

For personal use only

America Needs Tungsten.

Linka Already Produced It.

Three high-grade historic mines. Fast-to-market strategy. Drilling imminent.

Gold Coast Investment Showcase | 11 June 2026

Linka Project, Nevada, USA

ASX:VKA | OTCID:VKALF

Disclaimer & Competent Person's Statements

Disclaimer

This presentation and any accompanying verbal presentation (together the Presentation) are confidential and have been prepared by Viking Mines Limited (Viking or the Company) and approved by the Board of the Company. The information contained in the Presentation (Information) is summary only and should be read in conjunction with any other documents provided to you by the Company. The Information is current as at 11 June 2026 and the Company does not undertake to provide any additional or update information, whether as a result of new information, future events or results or otherwise. By receiving the Presentation, you acknowledge and represent to the Company that you have read, understood and accepted the terms of this disclaimer.

The Company has prepared the Presentation based on information available to it at the time of preparation. No representation or warranty, express or implied, is made as to the currency, accuracy, reliability, completeness or fairness of the information, opinions and conclusions contained in this Presentation. Viking, or related bodies corporate, shareholders or affiliates, nor any of their respective officers, directors, employees, affiliates, agents or advisers (Agents) guarantee or make any representations or warranties, express or implied, as to or take responsibility for, the currency, accuracy, reliability, completeness or fairness of the information, opinions and conclusions contained in this Presentation. Viking does not represent or warrant that this Presentation is complete or that it contains all material information about Viking or which a prospective investor or purchaser may require in evaluating a possible investment in Viking or acquisition of shares. To the maximum extent permitted by law, Viking and its Agents expressly disclaim any and all liability, including, without limitation, any liability arising out of fault or negligence, for any loss arising from the use of information contained in this Presentation, or otherwise arising in connection with it.

Any forward-looking statements in this Presentation, including projections, forecasts and estimates, are provided as a general guide only and should not be relied on as an indication or guarantee of future performance and involve known and unknown risks, uncertainties, assumptions, contingencies and other important factors, many of which are outside the control of Viking and which are subject to change without notice and could cause the actual results, performance or achievements of Viking to be materially different from the future results, performance or achievements expressed or implied by such statements. Past performance is not necessarily a guide to future performance and recipients of this Presentation are cautioned not to place undue reliance on such forward-looking statements.

The information contained in this Presentation is for information purposes only, does not constitute investment or financial product advice (nor taxation, accounting or legal advice) and is not intended to be used as the basis for making an investment decision. In providing this Presentation, Viking has not considered the objectives, financial position or needs of any particular recipients. Before making an investment decision prospective investors should consider the appropriateness of the information in this Presentation having regard to their own objectives, financial situation and needs, and seek legal, taxation and financial advice appropriate to their jurisdiction and circumstances.

This Presentation is not a prospectus, product disclosure statement or other offer document under Australian law or any other law (and will not be lodged with the Australian Securities and Investments Commission or any other foreign regulator) and is not, and does not constitute, an invitation or offer of securities for subscription, purchase or sale in any jurisdiction. In particular, this Presentation does not constitute an invitation or offer of securities for subscription, purchase or sale in the United States or any other jurisdiction in which such an offer would be illegal. The securities referred to in this Presentation have not been, and will not be, registered under the U.S. Securities Act of 1933 as amended or the securities laws of any state or other jurisdiction of the United States and may not be offered or sold, directly or indirectly in the United States. The information in this Presentation is strictly confidential. It may not be disclosed, reproduced, disseminated, quoted or referred to, in whole or in part, without the express consent of Viking.

Competent Person's Statements

Information in this presentation that relates to Exploration Results is based on information compiled by Mr Julian Woodcock, who is a Member of the Australian Institute of Mining and Metallurgy (MAusIMM CP) – 305446). Mr Woodcock is a full-time employee of Viking Mines Ltd. Mr. Woodcock has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Woodcock consents to the disclosure of the information in this report in the form and context in which it appears. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original announcements.

The information contained in this presentation, relating to metallurgical results, is based on, and fairly and accurately represent the information and supporting documentation prepared by Mr Peter Adamini, BSc (Mineral Science and Chemistry), who is a Member of The Australasian Institute of Mining and Metallurgy (AusIMM). Mr Adamini is a full-time employee of SGS Australia owned Independent Metallurgical Operations Pty Ltd, a wholly owned subsidiary of SGS Australia Holdings Pty Ltd. Mr Adamini is an independent consultant engaged by Viking Mines Limited for metallurgical representation. Mr Adamini consents to the disclosure of the information in this report in the form and context in which it appears. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original announcements.

THE THREE-QUESTION ANCHOR

Why Tungsten? Why Now? Why Viking?

WHY TUNGSTEN

0% of US tungsten supply produced domestically

- Critical mineral for munitions, aerospace and cutting tools.
- REEShore Act bans Chinese tungsten from US military supply chains from December 2026.
- China controls ~85% of global supply, a single-point-of-failure for Western defence.

WHY NOW

~10x rise in APT price since start of 2025

- APT trading at US\$3,100/mtu, at or near all-time highs.ⁱ
- Structural deficit: stockpiles depleted, Chinese export controls tightening, conflict-driven demand.
- Window for new Western supply is open and policy-supported, for the first time in a generation.

WHY VIKING

Restart

Focused on a recommencing production from a brownfields past producing asset

- High-grade past producing assets (0.5% WO₃)ⁱⁱ.
- Flagship Linka project operating tungsten mine until 1956, closed on price, not on geology.
- Rapid advancement of multiple workstreams.
- Metallurgical testwork demonstrated successⁱⁱⁱ.
- Fully funded Maiden drilling campaign weeks away^{iv}.

BENCHMARKING

The Grade Story

Linka's historical mill grade sits amongst the top tier of global projects.

Global Tungsten Projects (% WO₃)

Linka grade derived from historical production reports from 1955-56.
See Viking ASX release 16 December 2025.

THE MATH

Value of tungsten ores

1% WO₃ in rock

= 10 kg WO₃ per tonne = 1 mtu

× Metallurgical recovery (e.g. at 75%)

= 7.5 kg WO₃ per tonne = 0.75 mtu

× Concentrate revenue per mtu

= Inherent value US\$/t

KEY VALUE DRIVERS

- └ Ore grade
- └ Metallurgical recovery
- └ Tungsten concentrate pricing

REEShore Created The Buyer. Is Linka The Domestic Supplier...

The mandate that didn't exist when this mine closed in 1956 is now in place, and it's locked in by federal law.

Chinese Export Restrictions

In February 2025, China placed restrictions on APT, Tungsten Carbide & Tungsten Oxide. This started the current global supply chain shortages on tungsten products.

REEShore Act

Bans Chinese-origin tungsten in US military supply chains from December 2026, creates an immediate, policy-locked domestic premium.

Department of War (DoW) momentum

In 2026, the US government initiated 'Project Vault', actively seeking to grow critical mineral stockpiles, including Tungsten. Funding options available e.g. **Guardian Metals (tungsten, Jul-25)** DPA Title III US\$6.2M, non-dilutive grant, to fund Pilot Mountain PFS.

Tariffs & Section 232

Tungsten products covered by Section 232 review and tariff structures, favouring domestic supply. Pricing differential growing.

Others Are Exploring. We're Advancing a Past Producer.

Linka operated until 1956. VKA is not exploring for a deposit, we're blowing the dust off one that's already produced.

DISCOVER, THEN BUILD A NEW MINE

Years from production

- └ Greenfields exploration in new frontiers requires long lead times
- └ High upfront costs with lower likelihood of success
- └ High technical risks to determine geology, resource, metallurgy etc.
- └ Lower-grade bulk tonnage projects require larger CAPEX resulting in financing risk
- └ Permitting from scratch results in a multi-year process
- └ Catalysts measured in years

LINKA BROWNFIELDS ADVANTAGE

A head start

- └ History provides the blueprint and a headstart
 - └ Pits, 150ft shaft, historic mill site, ROM pad and tailings already on the ground providing
 - └ 1970's historical drilling and mining records discovered and digitised
- └ Multiple Parallel Workstreams underway
 - └ On ground exploration advanced with drilling imminent
 - └ Metallurgical testwork well advanced
 - └ Concept processing study underway and flowsheet designed
 - └ Permitting strategy developed to deliver in the shortest timeframe
 - └ Project aligned with REEShore Act and federal funding opportunities

THE PACE OF EXECUTION

From Acquisition to Action — In Six Months.

An aggressive workflow and compacted timeline. Every month is a value adding step.

MANAGEMENT DISCIPLINE ON DISPLAY

The historical Linka dataset was acquired for less than the cost of a single drillhole.

What's Already Been Proven. Before A Single Drillhole.

Six months of work has already shifted Linka from thematic exposure to measurable performance.

SURFACE GRADE

14.7% WO₃

Peak surface grab at Conquest (LKGB0005); multiple high-grade outcrops along the trend.ⁱ

STRIKE EXPANDED

1.6km

Mineralised horizon expanded from historic ~820m after digitising 1970s dataset.ⁱⁱ

REGIONAL POTENTIAL

~7km

Potential interpreted intrusive contact zone identified by ground magnetics geophysical survey.ⁱⁱⁱ

DRILL PERMITTING

Jun Qtr

Maiden drill programme at Linka permitted and scheduled to commence in June 2026 quarter with earthworks followed by drilling.^{iv}

METALLURGY

76% Recovery

Combined gravity + flotation concentrate at 56.9% WO₃ grade. Proven physical separation, no chemical complexity.^v

For personal use only

LINKA OPPORTUNITY + UPSIDE

ASX:VKA | OTCID:VKALF

i. ASX Announcement 24 February 2026 – VIKING SEES HIGH-GRADES AT LINKA INC. 12.2M AT 1.3% WO₃
ii. ASX Announcement 19 February 2026 – VKA ADVANCES LINKA RESULTS VIA HISTORICAL DATA DIGITISATION

iii. ASX Announcement 17 February 2026 – VKA DATA INTEGRATION EXPANDS LINKA TUNGSTEN TO 1.6KM STRIKE
iv. ASX Announcement 14 January 2026 – HIGH GRADE ASSAYS UP TO 1.3% WO₃ FROM LINKA TUNGSTEN PROJECT

Drilling Targets; Testing the Potential

89%

of interpreted prospective contact zone is under shallow cover and untested.

TARGET 1 - LINKA

- Validate historical drilling
- Test below historic drilling
- Define near surface high grade

TARGET 2 - EXTENSIONS

- Undercover SW extensions from Linka
- Evidenced by historic surface sample
- Contact mapped by geophysics

TARGET 3 - BLUE SKY

- 7km regional intrusive contact
- Untested potential
- The best could be yet to come

Premium Grade Metallurgy, Real Recovery.

Latest testwork delivers a 56.9% WO_3 concentrate at an industry leading 76.0% recovery, A step-change from the 56.4% WO_3 / 46.0% recovery reported in March

COMBINED CONCENTRATE

56.9% WO_3

at 76.0% recovery from combined gravity + cleaner flotation.ⁱ Step-change from 56.4% at 46.0% recovery previously reported.ⁱⁱ

NEXT TARGET

>80% Recovery

Flotation reagent optimisation targeting >80% recovery at >50% WO_3 grade. Updates to market as testwork completes.

LOW-CAPEX PATHWAY

Simple

Proven physical separation using industry-established gravity and flotation techniques, no chemical complexity. Feeds the conceptual processing study with Mineral Technologies to refine CAPEX and plant design.

GRAVITY STAGE

66.6% WO_3

standalone gravity concentrate at 42.16% recovery. Replicated at 5x sample size (10kg vs 2kg), flowsheet de-risking.ⁱ

PROCESSING — THE KEY TO UNLOCKING THE VALUE

Linka Project: Processing Concept Study

└ A modular gravity + flotation flowsheet built for low CAPEX, fast & simple onsite construction.

MODULAR PROCESSING

- └ Mineral Technologies completing the Processing Concept Study for Linka
- └ “FlexSeries” technology reduces lead times and simplifies onsite construction
- └ Deliverables: PFD, mass & water balances, CAPEX & OPEX, 3D model, construction timeline

SIMPLE FLOWSHEET

- └ Conceptual processing rate of 43tph adopted for evaluation
- └ Crushing > grinding > gravity separation > flotation
- └ Opportunity to add ‘upgrades’ with;
 - └ Ore sorting technology
 - └ WHIMS
 - └ Falcon concentrators

Refer to VKA ASX Announcements 17 March 2026 & 27 April 2026

ASX:VKA | OTCID:VKALF

i. ASX Announcement 17 March 2026 – VKA ENGAGES MINERAL TECHNOLOGIES FOR LINKA TUNGSTEN
 ii. ASX Announcement 27 April 2026 – CONCEPTUAL PROCESS ESTABLISHED FOR LINKA TUNGSTEN PROJECT

Reinvigorating A Historic Mine.

This isn't greenfields exploration. It's a restart strategy for a mine that has previously been proven to work.

PREVIOUSLY BUILT

Infrastructure

- ✓ Three historic mines: Linka, Conquest, Hillside
- ✓ 150ft (~46m) shaft, multiple pits and underground workings
- ✓ On-site ROM pad and historical tailings dam
- ✓ Highway <7km and grid power <4km
- ✓ 8.5km² of consolidated mining claims

PREVIOUSLY WORKED

Production

- ✓ 65kt at 0.5% WO₃ milled to 1956 (360 tpd mill)
- ✓ Closed on price collapse — not on geology
- ✓ High-grade UG channels: 6.1m at 1.5% WO₃
- ✓ Surface stockpiles for ongoing testwork
- ✓ Metallurgy validated: % 56.9₃ concentrate at 76.0% recovery

PREVIOUSLY EXPLORED

Knowledge

- ✓ 72 historical drillholes / 2,908m — digitised
- ✓ High-grade drillholes & surface samplesⁱⁱ
 - 12.2m at 1.3% WO₃
 - 22.9m at 0.6% WO₃
 - 8.5m at 1.0% WO₃
- ✓ Outcropping mineralisation across 0.8km horizon
- ✓ Surface grades up to 14.7% WO₃ⁱ

ADVANCING

Metallurgy, surface sampling, permitting, concept processing studies

Advancing multiple technical fronts, focused on a rapid restart strategy.

PENDING

Maiden Drilling: June Quarter 2026

Testing Linka, SW near mine extensions and first pass blue sky across the broader intrusive complex.

WHAT'S NEXT

Catalyst Ladder: Six Months Of News Flow.

From validation → drilling → resource → development. Each rung is a value adding step.

MAY 2026

Metallurgy validated

Combined gravity + flotation circuit delivers 56.9% WO₃ at 76.0% recovery; further flotation optimisation underway targeting >80% recovery¹. Conceptual processing study with Mineral Technologies progressing with CAPEX & OPEX estimates expected soon.

JUN Q 2026

Drilling commences

NOI approval; rigs mobilised; first holes targeting (a) shallow near mine at Linka and down dip extensions, (b) SW under-cover extension, (c) regional initial exploration across broader geophysics mapped intrusive.

Q3 2026

First assays

Initial drillhole assays released to market.

Q3-Q4 2026

Follow-up programme

Infill and step-out drilling along the 1.6km horizon; geophysics-driven blind targets tested.

2027

Resource & development

Path to maiden JORC resource, concurrent permitting and offtake discussions, small-scale stockpile/tailings retreatment optionality.

IN PARALLEL Geological field activity • Baseline & environmental studies • Processing testwork (TOMRA & Sepro) • DIBC membership

Why invest now.

*A\$24.3M market cap. A\$19.6M enterprise value.
A brownfields restart opportunity, weeks from drilling.*

A past producing asset, not a discovery story

Tungsten price at all-time highs

REEShore Act creates the buyer from Dec 2026

Fully funded maiden drilling weeks away, first assays Q3

Exploration upside

Near-term producer strategy

Cautionary Statement

Resource and project information derived from publicly available resource data (see corresponding links), market data sourced from Iress Market Systems as of 25 March 2026.

In the resources disclosed in the table above:

Footnoted items 1:

- the data are not reported in accordance with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (referred to as the "JORC Code (2012)");
- a Competent Person has not done sufficient work to classify the historical estimates or foreign estimates as Mineral Resources or Ore Reserves in accordance with the JORC Code (2012); and
- it is uncertain that following evaluation if the historical estimates or foreign estimates will be able to be reported as Mineral Resources or Ore Reserves in accordance with the JORC Code (2012).
