<sup>1</sup> 1H25 restated to align with revised segment reporting structure announced 4 July 2025

The Group reported operating profit of **\$83.1 million** and operating earnings of **48.6 cents per share**, reflecting the continued strengthening of earnings quality through diversification and disciplined capital management. Total assets under management were broadly stable at **\$39.9 billion**. Statutory NPAT was down due to unrealised fair value movements in fund investments.

The Board has determined an interim dividend of **39.5 cents per share**, fully franked, payable in accordance with the Group's revised dividend policy targeting at least 80% of Group operating profit.

MFG CEO and Managing Director **Sophia Rahmani** said:

“The Group’s first-half result reflects the progress we are making in delivering our strategy and strengthening the diversity of earnings. In a challenging environment for active managers, MFG delivered earnings growth, maintained a strong balance sheet and continued to return capital to shareholders.

During the first six months of FY26 MFG continued to execute across its strategic priorities, strengthening its distribution platform, enhancing governance and risk frameworks, and further improving the quality of Group earnings through increased contributions from strategic partnerships. MFG remains a cash-generative, capital-disciplined business with a strong balance sheet and stabilising flows, positioning the Group well to continue delivering for clients and creating long-term value for shareholders.”

### Outlook

As the Group enters the second half of FY26, MFG remains focused on delivering for clients, supporting investment performance, deepening client relationships and selectively investing for growth, while maintaining a disciplined approach to capital and risk management.
