

\$8.2m western military contract

- DroneShield has received a contract totaling \$8.2m for a western military end-customer.
- This hardware is on-the-shelf with delivery expected to be completed prior to 2025 year end or in early Q1 2026, and payment expected in Q1 2026.

DroneShield Limited (ASX:DRO) (DroneShield or the Company) is pleased to announce it has received a contract for \$8.2 million from an in-country reseller for delivery to a western military end-customer. The reseller is a wholly-owned subsidiary of a multi-billion dollar, global, publicly listed customer that is required to distribute the products to the western military government department in-country. The contract is for handheld counter-drone systems, associated accessories and spare kits, and software updates. DroneShield has this stock on-the-shelf and expects to complete the delivery prior to end of 2025 or in early Q1 2026. Cash payment is expected to be fully received in Q1 2026. No additional material conditions need to be satisfied.

Over the past 7 years, prior to this contract, DroneShield has received 38 contracts from this reseller totalling over \$9.6 million. There are no obligations for any additional contracts from this reseller or end-customer.

DroneShield confirms that:

- it does not consider the identity of the counterparty/customer to be information that a reasonable person would expect to have a material effect on the price or value of DroneShield's securities; and
- the announcement contains all material information relevant to assessing the impact of the contract on the price or value of DroneShield's securities and is not misleading by omission.

DRONE SHIELD

Going into 2026, DroneShield has approximately \$97.7 million in locked in revenues (in addition to this contract, where the hardware revenues would fall into either 2025 or 2026 depending on the final delivery date), an all-time record for starting a new year.

This announcement has been approved for release to the ASX by the Chairman on behalf of the Board.
