Aeris Resources Limited (**Aeris**) (**ASX:AIS**) today released its Appendix 4D and Half-Year Report for the half year ended 31 December 2025 (**FY26 Half-Year** or **HY26**) for Aeris and its controlled entities (**Group**).

This release presents a summary of information reported in FY26 Half-Year results and should be read in conjunction with the FY26 Half-Year results released separately today. Unless otherwise stated, results in this release are in Australian dollars and reported on a statutory basis.

Aeris' Executive Chairman, Andre Labuschagne, said "The positive FY26 Half-Year financial results for Aeris and the continued improvements across our operations are an outcome of the hard work and resilience across the business. Costs have been well managed across the group, enabling the business to benefit from strong commodity prices and grow cash flow from operations."

“Execution of our financing activities, provides breathing space for the business to focus on operational excellence and project development, including the Murrawombie Open Pit, Constellation and exploration. It is also another step in building a stronger balance sheet with unrestricted cash higher at \$87.9 million, net profit of \$47.9 million and a materially deleveraged balance sheet post repayment and cancellation of the \$50 million (\$40 million drawn) WHSP facility.”

“These steps put us in a great position to deliver another strong performance in FY26.”

Sustained higher gold and copper prices combined with good cost control, contributed to strong cash flows from operations of \$97.3 million. Operating cash flows funded reinvestment into capital and exploration, including the drilling program at Constellation (Tritton).

The company also undertook a successful capital raising during HY26 and raised \$96.9 million (net of transaction costs). A portion of the proceeds from the equity raise were used to repay and cancel the \$50 million (\$40 million drawn) loan facility with Washington H. Soul Pattinson (WHSP). The early repayment of this facility significantly deleveraged the balance sheet and estimated to save ~\$6 million in interest and fees.

The chart below shows cash movements in the 6 months to 31 December 2025.

OCF = operating cash flow

- 1. Proceeds from equity raise, net of direct costs
- 2. Finance and other includes gold hedging

At 31 December 2025, Aeris held cash and cash equivalents of \$87.9 million. Net assets at \$452.6 million increased from \$317.7 million at 30 June 2025.
