- Funds are to be directed towards:
 - A\$20m: 80,000m resource expansion and exploration campaign with rig count increasing to 4, consisting of 2 diamond rigs targeting underground extensions and up to 2 RC rigs targeting shallow oxide exploration targets beyond the current mine plan;
 - A\$5m: completion of the Company's Feasibility Study and permitting process; and
 - A\$5m: general working capital, corporate overheads and financing costs.
- Updated Mineral Resource Estimate expected in 2H 2026
- Horizon now fully funded to Final Investment Decision
- Results from diamond drilling at Kingfisher and Omega expected in late-March or April 2026

Horizon Gold Limited (**Horizon** or the **Company**) (ASX:HRN) is pleased to announce that it has received firm commitments for a placement to raise A\$20 million (**Placement**). The Placement saw strong interest from a number of leading institutional gold investors.

In addition to the Placement, the Company intends to offer eligible shareholders the opportunity to participate in a non-renounceable entitlement offer to raise up to a further A\$10.2 million (**Entitlement**

¹ : Assuming valid applications are received for all entitlements.

Offer) at the same Offer Price as the Placement (collectively, the Placement and Entitlement Offer are the **Offer**). The Entitlement Offer is not underwritten.

Information about the use of proceeds from the Offer

Horizon's 100% owned Gum Creek Gold Project (**Gum Creek** or **Project**) centred about 90 kilometres north of Sandstone, Western Australia, covers over 644 square kilometres of continuous tenure along the Gum Creek greenstone belt. The Project presents as an attractive gold investment opportunity with excellent potential to increase the current 2.30Moz² gold resource base through further exploration, and excellent near-term resource development potential which is currently being evaluated through a free milling open pit feasibility study (**Feasibility Study**) due imminently in mid-2026.

During CY2025 the Company completed RC and diamond drilling at multiple priority targets. The Company had significant success extending open pittable resources along the Gidgee Shear Zone as well as extending the high-grade underground orebody at Kingfisher with hits including 4m @ 11.4g/t from 431m³. Horizon currently has a rig testing extensions at Omega which has previous drilling intercepts including 30m @ 21.1g/t Au from 57m, 13m @ 10.8g/t Au from 122m, and 24m @ 6.1g/t Au from 50m⁴. Previous results at other priority targets including Wedge at 52m @ 5.9g/t Au from 91m⁵.

Funds raised from the Offer will be used to complete the Feasibility Study and undertake a materially expanded 80,000m exploration drilling program in CY2026 with Horizon expected to increase its rig count to 4, consisting of 2 diamond rigs to target underground high-grade extensions and up to 2 RC rigs to target shallow oxide exploration targets beyond the current mine plan.

The capital raising was structured to allow existing shareholders to continue to support the strategy but also allows a set of targeted new investors to join the Company's share register.

Details of the Placement

The Placement comprises the issue of 16.7 million fully paid ordinary shares in Horizon (**New Shares**) at an offer price of A\$1.20 per New Share (**Offer Price**). The Offer Price represents a discount of:

- 7.7% to the Company's last closing price of A\$1.30 per share on 27 February 2026; and
- 5.3% to the 10-day volume weighted average price of A\$1.27 per share at close of trade on 27 February 2026.

All New Shares under the Placement (**Placement Shares**) will be issued pursuant to Horizon's existing placement capacity under ASX Listing Rule 7.1. Placement Shares will rank equally with existing fully paid ordinary shares in Horizon. Settlement of the Placement Shares is scheduled to occur on 11 March 2026, with the Placement Shares expected to be issued on 12 March 2026.

Commenting on the Placement, Horizon's Managing Director, Scott Williamson said:

"The Placement has received overwhelming support from a number of high-quality institutional investors. We believe it represents a pivot point for Horizon Gold with the introduction of meaningful institutional capital for the first time as the Company accelerates its path toward meaningfully expanding and progressing Gum Creek. Funds will be directed toward completion of the Feasibility Study and a meaningfully upsized exploration program targeting both high-grade underground extensions of the existing orebodies and shallow oxide exploration targets beyond the current mine plan."

"Horizon is in a unique position with a large and vastly underexplored brownfield gold project in Western Australia that already hosts 2.3Moz gold with potential for considerable further open-pit and underground resource growth. We look forward to a catalyst rich 2026 with release of the Feasibility Study on-track for mid-year and drilling ongoing at Omega."
