Meridian Energy monthly operating report for July 2026

14 August 2026

Meridian Energy Limited has released its monthly operating report for the month of July 2026 (attached).

Mike Roan said Meridian was well positioned to help meet record monthly demand thanks to strong renewable generation.

“New Zealand experienced record July electricity demand, with daily demand records broken multiple times during the month. The sector and Meridian stood up to the test, with carefully managed hydro storage levels supporting increased renewable generation across Meridian’s portfolio.”

Key points this month include:

- In the month to 10 August 2026, national hydro storage decreased from **136%** to **128%** of historical average.
- South Island storage decreased to **138%** of average and North Island storage decreased to **88%** of average by 10 August 2026.
- Meridian’s July 2026 monthly total inflows were **162%** of historical average.
- Meridian’s Waitaki catchment water storage¹ at the end of July 2026 was **145%** of historical average.
- Snow storage in Meridian’s Waitaki Catchment was **105%** of average in early August.
- Water storage in Meridian’s Waiau catchment was **158%** of average at the end of July 2026.
- July was warm and wet for the South Island and dry for the North Island. Temperatures and rainfall were above average for the South Island, whereas the North Island had average temperatures and well below average rainfall.
- National electricity demand in July 2026 was a record July level and **1.9%** higher than July 2025. Excluding New Zealand Aluminium Smelters Ltd (NZAS), demand is **1.5%** higher than July 2025.
- NZAS average load during July 2026 was **581MW**, compared with 552MW a year ago, when Meridian and NZAS had agreed a 50MW demand response reduction from March 2025 to August 2025.
- Meridian’s retail sales volumes in July 2026 were **2.3%** higher than July 2025.
- Compared to July 2025, segment sales in residential were 13.6% higher, small medium business 3.0% higher, large business 7.4% higher, agriculture 1.8% higher and corporate 7.6% lower.

Weekly lake storage updates are available on Meridian’s website. See comparative lake levels at: www.meridianenergy.co.nz/power-stations/lake-levels

ENDS

¹ Waitaki water storage levels exclude any Lake Pūkaki storage below 518m above sea level.

July 2026

Monthly operating report

July key points

In the month to 10 August 2026, national hydro storage decreased from **136%** to **128%** of historical average.

South Island storage decreased to **138%** of average and North Island storage decreased to **88%** of average by 10 August 2026.

Meridian's July 2026 monthly total inflows were **162%** of historical average.

Meridian's Waitaki catchment water storage at the end of July 2026 was **145%** of historical average.

Snow storage in Meridian's Waitaki catchment was **105%** of average in early August.

Water storage in Meridian's Waiau catchment was **158%** of average at the end of July 2026.

July was warm and wet for the South Island and dry for the North Island. Temperatures and rainfall were above average for the South Island, whereas the North Island had average temperatures and well below average rainfall.

National electricity demand in July 2026 was a record July level and **1.9%** higher than July 2025. Excluding New Zealand Aluminium Smelters Ltd (NZAS), demand is **1.5%** higher than July 2025.

NZAS average load during July 2026 was **581MW**, compared with 552MW a year ago, when Meridian and NZAS had agreed a 50MW demand response reduction from March 2025 to August 2025.

Meridian's retail sales volumes in July 2026 were **2.3%** higher than July 2025.

Compared to July 2025, segment sales in residential were 13.6% higher, small medium business 3.0% higher, large business 7.4% higher, agriculture 1.8% higher and corporate 7.6% lower.

Market data

National electricity demand in July 2026 was a record July level and 1.9% higher than July 2025.

New Zealand Aluminium Smelters Ltd (NZAS) average load during July 2026 was 581MW, compared with 552MW a year ago, when Meridian and NZAS had agreed a 50MW demand response reduction from March 2025 to August 2025.

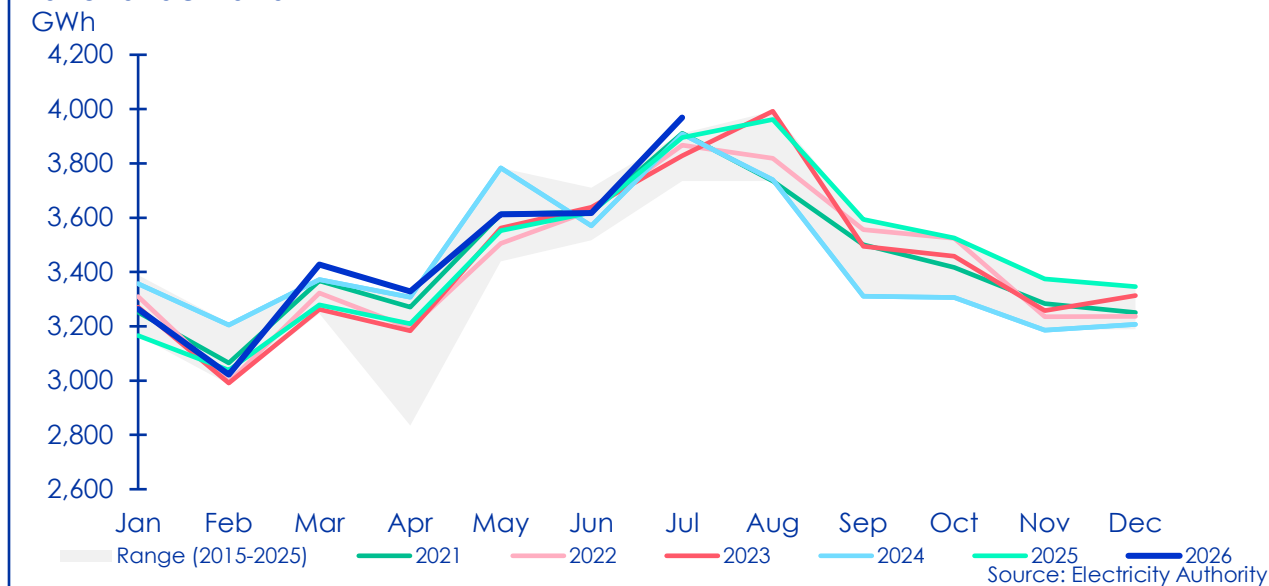

July was warm and wet for the South Island and dry for the North Island. Temperatures and rainfall were above average for the South Island, whereas the North Island had average temperatures and well below average rainfall.

Demand in the last 12 months was 3.8% higher than the preceding 12 months.

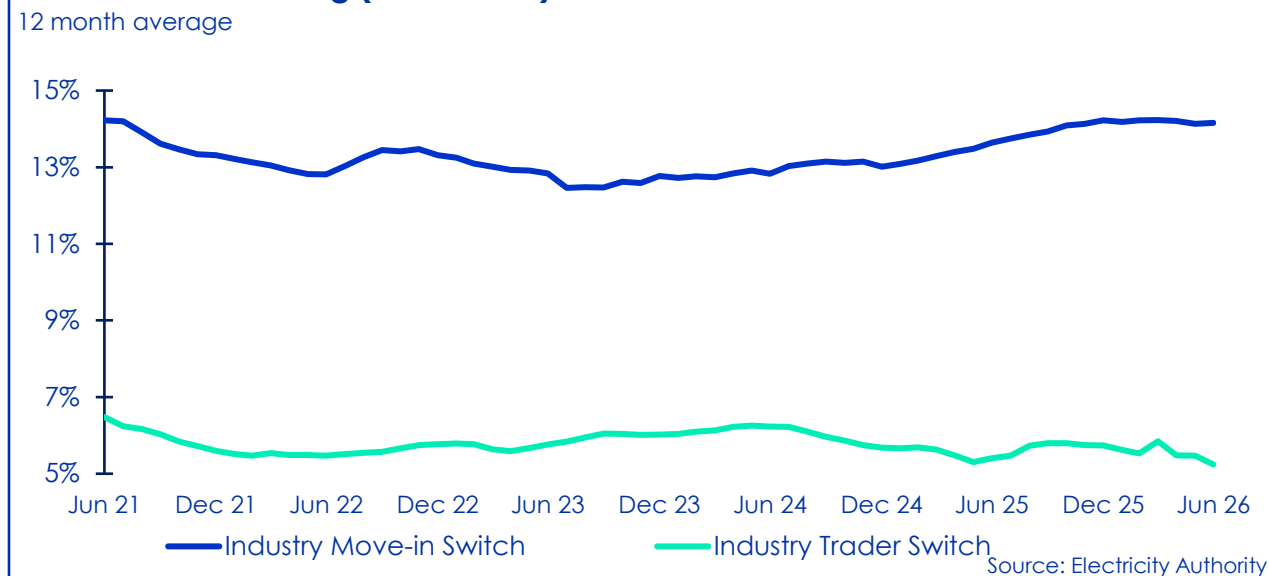

12-month average switching rate of customers changing retailers but not moving ("trader" switch) was 5.2% at the end of June 2026.

12-month average switching rate of customers moving and changing retailers ("move-in" switch) was 14.2% at the end of June 2026.

National demand

Market ICP switching (all retailers)

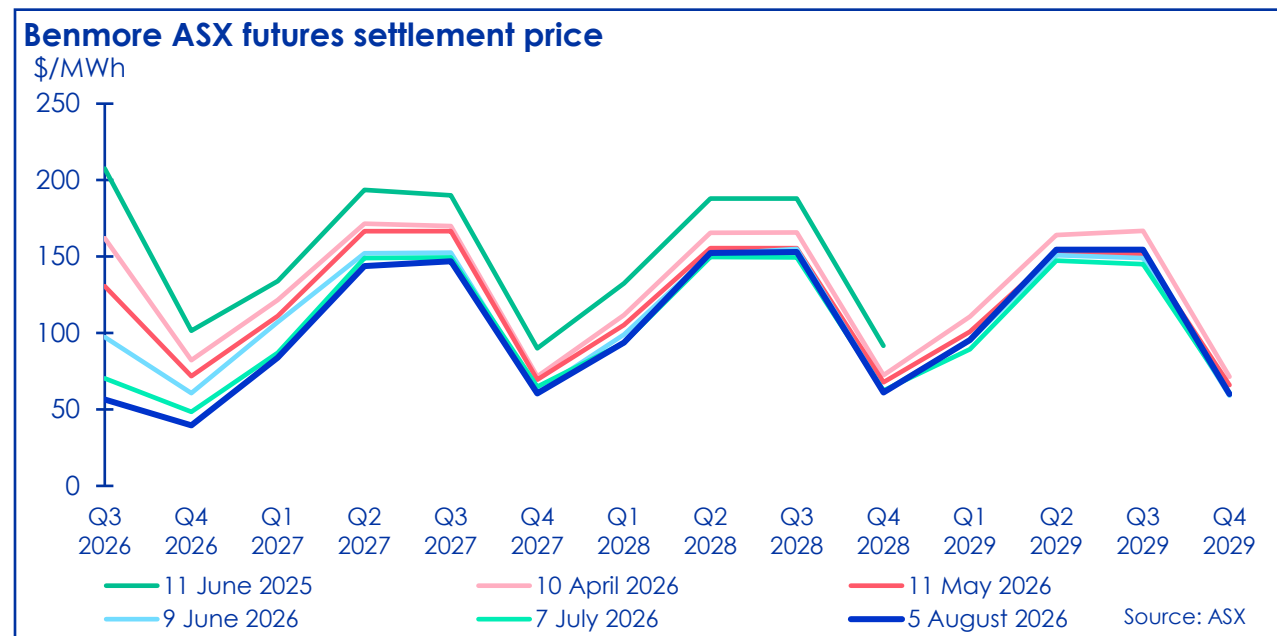

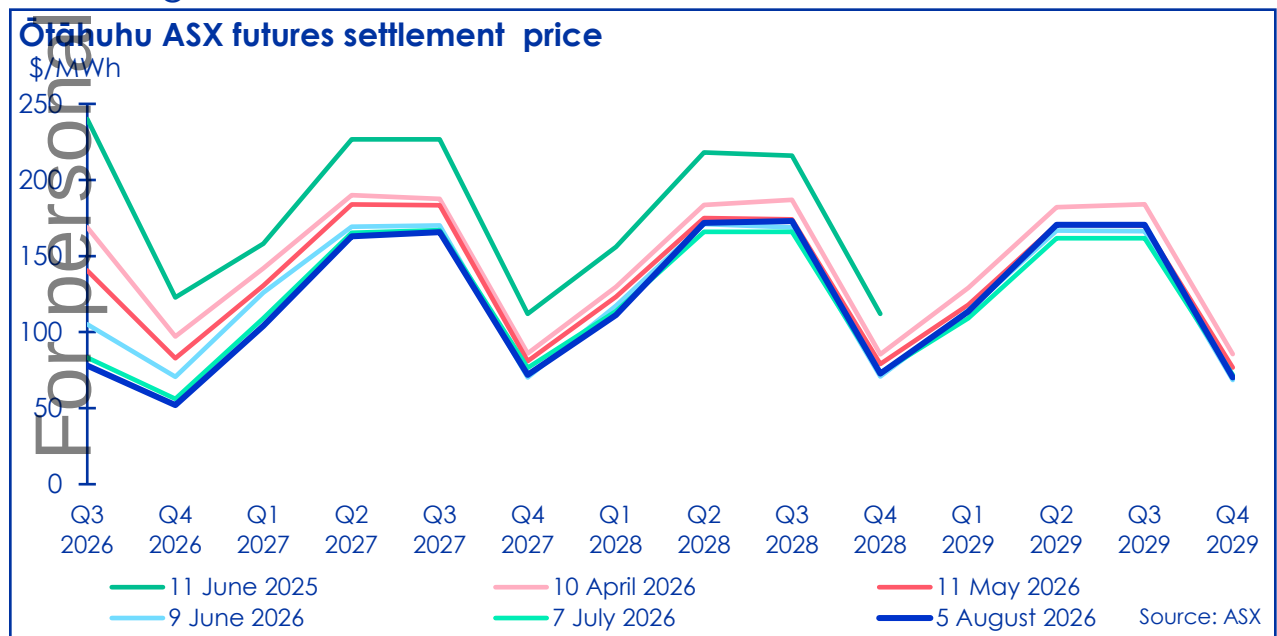

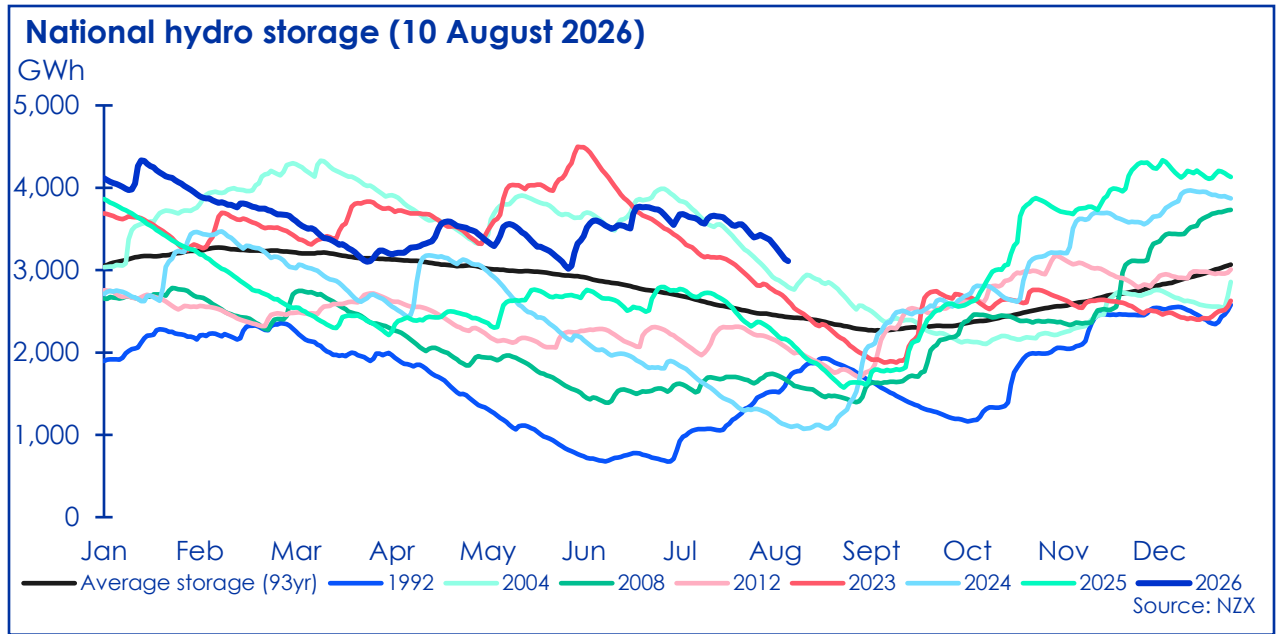

Market data

July 2026 saw further decreases in the ASX electricity futures prices. Since February 2026, future quarterly prices for 2027 to 2029 have fallen more than 20%, primarily driven by committed new generation buildout.

National storage decreased from 136% of average on 13 July 2026 to 128% of average on 10 August 2026.

South Island storage decreased to 138% of historical average by 10 August 2026 and North Island storage decreased to 88% of average.

Retail

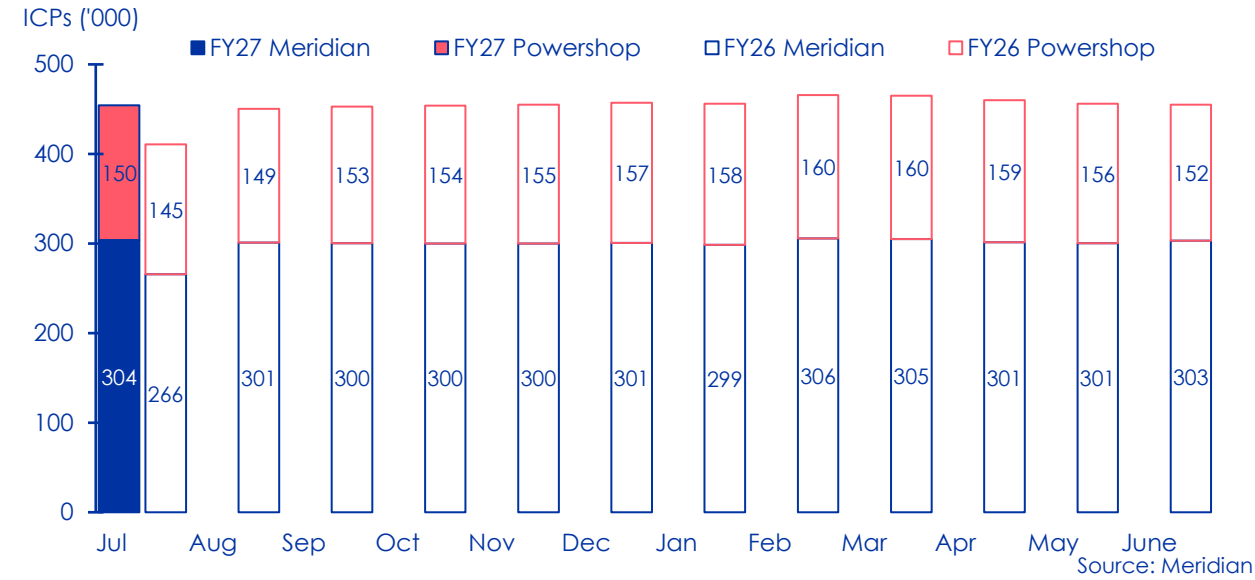

Meridian's customer connection numbers decreased 0.2% during July 2026 and have increased 10.5% in the last 12 months.

Retail sales volumes in July 2026 were 2.3% higher than July 2025.

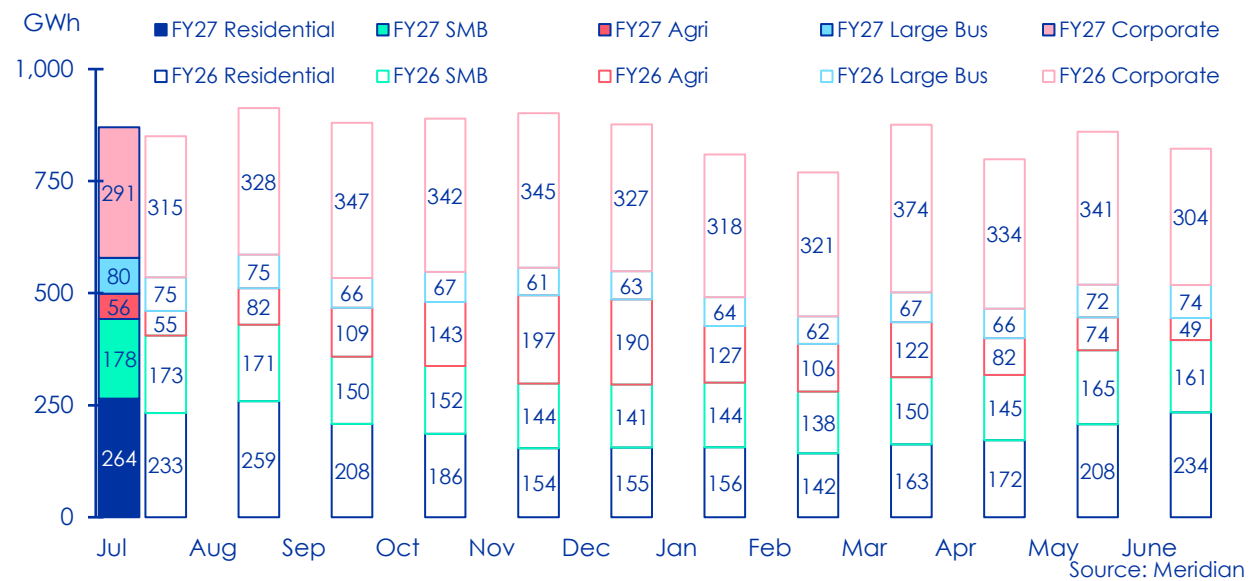

Compared to July 2025, segment sales in residential were 13.6% higher, small medium business 3.0% higher, large business 7.4% higher, agriculture 1.8% higher and corporate 7.6% lower.

Meridian's customer connections

Meridian's retail sales volume*

Inflows and storage

July 2026 monthly total inflows were 162% of historical average.

Waiau catchment inflows in July 2026 were 164% of historical average, 174% higher than the same month last year.

Waitaki catchment water storage¹ moved from 2,073GWh to 1,968GWh during July 2026.

Waitaki water storage at the end of July 2026 was 145% of historical average and 63% higher than the same time last year.

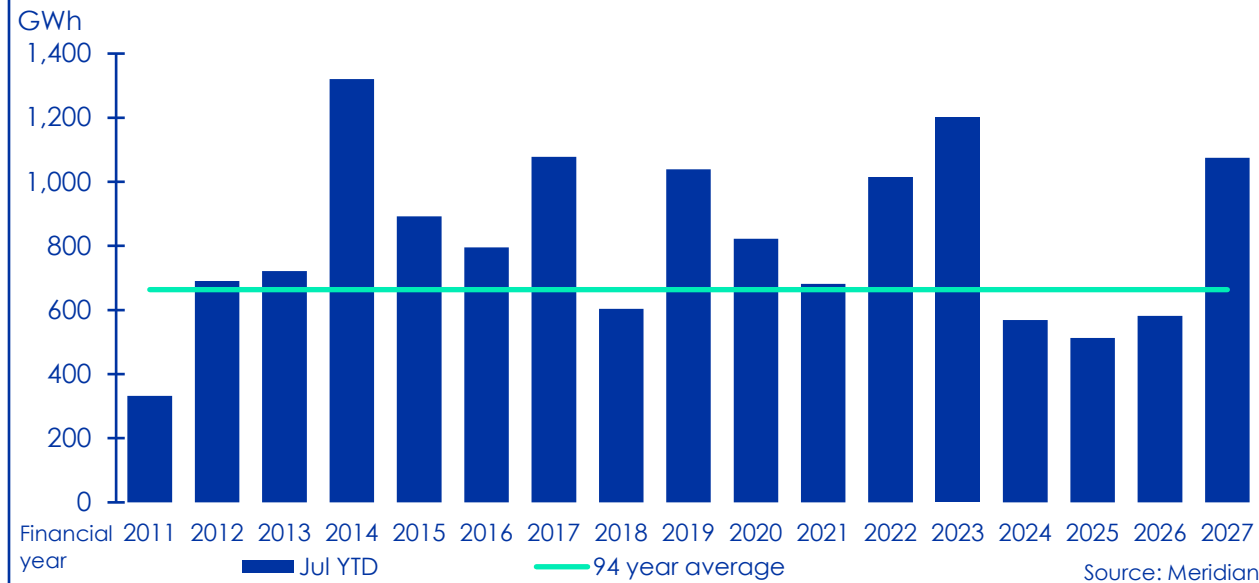

Snow storage in Meridian's Waitaki catchment was 105% of average in early August.

Water storage in Meridian's Waiau catchment was 158% of average at the end of July 2026.

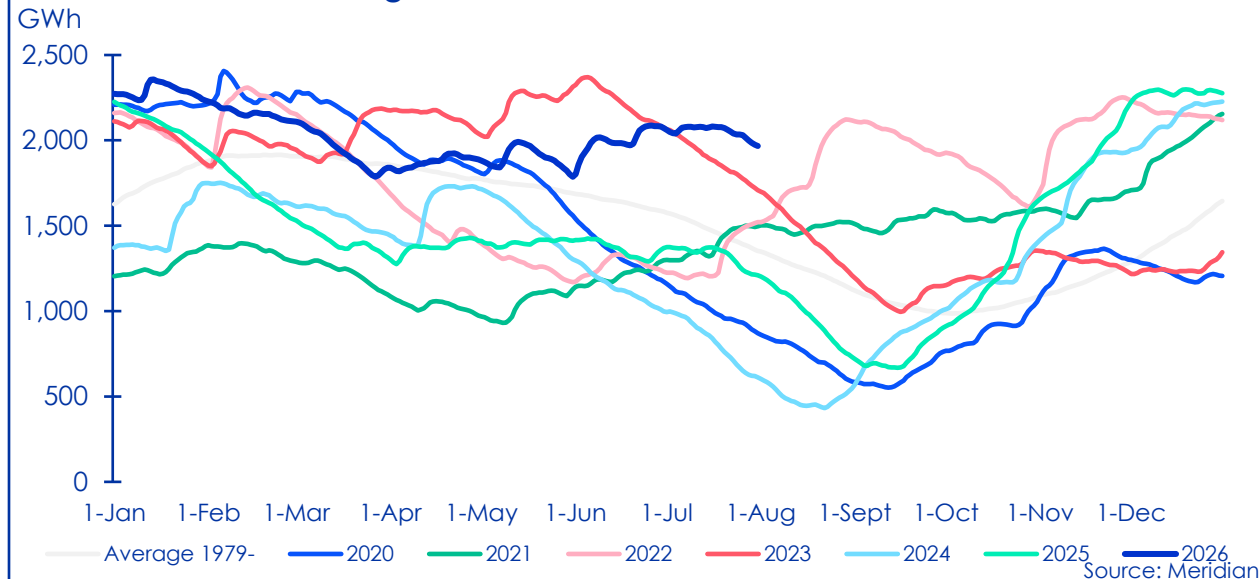

¹Waitaki water storage levels exclude any Lake Pūkaki storage below 518m above sea level.

Weekly lake storage updates are available on Meridian's website. See comparative lake levels at: www.meridianenergy.co.nz/power-stations/lake-levels

Meridian's combined catchment inflows

Meridian's Waitaki storage¹

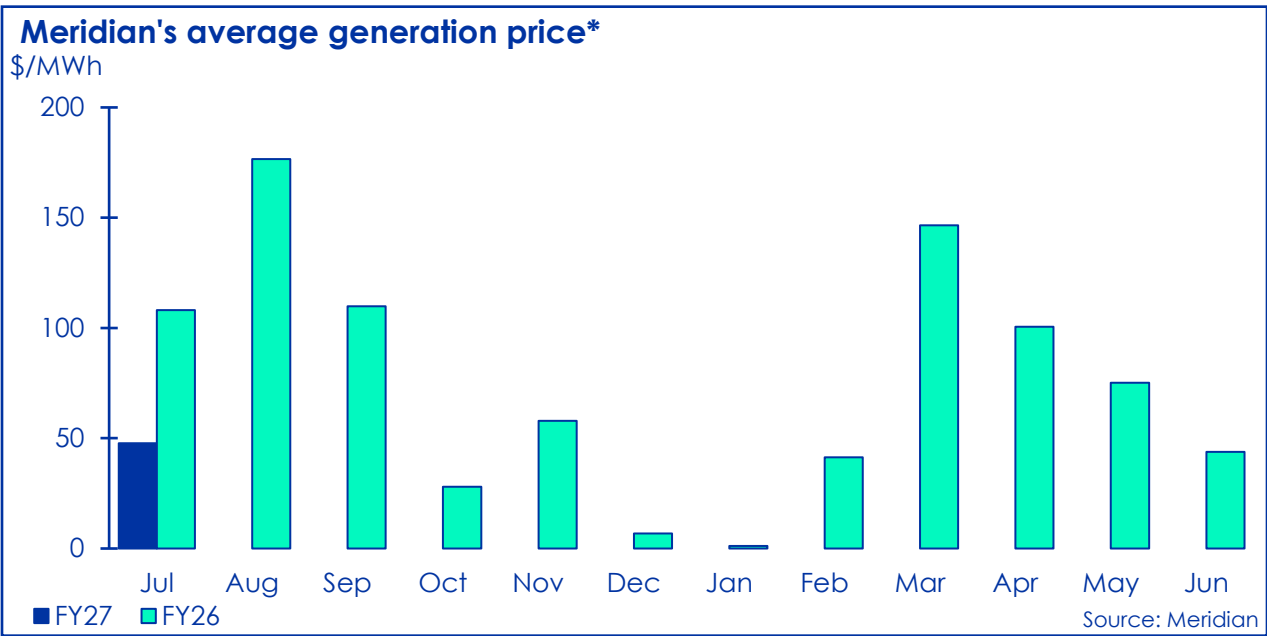

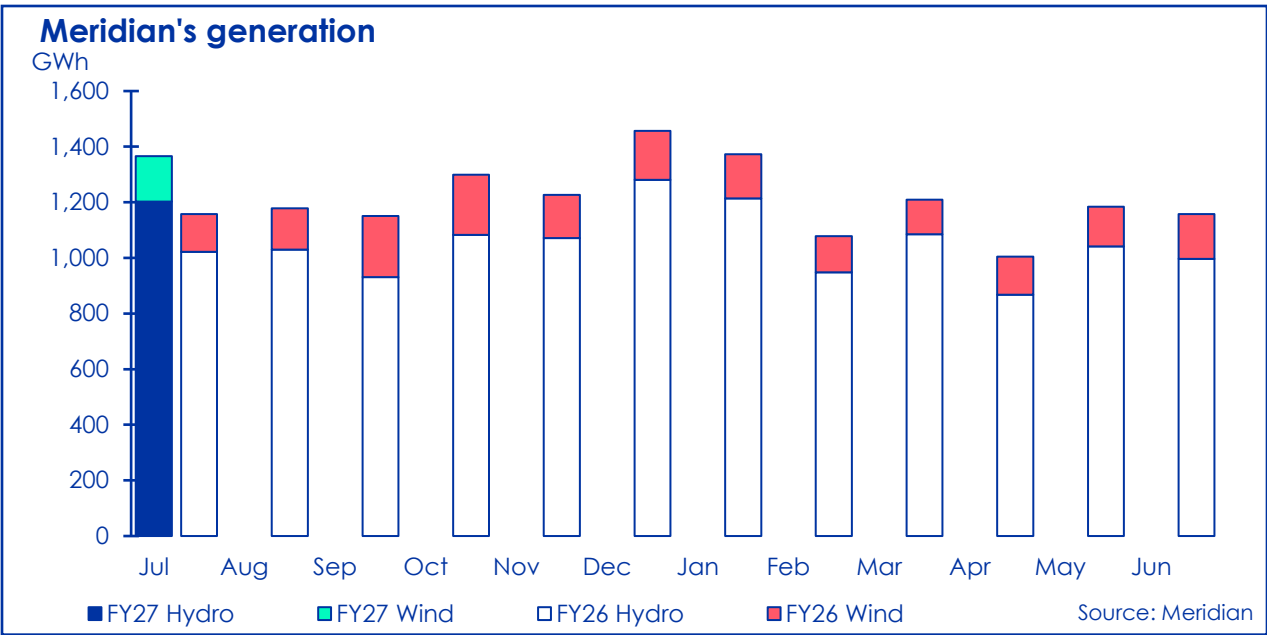

Generation

Meridian's generation in July 2026 was 18.0% higher than the same month last year, reflecting higher hydro generation and higher wind generation.

The average price Meridian received for its generation in July 2026 was 55.9% lower than the same month last year.

The average price Meridian paid to supply its retail customers in July 2026 was 47.3% lower than the same month last year.

*price received for Meridian's physical generation

Footnotes

1. Contracted sales volumes and volume weighted average price received from contracted customers less distribution costs.
2. Derivatives sold excluding the sell-side of virtual asset swaps.

3. Average price of both NZAS sales volume and derivative sales volumes.
4. Meridian Retail and Powershop New Zealand installation control points (ICPs), excluding vacants.
5. Volume weighted average price received for Meridian's physical generation.
6. Over the counter and ASX contract volumes excluding the buy-side of virtual asset swaps.

Glossary

Hedging volumes	buy-side electricity derivatives excluding the buy-side of virtual asset swaps
Average generation price	the volume weighted average price received for Meridian's physical generation
Average retail contracted sales price	volume weighted average electricity price received from retail customers, less distribution costs
Average wholesale contracted sales price	volume weighted average electricity price received from wholesale customers (including NZAS) and financial contracts
Combined catchment inflows	combined water inflows into Meridian's Waitaki and Waiau hydro storage lakes
Cost of hedges	volume weighted average price Meridian pays for derivatives acquired
Cost to supply contracted sales	volume weighted average price Meridian pays to supply contracted customer sales and financial contracts
Contracts for Difference (CFDs)	an agreement between parties to pay the difference between the wholesale electricity price and an agreed fixed price for a specified volume of electricity. CFDs do not result in the physical supply of electricity
Customer connections	number of installation control points, excluding vacants
GWh	gigawatt hour. Enough electricity for 125 average New Zealand households for one year
Historic average inflows	the historic average combined water inflows into Meridian's Waitaki and Waiau hydro storage lakes over the last 85 years
Historic average storage	the historic average level of storage in Meridian's Waitaki catchment since 1979
HVDC	high voltage direct current link between the North and South Islands of New Zealand
ICP	New Zealand installation control points, excluding vacants
ICP switching	the number of installation control points changing retailer supplier, recorded in the month the switch was initiated
