First half results summary and outlook

HiTech Group Australia Limited (“HiTech” or “the Company”) is pleased to provide an update on the Company’s strategic positioning and growth outlook, as demand for ICT talent and services continues to strengthen.

CEO and Managing Director, Elias Hazouri, commented: “The H1 FY26 financial results reflect the impact of government reductions in contractor and consulting expenditure across the economy. While the outcomes fall short of our original targets, they remain solid at a time when many competitors are less equipped to maintain their position and competitiveness. HiTech remains strategically positioned to meet the continued demand for ICT talent and services. Our strong financial footing and long-term supplier agreements continue to underpin our competitive edge. We are currently delivering on multiple active client mandates, including Defence preferred supplier engagements and are actively pursuing new tender opportunities across federal and state government, where critical ICT programs continue to drive demand. We have taken decisive steps to safeguard margins by securing new agreements with major clients, reducing both fixed and variable costs, and sharpening our focus on departments and agencies where margin stability and revenue quality remain attractive. Our strong cash reserves and zero debt position place us in an enviable position to capitalise on emerging growth opportunities including organic investment to expand into new markets or adjacent industries as we as inorganic growth via potential acquisitions.”

HiTech remains committed to delivering long-term value for shareholders and will continue to explore avenues for sustainable growth in alignment with market demand.

In determining the lease term, the group considers all facts and circumstances that create an economic incentive to exercise an option. When exercising lease extensions of building premises, the company considers the following factors:

- Any termination and make good penalties.
- Value of leasehold improvements.
- Cost of disruption to the business to relocate; and
- Availability and cost of other suitable properties.

Extension options are only included in the lease term if the lease is reasonable. As a result, the company has not included the extension option.

General

The Company's core business is in recruitment of permanent and contracting ICT professionals. We have won new business which led to increasing our revenue and profit.

EPS

Basic earnings per share for the first half of the current financial year were 4.82 cents per share compared to 8.14 cents per share in the previous corresponding period.

Segment Information

The Company reports to management and allocates resources on a single reporting entity basis.

Significant features of operating performance

HiTech currently supplies permanent and contract staff from its large proprietary database of over 410,000 specialised and skilled professionals that have been secured through a strategy of multiple sourcing tools and networking drives. HiTech's candidate database is the primary source of skilled professionals that we draw upon to fulfil our clients' personnel demands. This is a proprietary database that is invaluable to our business and ensures we maintain our sustainable competitive advantage in the marketplace. This same database is utilised to resource our ICT Services business.

The HiTech Client base includes corporate and government clients and is well established, with strong representation by high technology companies, banking/financial services companies plus Federal Government departments and agencies. HiTech has also entered into preferred supplier agreements for the supply of staff in both the public and private sectors.

ICT contracting, comprising the provision of ICT professionals for temporary and other non-permanent staffing needs of clients for specific projects, has continued to supply HiTech with strong cash flow. ICT contracting is viewed as a relatively higher volume business with lower margins. We have worked on reducing low margin contracting business and building higher margin contract opportunities. We actively seek new managed services arrangements that will further increase strong margin income. This strategy has delivered favourable results without the need to significantly increase the operating cost base as yet.

Factors which are likely to affect results in the future

While there is still ongoing demand for ICT talent and a shortage of high quality security cleared candidates, the advent of the cost cutting government measures in place may potentially reduce ICT resources demand which will result in lower margins and downward pressure on placement numbers. We will continue to place candidates on the back of the ongoing demand for talent which will further enhance our results. Our focus is on high margin business and moving away from low margin contracting work where we can. We continue to explore participation in the rationalisation of the recruitment and ICT services industries. We have looked and are still looking at potential acquisitions/mergers that are EPS accretive and suit our criteria. We have retained our preferred supplier status with our valued clients, increased our client base and are working towards further developing these relationships in these unprecedented times. With a focus on being relevant, we are constantly evolving and improving our systems and productivity to provide a better service to our clients and candidates.

Outlook

HiTech is strongly positioned to meet ongoing market demand for ICT talent and services, supported by a solid balance sheet and long-term supplier agreements.

While we experienced margin pressure on contracting agreements heading into the end of the calendar year, we have taken decisive steps to protect and strengthen margins. These include securing new agreements with major clients, reducing both fixed and variable costs, and sharpening our focus on departments and agencies where margin quality and revenue stability remain strong. These initiatives are expected to flow through in H2 FY26. As a result, HiTech is now positioned to benefit from economies of scale, enabling further volume growth without materially increasing our cost base, and supporting continued margin expansion and improved profitability.

HiTech continues to deliver across several active client mandates, including key Defence engagements, and is actively pursuing a robust tender pipeline across private clients, federal and state governments, where critical ICT programs remain a priority. As global and domestic conditions evolve, we remain well positioned to respond to shifts in demand. We are also investing in strengthening our talent pool and consultant capability, with increased emphasis on specialised expertise and high-level government security-cleared talent in preparation for upcoming programs of work.

With more than 55 years of combined experience in the ICT talent and services sector, no other Australian organisation in our space matches our depth of expertise or financial resilience. Our Board is strategically placed to maximise shareholder returns while navigating any economic challenges that may arise.
