Qualifications & Non-IFRS Financial Information

For personal use only

Forward Looking Statements

This presentation contains certain forward-looking statements with respect to Ramelius Resources Ltd's (Ramelius) financial condition, results of operations, production targets and other matters that are subject to various risks and uncertainties. Actual results, performance or achievements could be significantly different from those expressed in or implied by those forward-looking statements. Such forward looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors that are beyond the control of Ramelius that may cause actual results to differ materially from those expressed in the forward-looking statements contained herein. Ramelius gives no warranties in relation to the information and statements within this presentation.

Competent Persons Statement

The Ore Reserves and Mineral Resources underpinning the Production Targets disclosed in this announcement have been prepared by a Competent Person or persons in accordance with the requirements of the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves".

The Information in this report that relates to Exploration Results, Exploration Targets, Mineral Resources and Ore Reserves is based on information compiled by Peter Ruzicka (Exploration Results), Jake Ball (Exploration Targets and Mineral Resources) and Paul Hucker (Ore Reserves), who are Competent Persons and Members of The Australasian Institute of Mining and Metallurgy. Peter Ruzicka, Jake Ball and Paul Hucker are employees of the Company and have sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Peter Ruzicka, Jake Ball and Paul Hucker consent to the inclusion in this report of the matters based on their information in the form and context in which it appears.

The Company confirms that it is not aware of any new information or data that materially affects the information included in this presentation and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.

Non-IFRS Financial Information

Financial data in this presentation includes 'non-IFRS financial information' per ASIC Regulatory Guide 230 Disclosing non-IFRS financial information published by ASIC. Non-IFRS measures in this presentation includes production cost information such as All-in Sustaining Cost (**AISC**) and free cash flow (FCF). Ramelius believes this non-IFRS financial information provides useful information to users in measuring the financial performance and conditions of Ramelius. The non-IFRS financial information do not have a standardised meaning prescribed by the Australian Accounting Standards (**AAS**) and, therefore, may not be comparable to similarly titled measures presented by other entities, nor should they be construed as an alternative to other financial measures determined in accordance with AAS. Investors are cautioned, therefore, not to place undue reliance on any non-IFRS financial information included in this presentation. Non-IFRS financial information in this presentation has not been subject to audit or review by the Company's external auditor.

Previously Reported Information

Information in this report references previously reported results, production targets and resource and information extracted from the Company's ASX announcements cross-referenced within the report. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters continue to apply and have not materially changed.

Ramelius overview

Two high-quality hubs with exceptional growth underpinned by a large, long-life resource base

For personal use only

Market Cap[1]	Cash, Gold and Investments[1]
A$6.8 bn	A$1 bn
Mineral Resource[2]	Ore Reserve[2]
14 Moz	4.3 Moz
FY27 production (Guidance)[3]	FY27 AISC (Guidance)[3]
205-225 koz	A$2,150-2,350/oz
FY30 production (Outlook)[3]	FY30 AISC (Outlook)[3]
560-610 koz	A$2,100-2,400/oz

Two high-quality hubs in Western Australia

NOTES

1. As at 16 September 2026
2. See RMS ASX Release '2026 Resources and Reserves Statement', 25 August 2026 (includes Edna May, subsequently sold on 4 September 2026)
3. For all references to the Company's FY27 Guidance and Outlook, see RMS ASX Release '4-Year Outlook & FY27 Guidance', 21 September 2026

A premier gold producer

For personal use only

FREE CASH FLOW

A$1.5-1.8 bn

FY30 annual FCF business[2]

GROWTH

205%

Production growth from FY26 to FY30 without diluting margins

COST POSITION

1st third

Cost position in low-risk jurisdictions CY27[3]

CAPITAL RETURNS

65%

Of FY26 FCF returned while investing in growth

RESOURCE QUALITY

~14.0Moz / ~4.3Moz[1]

Resources / Reserves supporting long mine life

SHAREHOLDER RETURNS

25% TSR p.a.

Proven shareholder value creation over 10 years

NOTES

Source: FactSet, Company Disclosure

1. See RMS ASX Release '2026 Resources and Reserves Statement', 25 August 2026 (includes Edna May, subsequently sold on 4 September 2026)
2. At gold price assumption of A$5,500/oz – A$6,000/oz, based on RMS' 4-Year Outlook
3. See page 33

World class gold portfolio

For personal use only

Mt Magnet Hub

Dalgaranga, Galaxy, Cue, Eridanus

Brownfield expansion

Murchison
500km north-east of Perth, WA

FY30 outlook: 420-460koz

FY27 production guidance: 205-225koz

Mineral Resource: 157Mt at 1.9g/t for 10Moz[1]

Mill capacity: upgrading to 4.3 - 5.0Mtpa
Currently operating at 2.0Mtpa

Rebecca-Roe Project

Rebecca, Roe

Greenfield development

Kalgoorlie
150km east of Kalgoorlie, WA

First gold: Q4CY28

FID obtained
Subject to environmental permitting for Roe expected in December 2026 Quarter (Rebecca received)

Mineral Resource: 67Mt at 1.5g/t for 3Moz[1]

Mill capacity: 3.25Mtpa
Construction scheduled to commence December 2027

NOTES

Source: Company disclosure

1. Mineral Resource inclusive of Ore Reserves. Mineral Resource figures rounded to zero decimal places. Rounding errors may occur

For personal use only

Advancing 600koz+ gold portfolio in Western Australia

For personal use only

Production outlook

De-risked Mt Magnet production base plus Rebecca-Roe growth and upside[3]

FY27 group guidance	FY30 group outlook
205-225koz Gold production	**560-610**koz Gold production
A$2,150-2,350/oz AISC	**A$2,100-2,400**/oz AISC
2Mt Mill capacity[1]	**8.25Mt** Mill capacity[2]

NOTES

1. FY27 Mill capacity represents Mt Magnet mill capacity only
2. FY30 represents Mt Magnet upgraded mill capacity to 5Mtpa and Rebecca-Roe mill capacity of 3.25Mtpa
3. For all references to the Company's FY27 Guidance and Outlook, see RMS ASX Release '4-Year Outlook & FY27 Guidance', 21 September 2026

Mt Magnet

Transformational high-grade growth underpins near-term production and cash generation

Rebecca-Roe

Further growth and upside, supporting scale and mine life

Portfolio

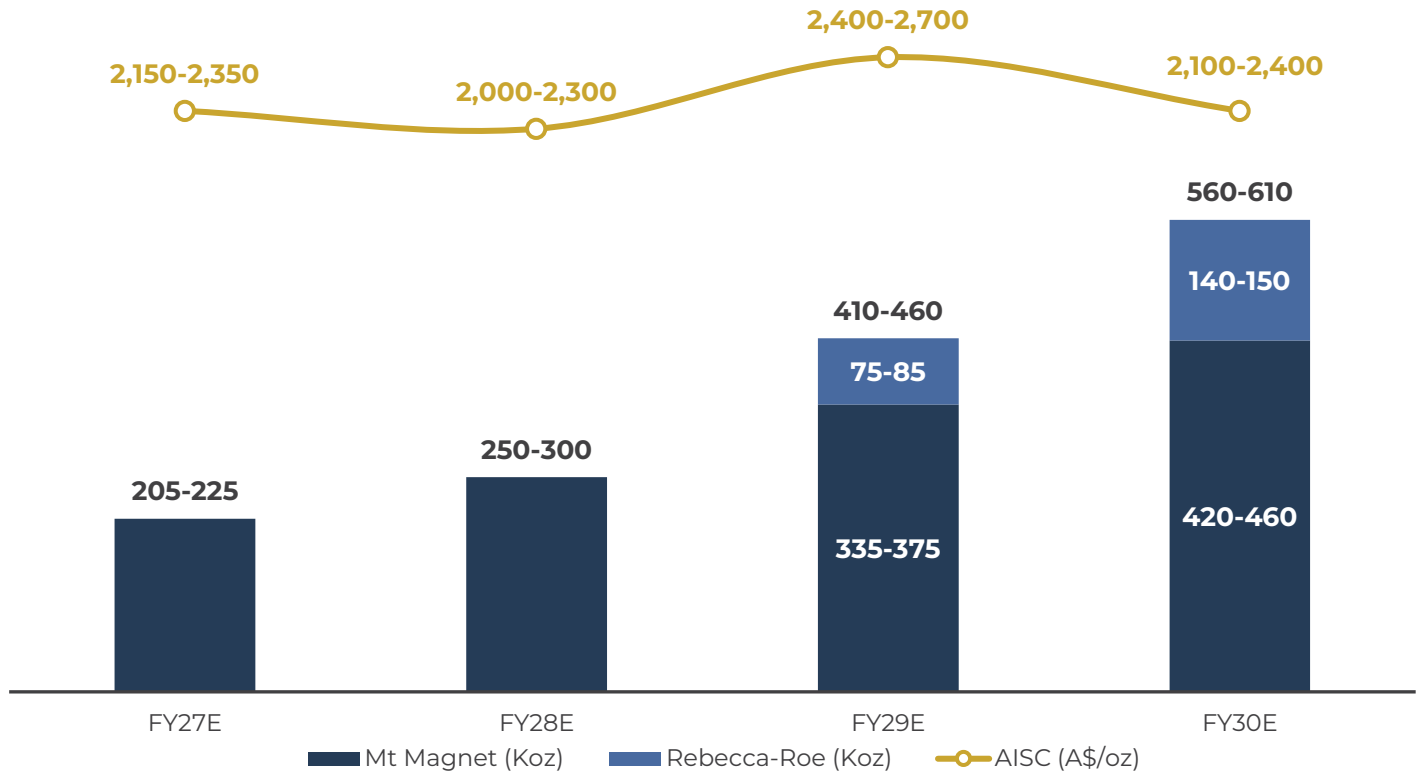

High-quality, long-life portfolio positions the group for reliable delivery whilst maintaining high margins

Executing the 600+ koz p.a. base case

Staged execution to unlock production growth

For personal use only

FY27-30 production (koz p.a.) & AISC (A$/oz) outlook[1]

Mt Magnet expansion

Leveraging off existing infrastructure with execution underway

Stable cost base through ramp-up

Scale + grade + operating excellence supports AISC discipline

Maintaining high margins on higher ounces

More ounces at competitive AISC = increased cash generation and returns

NOTES

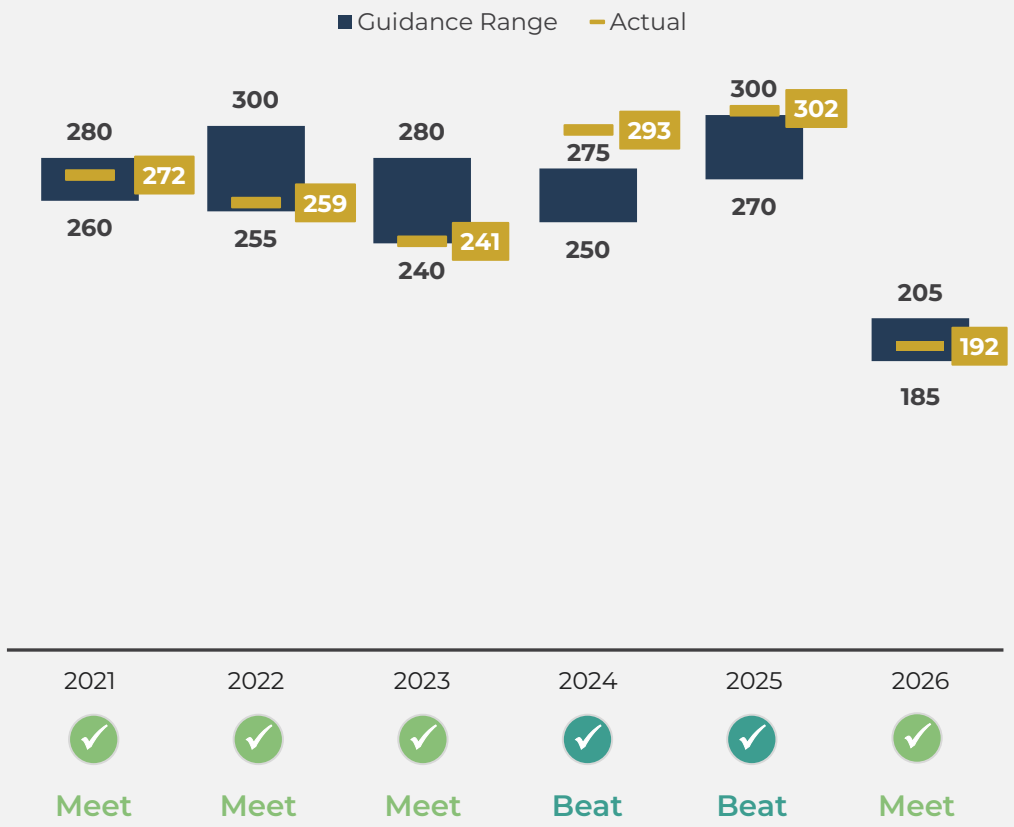

1. The Mt Magnet FY27 Guidance is based exclusively on Ore Reserves. The Mt Magnet 4-Year Outlook to FY30 is a Production Target based on 88% Ore Reserves. The Production Target is based upon 94.5% Indicated Mineral Resources and also contains a proportion of Inferred Mineral Resources (5.5%). There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the Production Target itself will be realised. Over the 4-Year period mill feed will include 2.1Mt@ 0.9g/t of stockpiles (already in Ore Reserve). The Rebecca-Roe 4-Year Outlook to FY30 is a Production Target that is based upon Ore Reserves only

Execution track record

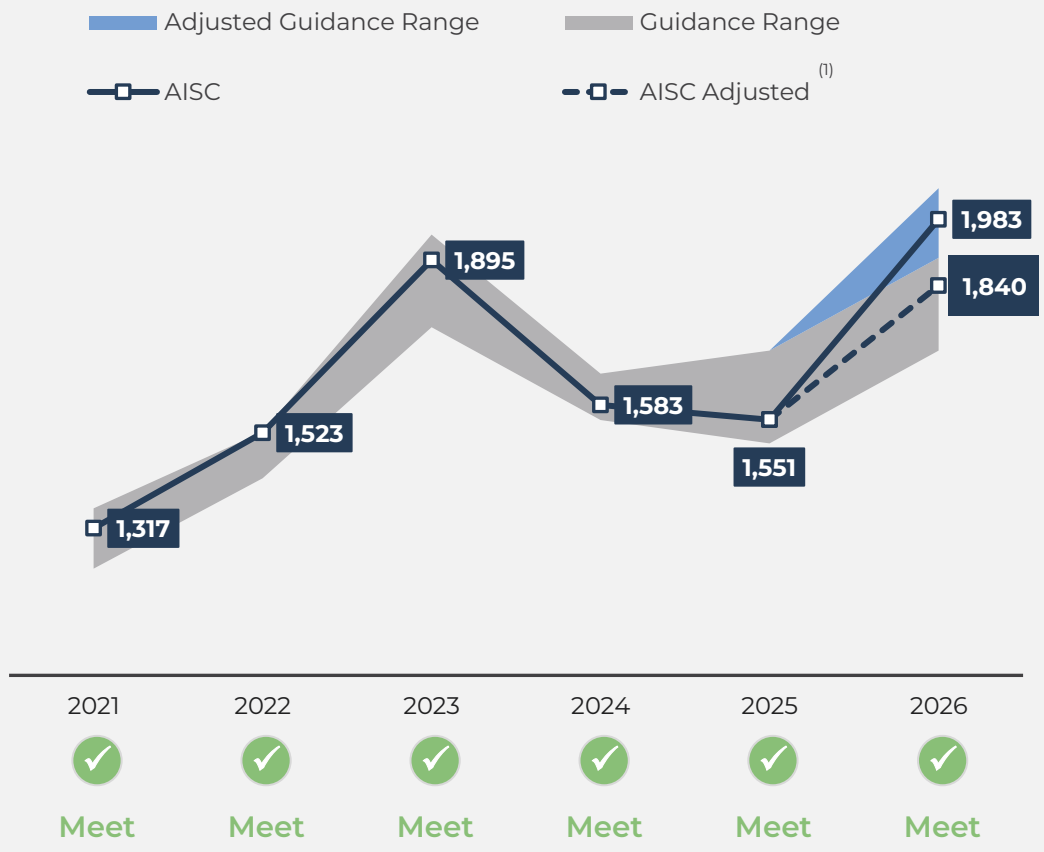

Proven ability to consistently meet Guidance

For personal use only

Gold production vs Guidance (koz)

AISC (A$/oz)

NOTES

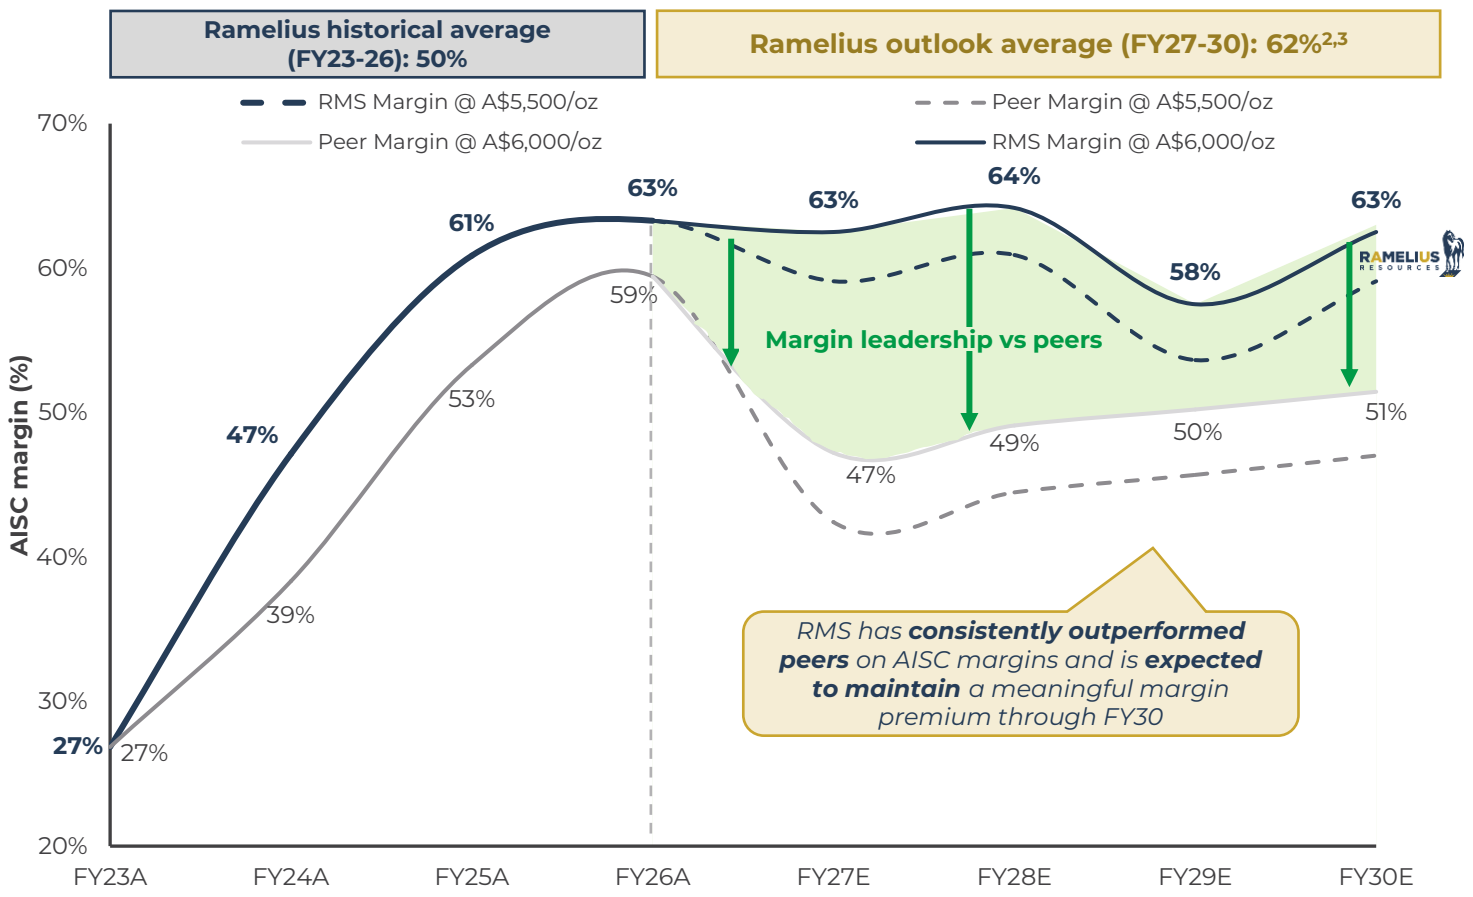

1. AISC adjusted for the impact of early commercial production from Never Never underground

High-grade growth underpins sustained margin outperformance

Ramelius retains a clear margin advantage as high-grade feed expands through the Mt Magnet Hub

For personal use only

AISC margin trend (%) vs peers[1]

Grade

- Higher-grade ore displaces lower-grade feed
- More ounces per tonne supporting stronger cash margins

Scale

- Expanded hub throughput spreads fixed costs
- Greater infrastructure utilisation lifts operating leverage

Cost position

- Structural AISC advantage maintained through growth
- Outperformance persists despite sector wide cost pressures

NOTES

Source: Company disclosures, Visible Alpha

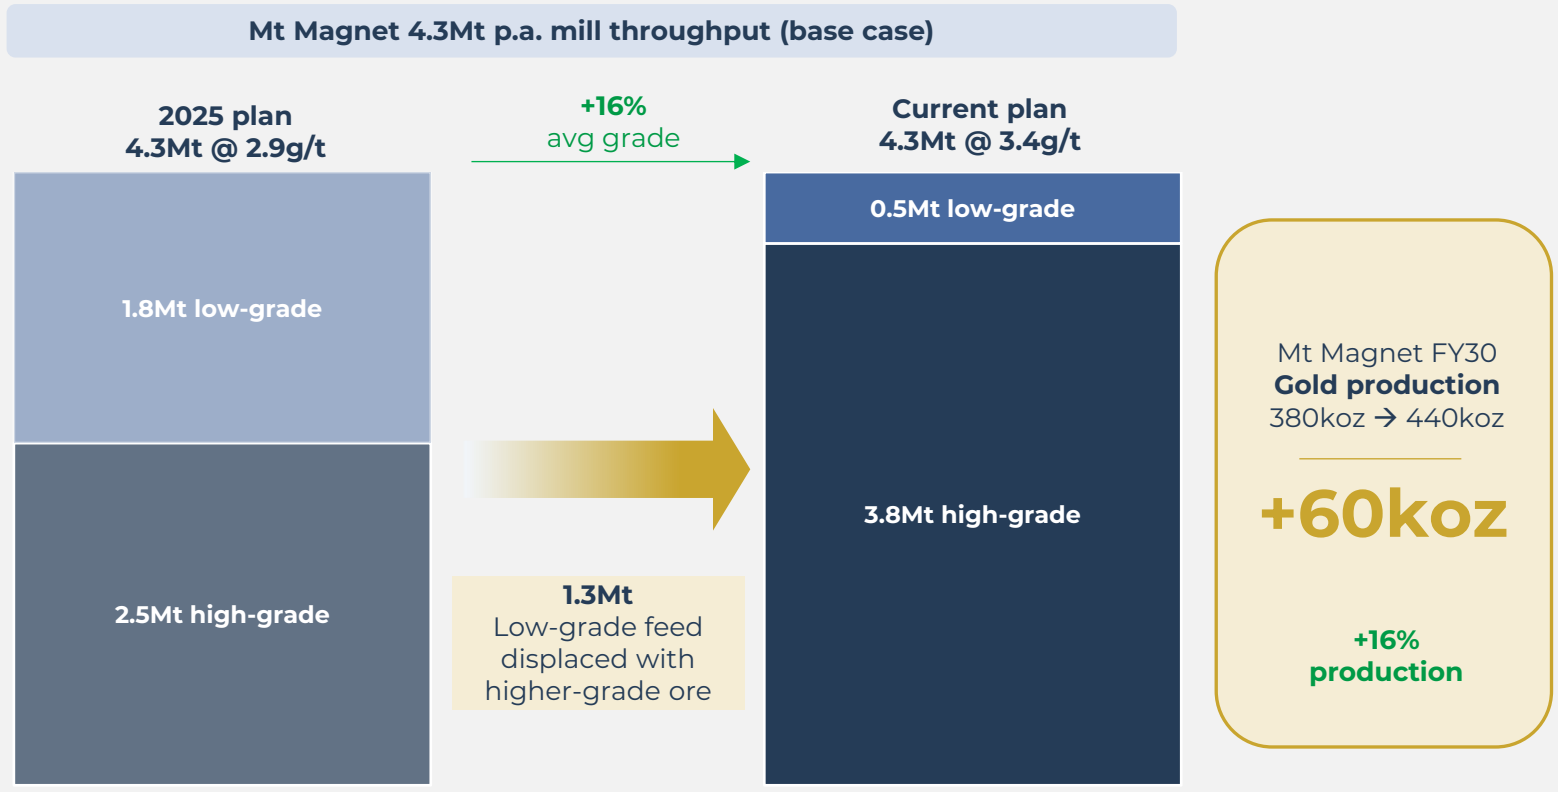

1. Historical averages based on company reported AISC versus company realised prices. Peers include NST, GMD, CMM, GGP, RRL, and WGX
2. Outlook margins based on midpoint RMS group AISC, peer outlook AISC based on Visible Alpha as at 10 September
3. Outlook average @A$6,000/oz gold price

High-grade discoveries unlocking 600+ koz p.a.

Exploration success has already upgraded expected mill feed at Mt Magnet, lifting forecast ounces. Further upside exists beyond FY30

For personal use only

Mt Magnet FY30 displacement executed from FY26 exploration

Same mill throughput with higher grade discoveries improves feed quality and lifts total production ounces

Post FY30 upside

FY31-36 displacement

For each +1.0 g/t uplift on 1Mt, ~30koz of incremental gold production is achieved[1]

Exploration and resource conversion

Cue, Lena, Galaxy and Mt Magnet brownfields provide scope to add incremental high-grade

Processing and recovery optionality

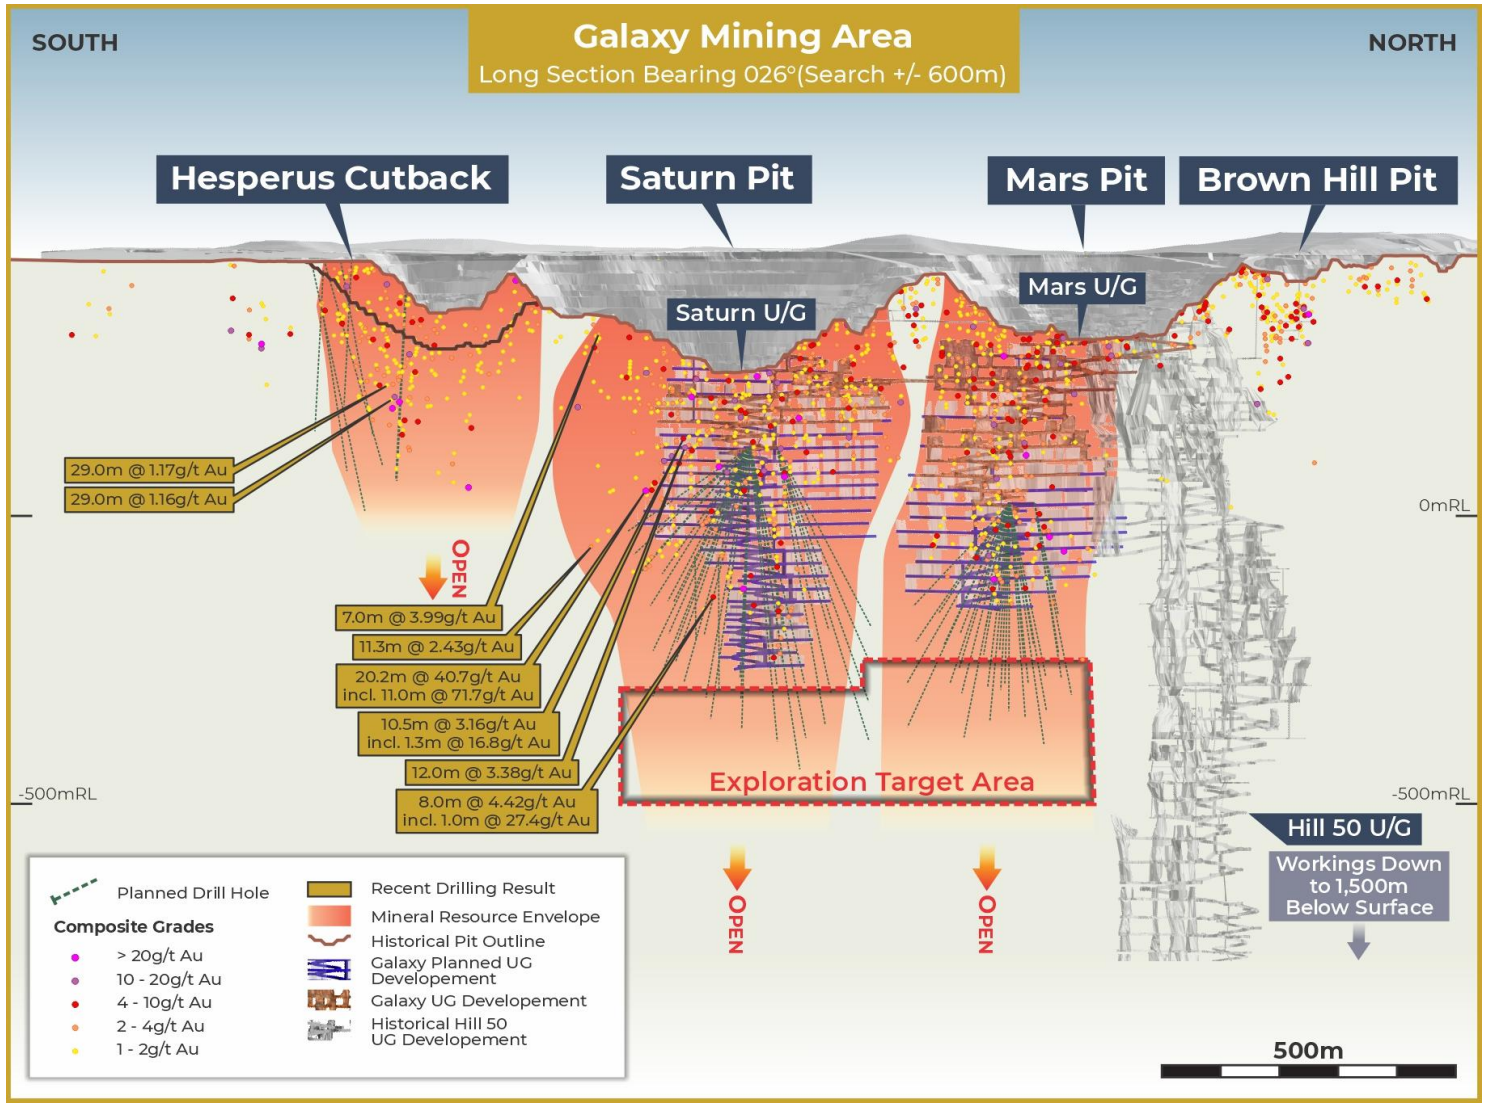

Further upside may emerge from improved recoveries and mine plan optimisation

NOTES

1. Assumes a flat 90% recovery across grades

Galaxy | FY26 Exploration investment of A$19M delivered 600koz

For personal use only

Galaxy Group[1]	2025	2026
Total Mineral Resources[3]		
Tonnes (kt)	26,000	**36,000**
Grade (g/t)	1.7	**1.7**
Contained Gold (koz)	1,400	**2,000**

Highly cash generative

- FY26: 0.6Mt @ 2.1g/t, 38koz for A$87M in free cash flow

Exploration Targets[2,3,4]

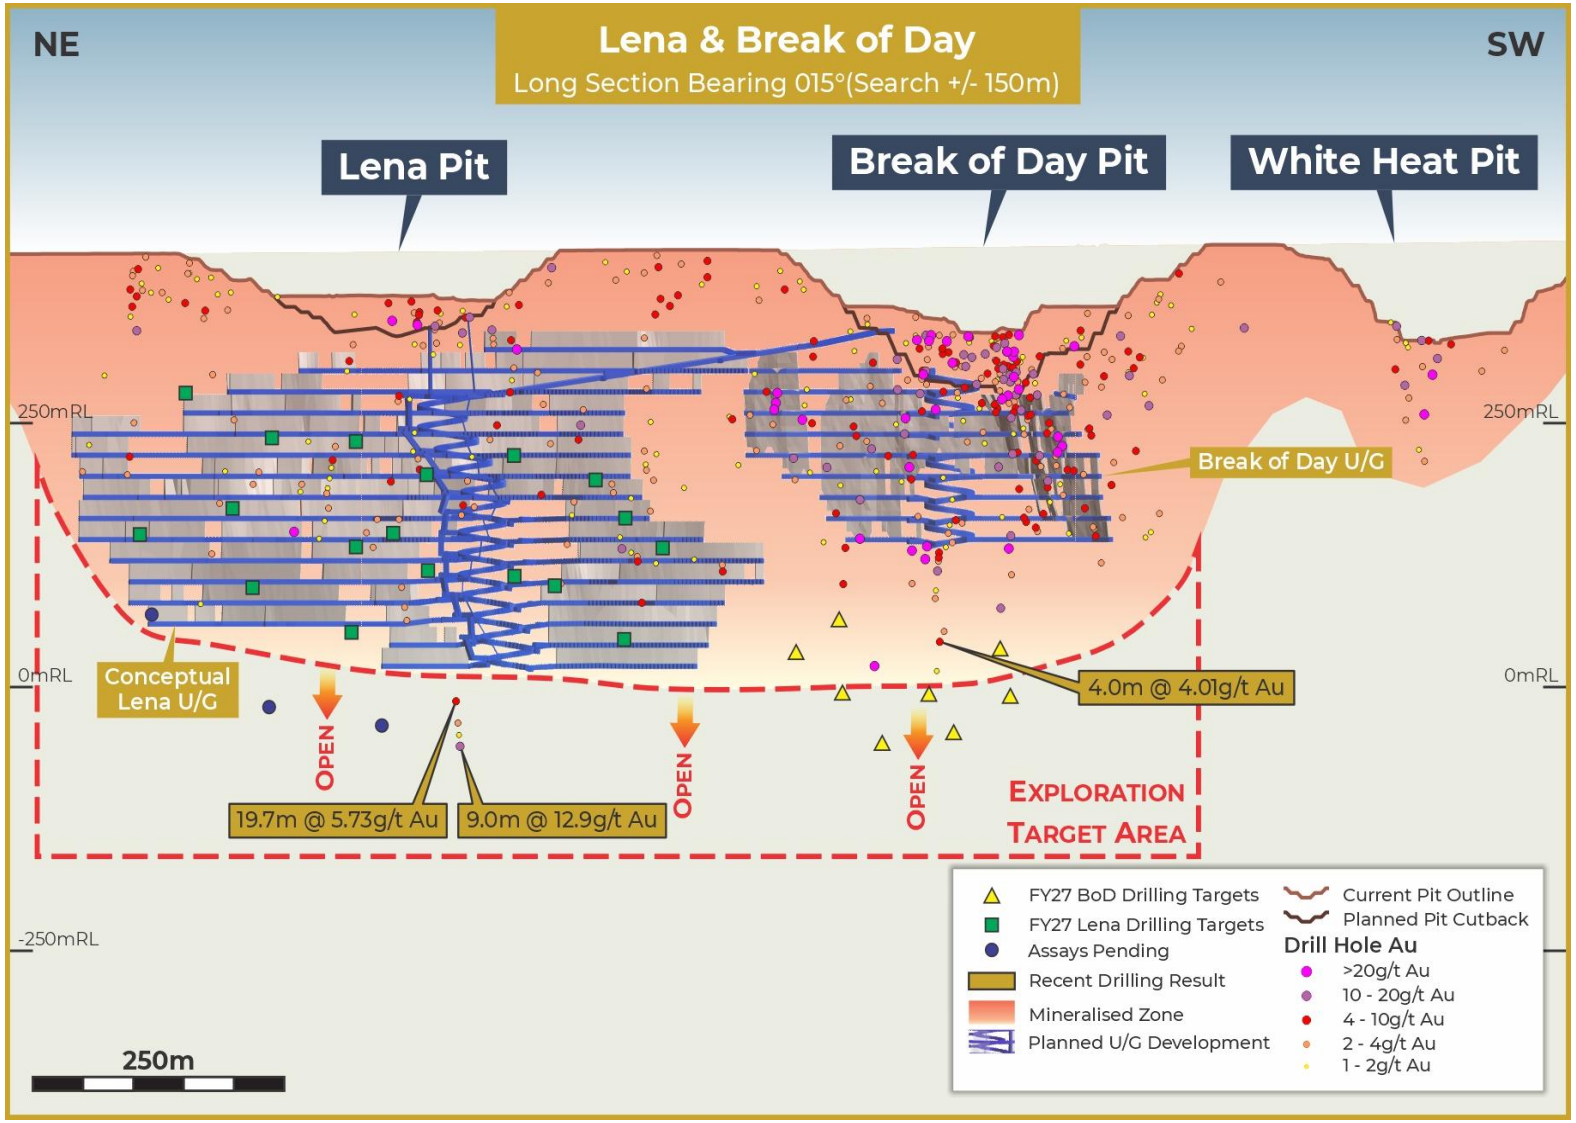

- Galaxy UG: 6.0 - 7.0Mt at 2.1 - 2.6g/t for 400 - 600koz[2,3]
- Perseverance South UG: 3.9 – 6.2Mt at 1.6 - 2.0g/t for 200 - 400koz[2,3]

NOTES

1. Galaxy Group includes Brown Hill, Hesperus, Hill 50 Deeps, Galaxy UG, and Perseverance South.
2. See RMS ASX Release '2026 Resources & Reserves Statement', 25 August 2026 and "Resources & Reserves Statement 2025", 1 October 2025;
3. The potential quality and grade of the Exploration Target is conceptual in nature; there has been insufficient exploration conducted to determine a Mineral Resource and there is no certainty that further exploration work will result in the estimation of a Mineral Resource or that an Exploration Target will be realised.
4. Exploration spend of $21M planned for FY27

Cue | what FY26 Exploration investment of A$16M delivered

For personal use only

Cue UG	2025	2026
Lena UG Mineral Resource[1]		
Tonnes (kt)	910	**3,000**
Grade (g/t)	3.6	**2.4**
Ounces (koz)	110	**230**
Break of Day UG Mineral Resource[1]		
Tonnes (kt)	250	**420**
Grade (g/t)	8.9	**7.7**
Ounces (koz)	72	**110**
Cue UG Exploration Target[2]		
Tonnes (kt)		**1,900 - 2,600**
Grade (g/t)		**2.4 – 3.6**
Ounces (koz)		**150 - 300**

FY27 Drill Plan / A$16M Spend

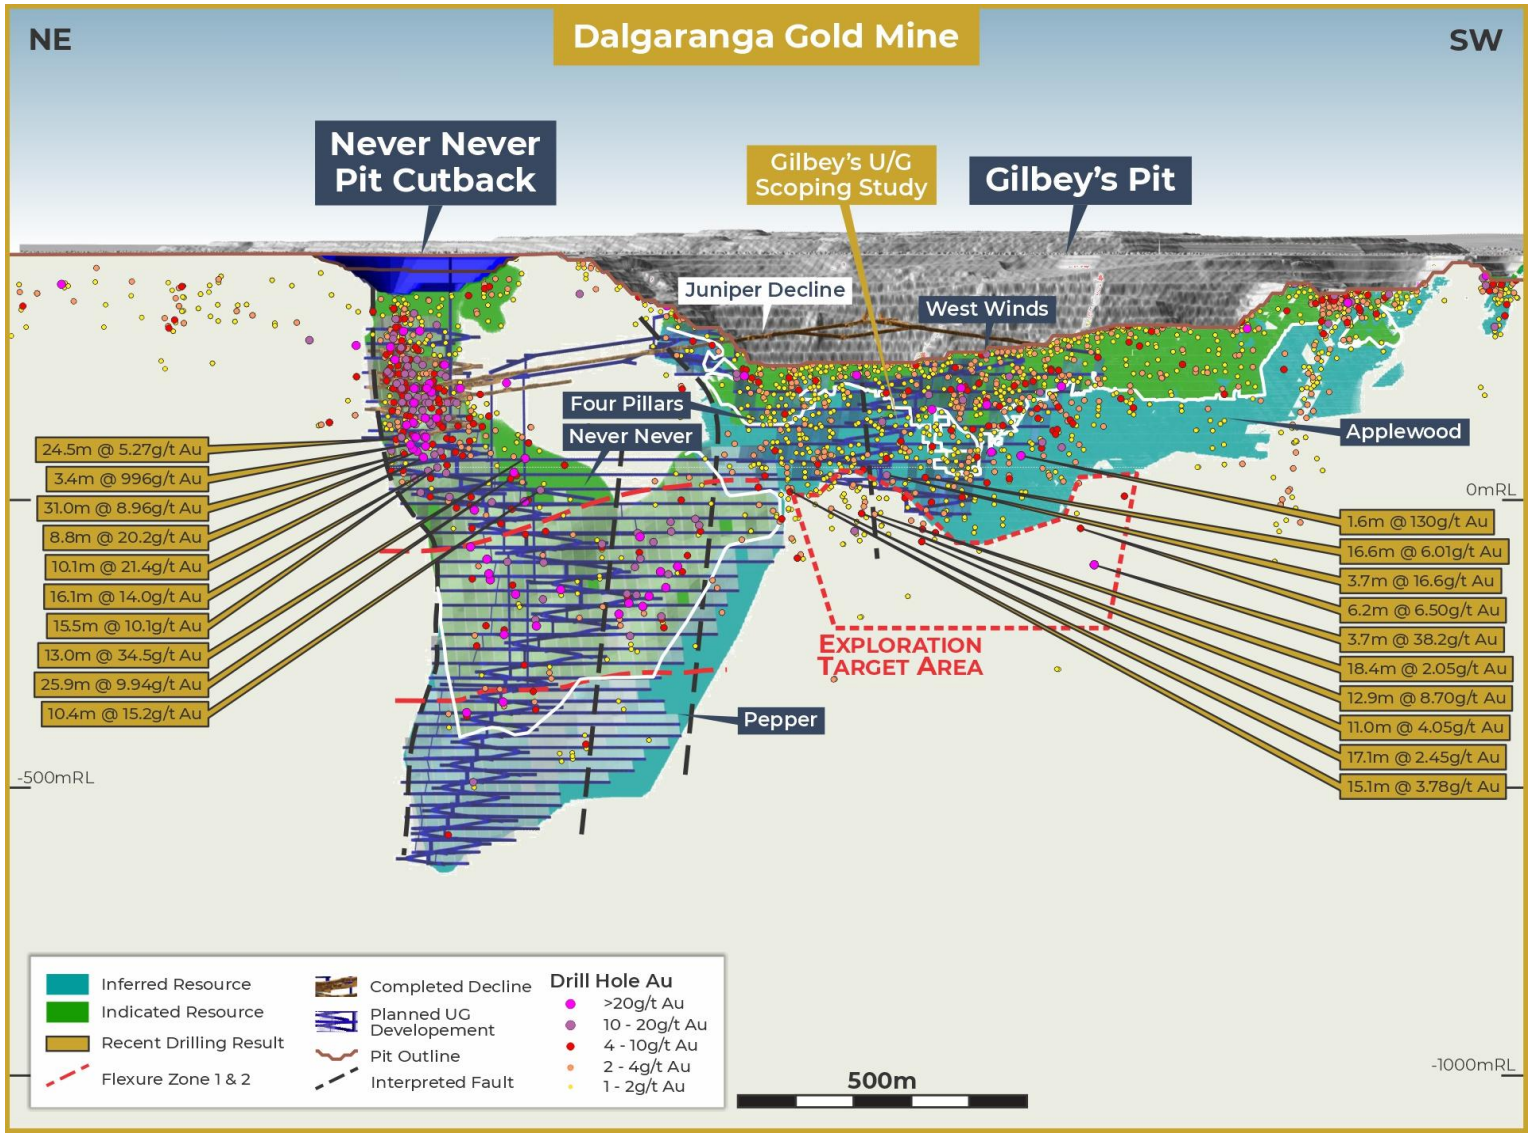

- Continue surface drilling for conversion of Lena Inferred Mineral Resources to progress Scoping Study while exploring down-dip extensions at Break of Day

NOTES

1. See RMS ASX Release '2026 Resources and Reserves Statement', 25 August 2026
2. The potential quality and grade of the exploration target is conceptual in nature, there has been insufficient exploration conducted to determine a mineral resource and there is no certainty that further exploration work will result in the determination of a mineral resource or that an exploration target will be realised

Gilbey's Underground | new underground mine potential

For personal use only

Gilbeys UG Scoping Study Results[1]

Parameter	Unit	Scoping Study
Mining (UG) Production Target[1]		
Ore tonnes	Mt	5.2 - 5.8
Grade	g/t	1.5 - 1.7
Contained gold	koz	250 - 300
Processing Production Target[1]		
Ore processed	Mt	5.2 - 5.8
Grade	g/t	1.5 - 1.7
Recovery	%	85 - 89
Gold Production	koz	220 - 260

Exploration Target[2,3]

- Gilbey's UG: 2.1–4.7Mt at 1.5–2.0 g/t for 100 – 300koz

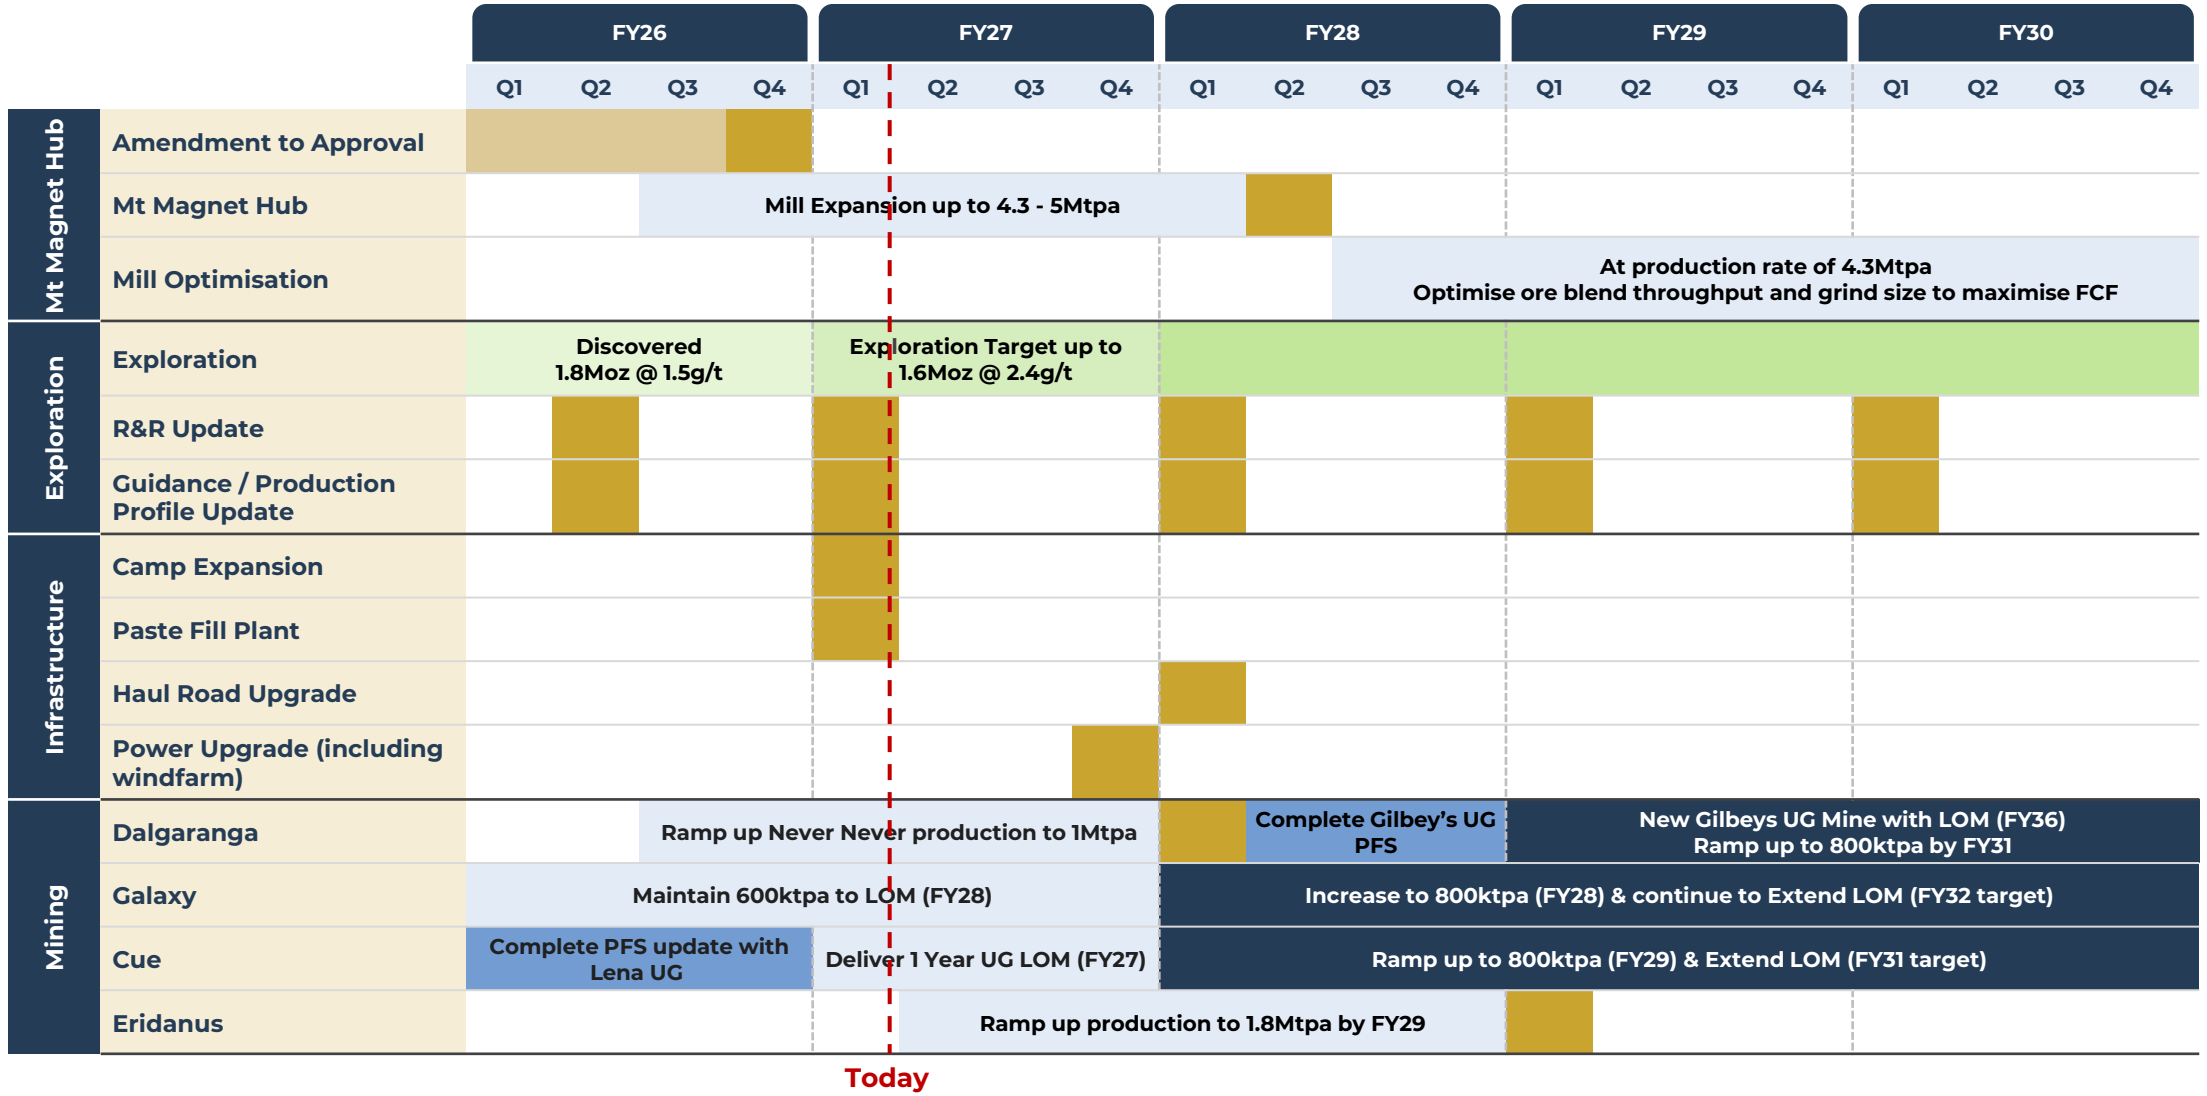

Ore Reserve[2]

- Never Never UG: 6.8Mt at 7.4 g/t for 1.6Moz

NOTES

1. See RMS ASX "Four-Year Update and FY27 Guidance", 21 September 2026
2. See RMS ASX Release '2026 Resources and Reserves Statement', 25 August 2026
3. The potential quality and grade of the exploration target is conceptual in nature, there has been insufficient exploration conducted to determine a mineral resource and there is no certainty that further exploration work will result in the determination of a mineral resource or that an exploration target will be realised

Mt Magnet project timeline | achievable sequenced plan

For personal use only

Mt Magnet | processing plant upgrade to 4.3Mtpa

For personal use only

Area	Growth Capex (A$M)	FY27 (G)[1]	FY28 (O)[1]
Mt Magnet Processing Expansion	Circuit 1 upgrade, new Circuit 2: 4.3 – 5.0Mtpa	195-215	35-45
	Processing Infrastructure & upgrades	35-40	12-18
Mine Infrastructure Upgrades	Mine Infrastructure (road & power upgrades, water, camp & buildings)	40-50	5-10

Key components

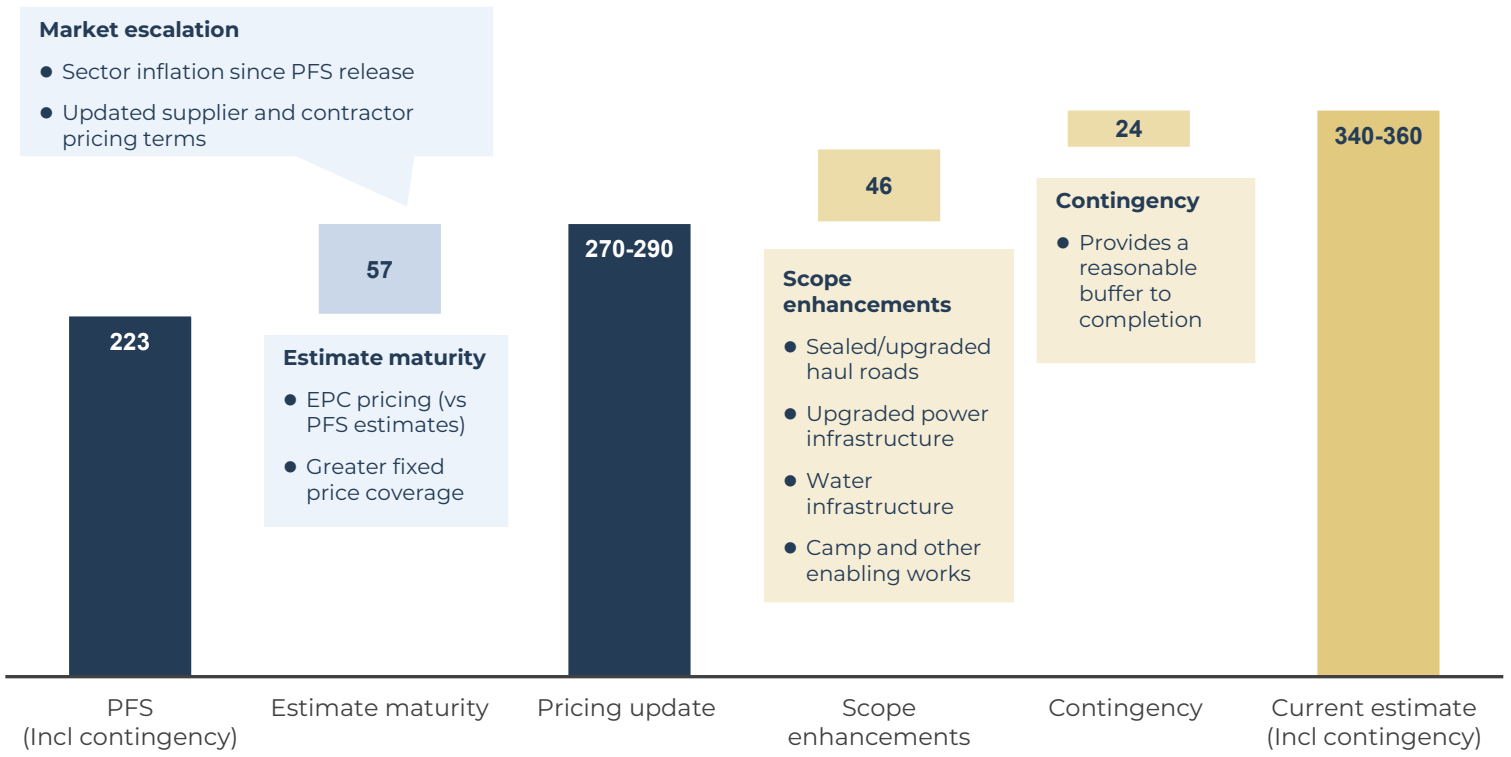

- Single stage jaw crusher (ordered), 10kt live coarse ore stockpile
- 6.5 MW SAG mill (relocated from Dalgaranga) & pebble crusher
- 3.5 MW ball mill (ordered) & cyclone cluster (relocated)
- Gravity circuit and intensive leach reactor (relocated)
- Seven new 2,500 m3 leach / CIL tanks
- Split AARL elution circuit and gold room (relocated)
- Tailings thickener and pumping
- Reagents and utilities (partly relocated)

NOTES
1. "G" = Guidance; "O" = Outlook

Mt Magnet expansion | enhanced scope with greater cost certainty

Updated capital reflects scope enhancements, sector inflation and more advanced estimates

Mt Magnet project capital reconciliation (A$m, real)

1 Additional scope

Updated capital includes deliberate upgrades to improve reliability, efficiency, and long-term economics

2 Investment today, saving tomorrow

Better roads, water and power cut maintenance, improve haulage efficiency and strengthen operational uptime

3 Higher estimate confidence

EPC pricing and increased fixed price coverage boost certainty and reduces escalation risk

4 Ready for the next growth phase

Built with future capacity in mind, including back-end plant capacity to support 5Mtpa

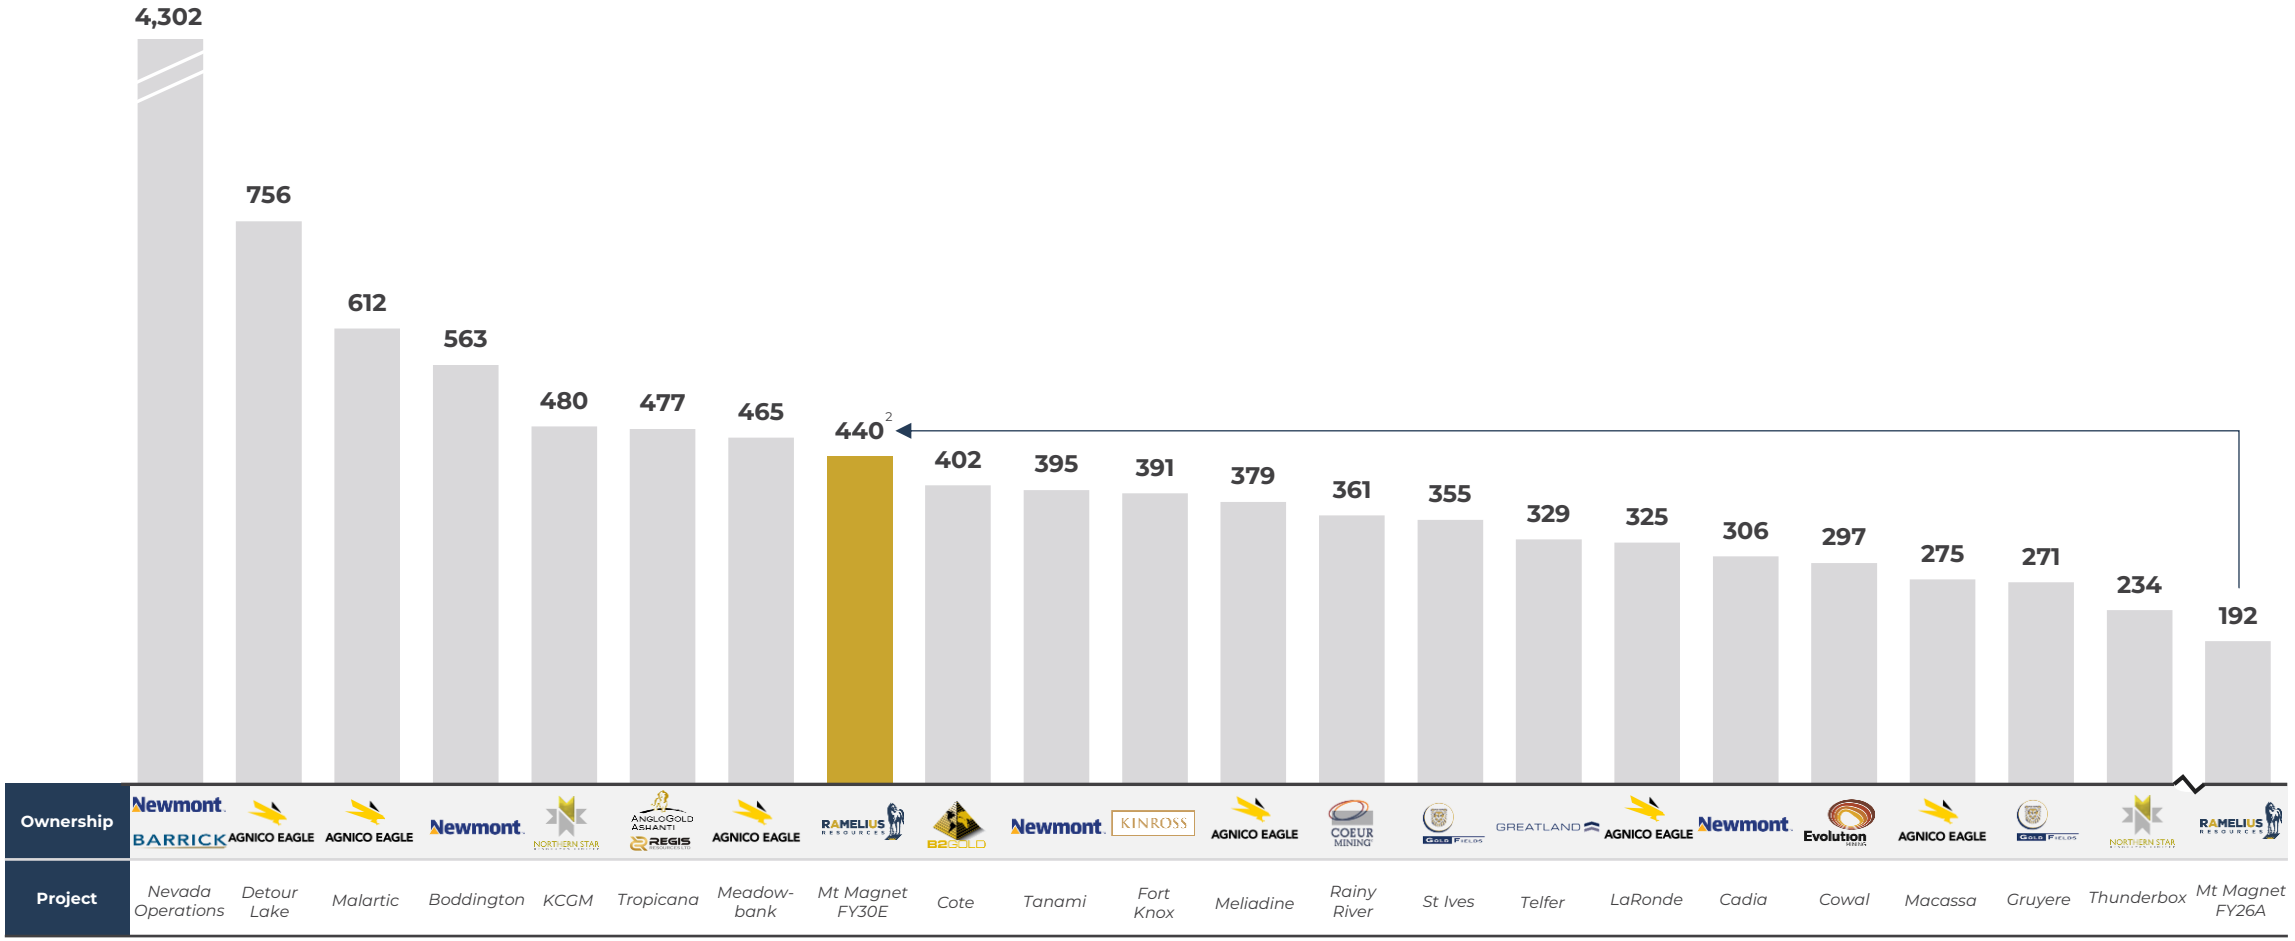

Incremental capital today delivers a more robust operating platform and long-term value through improved efficiency and greater certainty

For personal use only

Scale that matters globally

Mt Magnet positioned to become a top 10 global gold-producing hub by 2030

Top 20 global projects by FY26 gold production[1]

For personal use only

NOTES

Source: CIQ, available company data

1. Global geographies include Australia, USA, Canada, developed Europe, and developed Asia Pacific
2. Based on midpoint of Mt Magnet production outlook

For personal use only

Returns & Capital Discipline

Disciplined capital allocation that delivers shareholder returns

Total shareholder returns up 96% versus a year ago and growing

Balance sheet strength and flexibility

A$0.8bn

Cash and gold on hand[3]

A$1.3bn

Total liquidity[3]

Cash returns

A$255m

Cash returned in FY26

65%

Underlying FY26 FCF returned to shareholders

Value accretive growth

~270%

Average historical ROI[1]

~50%

Average historical IRR[2]

A clear and disciplined framework balancing strength, returns and growth

NOTES

1. Average historical ROI calculated as the average ROI for Vivien, Edna May, Tampia, Symes, Penny, Cue, Galaxy and Other Mt Magnet from FY11-FY26 whereby ROI = (total inflows – total outflows)/total outflows
2. Average historical IRR calculated as the average IRR of Vivien, Edna May, Tampia, Symes, Penny, Cue, Galaxy and Other Mt Magnet from FY11-FY26, excluded Dalgaranga and Rebecca-Roe as returns have yet to be realised
3. As at 16 September 2026

For personal use only

FCF machine with leverage to the gold price

Self-funded growth with outsized FCF through FY30 and beyond

For personal use only

FCF inflection through FY30

Production growth and strong margins drive FCF growth

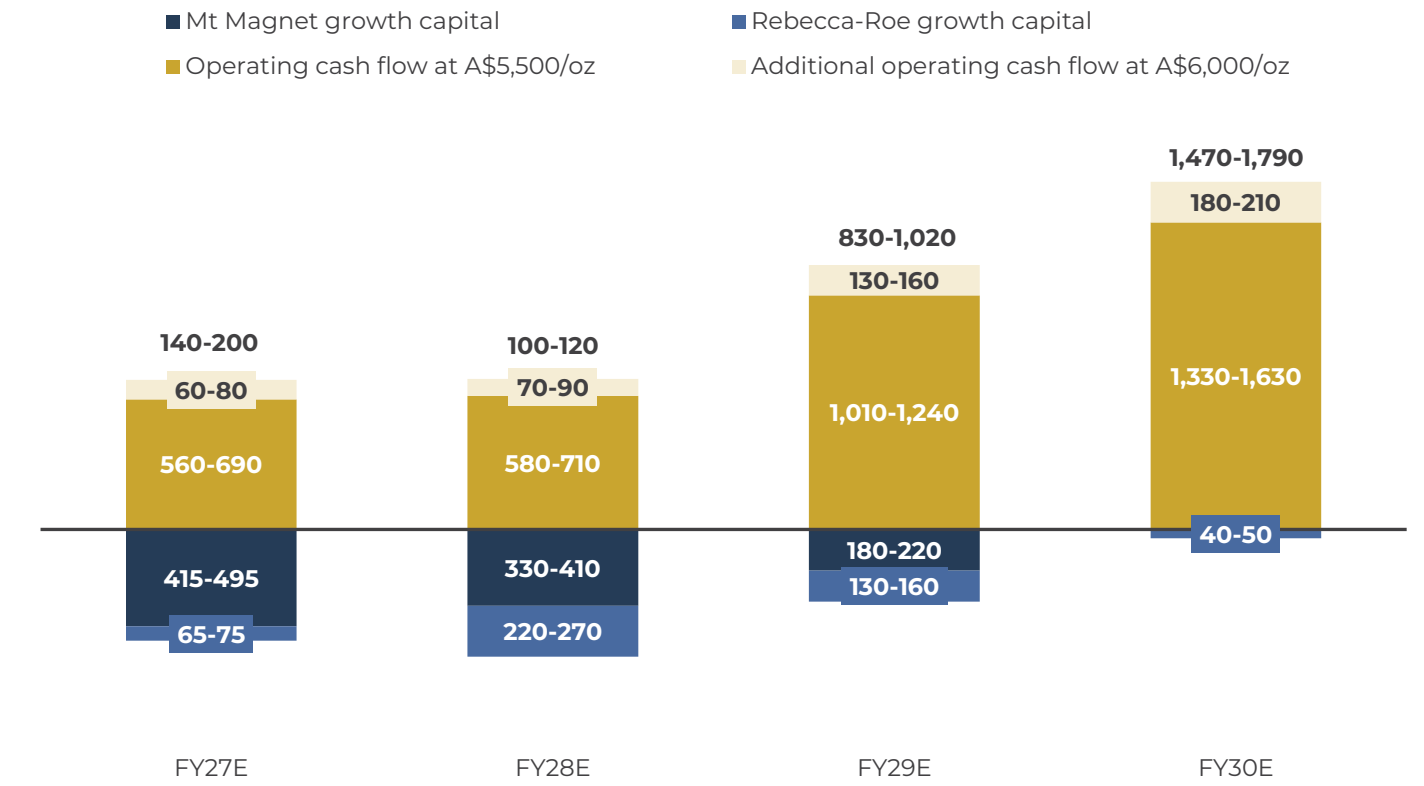

Leverage to gold price

FY30 FCF approaches A$2bn at A$6,000/oz

Outsized FCF relative to valuation

Forward cash generation screens strongly against larger cap peers

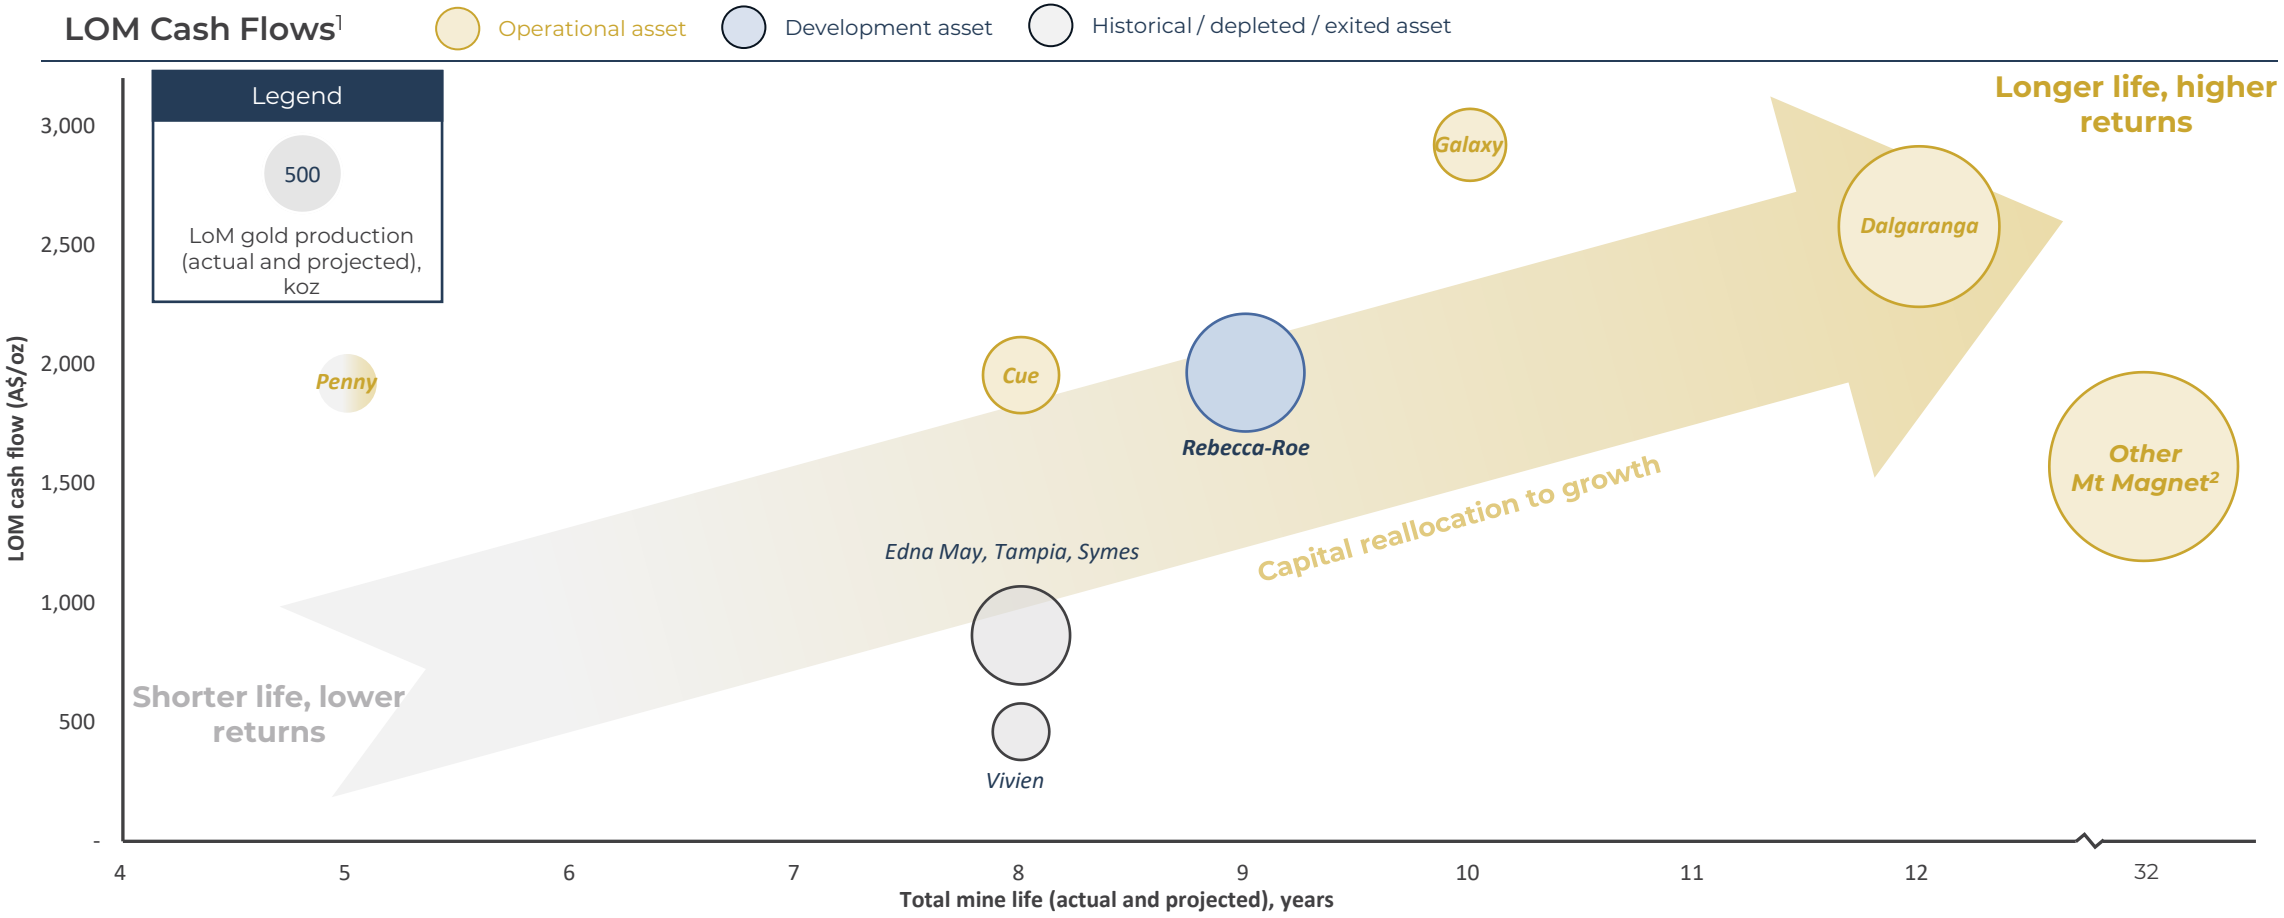

Free cash flow outlook at A$5,500/oz and A$6,000/oz gold prices (A$m)

NOTES
Operating cash flow excludes exploration expenditure.

Track record of value accretive allocation of capital

Building a longer life higher return portfolio

Portfolio quality has improved through disciplined capital allocation, hub development and exploration success

NOTES

1. Actual and projected @A$5,500/oz Au, inclusive of acquisition costs and proceeds from divestments, Rebecca Roe cash flow production as per Oct 2025 DFS
2. Other Mt Magnet mines includes historic Mt Magnet gold mines (excluding Galaxy), Eridanus, Franks Tower, Hesperus, Morning Star, low grade stockpiles, Bartus UG, Hill 50 UG, and Eridanus UG

For personal use only

Significant growth options beyond base case

Exploration success will lift average grade, extend mine life and drive production beyond the 2030s

For personal use only

Galaxy

- Growth beyond current reserve with both Mars and Saturn open at depth
- Perseverance South
- 400-600koz Exploration Target[1]

Cue

- Cue underground extensions on strike and at depth
- Improved metallurgical recoveries
- Regional targets to the north

Mt Magnet region

- Eridanus open at depth
- High grade below Franks Tower pit
- Established infrastructure creates low-cost upside options

Dalgaranga

- Never Never production >1 Mtpa
- Gilbeys UG additional material
- Improved metallurgical recoveries
- Processing optionality at site

Rebecca-Roe

- Optimisation of mining schedule post-Roe approvals to improve FY29 & FY30 outcomes
- High grade UG depth extensions

Portfolio optionality

- ***Current FY30 is the new base case***
- ***High grade ore displacement increases margins***
- ***Capital efficient portfolio growth***
- ***Exploration success demonstrated***

NOTES

1. Note that the potential quality and grade of the Exploration Target is conceptual in nature and as such there has been insufficient exploration drilling conducted to estimate a Mineral Resource. At this stage, it is uncertain whether further exploration will result in the estimation of a Mineral Resource or that the Exploration Target will be realised

Ramelius' Investment Case

For personal use only

Dividend yield above mid-tier ASX gold producers

$376M dividends last 8 yrs

$150M in buy backs

Sector leading cash flows

High margin / free cash flow focused business with long life assets (Mt Magnet & Rebecca-Roe)

205% production growth

Pathway to **600koz p.a. by FY30** and upside potential through displacement of low-grade ore

Exploration upside

Doubling down with **$100M budget** in FY27 on quality high-grade targets

Reliable operational team

Stand-out in sector for **delivery of Guidance**

Benefits of scale & liquidity

ASX100 & MVGDX

Thank you

Mt Magnet Outlook | continuous delivery through FY30

For personal use only

FY27-30 production (koz p.a.) & AISC (A$/oz) outlook[1]

Mt Magnet expansion

Leveraging off existing infrastructure with execution underway

Stable cost base through ramp-up

Scale + grade + operating excellence supports AISC discipline

Maintaining high margins on higher ounces

More ounces at competitive AISC = increased cash generation and returns

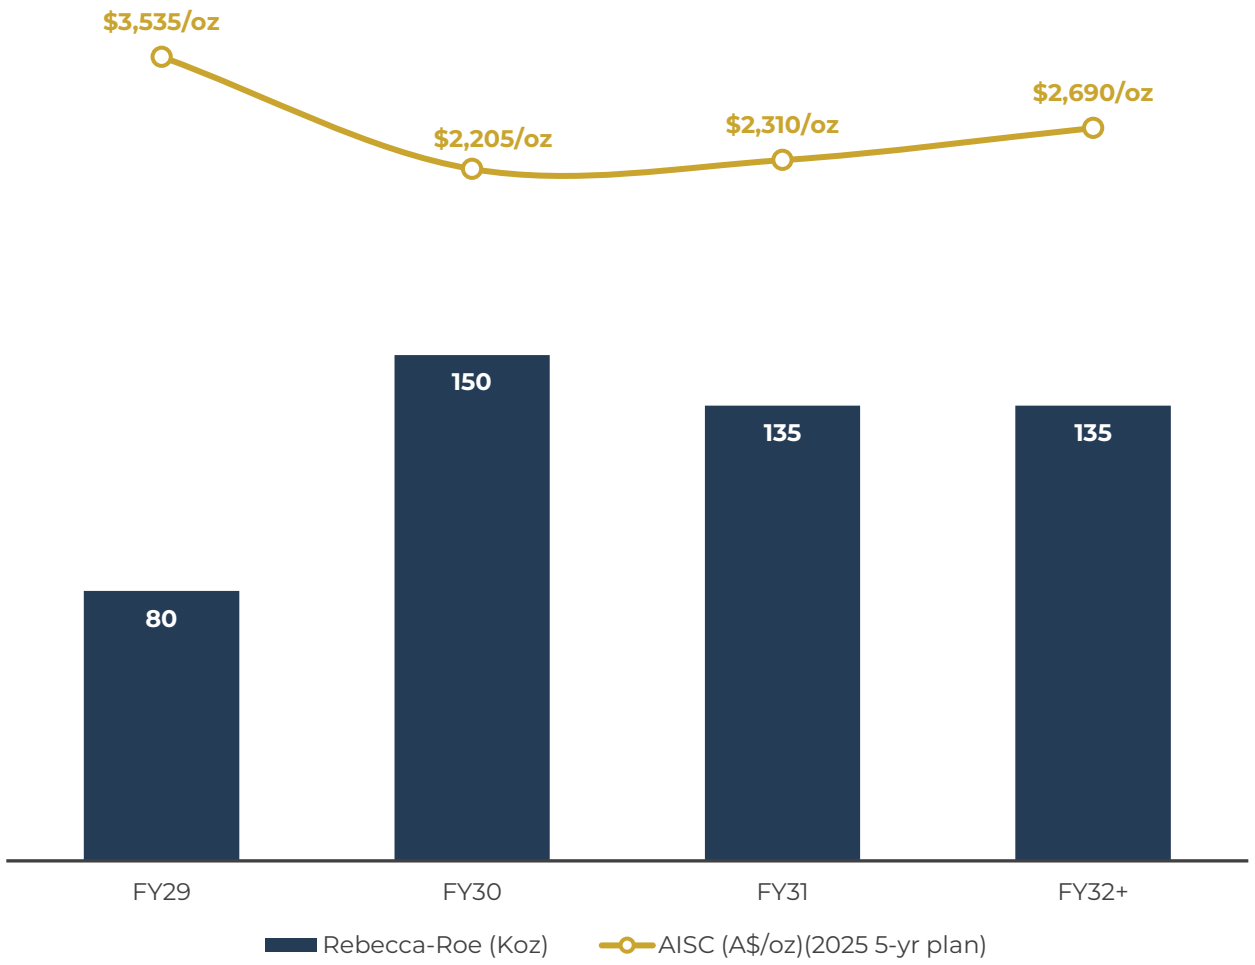

NOTES

1. The Mt Magnet FY27 Guidance is based exclusively on Ore Reserves. The Mt Magnet 4-Year Outlook to FY30 is a Production Target based on 88% Ore Reserves. The Production Target is based upon 94.5% Indicated Mineral Resources and also contains a proportion of Inferred Mineral Resources (5.5%). There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the Production Target itself will be realised. Over the 4-Year period mill feed will include 2.1Mt@ 0.9g/t of stockpiles (already in Ore Reserve)

Rebecca-Roe Outlook | to average 135koz p.a.[1]

For personal use only

Rebecca-Roe annual production & AISC

DFS results (October 2025)

- Total production of 26.3Mt @ 1.41g/t for **1.1 million recovered gold ounces**
- **A$2,625/oz AISC** average over LOM.
- **Mill/infrastructure build of A$340M**
- After tax **$NPV_{5\%}$ of A$692M** (@ base case of A$4,500/oz)
- Total **cash flow of A$1,418M** (@ base case of A$4,500/oz) with avg of approximately A$200M p.a between FY30 and FY36

Key updates

- Construction of processing plant has been scheduled to commence December 2027 Quarter
- Native Title Mining agreement executed in December 2025
- FID obtained, subject to environmental permitting for Roe. **Part V approval for Roe Project expected in the December 2026 Quarter**
- The updated 4-Year Outlook (2026) applied an underlying gold assumption of A$5,500/oz. This increases project AISC by ~A$40/oz
