CEO Commentary

Metcash Group CEO, Doug Jones said: “We have delivered a solid result supported by the resilience of our Food and Liquor businesses, our diversified portfolio and disciplined execution.

Hardware & Tools maintained share in a soft Trade market, with improved second half sales momentum. We have taken further action to strengthen the business and position the Group for sustained performance.

Cashflow remained strong, with cash realisation above guidance and leverage at the low end of our target range.”

Trading performance

Positive sales momentum (ex-tobacco) continued in the second half, with growth accelerating in Hardware & Tools.

Food:

- Supermarkets remained competitive, supported by promotional programs including Extra Specials
- Foodservice & Convenience delivered strong growth, driven by customer growth and contract wins
- Tobacco sales trends improved following mitigation initiatives and increased regulatory enforcement
- Lower tobacco mix supported continued margin improvement

Liquor:

- Metcash-supplied independents continued to gain market share
- Growth supported by multi-channel strategy and convenience offering
- On-premise recovery supported second half momentum
- EBIT margin returned to long-term levels in 2H

Hardware & Tools:

- Sales momentum improved in 2H, reflecting pricing and ranging initiatives undertaken
- Trade market conditions remained soft, with recovery timing extended
- Earnings impacted by margin pressure, particularly in Victoria and Tasmania
- Business remains well-placed for anticipated cyclical improvement in residential building market

Cashflow and capital management

- Cash realisation expected to exceed the 80-90% three-year target range
- Debt leverage ratio expected at the low end of the 1.0-1.75x target range
- Disciplined and proactive management delivered capital expenditure (excluding M&A) of ~\$170m, approximately \$30m below guidance
- Strong cash management enabled ~\$80m of precautionary inventory related to supply chain uncertainty

Cost and efficiency initiatives

Further actions are being implemented to align the cost base with current conditions and support future growth.

- Incremental cost program delivering at least ~\$25m annualised savings in FY27
 - ~\$15m labour savings (majority realised in FY27, primarily Hardware & Tools)
 - ~\$10m non-trade procurement savings
- Restructuring cost of ~\$6m in FY27, with payback within 12 months

These initiatives build on prior cost out programs, with continued focus on cost management as a core discipline.

Middle East conflict

There has been no material impact on FY26 earnings from increased freight or product costs. Impacts have mostly been offset through pricing mechanisms and active management.

Although there have been no supply shortages to date, given ongoing uncertainty, inventory levels were increased as a precaution. Cash realisation and leverage outcomes remain strong despite this investment.

The Group continues to proactively work with, and support, its customers to ensure they maintain their competitive position through these additional challenges.

Further information will be provided in the Company's FY26 full year results materials.
