3 Details and effect of the Offer

3.1 Overview

Radiopharm is currently undertaking the Equity Raise to raise gross funds of approximately \$40 million to support its current clinical trial programs and otherwise general working capital for the Company. The Equity Raise comprises of:

- (a) a two-tranche placement to Placement Subscribers to raise \$35 million before costs by way of:
 - (i) the issue of up to 415,706,190 New Shares at an issue price of \$0.03 per Share to be issued on or about 24 October 2025 (**Tranche 1**);
 - (ii) subject to Shareholder approval at the upcoming EGM, the issue of up to 750,960,477 New Shares at an issue price of \$0.03 per Share issued on or about 5 December 2025 (**Tranche 2**); and
 - (iii) subject to Shareholder approval at the upcoming EGM, the issue of one New Option for every New Share subscribed for by Placement Subscribers under Tranche 1 and Tranche 2, exercisable at \$0.039 each on or before 31 October 2027 (**Placement Options Offer**),

(together, the **Placement**); and
- (b) a securities purchase plan (**SPP**) to Eligible Shareholders to raise a further \$5 million (approx.) before costs by the issue of approximately:
 - (i) 166,666,667 New Shares at an issue price of \$0.03 per Share; and
 - (ii) one New Option for every one New Share subscribed for by Eligible Shareholders under the SPP, exercisable at \$0.039 each on or before 31 October 2027, subject to Shareholder approval at the upcoming EGM.

The Company intends to seek quotation of the New Options issued under the SPP and Placement Options Offer on the ASX.

3.2 Further details about the Placement

Tranche 2 of the Placement is subject to Shareholder approval at the EGM anticipated to be held in early December 2025.

The Placement Subscribers will be issued New Options under the Placement Options Offer in accordance with the placement letters entered into in connection with the Placement.

Under the Placement Options Offer, the Company offers to Placement Subscribers a total of 1,166,666,667 free attaching New Options for nil cash consideration. Only Placement Subscribers who participated in the Placement may participate in the Placement Options Offer.

The New Options offered under the Placement Options Offer will be issued on the terms and conditions set out in the Annexure to this Prospectus. All Shares issued on conversion of the New Options will rank equally with the Shares on issue at the date of this Prospectus.

3.3 Details of the SPP

(a) Offer details

The Company invites Eligible Shareholders to participate in the SPP.

Under the SPP, the Company offers to Eligible Shareholders a total of 166,666,667 New Shares at an issue price of \$0.03 each and a total of 166,666,667 free attaching New Options, to raise \$5 million (before costs and the exercise of any New Options).

The SPP is subject to the terms and conditions set out in this Prospectus. The SPP is being conducted on the same terms as the Placement.

Each Eligible Shareholder is entitled to apply for up to 1,000,000 New Shares at \$0.03 each, with one New Option for every New Share subscribed, totalling a maximum of \$30,000, regardless of the number of Shares held by that Eligible Shareholder.

The Board may accept oversubscriptions received from eligible shareholders for New Shares, subject to compliance with applicable law.

All of the Shares offered under this Prospectus will rank equally with the Shares on issue at the date of this Prospectus. Please refer to Sections 7.2 and 8.3 for further information regarding the rights and liabilities attaching to the Shares.

All of the New Options offered under this Prospectus will be issued on the terms and conditions set out in the Annexure to this Prospectus. All Shares issued on conversion of the New Options will rank equally with the Shares on issue at the date of this Prospectus.

Eligible Shareholders should be aware that an investment in Radiopharm involves risks. The key risks identified by Radiopharm are set out in section 6 of this Prospectus.

Eligible Shareholders may apply for New Shares under the SPP, but are not required to do so.

Shareholders will have their interest in Radiopharm diluted because of the issue of Shares under the Placement. In addition, Eligible Shareholders who do not participate in the SPP will have their percentage shareholding in Radiopharm further diluted.

(b) Offer price

The price per New Share on offer under the SPP is \$0.03. This is the same issue price as for the Placement. The Offer Price represents a discount of approximately:

- (i) 18.9% to the closing price of Shares on 15 October 2025 (being the last trading day before announcement of the Equity Raise);
- (ii) 17.6% to the 5 day volume weighted average price of Shares for the period ending on 15 October 2025 (being the last trading day before announcement of the Equity Raise); and
- (iii) 11.8% to the 15 day volume weighted average price of Shares for the period ending on 15 October 2025 (being the last trading day before announcement of the Equity Raise).

The current Share price can be obtained from the ASX website at www.asx.com.au (ASX code: RAD).

The market price of New Shares may rise or fall between the date of this SPP and the issue date of the New Shares and New Options under the SPP. The effect of this is that the issue price you pay for the New Shares may exceed the market price of Shares on the issue date.

(c) **Eligibility to participate**

Shareholders who were registered in the Company's register of Shareholders with an Australian or New Zealand address at the Record Date (i.e. 7.00 pm (AEST) on 17 October 2025) will be Eligible Shareholders and may participate in the SPP, except in respect of any Shares such registered Shareholder holds on behalf of another person who resides outside of Australia or New Zealand.

Due to foreign securities laws, it is not practical for Shareholders resident in countries other than Australia and New Zealand to be offered the opportunity to participate in the SPP.

(d) **Joint holders**

Shareholders who are joint holders of Shares are taken to be a single registered Shareholder for the purposes of the SPP and the certification in the Application Form by any joint holder is taken to have been given by all joint holders.

A Shareholder who receives more than one invitation to participate in the SPP (e.g. if the Shareholder holds Shares in more than one capacity) may not apply for New Shares:

- (i) with an aggregate value of more than \$30,000; or
- (ii) which would result in the aggregate value of the New Shares applied for (including through a Custodian (see section 3.3(e) below)) under the SPP and any similar arrangement in the last 12 months being more than \$30,000.

(e) **Custodians**

An Eligible Shareholder who holds Shares as Custodian for one or more persons on the Record Date (**Beneficiaries**) may apply for up to the maximum number of New Securities for each Beneficiary for whom the Custodian holds Shares.

Custodians should request a Custodian Certificate when making an Application on behalf of participating Beneficiaries. To request a Custodian Certificate please contact Automic Registry Service Limited on 1300 288 664 (within Australia) or +61 2 9698 5414 (outside Australia).

For further information on how to apply, contact the Share Registry via the SPP Information Line on 1300 288 664 (within Australia) or +61 2 9698 5414 (outside Australia) between 8:30 am and 5:00 pm (AEST), Monday to Friday during the Offer Period.

(f) **Allocation and scale back**

The SPP Offer seeks to raise approximately \$5 million before costs. The Board may, at its discretion, accept oversubscriptions above this amount, subject to compliance with applicable law. If applications are received from Eligible Shareholders under the SPP Offer for more than the maximum under the SPP Offer (being \$5 million plus any oversubscriptions accepted by the Board), applications under the SPP Offer will be allocated at the absolute discretion of the Company and the final allocation decision will be at the sole discretion of the Company (including any scale back).

The Company cannot guarantee that all Eligible Shareholders to the SPP will receive the number of New Securities applied for. If an Eligible Shareholder does not receive any or all of the New

Securities applied for, the excess Application Monies will be returned to the Eligible Shareholder without interest.

If a scale back is necessary, the scale back will be applied at the discretion of the Board. The Company will refund to the Applicant the difference between the application monies received by the Company and application monies payable for the number of Shares actually issued to the Applicant.

3.4 Purpose of this Prospectus

- (a) The offer of New Shares under the SPP Offer is being made in compliance with ASIC Instrument 2019/547. The Company has chosen to use this Prospectus for the SPP Offer in lieu of a share purchase plan offer booklet to streamline the application process and allow Eligible Shareholders to apply for New Shares and New Options under the same document.
- (b) While the Company satisfies the conditions of ASIC Instrument 2019/547 for the issue of New Shares under the SPP, the Company is unable to rely on ASIC Instrument 2019/547 in respect of New Options to be issued under the SPP because the New Options are a new class of securities not currently quoted on the ASX. Accordingly, the issuance of all New Options under the Prospectus shall be made under this Prospectus.
- (c) This Prospectus has also been prepared to ensure that the relief provided under ASIC Corporations (Sale Offers That Do Not Need Disclosure) Instrument 2016/80 (**Instrument 2016/80**) is available in respect of the New Options to be issued under both the SPP Offer and Placement Options Offer. Instrument 2016/80 provides relief from the on-sale provisions of section 707 of the Corporations Act and will relieve the need for any further disclosure to be made prior to the on-sale of Shares issued following the exercise of New Options, within 12 months of their date of issue. Shares issued on exercise of the New Options will be able to be immediately traded on ASX (subject to the grant of quotation).

Accordingly, the purpose of this Prospectus is to:

- (a) make the Offer; and
- (b) ensure that the on-sale of the underlying Shares to be issued upon the exercise of the New Options is in accordance with Instrument 2016/80.

3.5 New Options

The New Options under the Placement are conditional upon shareholder approval at the EGM anticipated to be held on 4 December 2025. In the event the New Options are not approved by Shareholders at the EGM, the New Shares under the Placement will be issued without any free attaching New Options.

The New Options under the SPP are also conditional upon shareholder approval at the EGM. In the event the New Options are not approved by Shareholders at the EGM, the New Shares under the SPP will not be issued.

The issue and exercise of the New Options is subject to the Corporations Act.

3.6 Extraordinary General Meeting

The EGM is anticipated to be held on 4 December 2025 to ask Shareholders to approve the issuance of the:

- (a) Tranche 2 New Shares; and
- (b) New Options.

At the EGM, Shareholders will also be asked to ratify the issuance of the Tranche 1 New Shares.

3.7 Timetable

The indicative timetable for the Offer is set out in Section 1.2.

The Directors may withdraw this Prospectus or an Offer at any time prior to the issue of New Shares and New Options pursuant to that Offer.

3.8 Minimum subscriptions

The minimum application amount per Eligible Shareholder is \$2,500.

3.9 Underwriting

The Offer is not underwritten.

3.10 ASX quotation

Application for official quotation of the New Shares offered pursuant to this Prospectus will be made in accordance with the timetable. If ASX does not grant official quotation of the New Shares offered pursuant to this Prospectus before the expiration of three months after the date of issue of the Prospectus, (or such period as varied by ASIC), the Company will not issue any and will repay all application monies for the Shares within the time prescribed under the Corporations Act, without interest.

The Company will seek official quotation of the New Options offered pursuant to this Prospectus.

The fact that ASX may grant official quotation to the New Shares is not to be taken in any way as an indication of the merits of the Company or the New Shares now offered.

3.11 Effect of Equity Raise on control of the Company

The below table sets out the number of Shares, voting power and Options held by the substantial holders at the date of this Prospectus and after the Equity Raise (based on shares and options to be acquired as set out under section 3.1 and proportional allotment of Tranche 2 shares with none of the Options to have been exercised):

Shareholder	At the date of this Prospectus			Following completion of the Equity Raise		
	Shares	Voting	Options	Shares	Voting power	Options

Lantheus	282,958,513	12.1%	37,406,295	537,958,513	14.5%	292,406,295

To the extent that the Equity Raise would result in a Shareholder having a relevant interest in the Company of more than 20%, the Shareholder must subscribe for the number of New Securities that increase its relevant interest in the Company to 19.99% and in respect of the balance of the New Securities, the Shareholder will only subscribe for these if permitted by law.

3.12 Financial position

The effect of the Equity Raise (including the Offer) on the financial position of the Company is set out in section 5.

3.13 Taxation considerations

The taxation consequences of an investment in the Company depend upon your particular circumstances. You should make your own enquiries about the taxation consequences of an investment in the Company. If you are in doubt about the course you should follow, you should consult your accountant, stockbroker, solicitor or other professional advisor.

4.4 Lodgement instructions and effect of making an Application

Applications for New Securities must be submitted on an Application Form attached to or accompanying this Prospectus. An Application Form must be completed in accordance with the instructions provided with that Application Form.

An original, completed and lodged Application Form constitutes a binding and irrevocable offer to subscribe for the number of New Securities specified in that Application Form. An Application Form does not need to be signed to be valid. Once an Application has been made, it cannot be revoked.

If an Application Form is not completed correctly, it may be treated by the Company as valid at its discretion. The Directors' decision as to whether to treat such an Application as valid and how to construe, amend or complete a form is final. However, in relation to the SPP an Applicant will not be treated as having applied for more New Securities than is indicated by the amount of Application Money.

Brokerage or transfer/stamp duty is not payable in relation to the Offer.

The Company reserves the right to refuse a completed Application Form if it has reason to believe that an Applicant has not received a copy of this Prospectus in paper or electronic form, or the Prospectus or Application Form provided to the Applicant has been altered or tampered with in any way.

If a person makes an Application, that person:

- (a) irrevocably and unconditionally agrees to the terms of the relevant Offer set out in this Prospectus;
- (b) acknowledges that their Application is irrevocable and unconditional;
- (c) if the Application has been made under the SPP, agrees to pay the Offer Price for each New Share which they have applied for; and

- (d) if the Application has been made under the SPP, warrants and represents to the Company that they are an Eligible Shareholder entitled to participate in the SPP.

4.5 Application Money to be held on trust

Application Money will be held by the Company on trust in accordance with the requirements of the Corporations Act until the Securities to which the Application Money pertains are issued under the SPP, or a refund of Application Money occurs in the circumstances described in this Prospectus. The Company will retain any interest earned on Application Money, including in the event of any refund of Application Money.

6 Risk factors

6.1 Factors influencing success and risk

Introduction

This section identifies the major risks the Board believes are associated with an investment in Radiopharm.

The Radiopharm business is subject to risk factors, both specific to its business activities, and risks of a general nature. Individually, or in combination, these might affect the future operating performance of Radiopharm and the value of an investment in the Company. There can be no guarantee that Radiopharm will achieve its stated objectives or that any forward-looking statements will eventuate. An investment in the Company should be considered in light of relevant risks, both general and specific. Each of the risks set out below could, if it eventuates, have a material adverse impact on Radiopharm's operating performance and profits, and the market price of the Shares.

Before deciding to invest in the Company, potential investors should:

- (a) read the entire Prospectus;
- (b) consider the assumptions underlying the risk factors that could affect the financial performance of Radiopharm;
- (c) review these factors in light of their personal circumstances; and
- (d) seek professional advice from their accountant, stockbroker, lawyer or other professional adviser before deciding whether to invest.

6.2 Specific investment risks

Products in development and not approved for commercial sale

Radiopharm's ability to achieve profitability is dependent on a number of factors, including its ability to complete successful clinical trials, obtain regulatory approval for its products and successfully commercialise those products. There is no guarantee that Radiopharm's products will be commercially successful.

Radiopharm does not currently generate revenue from product sales and any such revenue is not anticipated in the short to medium term.

There are many reasons why initially promising products fail to be successfully commercialised. For example, clinical trials may be suspended for safety or efficacy reasons (see further below), following development it may prove difficult or impossible to manufacture the products on a large scale, or, during the period of development, competitors (including those with greater resources) may emerge with competing or alternative treatments.

Clinical trial risk

The Company may be unable to secure necessary approvals from regulatory agencies and institutional bodies (clinics and hospitals) to conduct future clinical trials. There is also no assurance that products developed using the Company's technology will prove to be safe and efficacious in clinical trials, or that the regulatory approval to manufacture and market its products will be received. Clinical trials might also potentially expose the Company to product

liability claims in the event its products in development have unexpected effects on clinical subjects.

Clinical trials undertaken by the Company have many associated risks which may impact the Company's profitability and future productions and commercial potential. They may prove unsuccessful or non-efficacious, impracticable or costly. The clinical trials could be terminated which will likely have a significant adverse effect on the Company, the value of its securities and the future commercial development of its product.

Regulatory and reimbursement approvals

The research, development, manufacture, marketing and sale of products using the Company's technology are subject to varying degrees of regulation by a number of government authorities in Australia and overseas.

Products developed using the Company's technology must undergo a comprehensive and highly regulated development and review process before receiving approval for marketing. The process includes the provision of clinical data relating to the quality, safety and efficacy of the products for their proposed use.

Products may also be submitted for reimbursement approval. The availability and timing of that reimbursement approval may have an impact upon the uptake and profitability of products in some jurisdictions.

Furthermore, any of the products utilising the Company's technology may be shown to be unsafe, non-efficacious, difficult or impossible to manufacture on a large scale, uneconomical to market, compete with superior products marketed by third parties or not be as attractive as alternative treatments.

Commercialisation of products and potential market failure

The Company has not yet commercialised its technology and as yet has no material revenues.

The Company is also dependent on commercially attractive markets remaining available to it during the commercialisation phase and there is a risk that, once developed and ready for sale, commercial sales, to fund sufficient revenues for continued operations and growth, may not be achieved.

Dependence upon key personnel

Radiopharm depends on the talent and experience of its personnel as its primary asset. There may be a negative impact on Radiopharm if any of its key personnel leave. It may be difficult to replace them, or to do so in a timely manner or at comparable expense. Additionally, any key personnel of the Company who leave to work for a competitor may adversely impact the Company. Increases in recruitment, wages and contractor costs may adversely impact upon the financial performance of the Company.

Arrangements with third-party collaborators

Radiopharm may pursue collaborative arrangements with pharmaceutical and life science companies, academic institutions or other partners to complete the development and commercialisation of its products. These collaborators may be asked to assist with funding or performing clinical trials, manufacturing, regulatory approvals or product marketing. There is no assurance that Radiopharm will attract and retain appropriate strategic partners or that any such collaborators will perform and meet commercialisation goals.

Risk of delay and continuity of operations

Radiopharm may experience delay in achieving a number of critical milestones, including securing commercial partners, completion of clinical trials, obtaining regulatory approvals, manufacturing, product launch and sales. Any material delays may impact adversely upon the Company, including the timing of any revenues under milestone or sales payments.

Radiopharm may also experience business continuity problems arising from extreme events. As with most businesses, Radiopharm is reliant on IT systems in its day-to-day operations. An inability to operate such systems would impact the business. This might result, for example, from a computer virus or other cyber attack or from a physical event at its offices.

Competition

The biotechnology and pharmaceutical industries are intensely competitive and subject to rapid and significant technological change. A number of companies, both in Australia and abroad, may be pursuing the development of products that target the same markets that Radiopharm is targeting.

The Company's products may compete with existing alternative treatments that are already available to customers. In addition, a number of companies, both in Australia and abroad, may be pursuing the development of products that target the same conditions that the Company is targeting. Some of these companies may have, or develop, technologies superior to the Company's own technology. The Company may face competition from parties who have substantially greater resources than the Company.

Requirement to raise additional funds

The Company may be required to raise additional equity or debt capital in the future. There is no assurance that it will be able to raise that capital when it is required or, even if available, the terms may be unsatisfactory. If the Company is unsuccessful in obtaining funds when they are required, the Company may need to delay or scale down its operations.

Growth

There is a risk that the Company may be unable to manage its future growth successfully. The ability to hire and retain skilled personnel as outlined above may be a significant obstacle to growth.

Intellectual property

The Company's ability to leverage its innovation and expertise depends upon its ability to protect its intellectual property and any improvements to it. The intellectual property may not be capable of being legally protected, it may be the subject of unauthorised disclosure or be unlawfully infringed, or the Company may incur substantial costs in asserting or defending its intellectual property rights.

6.3 General investment risks

Share market investments

It is important to recognise that the Shares are quoted on ASX and their price might rise or fall and they might trade at prices below or above the offer price.

Factors affecting the price at which the Shares are traded on ASX could include domestic and international economic conditions. In addition, the prices of many listed entities' securities are

affected by factors that might be unrelated to the operating performance of the relevant company. Those fluctuations might adversely affect the price of the Shares.

General economic conditions

Radiopharm's operating and financial performance is influenced by a variety of general economic and business conditions including the level of inflation, interest rates and government fiscal, monetary and regulatory policies. Prolonged deterioration in general economic conditions, including an increase in interest rates, could be expected to have a corresponding adverse impact on the Company's operating and financial performance.

Accounting standards

Australian accounting standards are set by the Australian Accounting Standards Board (**AASB**) and are outside the Directors' and Radiopharm's control. Changes to accounting standards issued by AASB could materially adversely affect the financial performance and position reported in Radiopharm's financial statements.

Tax risks

Changes to the rate of taxes imposed on Radiopharm (including in overseas jurisdictions in which Radiopharm operates now or in the future) or tax legislation generally may affect Radiopharm and its Shareholders. In addition, an interpretation of Australian tax laws by the Australian Taxation Office that differs to Radiopharm interpretation may lead to an increase in Radiopharm tax liabilities and a reduction in Shareholder returns.

Personal tax liabilities are the responsibility of each individual investor. Radiopharm is not responsible either for tax or tax penalties incurred by investors.

Litigation

There is a risk that the Company may in future be the subject of or required to commence litigation. There is, however, no litigation, mediation, conciliation or administrative proceeding taking place, pending or threatened against the Company.

6.4 Cautionary statement

Statements in this Prospectus may be forward looking statements.

Forward looking statements can be identified by the use of forward-looking terminology such as, but not limited to, 'may', 'will', 'expect', 'anticipate', 'estimate', 'would be', 'believe', or 'continue' or the negative or other variations of comparable terminology. These statements are subject to risks and uncertainties that could cause actual results to differ materially from those projected. The Directors' expectations, beliefs and projections are expressed in good faith and are believed to have a reasonable basis. They are based on, among other sources, the examination of historical operating trends, data in the Company's records and other data available from third parties. There can be no assurance, however, that the Directors' expectations, beliefs or projections will give the results projected in the forward-looking statements. Investors should not place undue reliance on these forward-looking statements.

Additional factors that could cause actual results to differ materially from those indicated in the forward-looking statements are discussed earlier in this section.

7 Material Agreements

7.1 Key documents

The Board considers that certain agreements relating to Radiopharm are significant to the Offer, the operations of Radiopharm or may be relevant to investors. A description of material agreements or arrangements, together with a summary of the more important details of each of these agreements is set out below.

7.2 Constitution

Below is a summary of the key provisions of Radiopharm's constitution (**Constitution**). This summary is not exhaustive, nor does it constitute a definitive statement of a Shareholder's rights and obligations.

Shares

The Directors are entitled to issue and cancel Shares in the capital of Radiopharm, grant options over unissued shares and settle the manner in which fractions of a Share are to be dealt with. The Directors may decide the persons to whom, and the terms on which, Shares are issued or options are granted as well as the rights and restrictions that attach to those Shares or options.

The Constitution also permits the issue of preference shares on terms determined by the Directors.

Radiopharm may also sell a Share that is part of an unmarketable parcel of shares under the procedure set out in the Constitution.

Variation of class rights

The rights attached to any class of Shares may, unless their terms of issue state otherwise, only be varied with the consent in writing of members holding at least three-quarters of the Shares of that class, or with the sanction of a special resolution passed at a separate meeting of the holders of Shares of that class.

Restricted securities

If the ASX classifies any of Radiopharm's share capital as restricted securities, then the restricted securities must not be disposed of during the escrow period and Radiopharm must refuse to acknowledge a disposal of the restricted securities during the escrow period, except as permitted under the Listing Rules or by the ASX.

Share certificates

Subject to the requirements of the Corporations Act, the Listing Rules or the ASX Settlement Operating Rules, Radiopharm need not issue share certificates if the Directors so decide.

Share transfers

Shares may be transferred by any method permitted by the Corporations Act, the Listing Rules or the ASX Settlement Operating Rules or by a written transfer in any usual form or in any other form approved by the Directors. The Directors may refuse to register a transfer of Shares where it is not in registrable form, Radiopharm has a lien over any of the Shares to be transferred or where it is permitted to do so by the Listing Rules or the ASX Settlement Operating Rules.

General meetings

Each Shareholder, Director and auditor is entitled to receive notice of and attend any general meeting of Radiopharm. Two Shareholders must be present to constitute a quorum for a general meeting and no business may be transacted at any meeting except the election of a chair and the adjournment of the meeting, unless a quorum is present when the meeting proceeds to business.

Voting rights

Subject to any rights or restrictions attached to any Shares or class of shares, on a show of hands each Shareholder present has one vote and, on a poll, one vote for each fully paid Share held, and for each partly paid Share, a fraction of a vote equivalent to the proportion to which the Share has been paid up. Voting may be in person or by proxy, attorney or representative.

Remuneration of Directors

Each Director is entitled to remuneration from Radiopharm for his or her services as decided by the Directors but the total amount provided to all Directors for their services as Directors must not exceed in aggregate in any financial year the amount fixed by Radiopharm in general meeting. The remuneration of a Director (who is not the managing Director or an executive Director) must not include a commission on, or a percentage of, profits or operating revenue.

Remuneration may be provided in the manner that the Directors decide, including by way of non-cash benefits. There is also provision for Directors to be paid extra remuneration (as determined by the Directors) if they devote special attention to the business of Radiopharm or otherwise perform services which are regarded as being outside of their ordinary duties as Directors or, at the request of the Directors, engage in any journey on Radiopharm's business.

Directors are also entitled to be paid all travelling and other expenses they incur in attending to Radiopharm's affairs, including attending and returning from general meetings or Board meetings, or meetings of any committee engaged in Radiopharm's business.

Interests of Directors

A Director who has a material personal interest in a matter that is being considered by the Board must not be present at a meeting while the matter is being considered nor vote on the matter, unless the Corporations Act allows otherwise.

Election and retirement of Directors

There must be a minimum of three Directors and a maximum of 12 Directors unless Radiopharm in general meeting resolves otherwise.

Where required by the Corporations Act or Listing Rules, Radiopharm must hold an election of Directors each year. No Director, other than the managing director, may hold office without re-election beyond the third annual general meeting following the meeting at which the Director was last elected or re-elected. A Director appointed to fill a casual vacancy, who is not a managing Director, holds office until the conclusion of the next annual general meeting following his or her appointment. If there would otherwise not be a vacancy, and no Director is required to retire, then the director who has been longest in office since last being elected must retire.

If a number of Directors were elected on the same day, the Directors to retire is (in default of agreement between them) determined by ballot.

Dividends

If the Directors determine that a final or interim dividend is payable, it is (subject to the terms of issue on any Shares or class of Shares) paid on all Shares proportionate to the amount for the time being paid on each Share. Dividends may be paid by cash, electronic transfer or any other method as the Board determines.

The Directors have the power to capitalise and distribute the whole or part of the amount from time to time standing to the credit of any reserve account or otherwise available for distribution to Shareholders. The capitalisation and distribution must be in the same proportions which the Shareholders would be entitled to receive if distributed by way of a dividend.

Subject to the Listing Rules, the Directors may pay a dividend out of any fund or reserve or out of profits derived from any source.

Proportional takeover bids

Radiopharm may prohibit registration of transfers purporting to accept an offer made under a proportionate takeover bid unless a resolution of Radiopharm has been passed approving the proportional takeover bid under the provisions of the Constitution.

The rules in the Constitution relating to proportional takeover bids cease on the third anniversary of the adoption of the Constitution, or the renewal of the rules, unless renewed by a special resolution of Shareholders.

Indemnities and insurance

Radiopharm must indemnify current and past Directors and other executive officers (**Officers**) of Radiopharm on a full indemnity basis and to the fullest extent permitted by law against all liabilities incurred by the Officer as a result of their holding office in Radiopharm or a related body corporate.

Radiopharm may also, to the extent permitted by law, purchase and maintain insurance, or pay or agree to pay a premium for insurance, for each Officer against any liability incurred by the Officer as a result of their holding office in Radiopharm or a related body corporate.

The Company has engaged Bell Potter Securities Limited as Lead Manager for the Offers pursuant to the terms of the Lead Manager Mandate.

It is not necessary to include general information about all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

The Company is subject to regular reporting and disclosure obligations because it is a 'disclosing entity' for the purposes of the Corporations Act. Additionally, as a listed company, Radiopharm is subject to the Listing Rules which require disclosure to ASX of any information the Company has which a reasonable person would expect to have a material effect on the price or value of its Shares.
