18 February 2026

Fletcher Building Announces FY26 Half Year Results

Fletcher Building today reported its results for the six months ended 31 December 2025 (1H FY26), with the Group continuing to reshape the business and delivering a stable underlying performance against a backdrop of challenging market conditions across New Zealand and Australia.

1H FY26 highlights

- Revenue from continuing operations of \$2,866 million, broadly in line with the prior corresponding period (pcp)
- EBIT from continuing operations before Significant Items of \$145 million, reflecting stable underlying performance
- EBIT margin before Significant Items of 5.1%, consistent with pcp
- Net cash from operating activities of \$156 million, improved from \$87 million in pcp
- Net debt of \$1,164 million, was below internal expectation, reflecting disciplined capital allocation and working capital management
- Total available liquidity of approximately \$0.8 billion as at 31 December 2025, providing sufficient headroom through the current market cycle
- Return on invested capital before Significant Items (ROIC) of 4.3% (1H FY25: 4.6%)

Managing Director and Chief Executive Officer Andrew Reding said the Group had continued to make progress in difficult trading conditions: “The first half of FY26 was another demanding period for the building industry, with subdued markets across New Zealand and Australia. Conditions differed between a particularly weak first quarter and a more stable second quarter. In that environment, our core manufacturing businesses held up well, supported by disciplined cost control and better operational execution. Just as importantly, we continued to make real progress on our strategy around simplifying the Group, strengthening the balance sheet, and embedding a decentralised operating model that improves accountability and performance.”

Mr Reding said the announced sale of the Construction division (announced 20 January) was a key milestone in the Group's transformation: “The sale of Construction is a major step in reshaping Fletcher Building into a simpler, more focused building products manufacturing and distribution group. Combined with the cost and capital discipline we have put in place, it positions the Group well to benefit as market conditions recover.”

Financial summary

Revenue from continuing operations was \$2,866 million, broadly in line with pcp. Lower volumes in New Zealand residential and civil markets and continued competitive pressure, particularly in the Distribution division, were largely offset by stable performance across the Group's core manufacturing businesses.

EBIT from continuing operations before Significant Items was \$145 million, with margin pressure in parts of the portfolio partially offset by structural cost reductions and operational improvements.

Net cash from operating activities increased to \$156 million, reflecting improved working capital management and cost-out benefits. Disciplined capital allocation resulted in net debt of \$1,164 million at the half, below internal expectations.

Available liquidity (cash on hand and undrawn committed facilities) for the Group was approximately \$0.8 billion as at 31 December 2025, including a new \$200 million bank liquidity facility and extensions to key syndicated banking facilities.

Lease liabilities reduced following a reassessment of lease terms and further reductions are expected from the Construction divestment.

Outlook

Mr Reding said market conditions were expected to remain challenging in the near term: "In New Zealand, residential and civil demand is likely to remain relatively subdued through FY26, with a more meaningful recovery not anticipated until calendar year 2027. In Australia, early signs of stabilisation are emerging in parts of the portfolio, although conditions remain uneven."

Looking ahead, Fletcher Building expects the benefits of actions already taken on costs, portfolio simplification, and capital discipline to progressively support performance as market conditions improve.

In line with the Group's capital structure settings, no interim dividend has been declared for 1H FY26.

ENDS

Chair and Managing Director & CEO's Review

Dear Shareholders

The first half of FY26 (1H FY26) has remained a challenging period for Fletcher Building. Market conditions across New Zealand and Australia continued to be subdued, with a clear contrast between a difficult first quarter and relatively more stable conditions in the second. Despite these headwinds, the Group has shown resilience and made solid progress in resetting the business. We have taken important steps to both simplify our portfolio and strengthen our financial position.

Volumes remain soft across much of the Group, particularly in New Zealand's residential and civil markets, and competition – especially in the Distribution division - continues to weigh on margins. Against this backdrop, our core manufacturing businesses performed relatively steadily, supported by disciplined cost control and stronger operational execution, helping to offset weaker conditions in Construction and Residential and Development divisions.

Revenue from continuing operations was \$2,866 million, broadly in line with 1H FY25, while EBIT from continuing operations before Significant Items of \$145 million reflected a steady underlying performance, despite difficult market conditions. Importantly, operating cash flow improved to \$156 million, materially higher than the prior corresponding period, indicating strong operating discipline and working capital management.

We continued to make good progress on several fronts during the first half:

- We announced the divestment of the Construction division, a significant milestone in our portfolio simplification strategy. The transaction with VINCI Construction is valued at \$315.6 million, with a potential increase to \$334.1 million pending the final outcome of certain key contracts. We expect to use the proceeds for debt reduction, with completion targeted for the first quarter of FY27.
- We continued embedding our decentralised operating model. Business Units are now fully accountable for their operational performance, customer relationships and environmental and social outcomes. At a Group level, we strengthened performance alignment by adopting return on invested capital (ROIC) as our central value metric, sharpening the link between decision-making and long-term value creation.
- We delivered meaningful cost reductions, achieving approximately \$45 million of year-to-date savings across Warehouse and distribution, and Selling, general and administration expenses. Additional cost-out initiatives were implemented during the first half, with the full earnings benefits expected to be realised in the second half of FY26.
- Progress was made across our core operations through a combination of growth initiatives and a focus on operational excellence. Growth initiatives included the opening of Firth®'s new Auckland batching plant, the commissioning of Fletcher Insulation®'s Sonata Acoustics facility, and the expansion of recycled aggregate capability at Winstone Aggregates®. In parallel, operational excellence initiatives delivered manufacturing and cost improvements at Laminex® Australia and Winstone Wallboards®.

- We remained focused on our climate commitments, maintaining an A- CDP rating and achieving a 23% reduction in emissions from our FY18 baseline. Initiatives across the businesses, such as solar generation, increased use of recycled materials, and alternative fuels at Golden Bay®, continue to support our long-term decarbonisation goals.
- We resolved a major legacy construction matter, with the New Zealand International Convention Centre (NZICC) reaching Practical Completion and being handed over to SkyCity ahead of its formal opening in February 2026. This represents an important milestone following several years of remediation and will deliver a truly world-class facility for Auckland, and New Zealand more broadly. Following the sale of the Construction division ongoing risks and responsibilities related to NZICC and other legacy projects will continue to be held by Fletcher Building. As previously stated, we intend to vigorously defend ourselves against SkyCity's NZICC litigation.
- Disciplined capital allocation and strong working capital management resulted in net debt below internal expectations, further improving the Group's financial position. The Group retains significant liquidity headroom and capacity against its banking covenants. As at 31 December 2025, we had approximately \$0.8 billion of available liquidity, further supported by a new \$200 million bank liquidity facility and extensions to key syndicated banking facilities.
- The Board appointed James Miller as Deputy Chair, reflecting its view that New Zealand-based governance leadership was important in supporting the Chair.

While we have made solid progress, market conditions remain challenging in New Zealand and demand across the residential and civil sectors is expected to remain relatively subdued through FY26, with a more meaningful recovery not anticipated until calendar year 2027. In Australia, early signs of stabilisation are emerging, although conditions remain uneven. Looking ahead, we expect that the benefits of actions already taken on costs, portfolio simplification and capital discipline will progressively support the Group's performance.

Given these circumstances, and in line with the Group's capital structure settings, no interim dividend has been declared for 1H FY26.

On behalf of the Board and management, we thank our people for their continued commitment, discipline and professionalism through a period of sustained change and challenging trading conditions. We also thank our shareholders for their ongoing support as we continue to reshape Fletcher Building into a simpler, more resilient and more focused building products manufacturing and distribution group.

Notes to the Consolidated Interim Financial Statements

Statement of accounting policies

1. GENERAL INFORMATION

The consolidated condensed interim financial statements presented are those of Fletcher Building Limited (the Company) and its subsidiaries (the Group). The Group is primarily involved in the manufacturing and distribution of building materials and residential, commercial and infrastructure construction. Fletcher Building Limited is domiciled in New Zealand. The registered office of the Company is 810 Great South Road, Penrose, Auckland.

The Company is registered under the Companies Act 1993 and is a Financial Markets Conduct Act (FMCA) 2013 reporting entity in terms of the Financial Reporting Act 2013. The Group is a for-profit entity. The Company is listed on the New Zealand Stock Exchange (NZX), and the Australian Securities Exchange (ASX) as a Foreign Exempt Listing.

Basis of presentation

These consolidated interim financial statements have been prepared in accordance with Generally Accepted Accounting Practice in New Zealand and the requirements of the Financial Markets Conduct Act 2013. Generally Accepted Accounting Practice are the New Zealand equivalent to International Financial Reporting Standards (NZ IFRS).

These financial statements are presented in New Zealand dollars (\$), which is the Group's presentation currency, and rounded to the nearest million unless otherwise stated.

The consolidated interim financial statements comply with NZ IAS 34 *Interim Financial Reporting* and do not include all the information and disclosures required in the annual consolidated financial statements, and should be read in conjunction with the Group's annual consolidated financial statements for the financial year ended 30 June 2025. In complying with NZ IAS 34, these financial statements comply with International Accounting Standard 34 *Interim Financial Reporting*.

The accounting policies adopted are consistent with those set out in the Group's annual consolidated financial statements for the financial year ended 30 June 2025, and corresponding interim reporting period, unless otherwise disclosed.

The estimates and judgements that are critical to the determination of the amounts reported in the consolidated interim financial statements have not materially changed from those applied in the Group annual consolidated financial statements for the financial year ended 30 June 2025, unless otherwise disclosed. Any material updates or developments are disclosed in the relevant notes and are indicated by this adjacent coloured line.

The following key exchange rates were applied in the preparation of the consolidated interim financial statements:

NZD/AUD	Unaudited Six months Dec 2025	Unaudited Six months Dec 2024	Audited Year ended Jun 2025
Average rates	0.8913	0.9111	0.9138
Closing rates	0.8651	0.9063	0.9260

For personal use only

Notes to the Consolidated Interim Financial Statements (Continued)

2. KEY ESTIMATES, JUDGEMENTS AND OTHER FINANCIAL INFORMATION

2.1 CHANGES IN ACCOUNTING POLICIES, INTERPRETATION AND AGENDA DECISIONS

Changes in accounting policies: classification of interest paid as a financing cash flow and dividends and interest received as investing cash flow

Effective for the FY25 consolidated financial statements, the Group voluntarily changed its accounting policy for the classification of interest paid, interest received and dividends received in the Consolidated Statement of Cash Flows. Previously, interest paid was presented net of interest received within operating activities, reflecting its inclusion in profit or loss, and in investing activities when capitalised to the balance sheet. Dividends received were presented within operating activities, reflecting its inclusion in profit or loss. Under the new policy, all interest paid is presented within financing activities, and interest received as investing activities, as the classification provides a more relevant representation of the nature of these costs and income, while dividends received are presented within investing activities, reflecting the cash flow returns of investments in associates and joint ventures. This change in presentation policy within the Consolidated Statement of Cash Flows aligns to the required amendments to NZ IAS 7 *Statement of Cash Flows*, which will become effective alongside NZ IFRS 18 *Presentation and Disclosure in Financial Statements* in future periods.

This change constitutes a voluntary change in accounting policy under NZ IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors* and has been applied retrospectively. Accordingly, comparative amounts for the six months ended 31 December 2024 have been restated. The change has no impact on the income statement, balance sheet or total cash flows.

The impact of the restatement on the Consolidated Statement of Cash Flows on the comparative information is as follows:

For the six months ended 31 December 2024 (unaudited)	As previously reported NZ\$M	Adjustment NZ\$M	Restated NZ\$M
Net cash flow from operating activities	(5)	92	87
Net cash flow from investing activities	68	13	81
Net cash flow from financing activities	(176)	(105)	(281)
Net movement in cash held	(113)		(113)

Reclassification of break fees and make-whole costs on termination of US private placement (USPP) notes and related cross currency interest rate swaps (CCIRS)

During the period ended 31 December 2025, the Group reviewed the presentation and classification of break fees and make-whole costs relating to the prepayment of USPP notes and associated CCIRS incurred in the current and comparative periods. These costs were previously classified and presented as Significant Items; however, the Group determined that they are more appropriately presented within funding costs. As a result, \$10 million of costs presented as Significant Items in the comparative periods ended 31 December 2024 and 30 June 2025 have been reclassified to funding costs. The reclassification also affected the Consolidated Statement of Cash Flows, with amounts reclassified between funding costs paid and net repayment of borrowings within cash flows from financing activities. This adjustment had no effect on total profit, earnings per share, equity or net cash flows.

This change reflects a presentation refinement only and does not represent a change in accounting policy or correction of an error under NZ IAS 8.

For personal use only

Notes to the Consolidated Interim Financial Statements (Continued)

2.2 SEGMENT AND NON-GAAP FINANCIAL INFORMATION AND MANAGEMENT PERFORMANCE METRICS

Segmental information

Segmental information is presented in respect of the Group's industry and geographical segments. The use of industry segments as the primary format is based on the Group's management and internal reporting structure, which recognises groups of assets and operations with similar risks and returns.

Change in Divisional Structure

Effective 1 July 2025, the Group implemented a new divisional structure following a strategic review to simplify operations, decentralise decision-making and improve performance accountability. As part of this change:

- the Building Products division was reclassified as the Light Building Products division, with Steel businesses moved into the newly established Heavy Building Materials division;
- the Australia division was disestablished, with its businesses reallocated into the Light Building Products division, with the exception of Stramit®, which was moved into the Heavy Building Materials division; and
- all Concrete division businesses were moved and consolidated into the Heavy Building Materials division.

In addition, from 31 December 2025, the Construction Division is presented as a discontinued operation, reflecting the expectation of divestment and wind-down of operations.

Comparative information disclosed throughout this note has been updated to reflect both the new divisional structure and the classification of the Construction Division as a discontinued operation. Accordingly, comparative information across all tables within this note has been updated to reflect the current period presentation.

Description of industry segments

Light Building Products	The Light Building Products division is a manufacturer, distributor and marketer of building products used in the residential, industrial and commercial markets in New Zealand and Australia. Businesses include plasterboard, laminates and panels, insulation, piping, steel and aluminium.
Heavy Building Materials	The Heavy Building Materials division includes the Group's interests in the concrete and aggregates value chain, including extraction of aggregates, cement production, ready-mix concrete and concrete products, which operate primarily in New Zealand. The division also includes the Group's Steel businesses in both Australia and New Zealand.
Distribution	The Distribution division consists of building and plumbing product distribution businesses in New Zealand.
Residential and Development	The Residential and Development division primarily operates in New Zealand, but also in Australia. In New Zealand, the division's operations include building and sale of residential homes and apartments, development and sale of commercial and residential land and management of retirement village assets. In Australia, the division's operations include development and sale of commercial land. Development activity includes sale of land property which are surplus to the Group's operating requirements.
Discontinued operations	Discontinued operations comprise the Tradelink® business, which was classified as held for sale from 1 April 2024 and disposed of on 30 September 2024, and the Construction division, which has been presented as a discontinued operation from 31 December 2025, reflecting the expectation that the majority of the division will be divested and the remaining retained liabilities wound down. Further details of the change can be found in note 2.4 .

Non-GAAP financial information policy

For internal reporting to the Board, the Audit and Risk Committee and external reporting to its stakeholders, the Group uses certain non-GAAP financial measures (alternative performance measures) alongside its NZ IFRS results to provide additional insight into the Group's underlying performance and financial position. These measures – which include earnings before interest, taxation, depreciation, depletion and amortisation expense (EBITDA) before Significant Items, earnings before interest and taxation (EBIT) before Significant Items, net earnings per share before Significant Items, Trading cash before Significant Items, Free cash before Significant Items, Funds, and Net debt – are not defined or specified under NZ IFRS. The Group believes that these non-GAAP measures, which are not considered to be a substitute for or superior to NZ IFRS measures, provide stakeholders with additional useful information on the performance of the business, with a clearer understanding of the Group's underlying operating results and financial position. Management uses these non-GAAP financial information measures consistently from period to period for internal planning and reporting. The Group adheres to applicable regulatory guidance on non-GAAP disclosures, emphasizing transparency, consistency, and comparability in how these metrics are calculated and presented. Importantly, each non-GAAP measure is reconciled to the closest IFRS measure in the accounts so that stakeholders can clearly tie these figures back to audited IFRS results.

Notes to the Consolidated Interim Financial Statements (Continued)

Description of Non-GAAP Financial Information

<p>EBIT and EBITDA before Significant Items</p> <p>Net earnings before Significant Items</p>	<p>The Group makes certain Significant Item adjustments to the statutory profit measures in order to derive non-GAAP measures. The Group discloses certain non-operating items as Significant Items. The Group's policy is to recognise Significant Items for transactions or events outside of the Group's ongoing operations that have a significant impact on reported profit. This policy provides stakeholders with additional useful information as a mean to assess the year-on-year trading performance of the Group. On this basis, Significant Items include, but are not limited to, the following:</p> <ul style="list-style-type: none"> - Gains and losses arising from mergers and acquisition (M&A) activity (i.e. business acquisitions and disposals) and associated costs. - Restructuring and other associated costs arising from significant strategy changes that are not considered by the Group to be part of the normal operating costs of the business. - Impacts of significant one-off events that have a material effect on the Group's financial performance and asset valuation. - Impairment charges and provisions that are considered to be significant in nature and/or value to the trading performance of the business. - Net gains and losses on the disposal of properties and businesses where a commitment to close has been demonstrated. <p>In addition to the above, EBITDA before Significant Items excludes the depreciation and amortisation of fixed, intangible and right-of-use (RoU) assets, while net earnings before Significant Items adjust for the net of tax consequences of Significant Items recognised in the period to reflect an "underlying" net earnings for continuing operations.</p>
<p>Trading and Free cash before Significant Items</p>	<p>Trading cash (or trading cash flow) is a non-GAAP measure highlighting cash generated or used by the Group's operations. Derived from NZ IFRS net operating cash flows, it adjusts for non-trading related items. Excluding financing, tax, Significant Items, legacy cash flows, but including lease payments. Trading cash focuses on recurring cash flows from trading activities, aiding in assessing liquidity and operational efficiency. "Trading cash" is adjusted for net capital and investment expenditure invested during the period to reflect the "Free cash" generated or consumed which impacts external borrowings, funding costs and potential dividends to shareholders. "Free cash" at a Group level also includes cash tax payments. Reconciliations to the NZ IFRS cash flow statement are provided below.</p>
<p>Net debt</p>	<p>Net debt is the total of all interest-bearing borrowings (loans, USPP, capital notes, other debt), adjusted for debt hedging activities, less cash and cash equivalents. This metric is used in determining the Group's leverage and gearing ratio. It is also used by management to assess financial risk and capital structure metrics. Though Net debt is a non-GAAP measure, it is derived from NZ IFRS line items (borrowings, derivatives used in hedging of borrowings, cash) on the balance sheet. A full reconciliation of Net debt is included in note 5.</p>
<p>Funds and Invested Capital</p>	<p>"Funds" (or funds employed) represents the external assets and liabilities of the Group and is used for internal reporting purposes. At a Group level, funds excludes net debt and deferred tax balances (with the exception of deferred tax on brands) and intercompany eliminations, while at a divisional or segment level, funds excludes net debt, intergroup advances/borrowings, current and deferred tax balances (with exception of deferred tax on brands). This non-GAAP measure reflects the capital used in operations and assets generating earnings. Funds indicates the capital intensity of the business and is used in return on capital measures. While NZ IFRS does not define "funds" as a single figure, its components are derived from the audited balance sheet including investment in working capital, fixed assets, indefinite life intangible assets and net RoU asset/liability positions.</p> <p>"Invested Capital" is based on the same components as "Funds", with the exception that it excludes RoU lease liability positions.</p>

* Comparatives have been reclassified to reflect intra-group sales between continuing operations and Construction division (discontinued operation), resulting in a gross-up of external revenue and cost of goods sold in continuing operations and corresponding eliminations within discontinued operations, with no impacts on total Group results.

† Comparatives have been represented, refer to **note 2.1**.

(1) Overheads reflect warehouse, distribution, selling, general and administrative expenses.

(2) Other operating income/(expenses) include restructuring and redundancy costs, and costs associated with Golden Bay's MVA ship breakdown in FY25 and the six months ended 31 December 2024.

(3) Revaluation gains include gains recognised from the remeasurement of Vivid Living's investment properties at each reporting date.

(4) Other gains/(losses) include gains/losses from the disposal of assets, net interest income on defined benefit plans, fx gain/losses on lease liabilities and proceeds from the disposal of NZ ETS units.

Notes to the Consolidated Interim Financial Statements (Continued)

Significant Items

During the period, the Group recognised a number of Significant Items arising from one-off restructuring activities, legacy legal matters, asset recoverability assessments and the decision to divest the Construction division and exit remaining construction activities. These items are non-recurring in nature and do not reflect the Group's underlying operating performance.

Significant Items from continuing operations in the period include:

Light Building Products

Laminex® New Zealand transition costs (\$2 million)

The Group commenced the transition to its new Taupō manufacturing plant in FY25, incurring \$2 million of one-off start-up and reorganisation costs associated with establishing new operations and commissioning production at the new facility.

Iplex® Australia Western Australia pipes legal costs (\$4 million)

Iplex® Pipelines Australia (Iplex® Australia) incurred an additional \$4 million in legal costs in managing claims and disputes related to the Typlex Pro-Fit matter. These costs have been classified as Significant Items, consistent with the treatment of costs in the prior period.

Heavy Building Materials

CSP Steel divestment (\$2 million)

Following a reassessment of asset recoverability in advance of its planned divestment, the Group recognised a \$2 million write-down of CSP Steel assets, which has been classified as a Significant Item.

Residential and Development

Release of previously recognised restructuring costs and provisions (\$1 million)

During the period, the Residential and Development division recovered a portion of previously recognised restructuring costs and provisions, classified as Significant Items, primarily through the sublease of vacated properties following the Auckland branch consolidation.

Significant Items from discontinued operations in the period include:

Construction

Retained legacy construction provisions (\$60 million)

The Group recognised an additional \$60 million of provisions, primarily relating to legacy vertical projects that are being retained by Fletcher Building following the expected divestment of the remainder of the Construction division. The provision covers projected costs associated with known and announced issues and also provides for potential claims that, while currently uncertain or unknown, could arise in the course of closing out construction defects for those projects. Refer to **note 3**.

Legacy project legal and other overhead costs (\$8 million)

The Group recognised \$8 million of legal and related overhead costs in connection with managing and responding to legal claims and disputes on legacy construction projects, consistent with the treatment in prior years.

NX2 divestment (\$3 million)

The Group completed the sale of its 13.4% interest in the NX2 Pūhoi to Warkworth Public Private Partnership during the period, resulting in a \$3 million loss on divestment, which has been classified as a Significant Item.

Papua New Guinea closure (\$1 million)

The Group recognised \$1 million of costs associated with the exit from its Papua New Guinea construction operations, primarily relating to closure and wind-down activities.

South Pacific impairment (\$9 million)

Following the classification of investments and operations in Fiji, Kiribati and Vanuatu as held for sale as at 31 December 2025, the Group recognised an impairment of \$9 million on assets to be divested.

* Following the Group's strategic reset, management reassessed lease extension options under NZ IFRS 16 on a lease-by-lease basis and removed extension periods no longer considered reasonably certain to be exercised. This resulted in lower right-of-use assets and lease liabilities in the current reporting period compared with the comparative periods.

Notes to the Consolidated Interim Financial Statements (Continued)

2.3 INTANGIBLE ASSET IMPAIRMENT TESTING

The Group performs an annual impairment test for assets with an indefinite useful life (i.e. goodwill and brands) in June or at the end of a reporting period when there is any new indicators that an asset may be impaired. The Group's impairment test for goodwill and intangible assets with indefinite lives is based on value-in-use calculations. The key assumptions used to determine the recoverable amount for the different cash generating units were disclosed in the annual consolidated financial statements for the year ended 30 June 2025. The Group considered the cyclical nature of the construction and building industry, the current economic environment and the historic and forecast performance of businesses in a mid-cycle environment, and concluded that no new indicators of impairment existed that required an impairment to be recognised as at 31 December 2025.

2.4 DISCONTINUED OPERATIONS AND ASSETS HELD FOR SALE

As at 31 December 2025, the assets and liabilities of the Construction division met the criteria to be classified as held for sale, and the results of the division have therefore been presented as a discontinued operation in the consolidated interim financial statements, with comparatives represented. The assets and liabilities of all the construction businesses to be divested have been classified and presented as held for sale as at that date.

The assets classified as held for sale include the South Pacific construction operations, which are expected to be divested separately from the businesses announced to be divested on 20 January 2026, in respect of which the Group entered into a binding agreement. Residual legacy vertical construction liabilities, including obligations associated with the New Zealand International Convention Centre (NZICC), do not form part of the assets and liabilities classified as held for sale. However, these activities have been presented within discontinued operations as the Group completes the wind-down of its vertical construction business.

Financial performance and cash flow information for discontinued operations

Construction

The financial performance and cash flow information for the Construction division presented are for the period ended 31 December 2025, the period ended 31 December 2024 and the year ended 30 June 2025.

Tradelink®

The financial performance and cash flow information for the Tradelink® presented are for the year ended 30 June 2025 and the period ended 31 December 2024, including the results from 1 July 2024 and up to the date of disposal of 30 September 2024.

Retained legacy construction provisions

The Group's Construction division has exposure to defects in construction projects after completion. This exposure arises from obligations under contract and at law. As at 31 December 2025, the Group was subject to a number of claims of this nature. In assessing these claims, the Group has applied significant estimates and judgements, including consideration of the merits of each claim, the estimated cost of remediation, and the likelihood of recoveries from third parties.

The Group recognised an additional provision of \$60 million as at 31 December 2025, primarily relating to legacy vertical construction projects that are expected to be retained by Fletcher Building following the divestment of the remainder of the Construction division. The provision covers projected costs associated with known and announced issues and also provides for potential claims that, while currently uncertain or not yet identified, are expected to arise as part of discharging the Group's present obligations under the specified defect liability periods as stipulated in project contracts. The provision represents management's best estimate of the costs required to close out construction defects on those projects. The recognition of the additional provision reflects a change in the Group's assessment of the risks and costs associated with managing future claims following the divestment, including the absence of an ongoing construction business.

The Group has considered its overall exposure to claims received to date and, where appropriate, has provided for them. Notwithstanding this, there remains a risk that the Group's ultimate exposure to these claims may exceed the amount currently provided.

Notes to the Consolidated Interim Financial Statements (Continued)

New Zealand International Convention Centre (NZICC)

As announced on 4 November 2025, the New Zealand International Convention Centre (NZICC) achieved practical completion and was formally handed over to SkyCity for operational commissioning in advance of its planned February 2026 opening. The assessment of the project position continues to involve significant estimates and judgements, with the final outcome subject to uncertainty, primarily relating to the close-out of final subcontractor claims, litigation liability and any recoveries under the NZICC third-party liability insurance policy.

On 6 June 2025, SkyCity commenced proceedings against Fletcher Construction and the Company in relation to alleged delays to the NZICC project. Fletcher Construction disputes SkyCity's claims for additional liquidated damages above the contractual cap and continues to defend the proceedings. The Group continues to pursue recoveries under the NZICC third-party liability insurance policy and related legal actions; however, no recovery has been recognised as at 31 December 2025 as the proceeds are not considered virtually certain in accordance with NZ IAS 37.

Silicosis

Consistent with the position disclosed in the Group's annual consolidated financial statements as at 30 June 2025, Laminex® Australia remains subject to a number of silica related personal injury claims in Australia, with A\$0.8 million of the provision utilised during the period. Based on currently available information as at 31 December 2025, no change to the provision amount is required. Notwithstanding settlements to date, significant uncertainty remains regarding the number, timing and cost of future claims and the Group's ultimate exposure may differ from the amount currently provided.

The Western Australia (WA) plumbing failures Industry Response

As a result of its entry into the Industry Response (IR), Iplex® Australia recorded a provision of A\$155 million (NZ\$170 million) pre-tax in FY25 for the expected costs it has agreed and is obligated to incur under the IR, which was classified as a Significant Item. The total provision estimate, key risks and assumptions remain unchanged from those disclosed in the annual consolidated financial statements as at 30 June 2025.

As of 31 December 2025, A\$22 million (NZ\$25 million) of the total provision amount has been utilised, including A\$9 million (NZ\$11 million) in the current period. Costs incurred to date under the IR remain in line with the provision and the underlying assumptions disclosed at 30 June 2025.

The IR was launched in November 2024 and now has 50 participating builders undertaking the agreed work and remediation programme. As at 31 December 2025, 149 homes have been fully remediated and over 4,000 homes have had leak detector units installed under the IR.

The provision continues to cover the expected direct costs of remediation and preventive measures, including leak detector units, pipe repairs, ceiling pipe replacements and, for homes with extensive failures, full house re-pipes and associated temporary accommodation. Excluded from the provision are builders' overheads or margins and any legal or litigation defence costs.

While most major builders are participating in the IR, the Buckeridge Group of Companies (BGC), which constructed approximately 55% of the potentially affected WA homes, has not joined the IR. The provision includes allowances for homes built by BGC, which retains the option to participate in the IR at any time. To the extent BGC remains outside the IR, repair costs and associated cash flows are expected to be proportionately lower; however, this may increase exposure to disputes and claims.

The total estimated cost of remediation remains subject to significant risk and uncertainty. Key assumptions include the number of homes expected to experience plumbing failures over time, the likelihood of repeat failures, the cost of remediation per failure, and the timing of expenditure. Actual outcomes may differ from estimates, which could result in the provision being increased.

The provision does not include any allowance for litigation or class action risk. Two claims, including a class action, are currently on foot in the Federal Court of Australia. Separately, a homeowner has brought a claim against both BGC and Iplex® Australia in the WA District Court. While the IR is expected to mitigate some risks, it does not extinguish the rights of homeowners or others to pursue claims. The Group will continue to monitor developments and reassess the adequacy of the provision as new and material information becomes available.

For personal use only

Notes to the Consolidated Interim Financial Statements (Continued)

4. TAXATION

The Group calculates the period income tax expense using the tax rate that would be applicable to the expected total annual earnings. The calculation of the Group's tax expense/(benefit) as well as its major components included in the condensed interim consolidated income statement are:

	Unaudited Six months Dec 2025 NZ\$M	Unaudited Six months Dec 2024* NZ\$M	Audited Year ended Jun 2025* NZ\$M
Earnings/(losses) before taxation from continuing operations	65	(131)	(412)
Taxation at 28 cents per dollar	18	(37)	(115)
<i>Adjusted for:</i>			
Difference in tax rates	1	(3)	(3)
Non-assessable income	(4)	(5)	(8)
Non-deductible expenses	3	2	57
Tax in respect of prior years	(1)		(2)
Tax expense/(benefit) on earnings from continuing operations	17	(43)	(71)
Income tax expense/(benefit) on continuing operations is attributable to:			
Tax expense on earnings before Significant Items*	19	13	46
Tax benefit on Significant Items*	(2)	(56)	(117)
	17	(43)	(71)
Income tax expense/(benefit) on discontinued operations is attributable to:			
Tax expense on earnings before Significant Items		4	12
Tax benefit on Significant Items	(25)	(4)	(10)
	(25)		2
Income tax expense/(benefit) is attributable to:			
Total current taxation expense	2		
Total deferred taxation benefit	(10)	(43)	(69)
	(8)	(43)	(69)

* Comparatives have been represented, refer to **note 2.1**.

The net deferred tax assets balance relating to the continuing operations of \$232 million at 31 December 2025 largely comprises New Zealand and Australia carried forward tax losses incurred in the current and prior periods, timing differences on the Group's provisions and net deferred tax assets on the Group's right-of-use assets/liabilities. It is expected there will be sufficient future earnings in New Zealand and Australia to utilise the deferred tax assets in each of these jurisdictions.

Notes to the Consolidated Interim Financial Statements (Continued)

5. BORROWINGS

	Unaudited Six months Dec 2025 NZ\$M	Unaudited Six months Dec 2024 NZ\$M	Audited Year ended Jun 2025 NZ\$M
Private placements		334	323
Bank loans	1,043	737	627
Capital notes	217	298	217
Other loans	5	4	5
Carrying value of borrowings (as per Consolidated Balance Sheet)	1,265	1,373	1,172
Less: value of derivatives used to manage changes in hedged risks on debt instruments	(7)	(44)	(34)
Economic debt	1,258	1,329	1,138
Less: Cash and cash equivalents	(94)	(202)	(139)
Net debt	1,164	1,127	999
Carrying value of borrowings included within the Consolidated Balance Sheet as follows:			
Current borrowings	60	85	60
Non-current borrowings	1,205	1,288	1,112
Carrying value of borrowings (as per Consolidated Balance Sheet)	1,265	1,373	1,172

In November 2025, the Group fully prepaid and cancelled all remaining US private placement (USPP) notes with a total settlement value of approximately \$298 million. The prepayment comprised principal of \$293.4 million, accrued interest including coupon step-up of \$4.3 million, and a make-whole payment of \$0.5 million. In conjunction with the repayment, the Group terminated the associated cross currency interest rate swaps (CCIRS) used to hedge the underlying USPP borrowings, resulting in a termination cost of \$8.2 million recognised within funding costs in the current period. The prepayment was funded through drawings under the Group's Australian debt facilities (syndicated revolving credit facilities (SFA) Tranches D1 and D2), totalling A\$261 million.

Reconciliation of liabilities arising from financing activities

The table below details changes in the Group's net debt arising from financing activities, including both cash and non-cash changes.

	Jun 2025 NZ\$M	Drawdowns/ Cash inflows NZ\$M	Repayments/ Cash outflows NZ\$M	Currency translation NZ\$M	Other non-cash movements (incl. hedge accounting) NZ\$M	Dec 2025 NZ\$M
Private placements	323		(356)	23	10	
Bank loans	627	822	(420)	14		1,043
Capital notes	217					217
Other loans	5					5
Carrying value of borrowings (as per Consolidated Balance Sheet)	1,172	822	(776)	37	10	1,265
Less: value of derivatives used to manage changes in hedged risks on debt	(34)		61	(24)	(10)	(7)

Notes to the Consolidated Interim Financial Statements (Continued)

6. CONTINGENT LIABILITIES

There have been no material updates or developments as at 31 December 2025 from the position disclosed in the Group's annual consolidated financial statements as at 30 June 2025, except for the following matter.

Class action proceedings: Western Australia (WA) plumbing failures

On 12 December 2025, Fletcher Building was joined as a respondent to the proceedings by WA home builder BGC against Iplex® Australia. An additional claim has been filed by one homeowner in the WA District Court, against both BGC and Iplex® Australia. All proceedings remain in the discovery phase, which is expected to continue through 2026 (other than the WA District Court proceeding which has not yet reached the discovery phase). The outcome of the proceedings and associated liabilities, if any, remains uncertain at the date of this report.

7. RECONCILIATION OF NET LOSSES TO NET CASH FROM OPERATING ACTIVITIES

	Unaudited Six months Dec 2025 NZ\$M	Unaudited Six months Dec 2024* NZ\$M	Audited Year ended Jun 2025* NZ\$M

Notes to the Consolidated Interim Financial Statements (Continued)

8. SUBSEQUENT EVENTS

Construction divestment

On 20 January 2026, subsequent to the reporting date, the Group announced that it had entered into a binding agreement to sell its Construction division to VINCI Construction for a headline enterprise value of \$315.6 million, subject to customary working capital and net debt adjustments and a potential increase of up to \$18.5 million contingent on the outcome of a small number of contracts currently under negotiation.

The transaction comprises the sale of Fletcher Construction Holdings, including the Higgins®, Brian Perry Civil® and Fletcher Construction Major Projects businesses. The Group's South Pacific construction operations and residual legacy vertical construction obligations, including the New Zealand International Convention Centre (NZICC), are excluded from this transaction.

Completion of the transaction is subject to regulatory approvals, counterparty consents under certain contracts, and the completion of the restructuring of South Pacific operations, and is expected to occur before the end of 2026.

Amendment to the conditions of Capital Notes and redemption of FBI200 Capital Notes

On 28 January 2025, the Group through its subsidiary Fletcher Building Industries Limited (FBI) announced that the trustee for the noteholders of each series of Capital Notes has agreed to amend the conditions of the Capital Notes. This amendment allows FBI to elect to redeem all Capital Notes of a series on the applicable Election Date for that series, as an alternative to the procedure for rollover of those Capital Notes on new terms. On 27 January 2026, FBI elected to redeem all of the FBI200 Capital Notes (presented as current in the balance sheet) when they mature on 15 March 2026.

Sale of Felix Street property

On 11 February 2026, the Group entered into an unconditional agreement to sell its surplus industrial property located at Felix Street, Onehunga, Auckland for consideration of \$53.5 million. The sale follows the Group's previously announced decision to relocate the PlaceMakers® Frame & Truss operation to the Cavendish Drive site in Wiri, Auckland. Settlement of the transaction is expected to occur in May 2026. The transaction had no impact on the Group's results as at 31 December 2025.

Independent Auditor's Review Report to the Shareholders of Fletcher Building Limited

Conclusion

We have reviewed the consolidated condensed interim financial statements of Fletcher Building Limited ("the Company") and its subsidiaries (together "the Group") on pages 4 to 25 which comprise the consolidated balance sheet as at 31 December 2025, and the consolidated income statement, consolidated statement of comprehensive income, consolidated statement of movements in equity and consolidated statement of cash flows for the six months ended on that date, and explanatory notes. Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial statements on pages 4 to 25 of the Group do not present fairly, in all material respects, the consolidated financial position of the Group as at 31 December 2025, and its consolidated financial performance and its consolidated cash flows for the six months ended on that date, in accordance with New Zealand Equivalent to International Accounting Standard 34: *Interim Financial Reporting* (NZ IAS 34) and International Accounting Standard 34: *Interim Financial Reporting* (IAS 34).

This report is made solely to the Company's shareholders, as a body. Our review has been undertaken so that we might state to the Company's shareholders those matters we are required to state to them in a review report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's shareholders as a body, for our review procedures, for this report, or for the conclusion we have formed.

Basis for Conclusion

We conducted our review in accordance with NZ SRE 2410 (Revised) *Review of Financial Statements Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the *Auditor's responsibilities for the review of the financial statements* section of our report. We are independent of the Group in accordance with the Professional and Ethical Standard 1 *International Code of Ethics for Assurance Practitioners (including International Independence Standards)* (New Zealand) as applicable to audits and reviews of public interest entities. We have also fulfilled our other ethical responsibilities in accordance with Professional and Ethical Standard 1.

Ernst & Young provides agreed upon procedures, taxation compliance, financial statement preparation and other assurance related services to the Group. Partners and employees of our firm may deal with the Group on normal terms within the ordinary course of trading activities of the business of the Group. We have no other relationship with, or interest in, the Group.

Directors' Responsibility for the Interim Financial Statements

The directors are responsible, on behalf of the Entity, for the preparation and fair presentation of the interim financial statements in accordance with NZ IAS 34 and IAS 34 and for such internal control as the directors determine is necessary to enable the preparation and fair presentation of the interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Review of the Interim Financial Statements

Our responsibility is to express a conclusion on the interim financial statements based on our review. NZ SRE 2410 (Revised) requires us to conclude whether anything has come to our attention that causes us to believe that the interim financial statements, taken as a whole, are not prepared in all material respects, in accordance with NZ IAS 34 and IAS 34.

A review of interim financial statements in accordance with NZ SRE 2410 (Revised) is a limited assurance engagement. We perform procedures, consisting of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. The procedures performed in a review are substantially less than those performed in an audit conducted in accordance with International Standards on Auditing (New Zealand) and consequently do not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on those interim financial statements.

The engagement partner on the review resulting in this independent auditor's review report is Graeme Bennett.

Important Information

This presentation has been prepared by Fletcher Building Limited and its group of companies (“Fletcher Building”) for informational purposes. This disclaimer applies to this document and the verbal or written comments of any person presenting it.

This presentation provides additional comment on the 2026 Half Year Financial Results dated 18 February 2026. As such, it should be read in conjunction with, and is subject to, the explanations and views given in that document. Unless otherwise specified, all information is for the 6 months ended 31 December 2025.

In certain sections of this presentation, Fletcher Building has chosen to present certain financial information exclusive of the impact of Significant Items. A number of non-GAAP financial measures, such as measures before Significant Items, are used in this presentation which are used by management to assess the performance of the business and have been derived from Fletcher Building’s financial statements for the 6 months ended 31 December 2025. You should not consider any of these statements in isolation from, or as a substitute for, the information provided in Fletcher Building’s financial statements for the 6 months ended 31 December 2025, which are available at www.fletcherbuilding.com. Details of Significant Items can be found in note 2.2 of those financial statements.

The information in this presentation has been prepared by Fletcher Building with due care and attention; however, neither Fletcher Building nor any of its related companies, nor its or their directors, employees, shareholders nor any other person gives any representations or warranties (either express or implied) as to the accuracy or completeness of the information and, to the maximum extent permitted by law, no such person shall have any liability whatsoever to any person for any loss (including, without limitation, arising from any fault or negligence) arising from this presentation or any information supplied in connection with it, or any reliance thereon.

This presentation may contain forward looking statements, that is statements related to future events or other matters. Forward looking statements may include statements regarding intent, belief or current expectations in connection with future operating or financial performance, or market conditions. Such forward looking statements are based on current expectations, estimates and assumptions and are subject to a number of risks and uncertainties, including material adverse events, significant one-off expenses and other unforeseeable circumstances. There is no assurance that results contemplated in any of these forward looking statements will be realised. Actual results may differ materially from those projected. Except as required by law, or the rules of any relevant stock exchange, no person is under any obligation to correct this presentation at any time after its release or to provide further information about Fletcher Building.

The information in this presentation does not constitute financial product, legal, financial, investment, tax or any other advice or any recommendation.

1H FY26 at a glance

Andrew Reding,
Managing Director & CEO

1H FY26 key takeaways

- 1** A split performance, with a better Q2 not enough to offset a difficult Q1
- 2** Core performed relatively well, making up for Construction and Residential weakness
- 3** Disciplined capital allocation
- 4** Further cost out initiatives implemented, with benefits to flow in 2H FY26
- 5** Progressed simplification strategy with Construction divestment

Turnaround plan

Urgent priorities have been actioned decisively and there is a clear path of continuous improvement ahead

Implemented

- Sale of Construction and Felix Street announced
- NX2 and CSP divestments completed
- Australian and Steel divisional restructure
- Initial phase of corporate cost out
- Forward capex commitments reduced
- Implemented the decentralisation restructure

Short term

- Settle Construction and Felix Street divestments
- Continue strategic review of Residential and Development
- Continue to assess wider portfolio for strategic fit and ROIC performance
- Further decentralise corporate functions and drive lower costs
- Capital allocation and structure review (1H FY27)

Medium term

- Fully implement new operational model
- Execute on portfolio simplification opportunities
- As portfolio simplifies, continuously improve central costs
- As balance sheet targets are met, reset dividend policy and return to dividend-paying status
- Assess and execute on growth options inside core divisions

For personal use only

Construction divestment progress

Divestment of Construction Division announced on 20 January, regulatory approvals underway

- Headline sale price of \$315.6m with a potential increase to \$334.1m pending the final outcome of certain key contracts
- A significant step forward in delivering a simplified portfolio, resilient capital structure and improved shareholder returns
- Following transaction adjustments and costs, net cash proceeds are estimated to be ~\$300m - \$315m which will be applied to reduction of net debt; the transaction will also significantly reduce lease liabilities
- Regulatory and customer approval processes are underway, with current best estimate of completion timing of 1Q FY27
- Any potential cashflow and cost out benefits are likely to be seen from FY27 onwards
- Vertical legacy liabilities retained and to be managed by the Group post completion¹

1H FY26 operational highlights

- **Firth** new flagship batching plant at 882 Great South Road opened - supporting continuing volume and share growth in the Auckland market
- **Golden Bay** resilient performance, with strong discipline on energy costs. Coal substitution rates continue to increase, up a further 2% on pcp
- **Humes** three new branches were opened in Westgate, Drury and North Christchurch, positioning the business well for the market recovery
- **Winstone Aggregates** commenced on-site concrete recycling at Auckland Urban Quarry sites and established a quarry JV in Hawke's Bay
- **Winstone Wallboard's** recycled content in the manufacture of plasterboard out of the Tauranga plant has been successfully trialed up to a level of 10%
- **Laminex Australia** focused on cost management and operational efficiency, delivering \$14 million in 1H FY26 cost out initiatives
- **Laminex New Zealand** preparations for the July 2026 go-live of the new OSB plant are progressing well, including brand refresh, architectural market research, and confirmation of the initial product offering
- **Fletcher Insulation's** acoustics panels plant, was completed in December
- **PlaceMakers** Frame & Truss and estimation volumes demonstrated positive momentum with continual improvement across the period

New Zealand volumes

Light Building Products and Distribution volumes have been flat or modestly positive, while Heavy Building Materials volumes remain flat to down

1H FY26 Commentary

- Winstone Wallboards volumes have remained largely flat across the half, but on a daily sales basis there has been a continual modest improvement since Q3 FY25
- Winstone Aggregates Volumes were impacted by a weak roading market and project delays, down 13.2% vs 1H FY25
- Golden Bay up 4.3% on 2H FY25 but flat vs 1H, with non-Firth customers and new projects supporting volume demand
- PlaceMakers F&T continues to see improving volumes with a noticeable sales lift in December 2026
- Humes was impacted by weak market conditions in the civil & residential subdivision segments and product mix degradation, with concrete pipe & precast volumes declining 12.8% vs 1H FY25
- Overall, trading conditions remain competitive, with ongoing margin pressure and compression continuing to be seen in many business units and especially in the Distribution division

NZ PRODUCT VOLUMES

Rolling 12m average quarterly volumes, Q4 FY19 = 100

Note: details of each Business Unit's respective volume metric can be found in both Q1 and Q2 Quarterly Volume Reports

Australian volumes

Volumes largely positive across Australian business units

1H FY26 Commentary

- Laminex Australia volume up 6.6% vs 1H FY25, driven by growth in residential and renovation markets and competitor supply issues. By state, the highest FY26 growth is forecast in QLD (+12%), driven by strong commercial activity, hospital projects, and the lead-up to the Olympics
- Iplex Australia's 1H FY26 volumes reduced as a result of lower PE and PVC volumes, primarily in the civil sector in Victoria. Overall PVC is steady, PE challenged and BlackMax (PP) volumes are expected to continue growing
- Fletcher Insulation saw good volume increases in part due to mix changes towards higher density products following construction code changes
- Stramit's 12 month rolling volumes are 4.8% lower in the period ended 1H FY26 compared to 1H FY25 (pcp), but they have shown some recent signs of improvement when the 6 months of 1H FY26 are compared to 2H FY25 (up 11.2%)

AUS PRODUCT VOLUMES

Rolling 12m average quarterly volumes, Q4 FY19 = 100

Note: details of each Business Unit's respective volume metric can be found in both Q1 and Q2 Quarterly Volume Reports

Residential and Development

Volumes in the Residential and Development Division have been lower than anticipated

1H FY26 Commentary

- 1H FY26 Take to Profit (TTP) of 223 residential and apartment units is 81 units (27%) lower than 1H FY25.
- Sales mix in 1H FY26 also includes a meaningful proportion of lower margin bulk section sales, reducing the comparability of volume figures to prior periods
- Average net conditional sign ups to ~10¹ per week across July–November 2025, down from ~16¹ per week in the same period prior year, with the roll-off of several developments having an impact

VOLUMES – Residential and Apartment units settled (Taken to Profit)

Financial results

Will Wright, CFO

Income Statement

Net earnings from continuing operations positive for the first time since June 2023, with cost out initiatives and market share gains partly offsetting the impact of volume declines and lower Residential sales

INCOME STATEMENT NZ\$m	DEC 2025 6 MONTHS	DEC 2024 6 MONTHS
Revenue	2,866	2,852
Cost of goods sold	(1,965)	(1,928)
Gross margin	901	924
Warehouse and distribution expenses	(312)	(301)
Selling, general and administration expenses	(451)	(478)
Share of profits of associates and joint ventures	8	3
Revaluation gain on investment property	-	2
Other	(1)	(3)
EBIT before Significant Items	145	147
Significant Items	(7)	(177)
EBIT	138	(30)
Lease interest expense	(33)	(31)
Funding costs	(40)	(70)
Taxation (expense)/benefit	(17)	43
Losses attributable to non-controlling interests	(3)	-
Net earnings/(losses) from continuing operations	45	(88)
Net losses from discontinued operations	(56)	(46)
Net losses attributable to the shareholders	(11)	(134)
Basic losses per share (cents)	(1.0)	(14.3)
Basic earnings/(losses) per share from continuing operations (cents)	4.2	(9.4)

- Revenue was broadly aligned with pcp, with better volumes in WWB and Laminex AU (+6.6%), that were partially offset by 81 fewer unit sales in R&D
- Gross margin held broadly flat vs pcp while overhead costs savings in R&D and Corporate were partially offset by higher costs in Distribution
- Like-for-like EBIT before Sig Items (including Construction) was \$151m compared to \$167m in 1H FY25
- Significant Items mainly made up by Iplex Australia pipes legal costs, CSP impairment and OSB plant transaction costs
- Funding costs reflect lower interest rates and lower debt vs pcp, and includes break fees and make-whole costs from early termination of USPP and interest rate swaps (~\$10m)
- Net losses from discontinued operations includes the Construction Division in both the current and comparative periods and Tradelink in the comparative period

For personal use only

Discontinued operations

The Construction Division has been presented as a discontinued operation

FINANCIAL PERFORMANCE & CASHFLOW NZ\$m	DEC 2025 6 MONTHS
Revenue	519
Cost of goods sold	(463)
Gross margin	56
Selling, general and administration expenses	(52)
Other operating income/(expenses)	2
EBIT before Significant Items	6
Significant Items	(81)
Losses before interest and taxation (EBIT)	(75)
Lease interest expense	(3)
Funding costs	(3)
Income tax benefit	25
Net losses from discontinued operations net of tax	(56)
Basic losses per share (cents)	(5.2)
Basic losses per share from continuing operations (cents)	(5.2)
Net cash inflow / outflow from operating activities	25
Net cash inflow / outflow from investing activities	20
Net cash inflow / outflow from financing activities	(15)
Net movement in cash generated by discontinued operations	30

- As at 31 December 2025, the Construction Division met the criteria to be classified as held for sale and the Division has therefore been presented as a discontinued operation
- These discontinued operations include:
 - **All of the New Zealand construction businesses** being sold to VINCI (as announced on 20 January 2026)
 - **The South Pacific construction operations**, which are expected to be divested or exited separately from the businesses announced to be divested
 - **Residual legacy vertical construction liabilities**, including obligations associated with the New Zealand International Convention Centre, which remain with the Group and do not form part of the assets and liabilities classified as held for sale. However, these activities have been presented within discontinued operations as the Group completes the wind-down of its vertical construction business
- The balance sheet for the operations to be divested includes net assets of \$183m (\$428m of assets, \$245m of liabilities)

EBIT bridge 1H FY25 to 1H FY26: Key drivers of YoY change

\$m

Balance Sheet

Strong focus on working capital and lease management, with Construction divestment to result in greater resilience once completed

BALANCE SHEET NZ\$m	31 DEC 2025	31 DEC 2024	30 JUN 2025
Inventory	1,928	1,953	1,905
Debtors	700	770	849
Creditors	(929)	(1,147)	(1,202)
Other Working capital	(394)	(255)	(345)
Property, plant and equipment and investment property	2,326	2,354	2,349
Indefinite life intangible assets	633	880	656
Other Intangible assets	31	150	47
Investments	211	240	218
Retirement plan assets	152	151	150
Right-of-use lease Asset	1,004	1,279	1,246
Deferred tax liability - brands	(61)	(69)	(63)
Derivatives for foreign currency hedging	(8)	3	(8)
Current tax balances	29	31	29
Net Position held for sale	233	2	
Invested Capital	5,855	6,342	5,831
Right-of-use lease Liability	(1,324)	(1,543)	(1,497)
Funds	4,531	4,799	4,334
Deferred tax balances (excl. deferred tax on brands)	294	251	272
Carrying value of borrowings	(1,265)	(1,373)	(1,172)
Value of hedge derivatives	7	44	34
Cash and cash equivalents (incl. those classified as held for sale)	94	202	139
Funds / Group Equity	3,661	3,923	3,607

- R&D funds increased +\$144m, with \$151m of land purchases during the period. Further purchases of ~\$64m are also expected in 2H FY26 with an additional ~\$132m¹ expected across FY27 and FY28
- PPE principally increased by additional investment in new OSB plant, with \$32m increase driven by NZD/AUD FX impact
- Construction assets and liabilities have been reclassified as held for sale (PPE, RoU, cash, and working capital balances), with net asset value of NZ\$183m²
- Provisions increase was largely attributable to the additional \$60m retained legacy construction project positions
- Deferred tax balance increased by \$17m with additional Construction provisions
- Creditors reduced reflecting a more balanced and less volatile approach to working capital

For personal use only

Cash flows

Strong operating cash flow of \$156m (up 79% on 1H FY25) despite \$151m of residential land purchases and reduced receipts from customers

CASH FLOWS NZ\$M	DEC 2025 6 MONTHS	DEC 2024 6 MONTHS
Cash flow from operating activities		
Receipts from customers	3,411	3,942
Receipts from residents (new ORAs)	4	8
Payments to suppliers, employees and other	(3,258)	(3,861)
Income tax paid	(1)	(2)
Net cash from operating activities	156	87
Cash flow from investing activities		
Sale of subsidiaries and investments	17	182
Acquisition of subsidiaries	-	-
Investment in joint ventures and associates	(3)	-
Dividends & interest received	6	7
Sale of property plant and equipment	3	53
Purchase of property plant and equipment and intangible assets	(150)	(150)
Investment in mining, consenting and stripping	(4)	(5)
Payments for investment property and development or investment property	(4)	(6)
Net cash from investing activities	(135)	81
Cash flow from financing activities		
Funding costs (expensed & capitalised)	(55)	(79)
Lease principal & interest paid	(132)	(135)
Net non-controlling contributions/(distributions)	(3)	6
Net issue / repurchase of shares	-	679
Net draw / (repay) borrowings & capital notes	107	(752)
Net cash from financing activities	(83)	(281)
Net movement in cash held	(62)	(113)

- Key components of net cash flows from operating activities included;
 - EBITDA¹ before Significant Items of \$331m (down ~4% on 1H FY25)
 - disciplined creditors and debtors control in M&D divisions
 - \$14m legacy construction inflows, and \$26m Significant Items cash outflows
 - Residential working capital spend in 1H FY26 of \$142m, largely driven by land purchases of ~\$151m
- Proceeds from the sale of NX2 resulted in a net cash inflow of \$19m in 1H FY26, partially offset by disposal costs on Tradelink
- Capex PP&E investment includes: \$86.5m OSB plant, \$5.4m PlaceMakers F&T plant, \$7.2m new Firth Auckland batching plant, \$2.8m Fletcher Insulation acoustic panels plant

Central costs

Increased operating discipline reflected in significantly lower corporate and divisional costs

For personal use only

CENTRAL COST SUMMARY NZ\$m	DEC 2025 6 MONTHS	DEC 2024 6 MONTHS
Group		
Technology	42	56
Corporate overhead costs	16	23
Property & Penrose campus	5	5
Other Group central costs (legal, payroll and other)	9	11
Digital@Fletcher project costs	-	-
Other income	(3)	(4)
Group central costs (pre-recharge)	69	91
Group recharges	(52)	(62)
Net Group corporate costs	17	29
Division¹		
Divisional central costs (pre-recharge)	28	33
Division recharges	(16)	(16)
Net Divisional corporate costs	12	17

- Group technology costs decreased materially post restructure and decentralisation initiatives
- Corporate overhead costs include executive remuneration and director fees, D&O insurance, company secretarial and listing fees and other Group support services
- Further cost out expected post Construction divestment to ensure corporate functions are “right sized”
- Other income primarily relates to ETS sales (1H FY25 only) and net interest income on defined benefit pension plan
- STI accruals in 1H FY26 are lower comparable to 1H FY25 reflecting current financial performance

Working capital performance

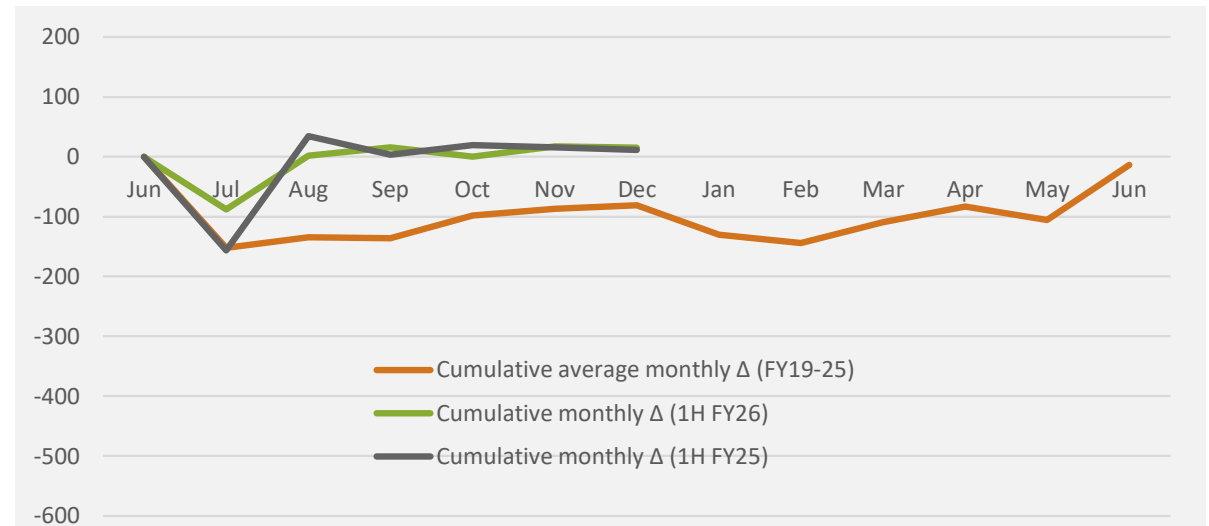

Working capital volatility has improved and is more in line with long term averages, with significant improvements expected with portfolio simplification

- Over the past two years, trading cash flows and working capital have been relatively volatile requiring the Group to maintain significant financing headroom
- The ongoing focus on reducing working capital volatility and trading cash flow has resulted in movements returning closer to long term averages
- Changes to the portfolio, such as the sale of the Construction division and potential divestment of Residential and Development, will likely lead to a material reduction in working capital volatility

GROUP CUMULATIVE MONTHLY ΔTRADING CASH¹
(FY19 – FY25); \$m

GROUP (ex CONSTRUCTION & R&D) CUMULATIVE MONTHLY ΔTRADING CASH¹
(FY19 – FY25); \$m

1. Average monthly change in trading cash for the period from FY19-FY25 accumulated over 12 months, Trading Cash is defined as net cash from operating activities, excluding income tax paid and including lease principal and interest paid

For personal use only

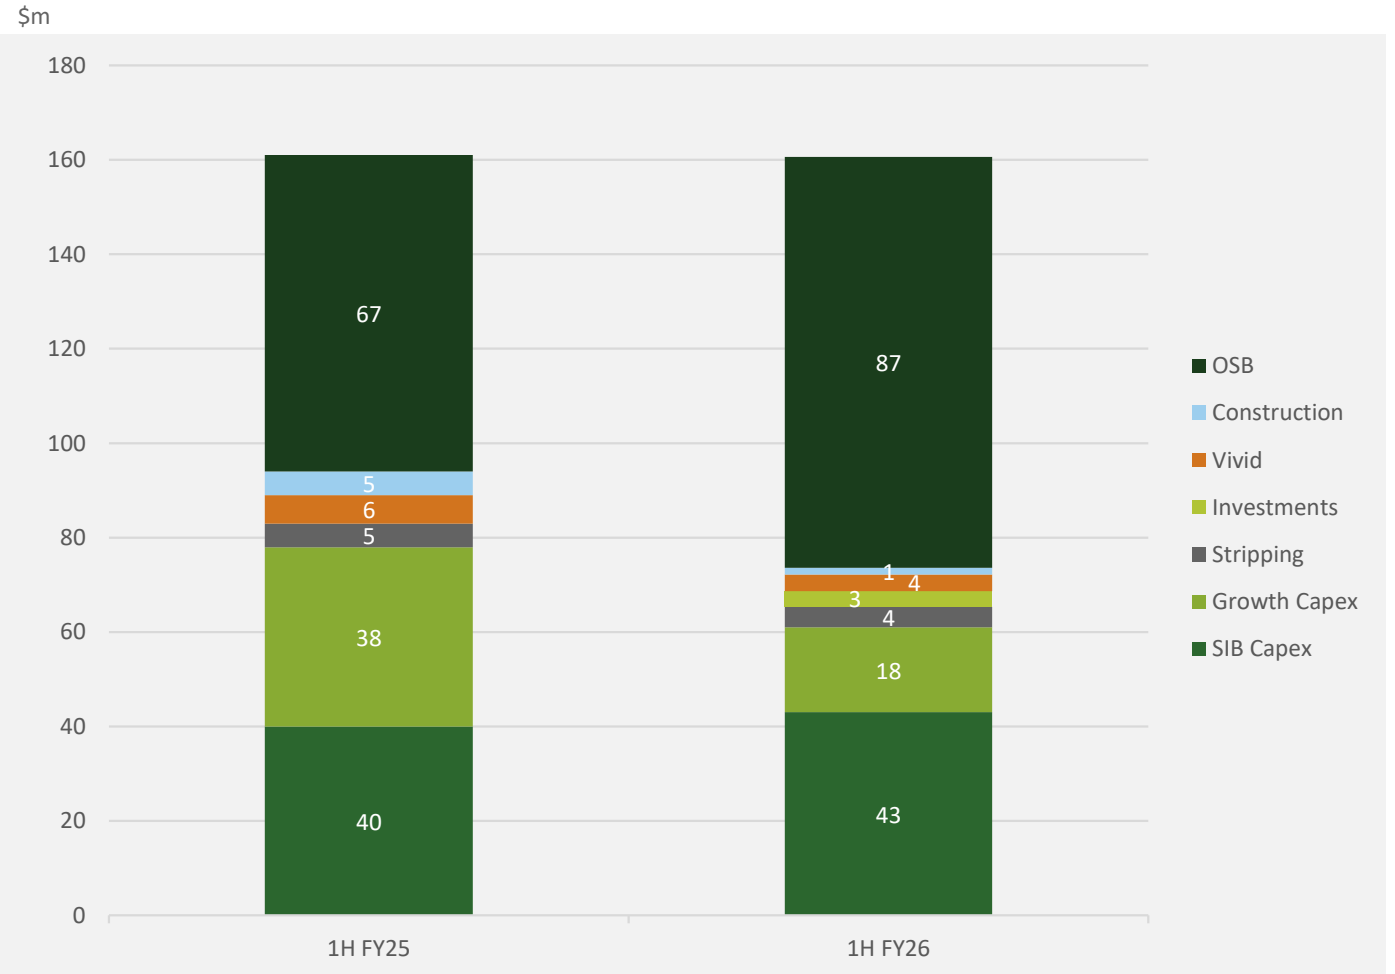

Capital allocation

Capex and Investments of \$161m in 1H FY26 flat compared to 1H FY25

- Investments includes contributions into Winstone Aggregates JVs
- Stripping (removing overburden to uncover aggregate resource) costs of ~\$4m in Winstone Aggregates and Golden Bay. These are capitalised and amortised as the resource is extracted
- Key 1H FY26 projects include:
 - OSB plant projected to go live April 2026, with initial board production expected in June/July 2026
 - Frame & Truss Cavendish Drive expected to go live by the end of May 2026
 - New Firth Auckland batching plant at 882 Great South Road opened in December 2025
- Divestment of the Construction Division will result in a meaningful reduction in capex relating to asphalt plant renewals originally planned from 2H FY26 into FY27 and FY28
- Full year FY26 Capex expected to be \$290m - \$310m (including OSB capex), with an additional \$30m to be spent on quarry consenting & stripping and \$5m on Vivid

CAPEX & INVESTMENTS BREAKDOWN

For personal use only

Management of lease portfolio

Reduction of \$172m in lease liabilities which will further reduce post divestment of Construction

- Total lease liabilities are ~\$1.3bn and represent ~52% of Group gross debt
- Lease terms were re-assessed and materially shortened across the Group, resulting in a ~\$172m reduction in Continuing operations lease liabilities.
- The divestment of Construction will also lead to a further reduction of ~\$76m
- In Continuing Operations, Land and Buildings account for the majority of the leases (~83%) with Plant & Machinery responsible for the remainder (~17%)
- ROIC calculation includes ROU assets to ensure lease impact is included in performance hurdles

Weighted average lease term (continuing operations)

As at 31 December 2025, \$m

Lease Liabilities NZ\$m	As at 31 DEC 2025	As at 31 DEC 2024
Light Building Products	(395)	(431)
Heavy Building Materials	(421)	(463)
Distribution	(361)	(374)
Materials & Distribution	(1,177)	(1,268)
Residential and Development	(2)	(12)
Corporate & Other	(69)	(140)
Continuing operations	(1,248)	(1,420)
Discontinued operations	(76)	(123)
Group	(1,324)	(1,543)

Funding mix

Continuing to make progress on simplifying funding structure, and implementing a more efficient capital model aligned with current operating and strategic priorities

TOTAL FACILITIES MATURITY PROFILE

As at 31 DECEMBER 2025, \$m

- Undrawn credit lines of \$750m and cash on hand of \$62m as at 31 December 2025; total liquidity of ~\$0.8b
- USPP (~\$295m) fully prepaid and cancelled, refinanced via bank debt with related swap termination costs and a make whole payment representing cash costs of ~\$7m incurred
- New \$200m 2-year bank liquidity facility established and existing \$325m Tranche C of the Syndicated Facility Agreement extended for 4 years, to FY30
- FY28 maturities reflective of a transitional capital structure and work is already underway on their refinancing
- Average maturity of debt is 2.3 years; average interest rate on debt is 4.7% excluding line fees and 5.8% including line fees
- Group gearing after hedging of 24% at 31 December 2025 (22% at Dec 2024)
- Moody's rating of Baa3/stable affirmed on 25 July 2025
- \$55m capital notes will be redeemed in March 2026

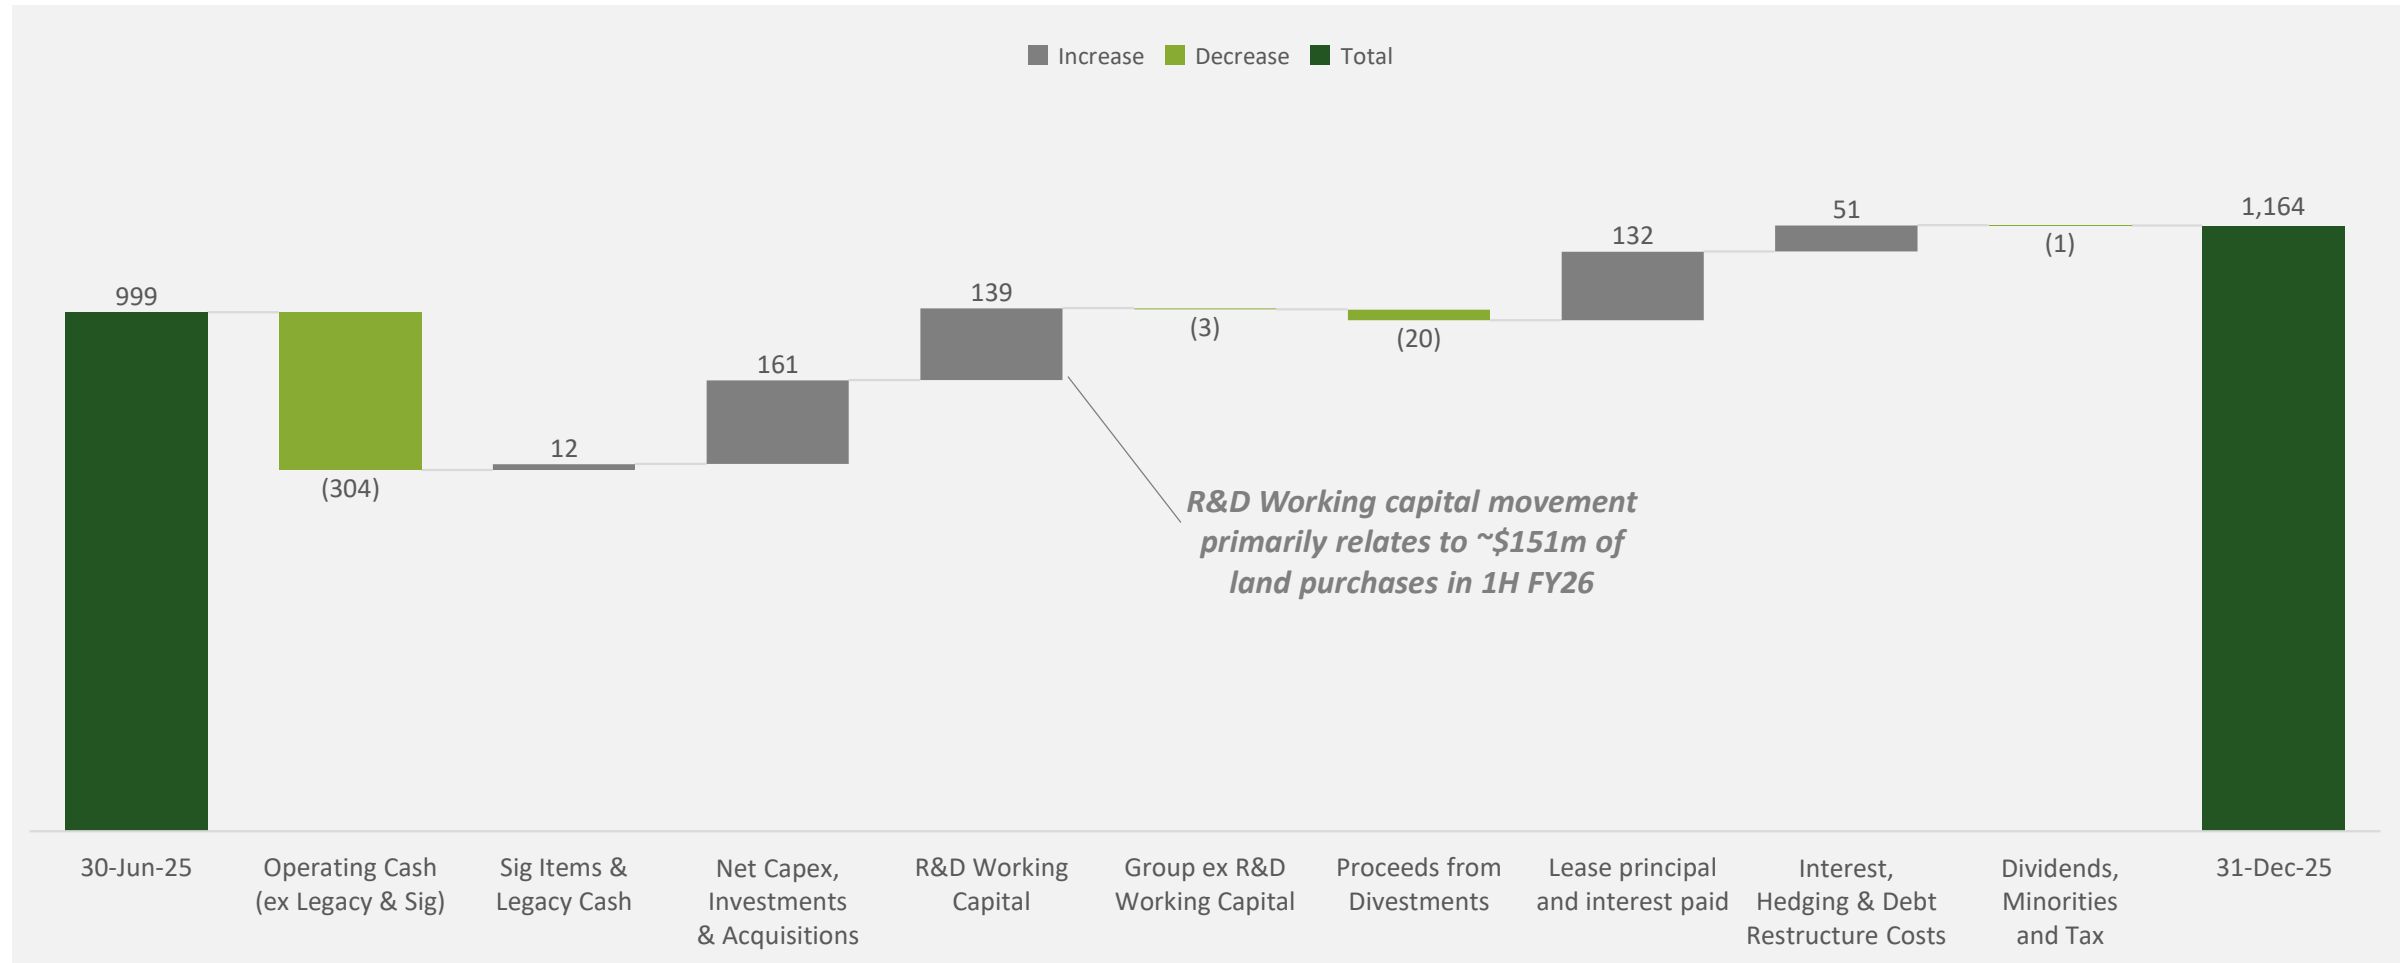

For personal use only

Net Debt bridge

Net Debt managed well despite significant Residential land purchases, FY26 full year expected to be flat compared to FY25 (excluding proceeds from Construction and property sales)

Outlook

Andrew Reding, Managing
Director & CEO

For personal use only

FY26F Outlook

Operating volumes continue to be subdued, impacting operating leverage and profitability

- New Zealand market volumes were largely flat in Q2 FY26 and overall remain subdued with meaningful improvements not expected until calendar year 2027
- Volumes in Australian businesses are mixed with Laminex and Fletcher Insulation starting to show a positive volume trend which, if continued, should support earnings
- Margin compression remains a challenge across a number of Business units, but cost out initiatives in Business Units, Divisions and Corporate have helped support profitability and operating leverage should provide upside as volumes recover
- In addition to the recent sale of Felix Street, other industrial land sale processes currently underway also have potential to generate EBIT and act as a short term offset to weakness in Residential and Development
- Our best estimate for Construction completion remains Q1 FY27 and Residential and Development strategic review remains underway; any potential cashflow and cost out benefits should be seen from FY27
- Looking ahead, we expect the benefits of actions already taken on costs, portfolio simplification, and capital discipline to progressively support performance as market conditions improve

For personal use only

Appendix

For personal use only

Fletcher Building at a glance

A leading building materials manufacturer and distributor across New Zealand and Australia with complementary development & construction businesses

- NZX and ASX listed (FBU), with market cap of ~\$4.0b
- FY25 Revenue of \$7b and EBIT¹ of \$390m
- Operates through a portfolio of 24 business units that employs 12,500+ people across Australia and New Zealand
- Portfolio provides meaningful vertical integration across key product categories including construction materials, wood & panels, water and insulation
- Exposed to structurally attractive markets, with population growth and infrastructure deficits driving demand for housing and infrastructure

Our medium-term strategy

At our Investor Day in June we presented a clear plan for improvement

Medium term focus on manufacturing and distribution of building products and materials

1 Urgent action

- Clear plan with immediate priorities already implemented and next stages identified
- Urgency and speed will be maintained throughout

2 Focus on high performance

- Business units and the Group will measure return against industry-specific WACC targets
- Underperforming business units evaluated

3 Empower our leaders

- Fletcher Building's business units are led by talented people, but more autonomy and recognition of BU-specific needs is required
- Develop and integrate performance-driven culture across business units

4 Resilient capital structure

- Dividend paused until net debt target of \$400m - \$900m (pre IFRS-16) achieved
- Target investment grade credit metrics

Supportive macro-economic trends

For personal use only

Light Building Products

- **Winstone Wallboards** - Revenue ~2% higher than pcp with product margins flat due to continued operational excellence improvements combined with favourable gypsum price movements mitigating cost inflation on labour, utilities and paper
- **Laminex Australia** - Delivered a 5% revenue increase, driven by a 7% uplift in domestic volumes (sqm). However, pricing pressure, sales mix and higher raw material costs impacted 1H FY26 EBIT, partially offset by improved recoveries and cost management
- **Laminex New Zealand** - Volumes were broadly flat on pcp, with the result impacted by plant breakdowns and accelerated depreciation of the Taupo particleboard plant ahead of replacement by the new OSB plant, resulting in 1H FY26 EBIT declining 19%
- **Waipapa Pine** - Volumes increased 15% on pcp, driving improved production recoveries from more stable production operations and procurement efficiencies, offsetting labour cost inflation. Pricing across timber products remains challenging
- **Comfortech** - Pink Batts volume increased by 5% compared to pcp, driven by positive market activity and share gains. However, this strong performance was partially offset by reduced commercial segment activity, which was down ~25%
- **Fletcher Insulation** - Share gains lifted glasswool volumes by 2% despite subdued market conditions. Overall, margins contracted due to pricing pressures, utilities and labour cost inflation, partially offset by plant performance and raw material savings
- **Iplex New Zealand** - 17% volume increase compared to pcp, driven by rural South Island sales and market share gains as the rural sector resumed delayed projects. Pricing remains challenging particularly in the civil and plumbing segments
- **Iplex Australia** - volume increased 1% compared to pcp, driven by growth in electrical and plumbing, but offset by weaker civil and irrigation volume. Market pricing pressure impacted margins, partially offset by procurement savings and lower resin costs
- **Oliveri** - 1H FY26 trading was subdued compared to pcp, primarily due to the contraction of the home improvement market, with retail sales declining

	6 months ended 31 December 2025 (1H FY26)	Change from 6 months ended 31 December 2024 (1H FY25)	
Gross revenue	\$1,100m	↑	3% from \$1,070m
External revenue	\$1,004m	↑	4% from \$965m

Capex & Investments	\$114m	↑	34% from \$85m

For personal use only

Heavy Building Materials

- **Firth:** Volumes were robust during the half (broadly flat YoY) with share growth offsetting a subdued and highly competitive market. During the half, Firth's new flagship Auckland batching plant was opened, with costs in line with expectations
- **Golden Bay:** Resilient performance, with disciplined manufacturing cost performance (particularly thermal and electrical energy) and supply chain efficiency offsetting a 1% volume decline. Coal substitution continues to rise, up 2% on pcp
- **Humes:** Impacted by weak market conditions in the civil & residential subdivision segments and product mix, with concrete pipe & precast volumes declining 13% YoY. During the half, three new branches were opened in Westgate, Drury and North Christchurch, positioning the business well for the market recovery
- **Winstone Aggregates:** Volumes were impacted by a weak roading market and project delays, down 13% YoY. Operating and overhead cost reductions protected margins alongside continued price discipline. Sales of recycled aggregates through The Urban Quarry increased significantly during the period
- **ColorCote:** Robust performance with increased production volumes through higher export sales and domestic share growth driving productivity improvements and offsetting continued margin pressure
- **Dimond:** Volumes increased 13% YoY driven by strong uptake of new products
- **Easysteel:** Operating profit was broadly flat on the prior period, with higher sales volumes (up 11% YoY) offset by continued margin pressure
- **Reinforcing:** Margins impacted by a highly competitive pricing environment and persistent cost pressures. Restructuring action taken in 1H FY26 to mitigate impacts
- **Stramit:** Improved performance compared vs pcp despite lower volumes (down 5% YoY) with good operational discipline and cost control. Market share stabilising following greater customer service and DIFOTIS focus from new management team

Distribution

- 1H FY26 saw the residential construction market continuing to perform below the activity levels experienced in 1H FY25 resulting in continued pressure on revenue and margins for the Distribution Division
- There appears to be a disparity in the residential construction market activity with the lower South Island regions in particular performing relatively well while the activity in main centres has been slower to recover following the post COVID building boom.
- **PlaceMakers** - Revenue flat on 1H FY25 having stabilised market share in a highly competitive market. Competitive pressure on revenue and margins particularly felt in Q1. Frame & Truss activity increasing in Q2 showing encouraging commercial momentum
- **Mico** - the plumbing supplies market remained subdued with activity significantly below FY25. Market share gains resulted in a revenue lift of 4% with margins only slightly below 1H FY25 despite the competitive conditions
- Both distribution business units remain focused on growing profitable business and business efficiency in a challenging trading environment

Residential and Development

- 223 units Taken To Profit (TTP), 81 units (-27%) lower than 1H FY25
- EBIT for 1H FY26 was \$12m, \$2m lower than the 1H FY25, with the margin impact of lower volume partly offset by cost management
- Invested capital increased \$80m from December 2024 inclusive of \$151m of land purchases during 1H FY26. Further purchases of ~\$64m are also expected in 2H FY26 with an additional ~\$132m¹ expected across FY27 and FY28
- New developments coming to market in 2H FY26 include first homes settling at The Hill, Kaipatiki and Beachlands, support expectations of stronger 2H volumes.
- The Beachlands pre-sales campaign (October 2025 launch) has delivered exceptionally strong results, with 32 contracts secured as at 31 December 2025

Construction

- The **Construction Division's** 1H FY26 performance has been impacted by delays in project work coming to market and by slower-than-expected commencement of projects following award
- **Higgins**, selected as preferred bidder on three NZTA integrated delivery contracts (previously known as NOC maintenance contracts) securing ~\$1.3b of work. One of two key wind farm projects is nearing completion, with Higgins also announced as preferred contractor for a further wind farm project (Dunedin). During the period, Higgins achieved its single largest day of bitumen supply on record, being 351tn
- **Brian Perry Civil**, achieved practical completion on its largest project as head contractor, at the Auckland Airport Taxiway Mike project. Completed the Te Reinga Bridge lift, the largest lift of its kind undertaken in New Zealand, involving a 175 tonne lift over 56 metres
- **Major Projects**, delivered improved margin and margin performance. Eastern Busway awarded a further works package (Zone 5 - Whakamaumahara) securing \$90m additional scope and Rā Hihi flyover successfully completed - a key programme milestone. Riverlink Alliance project (Wellington) has now mobilised on site, with construction underway

FY25 Significant Items

Total Significant Items of \$88m in 1H FY26, primarily construction related provisions

1H FY26 Significant Items (\$m)	
From Continuing operations	7
Legacy construction & legal provisions	68
South Pacific write down and closure costs	10
NX2 divestment – loss on disposal	3
Total from Discontinued operations	81
Total	88

- **Significant Items from continuing operations**

- ~\$7m, primarily comprising PIFWA-related legal fees of ~\$4m, a CSP inventory write-down of ~\$2m, and Laminex New Zealand Taupō plant transition costs of ~\$2m

- **Significant Items from discontinued operations**

- Totals to ~\$81m, comprising ~\$60m of additional provisions for retained legacy construction projects, ~\$8m of legacy overheads and legal costs associated with vertical construction, a ~\$10m of South Pacific closure costs and impairments, a ~\$3m loss on disposal of the NX2 investment, and some legal and advisory costs incurred in connection with the divestment of Construction and strategic review of Residential and Development

* Comparatives have been reclassified to reflect intra-group sales between continuing operations and Construction Division (discontinued operation), resulting in a gross-up of external revenue and cost of goods sold in continuing operations and corresponding eliminations within discontinued operations, with no impacts on total Group results.

+ Comparatives have been represented (refer note 2.1 of the 2026 Interim Financial Results).

1. Overheads reflect warehouse, distribution, selling, general and administrative expenses.

2. Other operating income/(expenses) include restructuring and redundancy costs, and costs associated with Golden Bay's MVAC ship breakdown (in FY25 and the six months ended 31 December 2024).

3. Revaluation gains include gains recognised from the remeasurement of Vivid Living's investment properties at each reporting date.

4. Other gains/(losses) include gains/losses from the disposal of assets, net interest income on defined benefit plans, fx gain/losses on lease liabilities and proceeds from the disposal of NZ ETS units.

Iplex Australia & Silicosis

House remediations and pipe replacements building momentum, no change to provisions

<p>Iplex remediation update</p>	<ul style="list-style-type: none"> As of 31 December 2025, A\$22 million (NZ\$25 million) of the total A\$155 million (NZ\$170 million) provision amount has been utilised, including A\$9 million (NZ\$11 million) in the current period Costs incurred to date under the Industry Response (IR) remain in line with the provision and the underlying assumptions disclosed at 30 June 2025 The IR was launched in November 2024 and now has 50 participating builders undertaking the agreed work and remediation programme (compared to 38 builders at 30 June 2025) While most major builders are participating in the IR, the Buckeridge Group of Companies (BGC), which constructed approximately 55% of the potentially affected WA homes, has not joined the IR. The provision includes allowances for homes built by BGC, which retains the option to participate in the IR at any time To the extent BGC remains outside the IR, repair costs and associated cash flows are expected to be proportionately lower; however, this may increase exposure to disputes and claims (BGC homes are being fitted with leak detectors) 	<p>Iplex Industry Response¹</p> <table border="1"> <thead> <tr> <th>Activity</th> <th>Completed as at 31-Dec-24</th> <th>Completed as at 30-June-25</th> <th>Completed as at 31-Dec-25</th> </tr> </thead> <tbody> <tr> <td>Leak detector Installation</td> <td>592</td> <td>2003</td> <td>4188</td> </tr> <tr> <td>Ceiling Pipe Replacement</td> <td>732</td> <td>996</td> <td>1176</td> </tr> <tr> <td>Full Home Remediation²</td> <td>5</td> <td>55</td> <td>149</td> </tr> </tbody> </table>	Activity	Completed as at 31-Dec-24	Completed as at 30-June-25	Completed as at 31-Dec-25	Leak detector Installation	592	2003	4188	Ceiling Pipe Replacement	732	996	1176	Full Home Remediation ²	5	55	149

<p>Iplex class action & BGC proceedings</p>	<ul style="list-style-type: none"> On 12 December 2025, Fletcher Building was joined as a respondent to the proceedings by WA home builder BGC against Iplex® Australia. An additional claim has been filed by one homeowner in the WA District Court, against both BGC and Iplex® Australia. All proceedings remain in the discovery phase, which is expected to continue through 2026 (other than the WA District Court proceeding which has not yet reached the discovery phase) The outcome of the proceedings and associated liabilities, if any, remains uncertain 																	
<p>Silicosis</p>	<ul style="list-style-type: none"> Consistent with the position disclosed in the Group’s annual consolidated financial statements as at 30 June 2025, Laminex® Australia remains subject to a number of silica related personal injury claims in Australia, with A\$0.8 million of the provision utilised during the period. Based on currently available information as at 31 December 2025, no change to the provision amount is required 																	

1. Includes activities prior to launch of the Industry Response; 2. Pipe has been completely removed from the home
