ASX Announcement
16 June 2026

Gawler Craton Project, South Australia

Drilling Update

x

Indiana Resources Limited (ASX: IDA) (Indiana or the Company) advises that the reverse-circulation (RC) drilling program planned to commence in mid-June, at the Company Well gold prospect, has been delayed due to the subsequent unavailability of the committed rig.

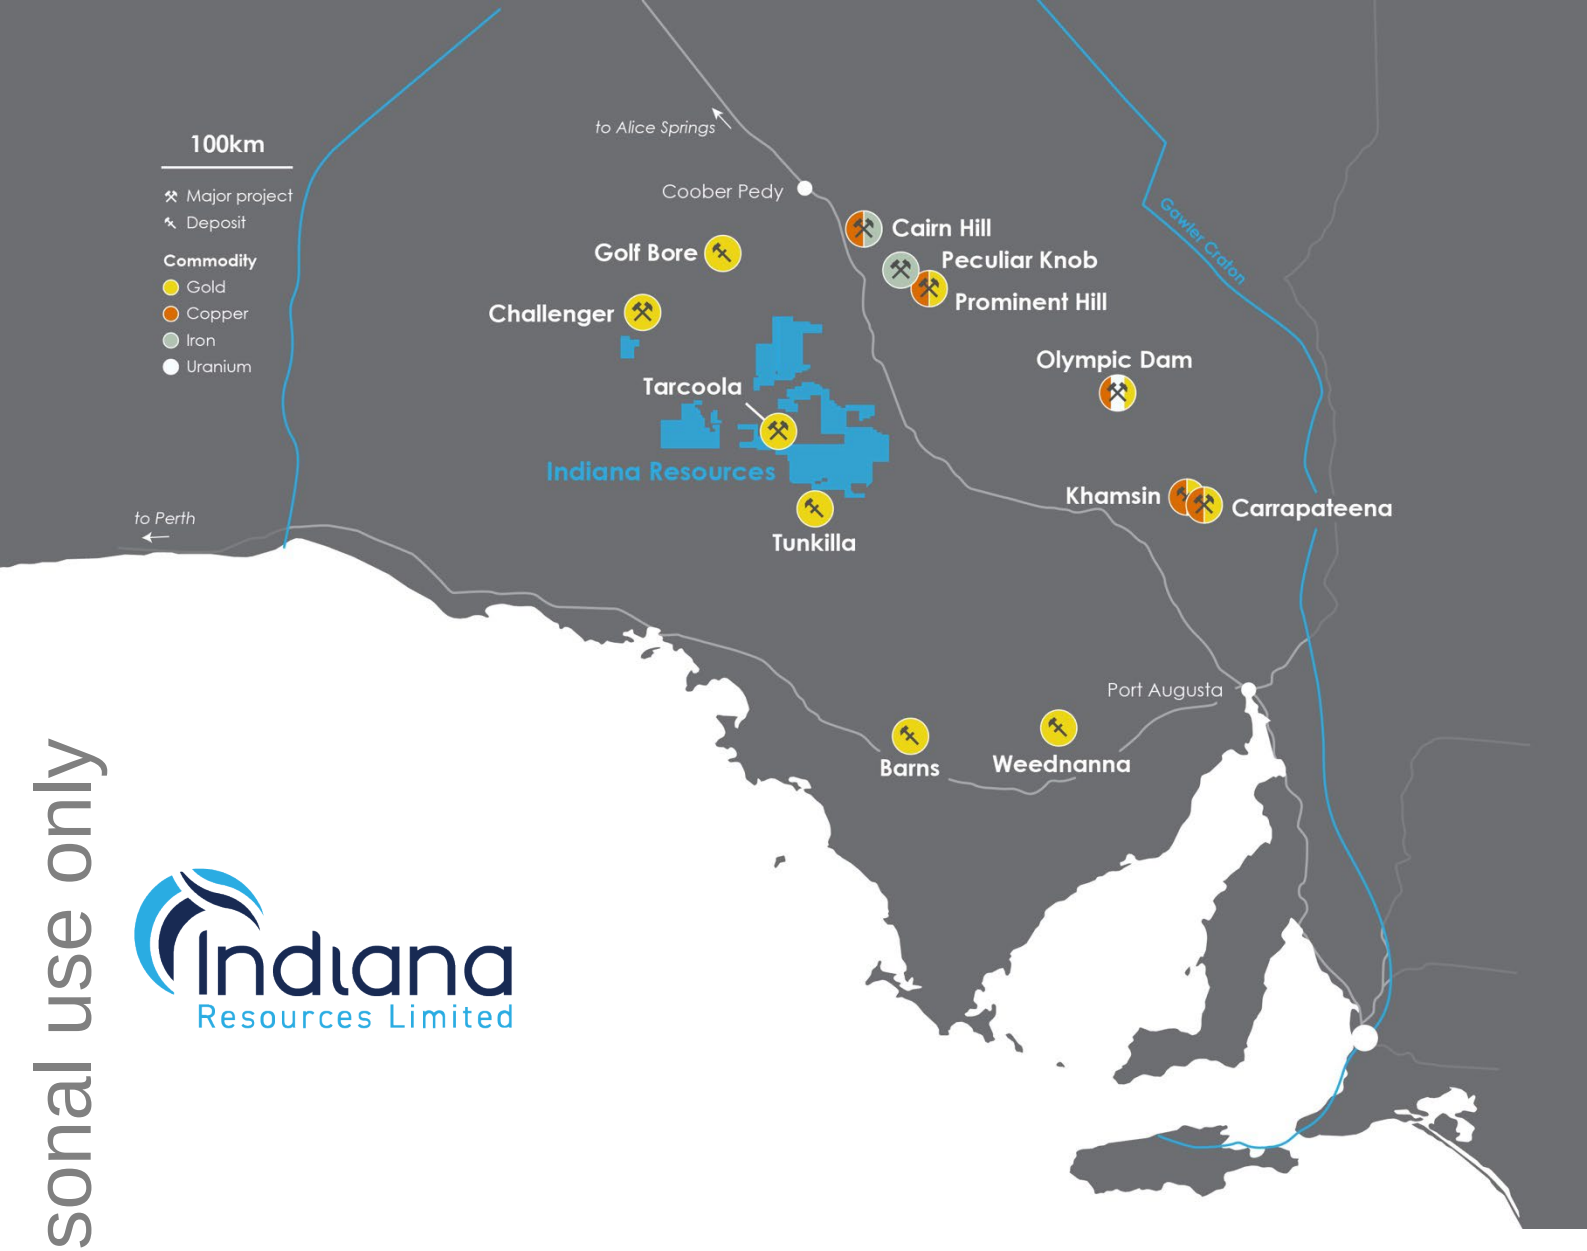

However, the Company has secured an alternative rig in a very short space of time and drilling is now planned to commence by the end of June.

Drilling is expected to continue through July, with the Company planning to provide regular updates as the program progresses.

Indiana Resources (ASX: IDA) is an exploration company focused on advancing a portfolio of tenements, which include critical minerals, rare earths, gold and base metals, in the highly prospective Central Gawler Craton Province in South Australia.

Indiana's ground position in the Gawler Craton covers +5,000km², with the Company's tenements strategically located between the historic gold mining centres of Tunkillia (1.7m ounce gold resource) and the historic Tarcoola gold mine.
