

RC DRILL RIG SPINNING AT HIGH-GRADE GOLD IBEL SOUTH PROJECT

HIGHLIGHTS

- **A 4,000m Phase 3 RC drilling campaign is now underway** at the Ibel South Gold Project following the mobilisation of the RC rig to site (Figure 1).
- Field teams will drill on dual day/night shifts to maximise drilling efficiency.
- The ~4,000m programme is expected to take approximately 25 days to complete, with assay results expected shortly thereafter.
- Drilling will focus on:
 - TMS Anomaly 3: **Depth extensions of high-grade gold** mineralisation,
 - TMS Anomaly 1: Strong TMS anomalies on NW plateau (**untested**), and
 - TMS Anomaly 2: A southern lateritic corridor anomaly (**untested**).
- Select results from prior drilling at Anomaly 3 include (and are not limited to)²:
 - 25-IBS-AC-008: **20m @ 6.0 g/t Au from 12m, incl. 4m @ 14.1 g/t Au**
 - 25-IBS-AC-016: **12m @ 6.12 g/t Au from 42m, incl. 7m @ 10.05 g/t Au (Hole ended in mineralisation)**
 - 25-IBS-AC-017: **7m @ 9.06 g/t Au from 7m**
 - 25-IBS-AC-007: **5m @ 4.7 g/t Au from 5m, incl. 3m @ 7.8 g/t Au**
 - 25-IBS-AC-010: **5m @ 2.16 g/t Au from 26m, incl. 2m @ 4.23 g/t Au**
- To date, **multiple holes have ended in mineralised greywacke**,³ reinforcing the need for deeper drilling to target the primary system.
- Only ~800m of strike length has been tested within the broader ~5km anomalous corridor identified to date, **with average drill depths of ~30m**.³
- RC drilling will be conducted at **depths ranging from ~260m to 300m**.
- Drilling is being undertaken by Forage Technique Eau, the same experienced team that completed the Phase 1 and Phase 2 AC programmes.

Haranga Resources Limited (ASX: HAR; FRA: 65E0) ("Haranga" or "the Company") is pleased to announce that a ~4,000m Reverse Circulation ("RC") drilling programme has commenced at its Ibel South Gold Project in Senegal ("Ibel South", Figure 4). The programme is designed to follow up strong results from Phase 1 & Phase 2 Aircore ("AC") drilling campaigns and extensive surface geochemical work, including Termite Mound Sampling ("TMS"), which together have defined a structurally controlled gold system hosted within Birimian greywacke.⁴

Chairman, Mr. Michael Davy commented: *"This programme marks an exciting new phase of growth at Ibel South as we transition from shallow AC drilling to RC drilling targeting high-grade down-dip extensions at TMS Anomaly 3. Further, with access now established at TMS Anomalies 1 and 2, these compelling targets will also be tested for the first time. With only ~800 metres of a ~5km anomalous corridor tested to date, we see significant potential to expand the system along strike and at depth. With drilling nearing completion at Lincoln, Haranga is advancing two high-*

grade gold projects in parallel, and I look forward to reporting near-term results and milestones from both projects in due course."

DRILL PROGRAMME INFORMATION

Field teams will operate on a dual day and night shift basis to maximise drilling productivity. The ~4,000m RC drilling programme is expected to be completed in approximately 25 days, subject to operational conditions. Drilling is being undertaken by Forage Technique Eau, the same experienced contractor that successfully completed the Phase 1 and Phase 2 AC programmes.

This ASX Announcement has been authorised for release by the Board of Haranga Resources Limited.

Kyla Garic

Company Secretary

HARANGA RESOURCES LIMITED

Competent Person's and Compliance Statement

The information in this announcement that are footnoted below (1-4) relates to exploration results and mineral resources that have been released previously on the ASX. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that, in the case of mineral resources estimates (including foreign estimates), all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's finding is presented have not been materially modified from the original market announcements.

Saraya - Mineral Resource¹

The Company confirms it is not aware of any new information or data that materially affects the information included in the Mineral Resource estimate and all material assumptions and technical parameters underpinning the estimate continue to apply and have not materially changed when referring to its resource announcement made on 27 August 2024¹. The Company confirms that the form and context in which the Competent Person's finding is presented have not been materially modified from the original market announcements.

Saraya - Mineral Resource Estimate

The resource as reported at 27 August 2024 is as follows:

Classification	Tonnage	Grade	Contained eU₃O₈	
	Mt	eU₃O₈ ppm	Mlbs	Tonnes
Indicated	4.1	740	6.7	3,038
Inferred	10.4	475	10.9	4,946
Total	14.5	550	17.6	7,984

Table 1: Saraya Mineral Resource Estimate¹ - 250ppm cutoff, Indicator Kriging

Disclaimer

Forward-looking statements are statements that are not historical facts. Words such as “expect(s)”, “feel(s)”, “believe(s)”, “will”, “may”, “anticipate(s)”, “potential(s)” and similar expressions are intended to identify forward-looking statements. These statements include, but are not limited to statements regarding future production, resources or reserves and exploration results. All of such statements are subject to certain risks and uncertainties, many of which are difficult to predict and generally beyond the control of the Company, that could cause actual results to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include, but are not limited to: (i) those relating to the interpretation of drill results, the geology, grade and continuity of mineral deposits and conclusions of economic evaluations, (ii) risks relating to possible variations in reserves, grade, planned mining dilution and ore loss, or recovery rates and changes in project parameters as plans continue to be refined, (iii) the potential for delays in exploration or development activities or the completion of feasibility studies, (iv) risks related to commodity price and foreign exchange rate fluctuations, (v) risks related to failure to obtain adequate financing on a timely basis and on acceptable terms or delays in obtaining governmental approvals or in the completion of development or construction activities, and (vi) other risks and uncertainties related to the Company’s prospects, properties and business strategy. Investors are cautioned not to place undue reliance on these forward-looking statements that speak only as of the date hereof, and the Company does not undertake any obligation to revise and disseminate forward-looking statements to reflect events or circumstances after the date hereof, or to reflect the occurrence of or non-occurrence of any events.

About Haranga Resources

Haranga Resources is a gold exploration and development company with assets across California’s legendary Mother Lode Gold Belt and Senegal’s Kéniéba Inlier. In California, the Company has recently finalised the acquisition of the advanced, high-grade Lincoln Gold Project, which benefits from significant existing infrastructure and is fully permitted for mining. The Company has commenced an underground diamond drilling programme designed to support the delivery of a maiden JORC Resource for the Project and to test for potential repetitions at depth.

In Senegal, Haranga holds the highly prospective Ibel South Gold Project, which has returned spectacular near-surface high-grade gold mineralisation from recent maiden drilling. In addition, Haranga holds the Saraya Uranium Project, previously owned by Uranium giant Orano (previously Areva) and which has in excess of 65,000m of historical drilling and a defined mineral resource of 14.5Mt @ 550ppm eU3O8 for 17.6 Mlbs contained eU3O8 Indicated and Inferred.

Haranga’s collective expertise includes considerable experience running ASX-listed companies and financing, operating and developing mining and exploration projects in Africa, Australia, and other parts of the world.
