announcements/3950995">https://investorhub.g360tech.au/announcements/3950995</a>. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and, in the case of estimates of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

#### 4. Mineral Resource Governance

The Company has appropriate systems in place and suitably qualified and competent geological consultants to complete any resource estimation or review to the required standards as shown in the 2012 JORC Code Guidelines. The Quality Assurance, Sampling Systems, Assay procedures, Data Recording, Interpretation Standards and Resource Estimation Methods and other paraments as set out in Table 1 of the JORC Code 2012 Guidelines are closely followed. The mineral resources reported have been generated by independent external consultants where appropriate who are experienced in best practices in modelling and estimation methods. The consultants have also undertaken reviews of the quality and suitability of the underlying information used to determine the resource estimate.

# **Shareholder information**

The shareholder information set out below was applicable as at 22 September 2025.

#### **Substantial holders**

As at the date of this report, the Company had received substantial shareholder notices from the following shareholders:

		Ordinary shares	
D			% of total
U			shares
		Number held	issued
	MELBOURNE SECURITIES CORPORATION LTD <bv1 a="" c="" fund=""></bv1>	78,500,000 <sup>1</sup>	7.78%
	MR AARON PETER BANKS	75,660,225 <sup>2</sup>	6.54%

As per most recent notice of change of interests of substantial holder received on 8 November 2024, hence, the number of ordinary shares held does not reconcile to the twenty largest quoted equity security holders on 22 September 2025.

As per most recent notice of change of interests of substantial holder received on 22 September 2025, the number of ordinary shares held does not reconcile to the twenty largest quoted equity security holders as at 22 September 2025, as the substantial holder notice reflects holdings across multiple accounts.

### **Soting rights**

The voting rights attached to ordinary shares are set out below:

#### Ordinary shares

On a show of hands every member present at a meeting in person or by proxy shall have one vote and upon a poll each share shall have one vote.

There are no other classes of equity securities.

#### **Tenements**
