BOARD OF DIRECTORS

The names of the Company’s directors in office during the half-year and up to the date of this report are as follows:

Josef El-Raghy (transitioned from Executive Chair to Non-Executive Chair on 1 February 2026)

Henk Diederichs (appointed as Managing Director and Chief Executive Officer on 1 February 2026)

Andrew Pardey

Mark Arnesen

Directors were in office for the entire half-year unless otherwise stated.

PRINCIPAL ACTIVITIES

The principal activities of the Group during the half-year were gold exploration and evaluation in Namibia and Côte d’Ivoire.

REVIEW OF OPERATIONS

During the half-year, the Group’s activities focused on delivery of the Kokoseb Gold Project (“Kokoseb”) Scoping Study (completed on 30 September 2025), advancing the Definitive Feasibility Study (“DFS”) and exploration activities to increase resources and define a potential future underground resource for Kokoseb.

Scoping Study

The Kokoseb Scoping Study (completed on 30 September 2025) confirmed Kokoseb has an outstanding gold project, with an initial 11.3 year Life of Mine (“LOM”), forecast production from an open pit mine of ~180 koz of gold (Au) per annum for the first five years, with all-in sustaining cost (“AISC”) of US\$1,265/oz. LOM production averages approximately 146 koz annually at an AISC of US\$1,448/oz.

Kokoseb is underpinned by a Mineral Resource Estimate (“MRE”) of 2.93 Moz¹, including 1.81 Moz in the indicated category at a 0.5 g/t cut-off, which converts to a production target of 58.9 Mt at 0.97 g/t Au containing 1.83 Moz Au.

Kokoseb comprises an open cut mine, Carbon-In-Leach (“CIL”) processing facility with a capacity of 5.25 Mtpa, water supply from known water supply schemes in the area, low-cost power from the Namibian grid, tailings storage facility and related infrastructure.

Kokoseb demonstrates strong financial metrics based on the consensus gold price at the time of US\$2,600/oz, delivering a post-tax NPV5% of US\$646m, an IRR of 38%, and a payback period of 1.8 years. At the prevailing spot gold price of US\$3,450/oz at the time, the economics show substantial upside, with a post-tax NPV5% of US\$1,269m, an IRR of 60%, and a shortened payback period of 1.2 years. The current spot gold price continues to significantly enhance the overall project economics.

Further detail on the Scoping Study, including all the material assumptions on which the production targets and forecast financial information are based, is included in the Announcement released to the ASX on 30 September 2025. The Company confirms that the material assumptions underpinning the production targets and forecast financial information derived from the production targets in that Announcement continue to apply and have not materially changed.

¹ Refer ASX announcement dated 16 July 2025. The Mineral Resource Estimate for Kokoseb was first reported by the Company in an announcement dated 16 July 2025. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original announcement and that all material assumptions and technical parameters underpinning the mineral resource estimate in that announcement continue to apply and have not materially changed.

Definitive Feasibility Study (DFS):

The Kokoseb DFS remains on track for completion in the second half of the 2026 calendar year.

Key progress during the period included:

- The geotechnical drilling program is well advanced with drilling completion expected in February 2026. Samples to be selected and dispatched for laboratory testing in South Africa.
- Expressions of Interest for contract mining budget pricing issued and strong industry response received.
- Metallurgical testwork program substantially complete, with results undergoing validation.
- Senet (a DRA subsidiary) appointed for the process plant design and cost estimation. Site geotechnical investigations have been completed.
- Basis of design for non-process infrastructure - buildings and earthworks finalised.
- Exploratory drilling and pump testing completed at the Okombahe Water Supply Scheme, hydrogeology modelling scheduled to commence imminently. Drilling at the Ozondati Water Supply Scheme expected to start in February 2026. Mobilisation of Natural Source Audio Magneto Telluric equipment underway for OmAP geophysics survey.

Kokoseb Exploration

The focus of the Group's current exploration campaign is targeting additional ounces beyond the current open pit MRE, confirming continuity of previously identified high-grade plunging shoots and demonstrating mineralisation remains open at depth, supporting potential future underground development.

Significant high-grade intercepts announced during the period reinforce Kokoseb's outstanding potential for an underground operation include².

- 22.0m @ 14.87 g/t Au from 265.4m in KDD115
- 6.8m @ 5.12 g/t Au from 344.3m in KDD111
- 9.9m @ 5.51 g/t Au from 298.1m in KDD107
- 23.7m @ 1.91 g/t Au from 287.0m, incl. 5.0m @ 5.96 g/t Au in KDD105
- 19.3m @ 2.31 g/t Au from 246.7m, incl. 3.0m @ 7.92 g/t Au in KDD104
- 23.7m @ 6.59 g/t Au from 519.6m in KDD109
- 11.0m @ 4.46 g/t Au from 604.0m in KDD106

With six rigs currently on site, the Company is systematically advancing resource conversion and expansion while further de-risking the project ahead of the DFS completion.

Permitting

Preparation of permitting applications for Kokoseb is well advanced with the Mining Licence Application lodged with the Ministry of Industry, Mines and Energy ("MIME") on 10 October 2025.

The Environmental & Social Impact Assessment is nearing completion; final stakeholder review scheduled for early 2026 and lodgement with the MIME and the Ministry of Environment, Forestry and Tourism anticipated in Q1 CY2026 for regulatory approval and issuance of the Environmental Clearance Certificate.

Divestment of Non-Core Côte d'Ivoire Assets

In November 2025 the Company entered into a binding Share Sale Agreement with ASX listed Santa Fe Minerals Limited (ASX: SFM) ("Santa Fe") to divest its interest in all of its non-core gold exploration permits in Côte d'Ivoire (the "Agreement").

In accordance with the Agreement, the Company sold its 80% interest in the Dialakoro, Issia and Mankono Ouest permits and various permits under application with the consideration received being 20,000,000 ordinary fully paid shares in Santa Fe and 8,000,000 performance rights that convert to ordinary fully paid shares upon achievement of certain milestones.

The material terms of the Agreement are detailed in the ASX Announcement dated 26 November 2025. The conditions precedent were satisfied and the completion of the transaction occurred on 30 January 2026.

The divestment of Côte d'Ivoire is a strategic step that allows the Company to focus on the rapid exploration and development of Kokoseb while retaining exposure to future upside in Côte d'Ivoire through an ongoing shareholding in Santa Fe.

As a result of the divestment, a non-cash impairment of the carrying value of the Côte d'Ivoire exploration and evaluation assets has been recognised in the half-year report.

Corporate

During the period, the Company successfully raised A\$30,000,000 (before costs) to underpin an accelerated exploration program and the advancement of the DFS at Kokoseb. The Placement was comprised of the issue of 100 million new fully paid ordinary shares at an offer price of \$0.30 per share to domestic and offshore institutional and sophisticated investors.

The condensed consolidated half-year financial report does not include all of the notes of the type normally included within the annual financial report and therefore cannot be expected to provide as full an understanding of the financial performance, financial position and operating, financing and investing activities of the Group as the full financial report.

The half-year financial report should be read in conjunction with the annual financial report of the Company for the year ended 30 June 2025.

It is also recommended that the half-year financial report be considered together with any public announcements made by the Group during the half-year ended 31 December 2025 in accordance with the continuous disclosure obligations arising under the *Corporations Act 2001* and the Australian Securities Exchange Listing Rules.

The same accounting policies and methods of computation have been applied in these half-year financial statements as compared with the most recent annual financial statements, except for the adoption of new standards and interpretations effective as of 1 July 2025. The adoption of the new standards and interpretations effective as at 1 July 2025 had no material impact on the Group. See note 2(d) for further details.

(c) Going Concern

The half-year financial report has been prepared on the going concern basis, which assumes continuity of normal business activities and the realisation of assets and the settlement of liabilities in the ordinary course of business.

The Group has incurred net loss after tax of \$10,613,861 (31 December 2024: \$1,546,843) and experienced net cash inflows from operating, financing and investing activities of \$16,968,897 (31 December 2024: \$21,984,082) for the half-year ended 31 December 2025. The directors believe there are sufficient funds to meet the Group’s committed minimum expenditure requirements and, as at the date of this report, the directors believe they can meet all liabilities as and when they fall due for a period of at least 12 months from the date of signing the half-year financial report.

The directors have reviewed the business outlook and are of the opinion that the use of the going concern basis of accounting is appropriate.

¹ On 26 November 2025, the Company entered into a binding Share Sale Agreement to dispose of its wholly owned subsidiary, Glomin Services Limited (“Glomin”), which holds (through group entities) the Company’s Côte d’Ivoire exploration permits. The execution of the binding agreement constituted an impairment indicator under AASB 6. Accordingly, management reassessed the recoverable amount of the Glomin exploration and evaluation assets at 31 December 2025.

The carrying value of the Glomin’s net assets has been written down to \$6,100,000 at 31 December 2025, resulting in an exploration impairment expense of \$8,652,185 recognised in the condensed consolidated statement of profit or loss for the half-year ended 31 December 2025.

The recoverable amount was determined with reference to the fair value of the consideration receivable under the disposal agreement, comprising:

- 20,000,000 fully paid ordinary shares in Santa Fe Minerals Limited (ASX:SFE) (subject to 12-month escrow); and
- 8,000,000 milestone-based performance rights.

In determining fair value, management applied:

- The quoted market price of Santa Fe Minerals Limited shares at reporting date;
- An adjustment for the 12-month escrow restriction; and
- A probability-weighted assessment of milestone achievement and timing in respect of the performance rights.

5. EXPLORATION AND EVALUATION EXPENDITURE (CONTINUED)

The impairment assessment involves significant judgement, particularly in estimating milestone probabilities and determining the appropriate discount for escrow restrictions. The directors assess whether there are any triggers of impairment for the Group's exploration and evaluation assets as at 31 December 2025. Consideration is given to factors such as prevailing market conditions; previous expenditure for exploration work carried out on the tenements; maintaining rights to tenure; and the potential for mineralisation based on the Group's and independent geological reports.

The ultimate value of these assets is dependent upon recoupment by commercial development or the sale of the whole or part of the Group's interests in these exploration properties for an amount at least equal to the carrying value.

6. SHARE BASED PAYMENTS

Closing balance	4,331,587	2,886,587

¹ Securities issued during the period:

On 16 October 2025, the Company issued a total of 1,326,535 Performance Rights to employees under the short-term incentive plan for the 2026 financial year ("Employee Performance Rights").

The period used to determine vesting of the Employee Performance Rights is 1 July 2025 – 30 June 2026 and the expiry date is four years from the date of issue.

The Employee Performance Rights are split into four tranches with four separate non-market vesting conditions as below:

Tranche	Number of Securities	Vesting condition	Amount expensed
1	239,654	Namibia Budget discipline – non-capital budget within 15% of budget variance to budget, with Wia Gold board approved items, not included in original budget, eliminated from calculations.	\$36,869
2	513,921	Definition of a >3Mt underground resource a 4.0g/t Au or greater under the Scoping Study pit shell (whistle pit) at the Kokoseb Project in Namibia.	\$43,923
3	140,000	Maintain relationships with regulatory bodies and JV partners, including Epangelo. Establishing clear communication channels, increased understanding of regulatory requirements for Damaran and address any issues in a timely manner.	\$17,948
4	432,960	New, additional licenses, projects, project acquisitions in Namibia prospective for gold, with acquisition terms approved by the board of Wia Gold Limited.	\$44,404

The Employee Performance Rights issued have a nil exercise price and convert to ordinary shares on achievement of the performance milestone and were valued using a Black Scholes Model. The total amount vested on the Performance Rights issued during the period was \$143,144.

² Securities lapsed during the period:

A total of 6,442,500 Performance Rights, issued in previous reporting periods, lapsed during the period (4,000,000 KMP Performance Rights and 2,442,500 Employee Performance Rights) due to the vesting conditions being incapable of being met. This resulted in a total of \$903,025 being transferred from the share-based payment reserve to accumulated losses.

INDEPENDENT AUDITOR'S REVIEW REPORT
TO THE MEMBERS OF WIA GOLD LIMITED

Auditor's Responsibilities for the Review of the Financial Report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 31 December 2025 and its performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
