About Kincora: Kincora Copper Limited ("KCC": ASX & TSXV) is an emerging Australia-focused gold-copper explorer with a hybrid project generator strategy.

The Company is successfully proving up the prospectivity of its extensive project portfolio, which includes multiple district-scale landholdings and scalable drill ready targets. These assets are located in Australia's Lachlan Fold Belt and Mongolia's Southern Gobi, two of the globe's leading porphyry belts, and the historical Condobolin mining field within the Cobar basin in NSW.

The Company has already unlocked over $100 million of potential partner funding for multiple earlier stage and/or non-core porphyry projects. These initial deals have supported over 18,000 metres of drilling and over A$9m of partner funded exploration since late 2024, with management fees and exploration ramping up.

Partner discussions are ongoing for its remaining 100% owned flagship projects that are all situated within existing porphyry camps containing over 20-million-ounce gold equivalent resource inventory.

By having a significant portfolio of partner funded large porphyry projects, and a very focused capital efficient programs at the Condobolin and other sole funded projects, the Company is seeking to position Kincora as a leading institutional grade explorer in the public Australian and Canadian markets, and the leading project generator on the ASX.

The Company's website is: www.kincoracopper.com
