The Placement price and quantum reflect growing interest by global investors in Southern Palladium's long-term value proposition, which in our view is driven both by the high quality of the Bengwenyama project and a highly supportive market outlook for PGM prices. With the completion of this Placement, we are pleased to welcome three new global institutional investors. The accompanying Share Purchase Plan will also give retail investors the opportunity to acquire additional shares at the Placement price. We believe the completion of this capital raise future proofs Southern Palladium and the Company is now well positioned to execute our mine development strategy and unlock*
