Meridian Energy monthly operating report for October 2026

17 November 2026

Meridian Energy Limited has released its monthly operating report for the month of October 2026 (attached).

“Strong El Niño conditions were firmly established by the end of October. It was a warm, dry month for most of the country, with normal rainfall across much of the South Island. This meant farmers in that part of the country have not yet had to significantly rely on irrigation, which is reflected in our agricultural volumes,” says Chief Executive Mike Roan.

“The rainfall associated with El Niño is typically also favourable for our hydro catchments, and lake storage finished the month well above average in both the Waitaki and Waiau. This positions us well as we head into summer, and generation so far this financial year is 13.1% higher than the same period last year.”

Key points from October Operating Report

- In the month to 9 November, national hydro storage increased from **121%** to **128%** of historical average.
- South Island storage increased to **140%** of average and North Island storage increased to **83%** of average by 9 November 2026.
- Meridian’s October 2026 monthly total inflows were **101%** of historical average.
- Meridian’s Waitaki catchment water storage at the end of October 2026 was **164%** of historical average.
- Snow storage in Meridian’s Waitaki catchment was **89%** of average in early November.
- Water storage in Meridian’s Waiau catchment was **136%** of average at the end of October 2026.
- October was warm and dry for most of the country. Temperatures were well above average for the South Island, while much of the North Island was also above average. Rainfall was below normal for much of the North Island, with above normal rainfall across much of the South Island, including the West Coast, Milford Sound and Central Otago.
- National electricity demand in October 2026 was **0.5%** lower than October 2025.
- NZAS average load during October 2026 was **576MW**, compared with 567MW a year ago.
- Meridian’s retail sales volumes in October 2026 were **8.3%** lower than October 2025.
- Compared to October 2025, segment sales in residential were 7.4% lower, small medium business 0.6% higher, agriculture 27.4% lower, large business 3.5% higher and corporate 7.0% lower.
- Total customer connections decreased in October. Over 252,000 customers have now been migrated onto the Kraken platform.

Weekly lake storage updates are available on Meridian’s website. See comparative lake levels at: www.meridianenergy.co.nz/power-stations/lake-levels

October 2026

Monthly operating report

17 NOVEMBER 2026

October key points

In the month to 9 November 2026, national hydro storage increased from **121%** to **128%** of historical average.

South Island storage increased to **140%** of average and North Island storage increased to **83%** of average by 9 November 2026.

Meridian's October 2026 monthly total inflows were **101%** of historical average.

Meridian's Waitaki catchment water storage at the end of October 2026 was **164%** of historical average.

Snow storage in Meridian's Waitaki catchment was **89%** of average in early November.

Water storage in Meridian's Waiau catchment was **136%** of average at the end of October 2026.

October was warm and dry for most of the country. Temperatures were well above average for the South Island, while much of the North Island was also above average. Rainfall was below normal for much of the North Island, with above normal rainfall across much of the South Island, including the West Coast, Milford Sound and Central Otago.

National electricity demand in October 2026 was **0.5%** lower than October 2025.

NZAS average load during October 2026 was **576MW**, compared with 567MW a year ago.

Meridian's retail sales volumes in October 2026 were **8.3%** lower than October 2025.

Compared to October 2025, segment sales in residential were 7.4% lower, small medium business 0.6% higher, agriculture 27.4% lower, large business 3.5% higher and corporate 7.0% lower.

Total customer connections decreased in October. Over 252,000 customers have now been migrated onto the Kraken platform.

Inflows and storage

October 2026 monthly total inflows were 101% of historical average.

Waiau catchment inflows in October 2026 were 106% of historical average, 51% lower than the same month last year.

To date this financial year, inflows are 137% of historical average.

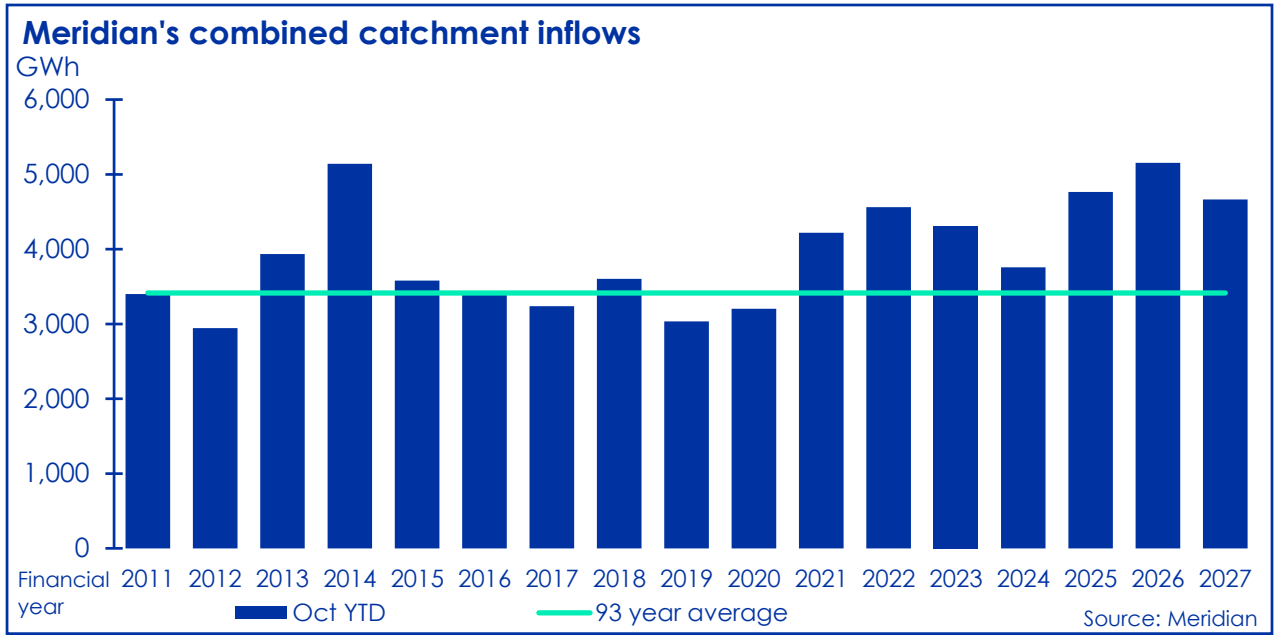

Waitaki catchment water storage[1] moved from 1,806GWh to 1,779GWh during October 2026.

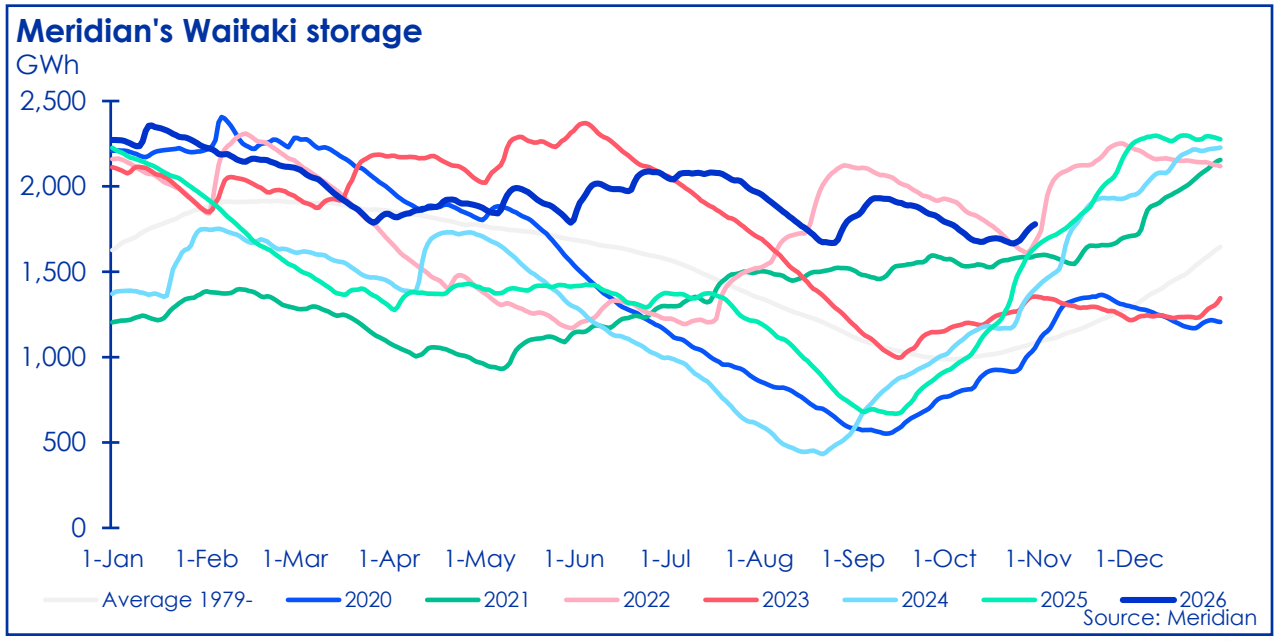

Waitaki water storage at the end of October 2026 was 164% of historical average and 8% higher than the same time last year.

Snow storage in Meridian's Waitaki catchment was 89% of average in early November.

Water storage in Meridian's Waiau catchment was 136% of average at the end of October 2026.

Glossary

Hedging volumes	buy-side electricity derivatives excluding the buy-side of virtual asset swaps
Average generation price	the volume weighted average price received for Meridian's physical generation
Average retail contracted sales price	volume weighted average electricity price received from retail customers, less distribution costs
Average wholesale contracted sales price	volume weighted average electricity price received from wholesale customers (including NZAS) and financial contracts
Combined catchment inflows	combined water inflows into Meridian's Waitaki and Waiau hydro storage lakes
Cost of hedges	volume weighted average price Meridian pays for derivatives acquired
Cost to supply contracted sales	volume weighted average price Meridian pays to supply contracted customer sales and financial contracts
Contracts for Difference (CFDs)	an agreement between parties to pay the difference between the wholesale electricity price and an agreed fixed price for a specified volume of electricity. CFDs do not result in the physical supply of electricity
Customer connections	number of installation control points, excluding vacants
GWh	gigawatt hour. Enough electricity for 125 average New Zealand households for one year
Historic average inflows	the historic average combined water inflows into Meridian's Waitaki and Waiau hydro storage lakes over the last 93 years
Historic average storage	the historic average level of storage in Meridian's Waitaki catchment since 1979
HVDC	high voltage direct current link between the North and South Islands of New Zealand
ICP	New Zealand installation control points, excluding vacants
ICP switching	the number of installation control points changing retailer supplier, recorded in the month the switch was initiated
MWh	megawatt hour. Enough electricity for one average New Zealand household for 46 days
National demand	Electricity Authority's reconciled grid demand www.emi.ea.govt.nz
NZAS	New Zealand Aluminium Smelters Limited
Retail sales volumes	contract sales volumes to retail customers, including both non half hourly and half hourly metered customers
Financial contract sales	sell-side electricity derivatives excluding the sell-side of virtual asset swaps
